MESSAGE FROM THE CHAIRMAN

•

"Dear Shareholder",

In 2013, EDP's performance was characterized by a decisive ability to execute, enabling the consolidation of the differentiation strategy pursued in recent years, making it possible to achieve the defined goals. Given the current environment, in which the European energy sector has been impacted by several exogenous factors, including at macroeconomic and fiscal level, it was essential the determination of all of those who dedicate themselves to the success of the Company, such as employees, shareholders, partners and other stakeholders.

A challenging and changing sector

Since 2008, the year that marked the beginning of a severe economic worldwide crisis, the European energy sector is undergoing a substantial transformation due to imbalances of different origins. These imbalances have altered the foundations of the sector, now perceived to be more instable. This view over the sector has had clear consequences, with the loss of about half of market capitalization of this sector between 2008 and 2013, almost half a trillion euros.

In 2013, macroeconomic imbalances continued to have a strong impact on electricity demand, which, despite a slight increase in the 2nd half of the year, remained negative in annual terms in the Iberian Peninsula. This reality has contributed to the increase of the excess capacity in the region, where reserve margins are approximately 40%, thus lowering prices and profit margins. There were also imbalances arising from tax and energy policies set by governments and European authorities, specifically due to the implementation of discretionary taxation, as seen in Portugal and Spain, with the announcement of a special levy applied to the energy sector and various regulatory packages, punitive to the profitability of power companies. Regarding technological imbalances, it is important to mention the fast development of Shale Gas in the United States, the persistence of the impacts of the Fukushima accident and the bets made by some European countries in immature renewable technologies, thus creating the impression that all renewable energies contribute to higher energy prices, something that does not coincide with reality.

In order to address the imbalances that exist in the sector, it is necessary a new vision and approach for the future, one that should be implement in the short term.

At the European level, the new approach should consider the rebalancing of the carbon market, thereby strengthening the price signal. Likewise, it is important to define a clear and stable framework for 2030 renewable targets. In addition it should take into account that the energy sector is experiencing a new reality, one in which fixed costs are increasingly important, given that a higher proportion of the investment is channeled to renewable energy, where the marginal cost of operating is close to zero. For this reason, the current key factor of competitiveness in the sector is the cost of capital, where less risk means lower cost of capital and where stable and long-term contracting is crucial. This is why we advocate mechanisms of feed-in-tariff and exante auctions - as adopted in the UK and Brazil - to remunerate renewable capacity. Similarly, we believe in capacity remuneration mechanisms, something that founds resonance in Germany, France and Italy, where such mechanism is used to provide visibility to long term remuneration.

Given the above, throughout 2014 we will foster the discussion about the current imbalances strongly impacting the industry and the new market design that should be adopted, in which the investor should not be forced to take more risks than those it controls.

A distinctive profile complemented with execution ability

In 2013, taking into account the context of major challenges looming, it was essential to have a clear definition of the strategic priorities of the Company, framed within the pillars set in 2006, namely, controlled risk, greater efficiency and focused growth. Thus, three priority areas of action for 2013 were defined: (i) stability of financial results; (ii) reduction of EDP's Group net debt and (iii) operating costs control.

To that extent, it is fair to acknowledge that EDP Group has consistently performed its priorities, anticipating and executing all that was in its power, but not ignoring the external environment and the impact it has had on non-controllable variables.

The EDP Group achieved a gross operating profit of €3.617M, stable compared to 2012, and a net profit of €1.005M (-1 % vs. 2012). Gross operating income for the year was negatively impacted by the Iberian operations (-3%), due to the aforementioned deterioration of demand and margins, regulatory cuts and closure of the Setúbal Plant. These effects were partially offset by an increase in liberalized market activities (+19 %), in particular through the increased hydro production and good energy management. In Portugal, we highlight the success of the market liberalization for residential electricity and gas consumers and the efficient performance of EDP Comercial, which ended the year with approximately 2 million electricity customers and over 200 thousand in gas, representing a leadership position in both markets. It should be noted the positive contribution of EDP Brazil (+24%), despite the negative impact caused by the depreciation of the Brazilian Real, an exogenous factor weighing approximately €100M at EBITDA level and EDP Renewables whose gross operating income grew 1% to €947M, boosted by an increase in installed capacity of 500MW. Additionally, focus on operating costs control allowed to successfully anticipate to 2013 the targets of OPEX III, initially set to 2014, representing a saving of €115M and the maintenance of the OPEX/Gross Margin ratio at 28%.

In what regards the evolution of net debt, this year there was a fall of $\in 800M$ supported by the financial closing of the sale of 49% of EDPR Portugal to CTG - agreed in 2012 -, the sale of gas transmission assets in Spain and the sale of over $\in 1.000M$ of tariff deficit in Portugal, taking advantage of the positive trajectory that international financial markets showed throughout the year. In terms of investment it should be noted that it stood at approximately $\in 1.978M$ (-2% vs 2012), of which 47 % was in Portugal, given the undergoing construction of five hydro plants.

Regarding the financing strategy, 2013 was characterized by a renewed interest in peripheral markets, which coupled with the better risk perception of the Portuguese Republic allowed EDP to obtain financing in the amount of approximately \in 3.5 billion, covering the financing needs of the company until the end of the first half of 2015.

But we were able to achieve even more. Throughout 2013 we managed to create growth options that allow us to look confidently to the future. On one hand, we signed a partnership for the development of the hydro project of São Manoel (700MW), in Brazil, in partnership with our strategic partner China Three Gorges and the Brazilian power company Furnas. EDP was the winner of the last two Brazilian hydro tenders with projects Cachoeira Caldeirão and São Manoel, thus demonstrating its ability to execute in this market. On the other hand, we signed with China Three Gorges the sale of a 50% stake in Brazilian hydro projects Jari and Cachoeira Caldeirão, and a memorandum of understanding for the acquisition by China Three Gorges, in 2015, of a stake in ENEOP. These agreements grant EDP the necessary ability to ensure a balance between growth and deleverage. Also noteworthy, is the fact that EDPR was able to sign long-term contracts for new projects in the U.S. totaling more than 1000 MW – making it the 2nd company with higher growth in that geography in 2013 – thus ensuring a steady growth in the coming years.

NEVERENDING ENERGY

Preserving a unique and sustained vision...

EDP has a clear vision of its role in the society and the relationship with its stakeholders. According to the Principles of Sustainable Development of EDP, we believe in the interconnection of seemingly distinct areas such as economy, culture, art, education, science and social innovation, and it is with the combination of these realities that we maximize our contribution to the society.

By organizing two roadshows - in Sao Paulo and Beijing - involving about 60 Portuguese companies and 40 foreign companies, we believe that we are promoting the internationalization of our suppliers and our economy.

We should also emphasize the role of EDP Foundation, and the impact of its programs. In 2013 "EDP Solidária" program supported more than 50 projects, and "Parte de Nós Saúde" allowed for an investment of approximately €0.9M in the recovery of 4 health centers. We kept our active role in culture, where we displayed 11 exhibitions that have been visited by more than 70 thousand people.

We believe that the Center for Arts and Technology, whose construction began in 2013, will be one of the most significant and ambitious cultural initiatives recently developed, particular as a center for innovation and shaping the evolution of Portugal. This is not an act of retribution for the local community but a commitment by the EDP Group in creating better conditions for the future of the community and, consequently, for the future of the company. We believe in the rehabilitation of urban spaces and, within our possibilities, we act towards their development. This is confirmed by the construction of the new Group headquarters in Lisbon, a building that allows the correction of inefficiencies in terms of space and provides unique conditions for work, while lying in a rehabilitation area

Our association to the Global Compact, a United Nations initiative, is yet another commitment where we undertake the development of our business within the framework of 10 principles on human rights, good labor practices, environmental and social practices, and in terms of fighting corruption.

Because we have a unique vision and consistently demonstrate the ability to perform, we were voted in 2013 world leaders in the Dow Jones Sustainability Index, in the sector of Utilities, a recognition that rewards EDP in several areas - excellence in risk management, human capital development, among others.

We believe in our integrated approach, differentiation capacity and strong resolve. We are prepared to remain at the forefront of the global energy sector.

... As a step to design a successful future

In 2013 EDP once again demonstrated its distinctive capabilities, which allowed delivering positive results and providing our shareholders a return rate of 25%, above our European counterparts (17 %). We combine our vision, strategy and execution ability to a commitment for sustainability.

We assume before our shareholders a responsible dividend policy distribution, hence the proposal to be presented at the General Shareholders Meeting of €18.5 cents per share, in line with previous years and within the policy defined. Also, it places EDP on the top of the 600 largest companies in Europe, in terms of dividend vield.

EDP is the largest Portuguese Group, the largest investor in Portugal and the Portuguese largest foreign investor. We are a group of 12,000 employees of 29 nationalities, present on 4 continents and in 13 countries. We are a success story and we are proud of what we have achieved. We are recognized in many fields such as engineering, finance, ethics, human capital management, environment, communication and social commitment.

The stakes are high but we continue to seek more and better results.

Only with the support, commitment and dedication of all employees it becomes possible to target the success we want. For this reason, we express our thanks to all.

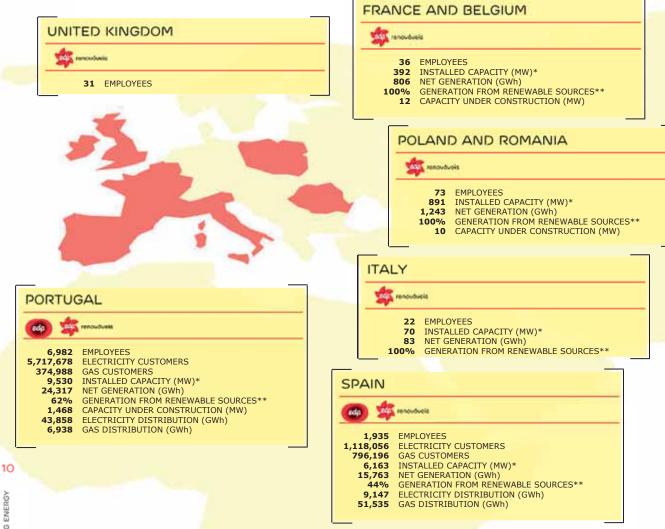

We would also like to take this opportunity to thank to all those that relate to our Company, such as shareholders, customers, suppliers, government agencies, regulators and statutory bodies, particularly the General and Supervisory Board for their support and confidence provided to the team.

The year 2014 will be a year marked by more challenges. But acting firmly we are confident that EDP will continue its path of differentiation and leadership.

António Mexia

Chairman of the Executive Board of Directors

1.1. COMPANY PRESENTATION

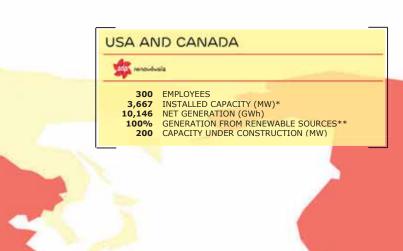

EDP – Energias de Portugal, S.A. is a listed company ("sociedade aberta"), whose ordinary shares are publicly traded in the "Eurolist by NYSE Euronext Lisbon, Mercado de Cotações Oficiais". EDP is established in Portugal, organised under the laws of Portugal and registered with the Commercial Registry Office of Lisbon, under no. 500.697.256. Its registered head office is located at Praça Marquês de Pombal, no. 12, 1250-162 Lisbon, Portugal.

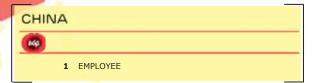

EDP was initially incorporated as a public enterprise ("empresa pública") in 1976 pursuant to Decree-Law no. 502/76, of 30 June, as a result of the nationalisation and merger of the main Portuguese companies in the electricity sector in mainland Portugal. Subsequently, EDP was transformed into a limited liability company ("sociedade anónima") pursuant to Decree-Law no. 7/91, of 8 January, and Decree-Law no. 78-A/97, of 7 April.

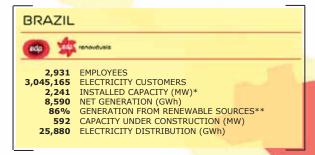

EDP is a vertically integrated utility company. EDP is the largest generator, distributor and supplier of electricity in Portugal, the third largest electricity generation company in the Iberian Peninsula and one of the largest gas distributors in the Iberian Peninsula.

EDP is one of the largest wind power operator worldwide with facilities for renewable energy generation in the Iberian Peninsula, the United States, Canada, Brazil, France, Belgium, Italy, Poland and Romania and is developing wind farms in the United Kingdom. Additionally, EDP generates solar photovoltaic energy in Portugal and Romania and has electricity generation, distribution and supply activities in Brazil.

EDP has a relevant presence in the world energy outlook, being present in 13 countries, with more than 9.8 million electricity customers, 1.3 million gas supply points and over 12,000 employees around the world. On December 31, 2013, EDP had an installed capacity of 23GW, generating 60.9TWh, of which 67% comes from wind and hydro plants.

- * MW EBITDA.
- ** Includes hydro, wind, solar and biomass.

On TOP of world's sustainability

Following its economic, social and environmental performance, EDP holds for the last 6 years a prominent position in the Dow Jones Sustainability index, both worldwide and at the European level, standing among the most sustainable utilities.

In 2013, the company reached the highest classification ever, 90 points, being the "Utilities: Electricity" industry leader, according to the Sustainability Yearbook from RobecoSAM, published in 2014

SHAREHOLDER STRUCTURE

The shares representing EDP share capital were initially admitted to trading in the official stock exchange NYSE Euronext Lisbon on July 16, 1997.

Since then the company went under seven subsequent phases of reprivatisation. The EDP share capital of EUR 3,656,537,715 is represented by 3,656,537,715 shares. The qualifying holdings held by shareholders in the EDP share capital on December 31, 2013 were as follows:

Detailed information may be consulted in the Corporate Governance chapter > Part I (page 95)

(1) On July 18, 2013, Capital Group notified EDP that held a qualified shareholding following the acquisition of 183,792,530 shares, representing 5.026% of the share capital of EDP and 5.026% of the voting rights. Since EDP did not receive any response to the request for confirmation of the position held by that shareholder as at December 31, 2013, it should be clarified that it is only known to EDP that the Income Fund of America and Capital Income Builder are mutual funds under discretionary management of Capital Research and Management Company owned by Capital Group.

EDP GROUP PRINCIPLES OF SUSTAINABLE DEVELOPMENT

1. Economic and social value

Constantly create value for our shareholders.

Increase efficiency in resource use and reduce risk exposure.

Contribute to improving competitiveness, by providing services of excellence and anticipating customers' needs and expectations.

Include environmental and social aspects in the planning and decision-making processes.

Contribute to improving the quality of life of people.

Eco-efficiency and environmental protection

Encourage the use of renewable energy sources and cleaner and more efficient energy technology.

Encourage the improvement of energy efficiency at the consumption end.

Manage the impact of activities, seeking a positive environmental balance.

Actively contribute to the protection of the environment and biodiversity.

Encourage the improvement of environmental management practices in the value chain.

Innovation

Encourage innovation and creativity, in the search for new market opportunities and the improvement of processes.

Promote collaborative practices in all phases of design, production and delivery of services.

Promote technological research and development and knowledge management in the energy field.

Integrity and good governance

Comply with legislation and established ethical and moral standards.

Respect and foster the respect for human rights, within our sphere of influence.

Ensure the participatory, competent and honest governance of our business.

Revised by the Executive Board of Directors in 2011.

5. Transparency and dialogue

Ensure an open and trusting relationship with all stakeholders.

Promote consultation and communication channels with stakeholders and take their contributions and expectations into consideration.

Report economic, environmental and social performance in a transparent and objective manner

6. Human capital and diversity

Encourage integrity, rigorousness, individual responsibility and teamwork, fostering diversity.

Encourage the development of employees' capacities and reward excellence and merit.

Improve health and safety conditions and the wellbeing of employees.

Reject abusive and discriminatory practices, guaranteeing equal opportunities.

Promote employee satisfaction and motivation.

Access to energy

Promote access to energy, in a reliable and safe manner and with quality.

Adapt commercial policies to the specific social nature of the market.

Ensure equity in the access to energy and energy systems.

Social development and citizenship

Promote social innovation, maximising the positive social impact of the business.

Support social and cultural initiatives, based on transparent criteria for assessing the social return of the invested resources.

Cooperate in the sustainable development of societies.

RECOGNITION

CORPORATE

EDP awarded Gold Class by RobecoSAM: EDP is considered in the "Sustainability Yearbook" for the 6th consecutive year and included in 2013 in the "Gold Class" category, for the 4th consecutive year, as one of the world leaders.

EDP again included on the Iberian Carbon Disclosure Leadership Index: EDP scored 97 out of 100 in terms of reporting, placing it on the Carbon Disclosure Leadership Index for the third consecutive year. It maintained a "B" rating in performance. For more information, see page 47.

IR Magazine Europe Awards 2013: EDP was placed 14th of 429 listed companies, 1st place in the sustainability practices category, and 3rd place in the CFO

EDP considered one of the world's most ethical companies: The award, attributed by the Ethisphere Institute, was attributed to EDP for the second consecutive edition. The award includes the following criteria in its method of classification: ethics and compliance, reputation, leadership and innovation, governance model, corporate citizenship, social responsibility and sustainability.

edpON is Europe's best intranet: The edpON intranet was the winner in the intranet category of the Digital Communication Awards 2013. These awards annually recognise the most innovative projects in the Digital Communication field, in 38 different categories.

EDP considered the world's best company in financial report: EDP was distinguished by "IR Global Rankings". EDP was recognised as an example of excellence, not only in terms of accuracy, transparency and consistency but also the quality of the information made available. This was a return to the top of the world rankings following its last appearance in 2010. EDP has been considered the best company of the Utilities sector in the last four years.

EDP University wins "Global Council of Corporate Universities" (GCCU) award:

EDP wins a bronze award from the GCCU in the category "Best Corporate University embodying the identity, the culture and the brand of the organisation in its stakeholders".

EDP is leader of the "Utilities: Power, Water and Gas" sector of the Dow Jones Sustainability World and Europe Indexes: EDP obtained the highest ever score of 90 points. EDP obtained the best score (100 points) in the following criteria: "Price Risk Management", "Risk & crisis management", "Scorecards/Measurement Systems", "Biodiversity" and "Human Capital Development", in which it is the sector leader.

PORTUGAL

EDP attributed AAA rating in Corporate Governance: EDP achieved a AAA rating in Corporate Governance for the second consecutive year, relative to the degree of compliance with Corporate Governance recommendations in Portugal. This rating was awarded by the Portuguese Catholic Universtiy, Lisbon/Associação de Empresas Emitentes de Valores Cotados em Mercado [Portuguese Listed Securities Issuers' Association].

EDP attributed Best European Utility award in the Investor Relations area: EDP obtained 1st place for the second consecutive year in the categories of best company in the Investor Relations area in Portugal and also among European utilities, at the IR Magazine Europe Awards 2013.

EDP wins four awards from Portuguese Association of Corporate Communication (APCE) in 2013: The intranet of the EDP Group, corporate TV, 2011 Annual Report and the corporate image We Are EDP (in partnership with Desafio Global), were the company's projects

EDP wins 2012 Excellence at Work award: The EDP Group won 1st place in the Large Company category (over 1,000 employees). It was also honoured in the Industry and Energy sector. This is the third edition of this Award, an initiative of Heidrick & Struggles in partnership with *Diário Económico* newspaper and ISCTE Business School, which is awarded to companies that most value and invest in human resources.

"Valuing Experience" wins honour of Associação para o Desenvolvimento Económico e Social [Association for Social and Economic Development]: EDP wins an award in the "Senior talent management" category at the "SEDES Excellence 2012" awards, an initiative of the Human Capital Working Group of SEDES, in partnership with the Human Resources Portugal magazine.

EDP wins Kaizen Prize for continuous improvement projects: The productivity gains obtained from more than 4,000 Lean initiatives developed since 2004 earned EDP the top award from the Kaizen Institute.

Inovcity elected an example of success by the European Commission: The EDP Group project, InovCity, was elected an example of success in Portugal by the European Commission under the campaign "A world you like with a climate you like." It is presented as a smart and innovative solution to reduce CO₂ pollution, and which improves the quality of people's life.

EDP attributed Bronze Award at the 2013 Effectiveness Awards for its Casa Total 10 + 2 campaign: The dual gas and electricity product was honoured in the "Other Services and Public Administration" category. The Effectiveness Awards are coorganised by APAN (Portuguese Association of Advertisers) and Grupo Consultores. The campaign was managed by the BAR agency, with the media strategy of Mediaedge (MEC).

Alqueva II is hydroelectric project of the year: The prize was awarded by the "International Water Power and Dam Construction" magazine. The same edition of the magazine also includes an article on the 15 biggest hydroelectric projects under construction in Europe, with Venda Nova III placed 12th in the ranking.

EDP Communication wins six awards at FEIEA Grand PRIX **2013:** The company was awarded first place in the "Internal Regular Multi-Language Publication" category for the edpON magazine, and the "Intranet Site" category for the edpON Intranet. It also earned the runner-up award in the Audiovisual Communication category with "edpON tv", and it was the ex aequo runner-up in the category of "Communication Strategy Ongoing" for the Conciliar Programme. EDP was awarded 3rd place in the "Internal Communication Strategy" category, for the EDP Volunteer Programme. The Special Prize Major Player was also awarded to EDP and to Desafio Global Ativism for the "We are EDP" concept, used for meetings and inhouse events.

SPAIN

HC Energía recognised by Red Española de Pacto Mundial (ASEPAM) for good sustainability practices:

ASEPAM compiled a series of good sustainability practices based on its examination of Sustainability Reports and Progress Reports. HC Energía attained the maximum level (Advanced Level) for the second consecutive year.

HC Energía regonised with the award Sociedad Castellana de Medicina y Seguridad del Trabajo: the recognition is due to the integration of the aspects related to contractores security in Servicio de Prevención de Riesgos Laborales

EDP RENOVÁVEIS

EDP Renováveis is one of the EXAME 500 Biggest & Best: EDP Renováveis won the EXAME magazine 500 Biggest & Best award for companies in Portugal, in the Water, Power and Gas category.

EDP Renováveis honoured by "Great Place to Work" as best place to work 2013, in Spain, in Scotland and in Poland:
EDPR was awarded honours in Spain, Scotland and Poland in the companies with 250 to 500 employees and companies with fewer than 50 employees categories, respectively, based on a study of organisational culture that looks at equal opportunities, flexibility, integrity and work environment, among other variables.

EDP Renováveis is Gold in Prémios Sapo 2013: its institutional website was awarded in the "Services" category. These awards recognize what is most creative in the area of online business communication.

EDP Renováveis placed first worldwide among utilities of the FTSE4Good index: EDPR joined the FTSE4Good index in September 2011, reaching number one among utilities in the revision of March 2013.

Web version of the Annual Report and Accounts (werbreport) of EDP Renováveis wins awards from the International Academy of the Visual Arts: The webreport won the Gold Award in the categories: General Website Corporate Communication, Website Features - Visual Attractiveness; Website Features: Home page. This edition of the W3 Awards also awarded a Silver Award to the werbreport in the General Website - Financial services category and to the corporate website in the Corporate Communication

BRAZIL

EDP shares are included on the Bovespa Index, in Brazil: EDP shares are included on the Bovespa Index (Ibovespa) from 7 January, with a share of 0.645%. The new Ibovespa portfolio now has 69 shares. Ibovespa is one of the most important performance indicators of prices of the Brazilian stock market.

EDP Brasil receives distinction from Greenhouse Gas
Protocol: The inventory of emissions of EDP Brasil 2012 was awarded the Golden Seal for the fourth consecutive year. The company was recognised for taking part in all the editions of the programme which began in 2008.

António Mexia wins award in Brazil: The Portuguese Chamber of Commerce of Rio de Janeiro celebrated 102 years since its establishment by presenting awards to the Portuguese who most stood out in relations between Portugal and Brazil. The CEO of EDP was presented the Manager of the Year Award 2013.

EDP Brasil among the country's companies generating most value: The study by Dom Strategy Partners indicated EDP as one of the Brazilian companies that produce most value, according to components such as financial results, reputation, competitiveness and corporation risk.

EDP among the most innovative companies of the South: EDP Brasil, through EDP Renováveis Brasil, owner of Cenaeel Wind Farm in Santa Catarina, is included on the "Champions of Innovation" ranking for one more year and it is among the 50 most innovative companies of South Brazil, according to *Amanhã* magazine.

EDP Brasil among the best companies in organisational human development and corporate citizenship: The company is among the 100 Best Companies of the Organisational Human Development Indicator (IDHO) and the 50 Best Companies in terms of Corporate Citizenship, meaning that it can now use those seals in its publications.

⁽³⁾ Excludes fleet and consumption and loss of natural gas. This information is included in GHG emission in Climate Change chapter.

⁽⁴⁾ Figures for 2010-2011 were revised due to a change in methodology, which now exclude production from nuclear sources (SP, USA and POF) and connectation (PT)

USA and ROE) and cogeneration (PT).

(5) Since 2011EDP reports separately waste and by-products.

1.2. FRAMEWORK

1.2.1. MACROECONOMIC FRAMEWORK

Comparing to the precedent years, 2013 was a year of relative stability. The strengthening of the monetary policy accommodation's degree in the main central banks was crucial to achieve that stability, since it reduced the high levels of uncertainty mainly associated with the euro disintegration risk and the destabilisation in the international financial markets.

The quieter environment favoured the progressive improvement in the economic activity indicators and the financial assets' performance in the industrialised economies. This evolution contrasted with the higher debility in the emerging markets. The world GDP has grown at a similar pace as 2012's (3.0%).

Excluding any disruptive event in the financial markets, 2014 may be a year of consolidation of the recovery signs inherited from 2013. This is the leading scenario by most of the observers, including the International Monetary Fund (IMF), which predicts the rate of global economic growth to rise to 3.7%. Nonetheless, there are risks. The global growth challenges stand largely in the potential adverse effects of the expected phased reduction in the USA Federal Reserve (FED) asset's purchase program. Moreover, the deceleration anticipated for the Chinese economy, if reinforced, may lead to a downward pressure on global demand.

GLOBAL ECONOMY IN SEARCH OF A NEW PARADIGM

The partial dissipation of the uncertainty, which has been blocking the return to historical growth patterns in the more developed countries since the outbreak of the international financial crisis, was crucial to establish a sustained growth base in these economies during 2013. Indeed, developments such as the end of the US housing market correction, the apparent eradication of the Japanese deflation and the restore of the international

community's confidence in the European currency are suggestive indications of a new cycle of business expansion and employment. Somehow contrasting, the emerging economies seem to be struggling with their development model's transition, typical symptom of rapid growth processes, and stem primarily from some competitiveness erosion as well as the excessive appreciation phenomena in certain areas, essentially in real estate. Taken this context, the progression of the world economy during 2014 will depend on the success of these two parallel procedures: consolidation of recovery in developed economies and calibration of the emergent economies growth models.

RESTRAINED INFLATION, IN LINE WITH THE RAW MATERIALS PRICE EVOLUTION

In 2013, the inflation rate declined in most of the world economies in line with the raw materials price evolution and according to a context of moderated activity growth, allied to the high unemployment levels. In 2014, the permanence of a contained dynamism should maintain inflation in levels compatible with the prices' stability.

FINANCIAL MARKETS MORE STABLE THROUGH LESS UNCERTAINTY CLIMATE

In 2013, the financial markets' development was characterised by low volatility levels and a greater propensity to more cyclical assets and with higher return. This environment more conducive to risk assets was due to the globally accommodative monetary policies that prevailed and reflected in the appreciation of the major North American, European and Nipponese stock indexes. In opposition, some of the most important indexes in emerging markets had weak or negative performances, because of lower investors' appetite for such assets. As a

side effect, strong currency devaluation emerged in these economies, mainly affecting those with external deficit.

The significant increase of interest rates implied in the government bonds of countries with higher credit ratings, such as USA, Germany and the UK, was greatly influenced by the perception that the FED could start removing its monetary stimulus program and by the strengthened expectations of sustained recovery in most developed economies.

In the European monetary market, the excessive liquidity reduction in the banking system, resulting from early repayments

of part of the liquidity injected in the context of provision of long-term funds (LTRO) of 2011 and 2012, exerted a rising pressure in the short-term interest rates and in the value of the euro against the major international currencies, namely the dollar and the yen.

Following the successful conclusion of the financial assistance programs in Ireland and Spain and the expectations that Portugal will also fulfil the goals of the economic program, the risk premium of government debt in euro area periphery countries started decreasing.

In 2014, major central banks should continue to pursue monetary policies compatible with high levels of monetary accommodation, which should contribute to keep the financial markets' volatility levels controlled.

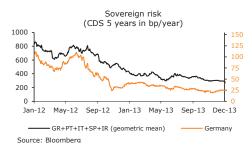

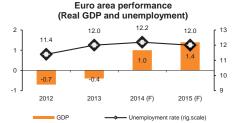

THE RECESSION IN EURO AREA LASTED THROUGH 2013

The sovereign debt crisis legacy has significantly constrained the economic activity pace in the euro area during 2013. The need to reduce the member-states leverage along with the financial fragmentation, the tightening of fiscal policy and the high unemployment level exerted a downward pressure over the consumption and the investment, leading to a 0.4% contraction in the GDP, tempered only by the favourable evolution of the external demand.

Upon the persistence of a still vulnerable economical and financial context, the European Central Bank (ECB) reduced its benchmark interest rate from 0.75% to 0.25% and relevant decisions were made towards a banking union.

In 2014, the euro area growth pace should again be constrained by the structural adjustment on-going in the several memberstates. Thus, the European Commission predicts that GDP will continue growing below its potential levels.

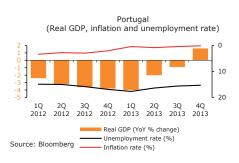

Source: IMF WEO Update Jan 14

THE PORTUGUESE ECONOMY HAD A MORE MODERATE CONTRACTION IN 2013

The Portuguese economy reconversion process, which has been implemented since May 2011 under the Economic Adjustment Program, kept conditioning the productive activity through 2013. However, the economy's contraction proved to be more moderated than in 2012.

After a sharp drop in the GDP during the first quarter, the following months delineated a path of recovery for the Portuguese economy, supported by the domestic demand stabilisation and the external demand acceleration. Regarding the domestic demand, the evolution is due to the attenuation of the decline in private consumption (following the inversion in the downward trend in the family's disposable income) and by the less unfavourable investment performance, particularly the investment in construction, which begins to stabilise after the strong adjustment framed in the reorientation of productive structure from the non-tradable sector to the tradable sector. Likewise, the shift to tradable goods and services has been reflected in the export activity's performance, which accelerated throughout 2013.

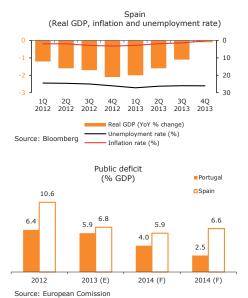

The progresses achieved in the adjustment process should continue to be favourably reflected on the GDP, which is projected to grow in 2014, for the first time since 2010. The perspectives for recovery of the Portuguese economy, along with favourable conditions in the international financial markets, have contributed to an expressive reduction in the risk premium associated with the Portuguese assets. However, the optimistic scenario in motion is subject to certain risk factors. Domestically, the risks on demand, inherent in the private and public unleveraged route, in addition to the uncertainty about how the Government will fund itself after the end of the Adjustment program, expected to May. In the external environment, the risks are mainly related to a possible deterioration in the financial market conditions and to the slowdown in external demand.

In 2014, the consumer price index should raise very moderately, reflecting a framework of low inflationary pressures, both internally due to the structural adjustment program and externally, given the perspectives that the world GDP will grow below its potential.

SPAIN REMAINED IN RECESSION IN 2013

Throughout 2013, the evolution of the Spanish economic situation was constrained again by the need for correction of severe macroeconomic imbalances, accumulated over the last years. Under the financial assistance program for the recapitalisation of the banking sector, several measures aiming the toughening of the credit

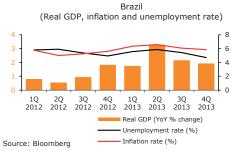

institutions' balance sheets were implemented and the process of fiscal adjustment and structural reform carried on. However, despite the progress made, the unemployment rate remained above 25% and the degree of restrictive access to credit also remained high. In fact, the private consumption levels continued falling, although less pronouncedly than the previous year. The impairments amount for financial institutions continued with an upward trajectory. Given the contraction in the domestic demand, the positive performance of the net exports turned out to be insufficient to reverse the downturn in the Spanish economy and the GDP growth rate was negative once more in 2013. Despite the weakness of the Spanish economic and financial situation, the risk premiums associated with the Spanish financial assets reduced, supported largely by the accommodation degree in ECB's monetary policy and a more benign context in the international financial markets.

In 2014, the European Commission predicts a 0.5% growth for the Spanish GDP. This recovery shall be sustained by the external demand dynamism as well as the enhancement in the domestic demand, around a gradual decline in the unemployment rate, the reversal of the reduction in the households' disposable income and the improvement of access to credit.

Concerning the aggregated prices' evolution, in 2014, it is expected a lower inflation level, as a result of the dissipation of the impact of measures to increase the direct and indirect taxation, the wage moderation framework and vulnerability of domestic demand.

BRAZILIAN ECONOMY ACCELERATED IN 2013

After a year of weak growth, the Brazilian economy showed signs of greater dynamism, with a growth of more than 2% in 2013. Although still beneath the historical average of about 3%, the activity's acceleration was due to the resilience of private consumption, which was supported by the credit and the robust labour market, as well as the performance of the investment, mainly in infrastructures intended to enable the expansion of critical productive sectors, including energy. Although the exports have benefited from the global economy's stabilisation and the depreciation of the Brazilian Real against the dollar, the strong increase in imports, due to increased domestic demand, particularly investment, together with the fall in commodity prices, resulted in worsening the trade deficit in 2013.

The inflationary pressures arising from the hastening of wages, the credit growth and the rising prices of imported goods within a framework of expansionary fiscal policy led the Brazilian Central Bank to dramatically reverse the cycle of reference rates' reduction, which persisted until 2012.

The Brazilian financial assets' performance was largely set by the raise of risk aversion in the emerging markets. This unfavourable external environment caused a sharp devaluation of Bovespa stock index, an increase in interest rates of medium and long term government securities and erosion of the Brazilian Real against the major international currencies.

In 2014, the IMF predicts that the GDP growth will stabilise below 3%, conditioned by the persistence of structural constraints and by the insufficient external competitiveness of tradable goods. Still, the evolution of business should benefit from the World Cup and the acceleration of the US economy. The expected loss of dynamism in the labour market and the maintenance of a restrictive monetary policy should favour the moderation in inflationary pressures. The upward risk for inflation focuses mainly on the possible depreciation of the Brazilian Real in the event of a higher risk aversion scenario, eventually caused by the reduction in monetary stimulus FED program.

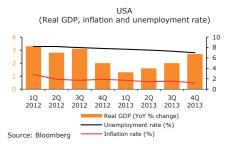

THE MAIN CHALLENGE FOR THE NORTH-AMERICAN ECONOMY IS WITHIN THE GRADUAL CLEARING OF THE FED'S ASSET PURCHASE PROGRAM

In 2013, the US economy has slowed down when compared to the previous year, in a context where the strong tensions on the federal fiscal policy caused a deterioration of the general levels of economic confidence. Nevertheless, the economy activity was sustained by the private consumption's performance, which benefited from a recovery in labour market, as well as the appreciation in the housing market, while the mortgage interest remained low due to the FED's accommodative monetary policy. The investment was probably the more dynamic

spending component, stimulated by the sustained increase in the load factor, along with the acceleration in the demand addressed to North-American exports.

During 2013, despite the FED's advances and retreats regarding the intention to reduce its government securities purchase program, the behaviour of the US financial markets was characterised by lower volatility levels and a greater propensity for cyclical assets such as stocks. Nonetheless, in the government debt market, the trend of rising yields, particularly visible from the end of the first six months, reflected the expected normalisation of monetary policy in the short term.

Reaching an agreement between Republicans and Democrats for the budgetary consolidation, should foster a climate of more trust among the economic actors, creating conditions for the activity's

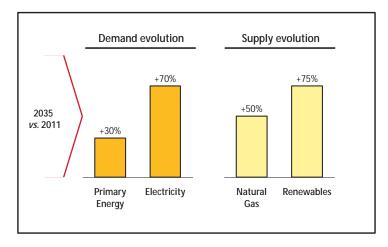

acceleration. The main risk to this recovery scenario is in the reaction of the real estate market to the expected gradually reduction of the FED's assets purchase program, announced in December 2013, which will likely result in rising the interest rates on mortgages.

1.2.2. ENERGETIC FRAMEWORK

GLOBAL ENERGY MEGATRENDS

The energy sector is witnessing a deep transformation due to shifting supply and demand patterns. The energy map is redesigned, with demand moving to South/East in emerging countries and supply growing in the West, particularly in the Americas. Despite this transformation requires structural changes at the global energy mix, with relevant impact on the traditional business models, it also encompasses relevant growth opportunities. Additionally, growing environmental concerns will pose significant challenges to ensure sustainability in the years to come. Overcoming these challenges will require a new energy paradigm with high levels of investment supported by a strong technological development and innovation.

The world is changing fast and energy is no exception

ENERGY DEMAND

Global demand for energy has been consistently increasing, being expected this trend to continue in the medium/long term as a result of economic and population growth. In particular, world's primary energy demand is estimated to grow by 30%, up to 2035. Regarding final energy demand, electricity is the energy form that should register the highest growth, about 70% up to 2035, as result of increasing urbanization and electricity penetration in new sectors, such as transports.

However, this strong growth is not predicted to come from the traditional historical markets but from the developing countries. In this sense, emerging economies are estimated to capture over 90% of the net growth in energy demand until 2035. Demand is expected keep almost constant in OECD countries, given energy efficiency developments will offset the organic growth consumptions.

This high demand growth will lead to strong environmental concerns. Being responsible for two-thirds of global Greenhouse Gas emissions (GHG), the energy sector will be key to achieve climate change goals. As to mitigate irreversible impacts of climate change, GHG emissions should be reduced, by 2050, to 50% of 1990 levels, strong challenges will arise in ensuring environmental sustainability, something the optimistic scenarios do not ensure.

ENERGY SUPPLY

Although the supply of all energy forms is expected to grow in the medium / long term, only renewables and natural gas will grow all over the world. With similar growth in absolute terms, natural gas is expected to increase by 50%, while 75% for renewables, up to 2035. Oil and coal should reduce their weight in the primary energy mix (from 60% to 50%), therefore keeping the highest share.

Natural gas consumption increase is the result of strong global energy market dynamics, explained by the recent shale gas technological developments and growing international trade of Liquefied Natural Gas (LNG). These developments should contribute to an increase of natural gas relative competitiveness, leading to fuel shifting dynamics from traditional fuels to natural gas in the industrial, transport and power sectors.

Regarding renewables, growth should be divided between traditional bioenergy and hydro + "new renewables" (wind and solar). Despite strong bioenergy growth, as a result of increasing population in developing countries, its share in the renewables mix is expected to decline from 75% to 60%, up to 2035. Hydro growth should also occur also focused on the developing countries, where there is still significant hydro potential to be explored. In this sense, up to 2035, the "new renewables" are the ones expected to increase their weight in the renewables energy mix, surpassing even the hydro, due to the recent technological revolution with a strong impact on the costs of these technologies. In particular, it is estimated the United States, China and Europe to lead renewables growth, up to 2035.

POWER SECTOR

Electricity demand growth will be sustained primarily by two factors: (1) Access to Electricity and (2) Fuel shifting from traditional fuels to electricity. On the supply side, there is an increasing technological innovation across all the value chain – generation, networks and retail.

Currently, still about 1.2 billion are without access to electricity (mainly in Africa and Southeast Asia). This is a key issue to be answered in the coming years, through new technology solutions and new business models, to be met by increasingly affordable small scale solar-based solutions.

Electricity's growing consumption vs. traditional fuels is explained by demographic and technological factors. The expected massive urbanisation for developing countries should contribute significantly to change consumption patterns towards an increased use of electricity. Additionally, more substantial use of heat pumps (with higher levels of efficiency) as well as new mobility solutions, based on electrical technologies, should contribute to a growing electrification in developed countries.

Technological innovations at the electricity production level are already changing the electricity generation's mix. In particular, renewables are expected to increase ~6x, up to 2035. Huge technology costs' decrease is a key driver of renewable growth, which might even change the traditional centralized generation model to new distributed models. In this paradigm each consumer is also generator, and networks operate as batteries for backup and energy flows management. Also at the networks level, information technologies and energy combination is outlining a new world of smartgrids, disruptive compared to traditional systems, where information flows in all directions and energy control is increasingly effective. From the retail side topics such as demand response, energy management, real-time pricing, customer relationship management, will enable better energy systems management. According to the International Energy Agency, the "Global investment in the power sector amounts to \$17 trillion through 2035, with over 40% in transmission and distribution networks".

EUROPEAN ENVIRONMENT

RECENT MARKET DEVELOPMENTS IN THE POWER SECTOR

From the consumption side, we have been witnessing strong demand destruction, as a result of the economic crisis, followed by a slow recovery due to energy efficiency. In particular, the new Energy Efficiency Directive, with effect from mid-2014, re-enforce energy savings development, with binding obligations for the Member States. In this sense, some European countries have announced energy efficiency obligation schemes.

From the supply side, renewables are continuing their sustainable growth despite some regulatory uncertainties. Reduced demand along with renewables increase has been reducing space for thermal generation, with strong impacts on thermal power load factors. Additionally, low CO_2 prices have been promoting electricity generation from coal versus natural gas, reversing European Union's (EU) decarbonisation path.

KEY REGULATORY LANDMARKS

In December 2013, the European Commission (EC) launched two documents to public consultation, regarding the State Aid Modernization process: "Environmental and energy aid guidelines for 2014-2020" (EEAG) and "General Block Exemption Regulation". The main topics covered and the more relevant to EDP are the guidelines concerning renewable energy support mechanisms (EC supports market instruments – feed-in-premium or green certificates – and does not consider the feed-in-tariffs to be an adequate tool) and guidelines on capacity mechanisms (seen by the EC as a last resort instrument to ensure the coverage of supply). The consultation closed in February and the documents' final version is expected to be released in mid-2014. In parallel, the EC opened two detailed investigations on the State Aid, about the payment exemption of renewables' overcost to the German energy intensive industries and the contract for differences established with EDF to build a nuclear power plant in the UK. Regarding the latter point, this investigation will be an opportunity to demonstrate that

the market reform in the UK (EMR: Electricity Market Reform) is essential to attract the investment needed in low-carbon generation at fair prices to consumers.

In January 2014, the EC presented the communication "A policy framework for climate and energy in the period from 2020 to 2030" whose final version should gather consensus among the Commission, the European Parliament and the European Council to be adopted (the negotiating process will last 1-2 years). The EC package of proposals for 2030 contains (1) a European objective of reducing Greenhouse Gas emissions of 40% in 2030, compared to 1990, (2) a goal of a greater share of renewable energy in the EU of at least 27%. (not binding at the member-states level, unlike the 2020's targets), (3) an eventual objective of energy efficiency defined according to the review of the Energy Efficiency Directive to be concluded later in 2014. The EC also proposes an ETS reform (establishing a reserve mechanism of market stability from 2021) and a new governance system to achieve the energy policies, based on national plans designed by the member-states. A preliminary analysis at these proposals indicates overall positive impacts, although there are still many uncertainties, namely with the renewable energy support mechanisms and with the achievement of the renewables goal, given the inexistence of binding national targets.

TOWARDS A NEW MARKET DESIGN

The European Union's objectives for 2030 materialise the economic decabornisation strategic goal, which will inevitably have implications in the electricity market design. In this sense, the Aid State directives, currently under review, should give the necessary latitude for the market design to evolve, not crystallizing in energy-only models suitable for the 90s liberalization.

Since the management of renewables intermittency is achieved through storage, interconnections and underutilisation of backup thermal plants and the investments in low-carbon technologies is CAPEX intensive (i.e. renewables and nuclear), an evolution to a low-carbon economy leads to a sector increasingly based on fixed costs

Tha current energy-only market models do not allow investments in backup technologies, since it is structurally impossible to recover the fixed costs in marginalist markets. Additionally, several markets have explicit maximum prices (i.e. MIBEL), which prevents spikes in energy prices that are critical to the fixed costs' recapture. Even when there are not explicit price caps, in practical terms, these very high prices are not politically acceptable (missing money problem). In this context, the current market models require **capacity remuneration mechanisms.**

In an increasingly CAPEX-only world, the key competitive factor is the cost of capital, which may be reduced through risk mitigation mechanisms. However, in the existing scenario, the investor carries a large quantity of risks (regulatory, price, political, economic cycle, etc.) far beyond the ones manageable (construction, operations, funding). Thus, the market design should evolve for **long-term stable contracting.**

Additionally, the increased penetration of high fixed cost technologies further depresses the marginalist price, which ultimately does not remunerate any technology. This effect is already felt nowadays. Recognising this, many European countries complemented their energy markets with payment capacity mechanisms and/or fixed remunerations (such as tariffs). Although some European markets do not require additional capacity in the short-term, particularly in Iberia, it is critical to ensure a positive encouraging environment to boost the medium-term investment and prevent the closure of power plants unprofitable but necessary to guarantee the supply.

As a clear evidence of the need for stability to ensure the investment, the new EDF's nuclear plant in the UK will have a Contract for Differences for 35 years (\sim £90/MWh).

To this effect, it is critical to re-design the current European markets towards a total costs' market (ex-ante versus ex-post competition).

Current marginalist energy-only market design does not ensure economicfinancial sustainability for Low-carbon technologies with high fixed costs

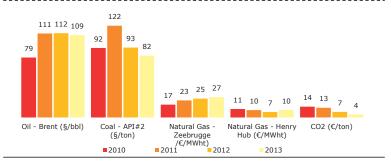

FUEL AND CO2

Internationally, the different fuel prices showed distinct dynamics in 2013:

- Stabilisation of the oil price (Brent, European index), keeping historical records around USD 110/bbl for three consecutive years
- **Drop in coal price** (APi#2, European index) with the futures market pointing to a fall in price by 2020, largely explained by the excess stock of coal in international markets. This excess of coal is the result of displacement of coal consumption for shale gas in the USA.
- Slight increase of natural gas prices (Zeebrugge, European index) maintaining the high prices defferential between Europe and USA (Henry Hub, North-American index).

Regarding the CO₂, **the prices maintained its downward trend**, which can be explained by structural oversupply due to demand decrease as a consequence of the economic crisis.

Evolution of Average annual prices of fuels and CO₂

IBERIAN ELECTRICITY AND GAS MARKET

ELECTRICITY

The economic situation in Europe continues to highly impact the electricity demand. In line with the most European markets, the electricity demand in Iberia also decreased in 2013:

+0.2%: smooth increase in **Portugal -2.2%**: signs of recovery in **Spain**

The high levels of hydro generation index (1.17 in Portugal and Spain) and wind generation index (1.18 in Spain) in 2013 contributed to a significant increase in renewable generation, leading to a sharp reduction in the residual thermal demand and, consequently, in operating coal and natural gas power plants.

The low CO_2 prices along with the increased competitiveness of coal vs. natural gas promoted the significant increase of coal electricity production instead of natural gas.

Reflecting in the fuel and CO_2 price evolution, the European wholesale electricity prices have mostly dropped vs 2012. Particularly in the Iberian market (MIBEL), the prices decreased to ε 44/MWh. The price differential between Portugal and Spain, remained low ($-\varepsilon$ 0.6/MWh), revealing a tight integration already existing between the two markets.

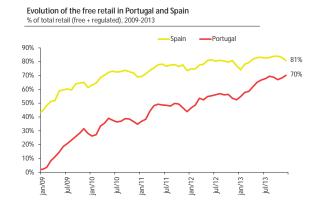

The decrease in MIBEL's electricity price is essentially due to the combination of three factors: (1) decrease in consumption compared to 2012 (-1.8% in Iberia) as a result of the economic downturn and the efficiency measures, (2) decrease of Residual Thermal Demand (about 30%) through the higher hydrological and wind index versus 2012 and (3) the boost of coal generation, during a year with low marginal cost due to the fuel and CO_2 cost decline.

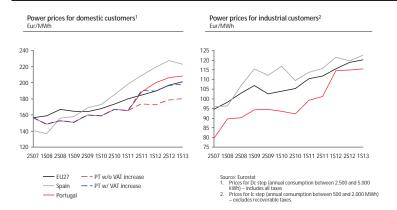

Wholesale power prices in Iberia are in line with other European markets

Regarding the supply, there has been a growing liberalization of the sector. At the end of 2013, the liberalized market represented 70% of the electricity supplied in Portugal and 80% in Spain.

The evolution of retail electricity prices in Iberia continues in line with EU average prices.

Retail
electricity
prices in
Portugal have
been in line
with EU's
average both
for industrials
and domestic

NATURAL GAS

The loss of competitiveness of natural gas led to a drop in natural gas demand in Iberia:

-4.9%: continued decline in consumption in **Portugal -8,2%**: continued decline in consumption in **Spain**

The decrease in the demand was a result of the sharp drop in consumption in the power sector, which represented less than 16% of the total consumption (-17% in Spain and -7% in Portugal). This demand decrease brought the need to deviate high amounts of contractualised natural gas to the international markets, demonstrating a strong flexibility to manage demand distortions.

The significant weight of LNG¹ in the natural gas supply in Iberia has allowed a great diversification of sources, highlighting Algeria, Nigeria, Qatar, France, Peru and Trinidad & Tobago.

REGULATION

The economic crisis has continued to induce a strong pressure from the European Governments to tax the energetic sector through fiscal policies that tend to be discriminatory and distort the regulatory framework.

PORTUGAL

Under the financial adjustment program that Portugal has been subject, the Portuguese Government has launched a series of regulatory packages affecting the energy sector. As a result of the measures approved until the 7^{th} Troika evaluation, the first regulatory package, with effects since 2012, has an estimated impact of approximately two billion euros between 2012 and 2020. In 2013, following the measures determined on the 8^{th} and 9^{th} evaluations, a second regulatory package and an additional tax targeting the Portuguese energy sector were announced. The first, with an expected impact of $\mathbf{1}$ billion to $\mathbf{1}$ 4 billion from 2014 to 2026 and the second is forecasted to have an impact of about one hundred fifty million euros in 2014. It is estimated that all the regulatory incursions since Troika's intervention will have an aggregated impact of about $\mathbf{1}$ 3 billion to $\mathbf{1}$ 3.5 billion.

The second package announced in 2013 includes the following regulatory measures: (1) elimination of market distortion caused by tax measures introduced in Spain through the payment of electricity injected into the grid (\in 3/MWh at peak and \in 2/MWh off-peak), (2) incentives for cost efficiency in the tariff harmonization mechanism applicable to the autonomous regions, (3) revision in hydro land remuneration, (4) correction of distortions in the ancillary services market as well as (5) the contribution on coal power plants to the National Electric System.

The extraordinary contribution of the energy sector is translated in a 0.85% tax on the electricity, oil and natural gas sectors' fixed tangible and intangible assets. Exceptions are applied to CCGTs with less than 2,000 hours/year of use, hydro plants with capacity lower than 20MW, wind plants, as well as power plants with licenses awarded through competitive tender procedures or consultation.

SPAIN

Throughout 2013, the Spanish Government also announced several regulatory restructurings aiming to reduce the tariff deficit. These measures aim to reduce the deficit, which was created by the Spanish Government energy policies, the electric sector agents, the customers and the State.

Major regulatory measures in this package, applicable to the sector's companies are: (1) reducing the transmission and distribution assets rate of return from around 8% to 6.5%, (2) cut in the investment incentive from €26thousand/MW/year to €10thousand/MW/year, (doubling the remaining incentive period), (3) change in Special Regime Generation remuneration to pool plus a complement to guarantee a 7.5% fixed return (before tax) and (4) subsidized tariff for vulnerable customers, to be supported by the companies. Additionally, the customers had an increase of 6.5% in the access tariff (+3.2% of total energy tariff), while the State contributed to the extra-peninsular overcost.

EDP RENOVÁVEIS' MARKETS

In 2013, according to the Global Wind Energy Council ("GWEC") 35.5GW of new wind capacity were installed. China remains the main driver of global growth by adding 16.5GW, nearly half of the total global new wind capacity, and reached 91GW of installed capacity. According to the European Wind Energy Association ("EWEA"), 11.1GW were installed in the European Union during 2013, bringing the total installed capacity in the region to 121GW, while based on the American Wind Energy Association ("AWEA") only 1.1GW were installed in the US reaching a total installed capacity of 61GW.

EUROPE

In the European Union the total wind capacity by the end of 2013 amounted to 117.3GW and the electricity generated covered 8% of electricity demand. The year was marked by an increase in offshore technologies.

An annual addition of 11.1GW, according to EWEA, represents a year over year decrease of 8%. The lower growth rate is a reflection of the regulatory and political uncertainty in some European markets. However, despite the slowdown in yearly additions, wind power was the technology which installed the most, accounting for 32% of the new additions.

The new installations were mainly concentrated in two countries, Germany (3.2GW) and the UK (1.9GW), with an increasing presence in offshore wind. Germany continues to lead the European market in terms of installed capacity. Rounding out the top 5 are Poland (894MW), Sweden (724MW) and Romania (695MW). EDPR is well positioned in several of these top markets.

Traditional large markets of Spain, Italy and France saw their rate of new wind projects decrease in 2013, by 84%, 65% and 24% respectively, where regulatory changes in Spain drove the significant decline.

The offshore market in Europe had a record year in terms of new installation by adding an additional 1.6GW, representing a 34% increase from 2012. For the year, Europe reach 6.6GW of offshore wind installed capacity spread through 11 countries with UK alone adding 733MW, strengthening its worldwide offshore leadership, followed by Denmark (350MW), Germany (240MW), Belgium (192MW) and Sweden (48MW).

AMERICA

Uncertainty regarding the extension of the Production Tax Credit (PTC) and Investment Tax Credit (ITC) led to a dramatic 92% decrease in installed capacity to 1.1GW in the United States. However, once the extensions were received, a flurry of construction activity ensued resulting in a record 12GW of new projects under construction by year end, according to AWEA. 2014 will be a solid year for growth as these projects come online.

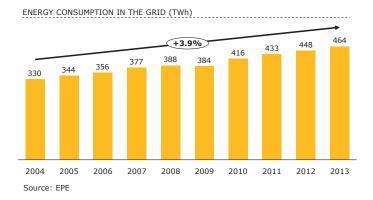

For the rest of the region, Canada installed 1.6GW of wind additions, including EDPR's first project with 30MW, while in Mexico 623MW were added. Latin America was strongly represented by Brazil, another EDPR market, as it installed 948MW, followed by Chile (130MW), and Argentina (76MW).

The renewable energy market is a growing and increasingly competitive arena which should continue to do well as investment costs decline and regulatory and general support is achieved.

ELECTRICITY MARKET IN BRAZIL

BRAZILIAN MARKET CONTEXT IN 2013

Brazil is one of the world's largest markets, with a GDP of about USD 2.5 trillions² in 2012 and a population of 196 million inhabitants, 84% concentrated in the northeast, southeast and south regions. A significant private and public investment growth has been occurring in the last years and it is estimated to carry on through the next years. The preparation for the major sports events, as the World Cup (2014) and the Olympics (2016), as well as the potential for oil exploitation in the Brazilian shore (pre-salt), the expansion and qualification of the logistic infrastructure have provided and will continue to provide high investments and diversified development opportunities.

The growth context in the Brazilian market contributed to the energy consumption behavior in 2013. In Brazil, the total energy consumption³ reached 463,740GWh, 3.5% above the previous year. Emphasis on the performance of the residential and commercial classes, with an increase of 6.1% and 5.7% in 2013, respectively, compared to 2012. Over the last 10 years, the average growth of electricity consumption was 3.9% per year.

² Source: WMF, MME

³ Source: EPE

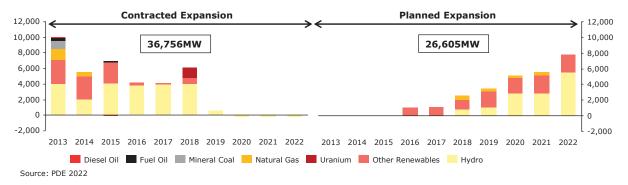

ABOUT THE ELECTRICITY MARKET IN BRAZIL

The electricity power generation in Brazil in 2013 corresponded to 129GW, with a generation mix consisting of 69% hydro, 15% thermal, 14% other renewables and 2% nuclear sources.

This energy generated incorporates the National Interconnected System (SIN), which covers 98% of the Brazilian market and is essentially characterised by the existence of large reservoirs, hydroelectric projects and long transmission lines.

According to the Ten Year Energy Expansion Plan 2022 (PDE 2022), the electricity demand will grow 4% per year in the next 20 years, reaching more than 93GW of demand in 2023. To meet this growing demand, it will be necessary a 52GW expansion in the installed capacity until 2022. To achieve that goal, it is planned an auction for more than 26GW in generation infrastructures during the next years, 13GW of renewable sources and small hydroelectric power plants, 10GW of hydroelectric power plants and 3GW of gas power plants.

ANNUAL INSTALLED CAPACITY INCREASE BY SOURCE (MW)

From the planned expansion in the chart above, there should be subtracted the hydro plant São Manoel, already auctioned in 2013, and added to the expansion contracted, thus reaching 37,456MW.

With the growth in new generation assets, it is simultaneously predicted the transmission grid expansion in about 48.3 thousands km, which represents around 45% of network extension, comparing with the infrastructure existent in 2013.

According to the PDE 2022, the energy efficiency and the penetration of distributed generation by the final consumers will contribute to reduce the need for expansion of centralised generation in SIN. The self-generation and the solar energy distributed will enable to discharge around 117TWh of energy requested to the grid in 2022. It is estimated that 98% of this energy will be generated in large systems, installed in industries such as steel generation, pulp and paper, chemical, refining, sugar production and alcohol, among others, and the commercial sector. The remaining amount of 1.9TWh (equivalent to 219MWa) in 2022 is due to the integration of solar photovoltaic generation systems in the residential and commercial classes.

ADVERSE REGULATORY FRAMEWORK

The year 2013 was characterised by significant changes in the Brazilian electricity sectors' regulatory scenario. In September 11, 2012, the Federal Government introduced the Provisional Measure n. 579/2012, which establishes measures to reduce about 20% of the electric energy tariff in all the Brazilian regions. The measures adopted to achieve this reduction comprised the anticipated renewal of generation and transmission concessions maturing between 2015 and 2017 (many electricity producers did not adhere to the concessions' extension) and the reduction or extension of sectorial fees – the fuel Consumption Account and the Global Reversion Reserve were extinguished and the Energy Development Account (CDE) was reduced by 75%.

The consequence of these measures and the marked frustration in 2013's auctions (A-1 Auction and Adjusts Auction) led to decontracting the distributors and, consequently, to the involuntary exposure to short-term energy market.

This scenario was complemented by the adverse climate conditions, with low rainfalls in the country, which contributed to increase the Settlement Price of Differences (PLD) and to the dispatch of thermal power plants outside the order of merit.

Cumulatively, these facts generated a reduction in corporate cash amounts, which created the need for an extraordinary contribution from the CDE and the Treasury.

36

1.3. STAKEHOLDER'S RELATIONSHIP

1.1.3. MANAGEMENT APPROACH

EDP has strengthened its management structures, focusing on stakeholder relations and strengthening internal procedures through the implementation of cross-company methods such as ComPro – the communication of projects to local stakeholders.

The EDP Executive Board of Directors approved a Stakeholder Segmentation Model in 2013, which is intended to standardise the identification and management of EDP's stakeholders. This Model considers four segments:

- Value Chain
- Market
- Democracy
- Social and Territorial Environment

This model maps EDP's key stakeholders. The mapping criteria considers: nature (public, private, and social/non-government); territorial (local, regional, national and supranational); and segmentation (generation and distribution chain, value chain, markets, public policy and to the regulation). Finally, it also considers organisation, influence and decision-making of Stakeholders in the EDP's corporate model.

EDP believes that the engagement of stakeholders in the governance model is more than just good business practice – it creates and distributes value to all stakeholders, and therefore contributes to a more cohesive society, and comprises a lever of competitiveness impacting on the performance of the company itself.

REPRISK®

EDP joined the Reprisk platform in 2013. This sustainability rating agency specialises in the identification, description and valuation of the reputational risks of each company in terms of environmental, social and management impact. Reprisk collects and analyses news, events, criticism and controversy about companies, their products, activities and projects, using the information conveyed by the media as the staring point. The platform had under observation at year's end 38,840 companies, 9,240 projects, 6,294 NGOs and 5,362 governmental structures.

The ratings established by Reprisk allow EDP access to key information for assessing its exposure to risk in terms of countries, markets, sectors and companies. The platform also allows EDP to conduct a comprehensive benchmark with other utilities.

http://www.reprisk.com

This principle underlies the approval by the EDP Executive Board of Directors of a Stakeholder Relations policy in 2013, based on four guiding commitments: Understand, Communicate, Trust and Collaborate.

UNDERSTAND

We dynamically and systematically identify the stakeholders that influence and are influenced by the Company, and we analyse and try to understand their expectations and interests in the decisions that directly impact them.

COMMUNICATE

We are committed to promoting two-way dialogue with Stakeholders through informational and consultation initiatives.

We listen, inform and respond to stakeholders in a consistent, clear, accurate and transparent manner, aiming to build close, strong and long-lasting relationships.

TRUST

We believe that fostering a climate of trust with our stakeholders is crucial to establishing stable and long term relations.

Our relations with stakeholders are based on values such as transparency, integrity and mutual respect.

COLLABORATE

It is our ambition to collaborate with Stakeholders to build strategic partnerships that bring together and share knowledge, skills and tools, thus promoting the creation of shared value in a differentiating manner.

INITIATIVES WITH STAKEHOLDERS

Several initiatives were undertaken by EDP with relevant stakeholders during 2013, namely:

Corporate Initiatives:

- Round of Conversations with Stakeholders This initiative began last year and was continued this year. Its aim is to promote discussion between the macrostructure of EDP and external guests on materially significant issues. Two rounds were held in 2013: with the National Association of Portuguese Municipalities and with Professor Marcelo Rebelo de Sousa.
- Conference by António Mexia at Lisbon Technical University (IST) The CEO took part in this initiative of IST, aimed at students and professors, as part of the conference series in Portuguese universities. The debate focused on the strategic vision in the energy sector in Portugal.
- Visit by the Economic and Public Works Committee to Alqueva The aim was to discover more
 about this hydro project of EDP and promote open and ongoing dialogue with this relevant stakeholder.
- Consultation with External Stakeholders An annual process involving various groups of stakeholders, including Local Government, Universities, Business Associations, Suppliers, Members of Parliament and of the European Parliament, in order to discover their expectations, relevant issues and opinions on relations with EDP and its performance.
- **Consultation with Internal Stakeholders** Systematic update of mapping of stakeholders, relevant and critical topics of the EDP Group.
- Meetings of the Stakeholders' Management Committee- Initiative intended to promote reflection
 and debate on the key challenges in relations with EDP's stakeholders and to subsequently establish a
 plan of action.

Throughout this report several operational initiatives are described, highlighting the relationship with the different segments of stakeholders. For further information: www.edp.pt> sustainability> stakeholders-

1.3.2. RELEVANT TOPICS AND MATERIALITY

EDP promotes stakeholder engagement through continuous participation processes, using various communication channels depending on the specific nature of the target audiences.

This ongoing dialogue with EDP's most significant stakeholders (through meetings, discussion rounds with the company macrostructure, questionnaires, consultations in-person, partnerships and other interactions) identifies the most relevant topics for the different segments mentioned above.

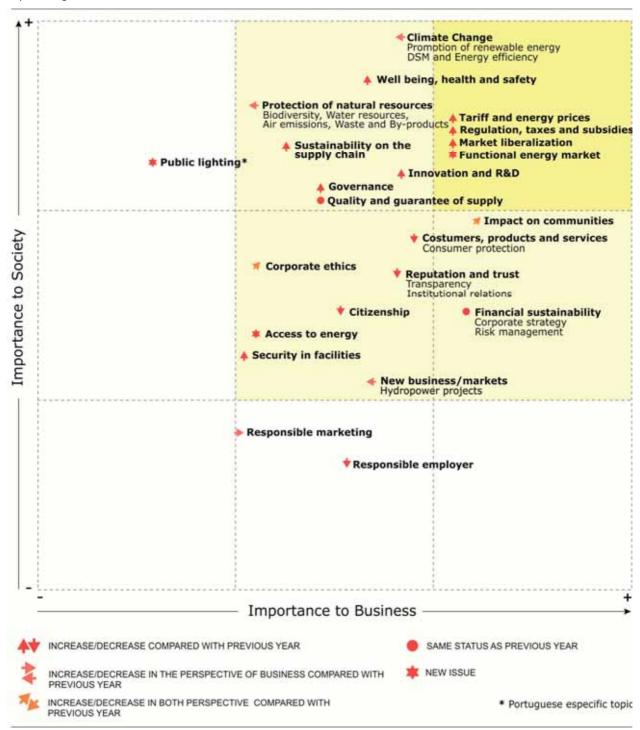

The conclusions of consultations organised by EDP with its stakeholders in 2013 are:

- **Value Chain segment**: tends to focus on the following topics as critical issues: tariffs and energy Prices, composition of the electricity bill, climate change (namely promoting energy efficiency in consumption), and innovation (specifically concerning smart grids).
- Market Segment: Critical issues are deemed to be financial sustainability issues (such as debt, the macroeconomic context, and the EDP Group strategy) and the regulatory framework.
- **Democracy segment**: identifies the most relevant topics as: Demand side management, investment in renewable energy, tariffs and energy price (namely the tariff deficit).
- Territorial and Social Organisation: places particular emphasis on topics such as public lighting, demand side management, investment in renewable energy, and tariffs and energy prices (in particular the tariff deficit).

EDP, given the importance of identifying material issues due to the influence they have on the decisions, activities and performance of an organisation and its stakeholders, annually updates these issues and prioritises them according to relevance and meaning.

The EDP Group materiality matrix includes the issues considered to be relevant for society and for the business, according to the Accoultability's standards.

The "relevant for society" arm incorporates the following analysis: regulation, benchmark, international studies, ESG (environmental, social and governance) investor surveys and ascertaining the expectations of the different EDP stakeholders; the "relevant for business" arm was evaluated based on interviews with managers and supervising officers of different areas of EDP.

This matrix supports the preparation of the annual report, both in the definition of its index and the selection of the content. Simultaneously, is used to support EDP's agenda for sustainability. Further information on the process can be found in the annex (page 312)

1.4. STRATEGIC AGENDA

STRATEGIC AGENDA FOR 2012-2015

At the Investors Day held in May 2012, EDP presented its strategic agenda for 2012-2015, marked by the beginning of a new cycle, which will focus on cash-flow generation and on the creation of new growth opportunities. In this event, EDP highlighted the appropriateness of the 2006 defined strategy and presented the following priorities for the period of 2012-2015:

Controlled Risk:

- Proactive management of the legal/regulatory agenda, keeping EDP's unique low risk business profile;
- Competitive refinancing and accelerated deleveraging ensuring the increase of cash-flow generation;

Superior Efficiency:

Focus on opex and capex efficiency creating sustained long-term growth opportunities;

Focused Growth:

Growth oriented to value creation, ensuring a stable and attractive shareholders' return.

Transversely to its strategy, the successful execution of the strategic partnership established at the end of 2011 with China Three Gorges (CTG), the biggest Chinese clean energy group, was also defined as a priority to EDP. Under this partnership, not only CTG will invest $\[\in \] 2015$ in stakes in renewable energy projects but it also has a strong funding commitment by a Chinese financial institution with EDP, at a corporate level, by an amount of up to $\[\in \] 2015$ billion.

| | STRATEGIC PRIORITIES | BUSINESS PLAN 2012-2015 F | STRATEGIC PRIORITIES | |
|--------------------------------------|--|--|--|-----------------------------------|
| CONTROLLED RISK SUPERIOR EFFICIENCY | 1. Proactive management of the legal/regulatory agenda, keeping EDP's unique low risk business profile 2. Competitive refinancing and accelerated deleveraging ensuring the increase of cash-flow generation 3. Focus on opex and capex efficiency creating sustained long-term growth and opportunities | Create sustained long-term growth | > Capex <50% of EBITDA (1) > EBITDA CAGR 11-15:-5% (€4,5-4,7 bn) > £130M/year OPEX III savings in 2015 > Adjusted Net Debt ⁽²⁾ /EBITDA <3,0x in 2015 > > 70% clean installed capacity in 2015 > -85% of EBITDA in 2015 > > 60% of EBITDA outside Portugal in 2015 | 5. FULFILMENT OF STRATEGIC PRIORITIES

The **management of the legal/regulatory agenda** has been a top priority for EDP. In Iberia, the focus has been in the measures proposed by regulators on both sides of the borders to fight the tariff deficit and in the fiscal changes in Portugal. EDP has assumed a proactive position, contributing to solutions that aim the system's sustainability. In Brazil, EDP has followed attentively the search for regulatory solutions that allow the regular electricity distribution activity's development, in a context of high purchase prices as a result of the unfavourable hydrological regime in the last two years. The regulatory impacts, the energy purchase price volatility in Brazil and the Brazilian Real depreciation in the last two years have been penalizing the earnings' growth, which stand below the goals defined on May 2012.

Nevertheless, EDP maintains a clearly distinctive low risk profile, expressed both in the weight of 90% of regulated activities in 2013, higher than the Business Plan target (85%) and in the 69% of renewable installed capacity, close to the 2015's target of 70%. The low risk profile has enabled EDP to mitigate the previous negative impacts.

In the **competitive refinancing and accelerated deleveraging** some decisive steps were taken during 2013. Although the target of Adjusted Net Debt/EBITDA of 3.0x is now more difficult to achieve mainly due to the

regulatory and fiscal impacts, by the end of 2013 were concluded asset sales amounting to €1.5 billion, including agreements with CTG and other minority interest sales in wind farms. Also during 2013, EDP management announced the 2014 and 2015 investment target reduction from €2 billion/year to €1.7 billion in 2014 and €1.5 billion euro in 2015 and sold more than one billion euros of tariff deficit in Portugal. Regarding funding, EDP issued about €3 billion of new debt during 2013, which allowed to lengthen the maturity profile and cover most of the funding needs until the end of 2015.

In a period of great uncertainty, the **focus on the Opex and Capex efficiency** has been a constant, attested by the successfully anticipation of OPEX III efficiency program results. The \in 120 million of savings in 2013, allowed not only to achieve the year's goal but also to anticipate the \in 115 million of savings for 2014. Regarding the Capex, there was a significant effort to reduce the value invested in relation to EBITDA, explicitly with a ratio of about 55% in the last two years and converging with the defined goal to the 2012-2015 average of 50%. The savings verified by the centralised procurement had also a decisive contribution (\in 207M in 2013).

In terms of **growth oriented to value creation**, after entry into service of Alqueva's repowering in 2012, there are 5 new hydroelectric power plants in construction in Portugal - Baixo Sabor, Foz Tua, Ribeiradio/Ermida, Venda Nova III and Salamonde II- with a total capacity of more than 1,400MW to be installed until 2016. Also during 2013, about 500MW of wind capacity were installed by EDP Renováveis. In Brazil, continued the construction of Jarí hydroelectric power plant (373MW) and started the construction works in Cachoeira Caldeirão hydroelectric power plant (219MW), backing a 68% investment in renewables in 2013, above the 60% goal defined in the Business Plan period. In achieving the goal of creating growth opportunities, during 2013, EDP signed long-term energy sale contracts matching 1,200MW in wind projects in the USA and 409.5MW for hydroelectric power plant São Manoel in Brazil, with start of operation scheduled to 2018 in a partnership with Companhia Furnas Centrais Eléctricas.

EDP has complied with its dividend distribution policy (payout ratio between 55% and 65%, with a minimum value of €18.5c per share), since the unitary dividend distributed in the last two years was €18.5c.

The **execution of the partnership with CTG** has also been a strategic management priority, with emphasis on the following facts:

- The sale of a 49% stake in EDP Renováveis Portugal was concluded in June 2013 with a final global price of
 €368 million;
- The agreement to sell a 50% stake in Cachoeira Caldeirão hydroelectric power plant to CTG for a price
 equivalent to the costs incurred by EDP Brasil and assuming a future co-investment commitment with and
 estimated value of BRL 294 million;
- The agreement to sell a 50% stake in Jarí hydroelectric power plant to CTG for BRL 490 million and assuming a future co-investment commitment with an estimated value of BRL 81 million;
- The agreement to sell to CTG 49% of the ENEOP consortium in 2015;
- Finally, in 2014, the agreement to sell to CTG a 33.3% stake of the company owning the development rights for São Manoel hydroelectric power plant.

These operations symbolize a significant progress in the strategic partnership, in particular by providing perceptibility to the target of one billion euros in CTG investments until the end of 2013.

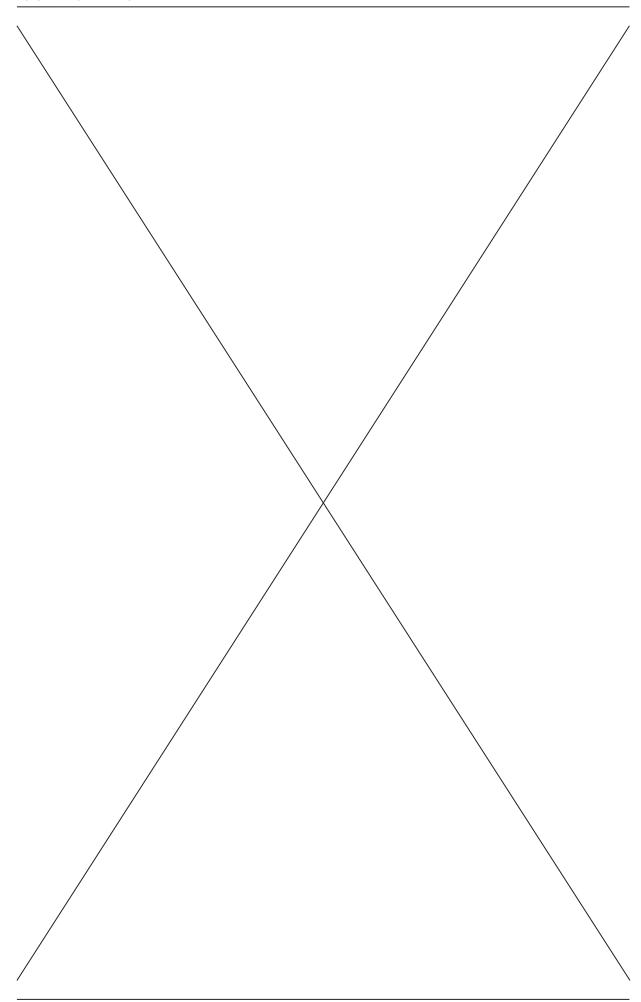

Along the defined strategy, EDP develops a corporate culture of continuous consolidation of employees' ethical values and of sustainability performance excellence, maintaining five lines of action for the period 2012-2015:

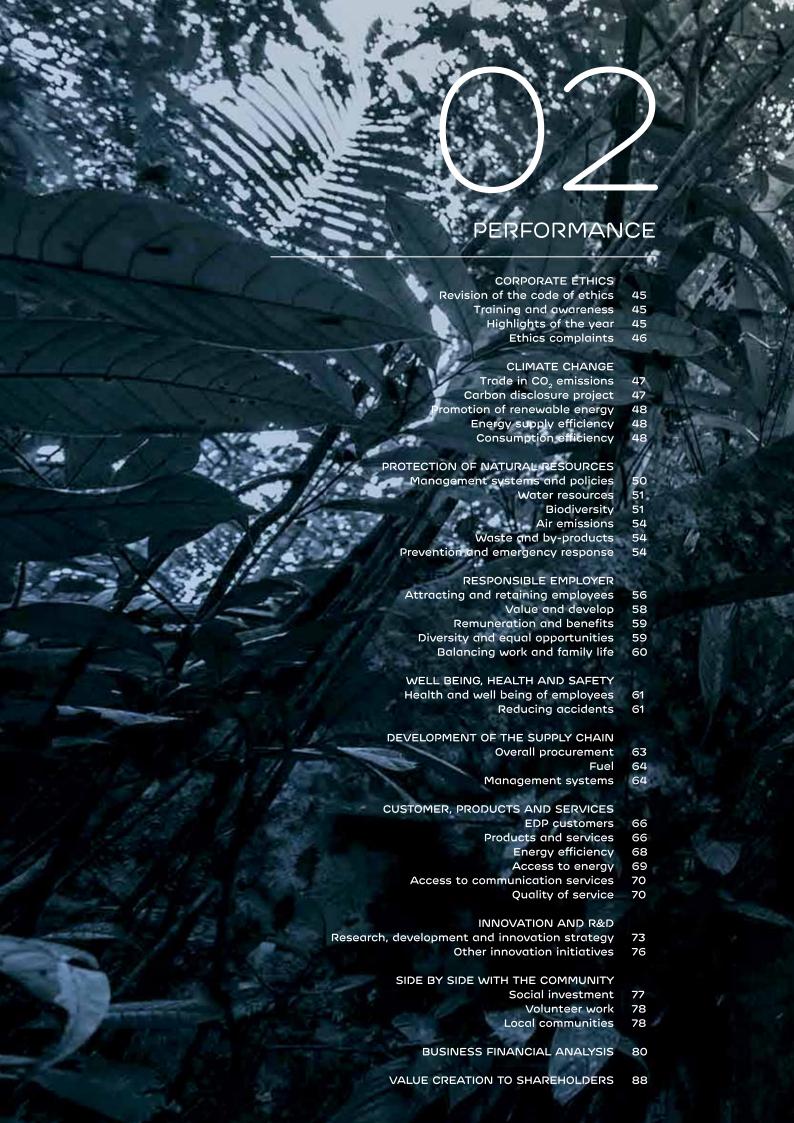

- Improve attractiveness and talent retention as well as ensure employee's motivation, on a phase of high renewal of employees;
- Strengthen the safety management mechanisms and promote the well-being of employees and service providers;
- Improve listening with stakeholders by collecting expectations and taking into account its consideration towards the company's strategy;
- Extend to the several stakeholders the application of tools that gather expectations, optimizing this way its consideration towards the company's strategy;
- Promote a proper management of long-term challenges to where the company will be exposed, by investing in R&D and Innovation.

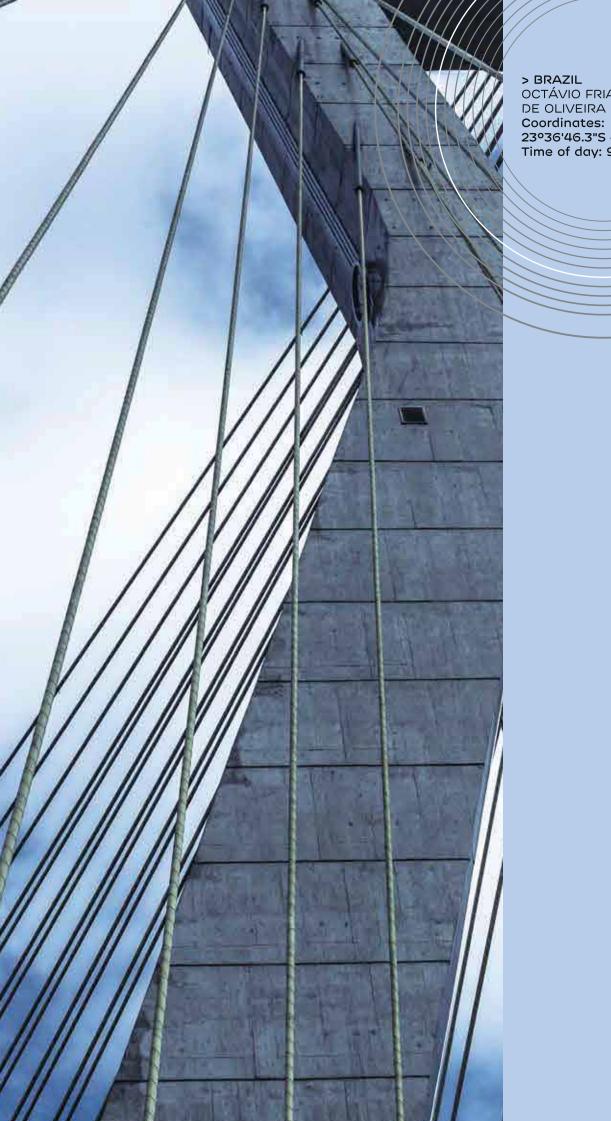

The following chapter summarizes the status of EDP commitments, and specifies the objectives and future goals associated to the achievement of the strategic agenda and aligned with the Principles of Sustainable Development of the Group, demonstrating this way the company's commitment to meet its challenges.

1.5. OBJECTIVES AND GOALS

| Objectives | Goals | Date | Status | Observation | | | | | | |
|---|--|-----------|---------------|--|--|--|--|--|--|--|
| 1. ECONOMIC AND SOCIAL VALUE | | | | | | | | | | |
| | EBITDA Average Annual Growth Rate: ~5% per year | 2011-2015 | | For additional information consult 1.4. Strategic Agenda chapter | | | | | | |
| To focus the growth | Net Profit Average Annual Growth Rate between 0 and 3% | 2011-2015 | | Agenda Chapter | | | | | | |
| | Payout ratio between 55% and 65% of the recurring net profit, with a minimum of EUR 0,185 per share | 2012-2015 | * | EUR 0,185 per share payed in 2013 | | | | | | |
| To promote internal efficiency | Annual Mean Operational Investment of EUR 2,000 M | 2012-2015 | \circledast | Operational investment of EUR 2,0M in 2013 | | | | | | |
| To control risk exposure | Total investment on renewable energies (60 % annual average) | 2012-2015 | * | 67,8% of operational investment in 2013 | | | | | | |
| | Installed capacity of 26 GW | 2015 | | 23GW of installed capacity in 2013, 67% of which are renewables | | | | | | |
| | Renewable installed capacity of more than 70% of total installed capacity | 2015 | * | are renewables | | | | | | |
| To improve the integration of sustainability practices in the internal management | OPEX reduction of €75M in 2012 and EUR 130 M by 2015 | 2012-2015 | | For additional information consult 1.4. Strategic Agenda chapter | | | | | | |
| | Adjusted Net Debt/EBITDA ratio lower than 3,0x | 2015 | | For additional information consult 1.4. Strategic Agenda chapter. | | | | | | |

2.1. CORPORATE ETHICS

•

EDP has been progressively consolidating its "ethics performance management system" in order to ensure:

- A high degree of individual ethical awareness;
- · Minimising the risk of bad ethical practices; and
- Maintaining a culture that generates transparency, trust and responsibility for the consequences of decisions and acts.

Significant developments occurred during 2013, which are summarised in this report and detailed in the published Annual Report of the Ethics Ombudsman (www.edp.pt>edp> corporate governance> ethics)

"It is my belief that the success of EDP is based on relationships of trust which we have learned to establish with all our stakeholders, over time. These relationships are certainly an important part of our heritage, today."

António Mexia

CEO

2.1.1. REVISION OF THE CODE OF ETHICS

EDP Code of Ethics sets out the ethical principles and limits of EDP operations anywhere in the world as well as the commitments it makes to stakeholders. The EDP Code of Ethics was revised in 2013. It had last been revised in 2005. The aim of the revision was to clarify these principles and commitments, detail certain topics that have, in the meantime, acquired special relevance for the business and standardise them in the context of the Group's various business units' operation. This revision was approved by the General and Supervisory

Board in the last quarter of 2013. Its extensive disclosure among internal and external stakeholders will occur during 2014.

2.1.2. TRAINING AND AWARENESS

The topic of business ethics was included, as planned, in the induction training provided to new employees admitted in 2013. A specific training/awareness raising module was developed with the active participation of the Ethics Ombudsman. The preparation of the training/awareness raising of suppliers underwent a change of schedule, and its implementation is envisaged during 2014.

EDP continued to support the AESE/EDP "Ethics in business and society" chair, forming part of the advanced courses and Master's degree courses organised by different educational institutions. This chair allows EDP to share its knowledge and experience in the field of business ethics.

EDP actively participated in the "gestão transparente.org" [transparent management.org] initiative in 2013, which is now available in english to strengthen its dissemination along the supply chain. The Practical Guide to Managing the Risk of Corruption aims to build the capacity of businesses and organisations to assess the risks of corruption in business contexts and promote best practices for transparency.

2.1.3. HIGHLIGHTS OF THE YEAR

The external assessment and benchmarking of the maturity of EDP's ethical performance management system gave the maximum score for "Prevention of bribery" on the FTSE4Good index, while maintaining a position of note in the "Codes of Conduct/Compliance/Corruption and bribery" criteria of the Dow Jones Sustainability indices

A Cooperation Protocol was concluded with the Applied Economics and Management Studies Centre of the Portuguese Catholic University, with the aim of supporting the improvement of EDP's ethical performance management system and to report on and disseminate good practices in business ethics. This protocol has a medium-term perspective (2013-2015) and it reinforces articulation between the Company and the University in an area of great importance for both corporate management and also for higher education teaching.

EDP was included on the list of the "World's Most Ethical Companies" in 2013, for the second consecutive year, following the assessment conducted by the Ethisphere Institute of the USA. In the comparative analysis with the previous year, the indicator of the maturity of EDP's ethical performance management system calculated by this institution shows an increase of about 15%, which is significantly higher than the average for listed companies in the same period.

EDP Brasil has also maintained the Ethical Seal awarded by the General Comptroller's Office, since 2011. It will undergo renewal assessment in 2014.

EDP published the Annual Ethics Ombudsman's Report for the first time in 2013. This report seeks to make a significant contribution to increasing transparency as regards the integrity and ethical quality of the management decisions and actions of Group employees and, ultimately, to raise the confidence deposited in the company by different stakeholders (further information at www.edp.pt> about edp> corporate governance> ethics> ethics ombudsman).

EDP established a Corporate Ethical Performance Index (**Ethicis**) in 2013, as set out in the Rules of the Code of Ethics. The value for 2013 will provide the benchmark for assessing progress and planning improvements in this

ethics

2.1.4. ETHICS COMPLAINTS

COMPLAINS SUBMITTED TO ETHICAL COMMITTEE, BY ORIGIN (No.)

13

10

8

5

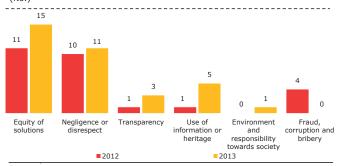

5

4

2

Costumer Citizen Employee Supplier Anonymous

COMPLAINS SUBMITTED TO ETHICAL COMMITTEE, BY ISSUE (No.)

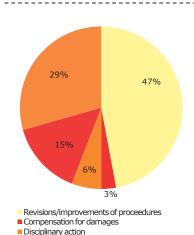

185 complaints were recorded in 2013 in the Group's different ethics complaints communication channels (a decrease of 11% from 2012). 60% of all recorded complaints originated in Portugal, with 7% originating in Spain and 33% in Brazil.

Only 35 of these complaints gave rise to proceedings submitted to the Ethics Committee of EDP, in accordance with the regulations (standard proceedings). All the other complaints were expeditiously processed by the business units involved as they were not considered to be of significant ethical dimension.

The number of standard proceedings opened in 2013 increased by about 30% from the previous year.

An analysis of the source of these proceedings shows that Customers are the most significant source (37%) closely followed by employees (23%). This result is a reversal of the order of the previous year, possibly due to the acceleration of the energy market liberalisation process in Portugal.

ACTION SET BY THE ETHICAL COMMITTEE

(1) Includes monitoring of processes performance, evaluation of initiatives effectiveness, participation to authorities for criminal investigation

Others (1)

Disqualification ou contract penalties application

As regards the classification of the complaint subjects, the categories "equity of solutions" (about 43%) and "negligence or disregard" (31%) are still the most significant of all complaints submitted to the Ethics Committee.

27 complaint proceedings were terminated in 2013, resulting in the following decisions of the Ethics Committee: 18 were considered upheld (67%); 7 were unfounded (26%); and 2 were inconclusive (7%).

The action taken following the appraisal of these proceedings is primarily addressed at the review and improvement of procedures and the training/capacity building of employees or suppliers. A significant number of actions classified as "other" are also recorded. This "other" category includes: monitoring the performance of processes, assessing the effectiveness of initiatives, reporting to criminal investigation authority, etc.

It is expected that the implementation of the action defined by the Ethics Committee and the initiatives planned for the communication of the new EDP Code of Ethics and the training/awareness raising addressed at employees and suppliers that will occur in 2014 may contribute to the improvement of the Group's ethical performance, in accordance with the management objectives established for this area.

2.2. CLIMATE CHANGE

(1) Pecém Powerplant has not been considered for the purposes of detailed environment information. The primary energy consumption was 13,201TJ, with a CO2 emission of 876 kt

EDP remains strongly committed to fighting Climate Change on two different fronts: mitigation and adaptation. In terms of mitigation, the stand-out fact in 2013 on the supply side is the increase in the installed capacity of hydroelectric, wind and solar energy power stations (more 435 MW). EDP has also been promoting initiatives to improve energy efficiency and enhance the provision

of energy services on the demand side.

In terms of adaptation, EDP has been increasing the resilience of processes and assets to extreme weather conditions

The market factors that limited the energy sector performance in 2013 (see page 29), combined with favorable weather conditions for the operation of hydroelectric and wind energy power stations, particularly on the Iberian Peninsula, led to the overall improvement of the energy and environmental performance of supply of the EDP Group compared to 2012: strong increase in generation from renewable sources and reduction of absolute and specific CO_2 emissions.

2.2.1. TRADE IN CO2 EMISSIONS

The allocation of emissions allowances for the 2013-2020 period began to be partially made in auction, in accordance with Directive 2009/29/EC, which regulates the 3^{rd} phase of the EU ETS - European Emission Trading System. In the case of the EDP Group, the power stations covered by the EU ETS produced 16.6 Mton of CO_2 in 2013, which is an 8% decrease compared to 2012. Overall specific emissions fell from 0.323 tCO $_2$ /MWh in 2012 to 0.276 tCO $_2$ /MWh in 2013, due to the strong increase in generation from renewable origin.

EDP continued with the same strategy of CO_2 portfolio management as that adopted in previous years for coverage of exposure through the use of allowances and also carbon credits acquired in both the primary market and secondary market, minimising its exposure to market risk. Moreover, EDP has been promoting voluntary CDM projects (Clean Development Mechanism), particularly in Brazil.

2.2.2. CARBON DISCLOSURE PROJECT

The Carbon Disclosure Project is a project that has become a global benchmark in business reporting of direct and indirect CO_{2eq} emissions. EDP scored 97/100 in 2013 in terms of reporting and a B grade in performance, achieving the best score for reporting in Portugal and the fourth best in the universe of world electricity utilities. The document is annually published in November in www.cdp.net and can be consulted afterwards on www.edp.pt> sustainability> environment> climate change> carbon disclosure project.

The table shows the direct (scope 1) and indirect (scope 2 and 3) emissions, broken down by categories and calculated according to the methodology defined in Greenhouse Gas (GHG) Protocol.

The EDP Group calculated scope 3 emissions for the first time in 2013, through the "Corporate Value Chain (Scope 3) Accounting and Reporting Standard" of the Protocol, which defines a methodology for evaluating indirect emissions caused by the activity of the company upstream and downstream. The application of this new methodology resulted in a substantial increase in the value of scope 3 emissions reported in 2012, from 1.4 $MtCO_{2eq}$ to 24.9 $MtCO_{2eq}$, due to the inclusion of all materially relevant categories under this Protocol (see table). Scope 3 emissions in 2013 decreased to 17.8 $MtCO_{2eq}$, mainly due to the lower acquisition of power to other companies for distribution.

(1) Scope 3 met hodology changed in 2013

2.2.3. PROMOTION OF RENEWABLE ENERGY

EDP continued to focus on the use of renewable energy sources as an important vector of its strategy to fight climate change. It added approximately 435 MW of renewable energy production to its portfolio in 2013, which totalled 15,716 MW from renewable sources at the end of the year. The fact that 2013 was particularly favourable on the Iberian Peninsula in terms of hydrological and wind values also contributed to a strong increase in electricity generation from renewable sources: 41.7 TWh in 2013, compared to 33.1 TWh in 2012.

CO2 EMISSIONS AVOIDED

The use of renewable energy sources for electricity generation in the EDP Group has the environmental benefit of avoiding the use of fossil fuels to produce the same energy and hence reduce Green House Gases emissions. The strategy of investing in renewable sources in recent years has led to a progressive increase in CO_2 emissions avoided, defined as emissions that would have occurred if the electricity of renewable origin had been produced in conventional thermoelectric power stations. Around 31.7 million tons of CO_2 were avoided in 2013, 44% up on 2012 (more information in page 25).

2.2.4. ENERGY SUPPLY EFFICIENCY

Certification of the Energy Management System

EDP Espanha obtained the certification of the integrated Energy Management System and Environmental Management System, according to ISO 50.001 standard in the head office at Oviedo.

Additionally, the activity of EDP Empresa de Servicios Energéticos, S.L. was also certified.

The above-stated circumstances would also lead to a significant improvement of the electricity generated /primary energy ratio, compared with 2012 and despite the increased use of coal-fired power stations compared to natural gas combined cycle power stations. This improvement of the ratio increased the overall efficiency of the EDP Group power stations.

EFFICIENCY IN ENERGY SUPPLY

| | Unit | 2013 | 2012 | 2011 | 2010 |
|--|------|---------|---------|---------|---------|
| Primary energy from fossil origin | TJ | 170,383 | 197,389 | 192,654 | 176,167 |

| Global efficiency | % | 68.4 | 63.4 | 66.2 | 69.4 |
| (1) Not include Pecém and Trillo powerplant. | | | | | |

2.2.5. CONSUMPTION EFFICIENCY

The promotion of improved energy efficiency in consumption is another of the arms of strategy to fight climate change. In this context, EDP continued to develop a vast array of customer-oriented initiatives in the different countries where it operates, whether voluntarily or through the provision of energy services, which are described on page 68.

 $^{(1) \,} Pec\'{e}m \, Power plant \, has not \, been \, considered for the purposes of \, detailed environment \, information. The CO <math>_2$ emission was 876 kt. (2) Excludes fleet and consumption and loss of natural gas. This information is included in GHG emission on page 47.

2.3.1. MANAGEMENT SYSTEMS AND POLICIES

Decommissioning of Thermoelectric Power Plants

In recent years, EDP has been undertaking in Portugal the decommissioning of the three thermal power plants in the final stages of their service life, a total of 1,712 MW, with conventional steam turbine technology that mainly used fuel oil.

The renewal of its thermal plants requires special attention at this stage that includes the decommissioning, demolition and dismantling of the facilities and environmental upgrading of the site.

Work monitoring plans are defined in order to discover and minimize the associated environmental impacts and appropriate measures are taken in an attempt to offset those impacts where they are significant and cannot be minimized to acceptable levels.

The decommissioning of the Carregado Thermoelectric Power Plant began in 2013 and the decommissioning of the Setúbal Thermoelectric Power Plant is almost completed.

The latter process included the decommissioning of the well-known "Setúbal Greenhouses" that ensured the landscape recovery and integration of the new developments under construction. Continuity of this procedure is now ensured by a contract already agreed between the Institute for Nature and Forestry Conservation (ICNF) and EDP.

EDP is committed to the ongoing improvement in its environmental performance through its Environmental Policy, in particular by preventing pollution and minimising its impacts, meeting the requirements of environmental laws applicable to the company's different activities, and other voluntary commitments (www. edp.pt> sustainability> environment> environmental policy).

A corporate environmental management system (SIGAC) has been implemented and certified since 2008, according to ISO 14001. This system covers "the corporate management of environmental policies and strategic plans for the environment, environmental information and the environmental performance of the EDP Group organisations "This system regulates and promotes the harmonisation and extension of the environmental certification of facilities and activities, whether through the ISO 14001 standard or the European Community Eco-Management and Audit Scheme (EMAS).

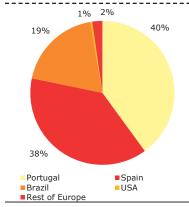

The effort to environmentally certify Group facilities and activities is mainly focused on the operating activities, with the design, construction and decommissioning phases managed according to their different specifications and controlled under the SIGAC. An exception to this rule is the electricity distribution design activity in Portugal, which is already certified.

The overall objectives of extending certification in 2013 have been met. The EDP Group currently has 76% of net installed power generation capacity covered by certified environmental management systems, corresponding to 75% of its generation facilities. The EDP Group has 82% and 29% of net installed capacity in Portugal and Spain, respectively, covered by EMAS system registration. In relation to electricity distribution, the EDP Group has 30% of substations' transformation capacity covered by certified environmental management systems, representing 25% of all substations.

Operational objectives and targets are annually defined, associated with the environmental management systems and incorporated in the Group's Environment and Sustainability Operational Plan. These objectives and targets of all generation centres with EMAS registration can be viewed at www.edp.pt> sustainability> environment> management systems, and in the relevant Environmental Statements.

ENVIRONMENTAL INVESTMENT AND COSTS

ENVIRONMENTAL INVESTMENTS AND EXPENSES

Environmental expenditure and investment amounted to EUR 101,481,000, up 26% compared to 2012. The increased investment is mainly focused on the generation activity and in particular environmental minimisation and offsetting measures arising from new hydroelectric projects in Portugal. A detailed breakdown by environmental item is provided in section 52, page 285

The company also incurred costs with fines and other penalties for non-compliance with environmental law in 2009, about EUR 236,000, in part explained by a failure to meet air pollution limits and effluent quality at the Sines power station and mainly due to compensations for spills that occurred in 2012 in Aboño powerplant.

51

2.3.2. WATER RESOURCES

Water is an essential resource for EDP's activity. A Corporate Water Management Policy was published in 2012, which aims to promote the sustainable management of this resource and also assess the exposure of the company's activities to water stress.

In the different Group's business, in electricity generation from thermal sources water is mainly intended for use in cooling circuits (99.6%) and it is subsequently returned to the environment at a slightly higher temperature. The temperature of wastewater in 2013 remained within the limits established in the various environmental permits.

The quality of effluent externally disposed of is periodically monitored in accordance with the provisions of the relevant environmental permits and law. Detailed information at www.edp.pt> sustainability> environment> performance.

As part of its operational management, EDP has implemented several initiatives at its generation centres to reduce water consumption and increase efficiency in the use of this resource, which have been contributing to the continuous improvement of their management, as seen in the indicators shown.

EDP publishes the Water Disclosure Project, since 2008, where the initiatives at course are described in greater detail. This report is available in October in www.cdp.net and afterwards it can be consulted on www.edp.pt> sustainability> environment> water> water disclosure project.

Global Water Tool

EDP Group used the Global Water Tool, developed by the World Business Council for Sustainable Development, to identify potentially water stress regions of its facilities. It concluded that the only EDP facility located in a water stress areas is the Sierra de Tercia Cogeneration Power Station in Murcia, which corresponds to approximately 0.07% of the Group's installed capacity. The power station was built to reduce the high pollution impact of the surrounding pig farms by consuming the residues of that industry and thereby reducing the large impact on the surrounding environment. It was equipped with the best water management processes, such as reusing effluent treatment condensate and reusing a part of the drained water for irrigating adjacent fields.

2.3.3. BIODIVERSITY

EDP MANAGEMENT IN PROTECTED AREAS

| | | Unit | Portugal | Spain | Brazil |

| Flooded areas | by reservoirs | ha | 3,074 | 260 | 0 (2) |

(1) The affected areas relating to wind farms are available at:

http://www.edpr.com/sustainability/environment-and-climate-change/biodiversity/protected-areas/

(2) Despite not being legally constituted (see online glossary), the location of these production centers requires a close monitoring, given the high ecological sensitivity of its location (see text).

EDP has defined a Biodiversity Policy since 2007, which sets out its management practices aimed at achieving an overall positive balance between the negative impacts associated with its operations and the measures it fosters and implements to minimise, offset and support the development of scientific knowledge. It annually publishes a biodiversity report, highlighting a number of ongoing initiatives. This report is available at www.edp.pt> sustainability> environment> biodiversity.

GENERATION ACTIVITY

Biodiversity is generally addressed in business operations in the certified environmental management systems. In the design and/or construction of new generation centres, in particular hydroelectric plants in Portugal and in Brazil, the focus is on minimising and offsetting the impact on biodiversity. The impacts mainly arise from the areas to be flooded, the physical barriers to be built and the substantial alteration from flowing water to standing water, creating changes and new ecosystem equilibriums. The construction of new wind farms is also closely monitored, especially the impact on birdlife and bat populations and the disturbance of habitats that have previously been those most protected by Mankind.

In Brazil, the hydroelectric power plants are located in the Amazon and Atlantic Forest and Scrublands biomes, which are considered biodiversity hot spots due to their ecological sensitivity, additional effort in close monitoring is required given the high degree of endemism and danger of extinction of species.

We highlight, in 2013, the hydroelectric power plants that follows:

BAIXO SABOR

This plant, located on the Special Protection Site and Zone of the Rivers Sabor and Maçãs - Natura 2000 Network – was the focus of a wide range of mitigation, offsetting and long-term monitoring measures. Most of the actions defined in those measures were implemented in 2013 and are at an advanced state of conclusion.

EDP was able to rely on the independent technical and scientific consultancy of CIBIO - Biodiversity and Genetic Resources Study Centre, Porto University, to ensure the ecological effectiveness of the measures to be implemented. CIBIO monitored the advance of the construction work (see highlighted box).

Technical-Scientific Consultancy Agreement

EDP established a scientific and technical consultancy agreement with CIBIO -UP (Biodiversity and Genetic Resources Study Centre, Porto University) under the principles of its Biodiversity Policy. The aim is to enhance the effectiveness of the biodiversity conservation measures on the regional scale in the context of sustainable environmental and socio-economic development for the local populations. This Agreement was initially established for the Baixo Sabor hydroelectric project, and it has since been extended to Foz Tua.

Fundamental requirements of the agreement:

- High technical and scientific capacity, ensuring the quality and appropriate articulation of baseline studies, the action programmes to be prepared and their subsequent implementation in the field;
- Independent review of the products of the partnership;
- Adaptive Management Approach, assuming that the technical and scientific knowledge is limited and regular adjustment is required, resulting from the learning generated by the programmes to monitor its eco-efficiency;
- Consistency in data collection from the different teams, made operational through an Integrated Information System, a repository of information that is intended to be guaranteed over a time period of several decades;
- Supplementary scientific research programme associated with this large-scale environmental experience, through which it may be possible to establish causal links between the project interventions and their consequences in environmental and socioeconomic terms.

The following initiatives are to be highlighted in this year:

- **Flora and habitat:** planting and increasing the density of local species (holm oak/zimbral and riparian vegetation) over about 270 ha, and specific interventions in surrounding areas with priority habitats to protect them and reduce fire hazards, over an area of approximately 600 ha.
- **Fauna:** creation and improvement of shelters for important species of bats; improving the habitat of the Iberian wolf through the promotion of natural prey, reducing human disturbance and reducing conflict with local populations; improving the habitat of rupiculous birdlife, and encouraging wild prey species, providing supplementary food (e.g. feeders for scavenger birds) and direct reinforcement of food in the breeding season to low productivity mating pairs; creation and improvement of reptile habitats (e.g. building walls) and amphibian habitats (e.g. ponds); and transfer of nymphs (aquatic insects) and the creation of protection zones for bivalve populations and resident fish without the influence of the future reservoir.

FOZ TUA

It is in the construction phase. The Foz Tua project is the result of a concession awarded by tender to EDP - Gestão da Produção de Energia, SA, under the National Programme for Dams of High Hydroelectric Potential (PNBEPH) launched in 2007 by the Portuguese state. It had previously undergone a strategic environmental assessment (SEA). The subsequent Environmental Impact Assessment (EIA) process identified its impact in detail, assessing its environmental feasibility and defining the relevant mitigation and offsetting measures.

In order to ensure the ecological effectiveness of the impact mitigation measures on ~457 ha of priority habitats, impact minimisation and compensation included a set of measures to maintain and/or restore habitats of the same classification, totalling 686 ha. These measures have already been planned and include measures to reduce the risk of fire, creating a network of visitable mini-reserves and preparing literature and a field guide for the vegetation of the Tua Valley. Habitat restoration is also directly related to other compensatory measures, such as those aimed at wildlife. The landscape restoration plan envisages the natural recolonisation of areas with conditions for colonisation by Rare or endangered of extinction species.

EDP also contributes 3.0% of the average annual net generation value to the Biodiversity and Nature Conservation Fund (a public fund). The creation of the Vale do Tua Regional Nature Park in 2013 guarantees that a significant part of those funds is directly invested in the region, upon the Protocol signed, in 2012, between the Regional Agency of Vale do Tua and EDPs Biodiversity Fund for the concession/exploration period.

RIBEIRADIO-ERMIDA

No significant negative impact is envisaged for the Vouga Site, so the planned measures comprise the reconversion of the habitat downstream of the future dam, which are in the design/establishment phase: removal of Sernada weir; building a passage way for ichthyofauna at Carvoeiro weir; plan for collecting fish downstream of Grela weir, subsequent transport and release into tributaries downstream and upstream of the dam.

VENDA NOVA III AND SALAMONDE II

The environmental impacts are of much less significance due to the nature of the projects. However, several significant environmental factors are evaluated and undergo minimisation, offsetting and monitoring action.

The Integrated Plan for the Control of *mimosa*. (an invasive specie) with the common name of mimosa) and the restoration of *habitats* are of note at Salamonde II. These were initiated during the construction stage and will extend to the operating stage, covering a total area of 60,000 m² over the two stages. In addition to this Plan there is a pilot project to minimize and control the erosive effects on the zones of the banks of the Salamonde and Caniçada reservoirs between high and low water levels.

Santo António do Jari and Cachoeira Caldeirão

Both plants are located in Brazil, in the state of Amapá, and are currently under construction. They jointly cover an area of 87 km² in zones of high biodiversity, 42 km² and 33.5 km² respectively, since they are located in the Amazon region, which is considered the world's most biodiverse region. Moreover, Cachoeira Caldeirão also contains 14.5 km² in protected areas: 3 km² in the Amapá State Forest (FLOTA) and 11.5 km² in the Private Seringal Triunfo Nature Reserve.

One highlight at Santo António do Jari, besides the monitoring and rescue of fauna, is the development of the programme to save germoplasms and reforestation with native species, a measure related to relocations, where EDP pledged to rebuild the new environment that will be like that of the original community.

WIND FARMS

The offsetting and monitoring of the impact arising from the construction and operation of wind farms is implemented through partnerships established with environmental NGO's and focus mostly on birds and bats. However, many of the initiatives directly benefit other groups of local fauna.

The partnership with the Castilla y León Natural Heritage Foundation (Spain), for example, has some notable projects for the protection and restoration of habitats:

- Creation of a wetland system that provides shelter and food for migratory birds crossing the Iberian Peninsula, which also benefits many amphibians and reptiles;
- The restoration of several natural ponds at Carcedo de Burgos;
- The building of an environmental interpretation centre at Aliseda de Tormes;
- The adaptation of the trails at Lagunas glaciares de Neila Nature Park and signage with rules for public use;
- Monitoring the Dupont's Lark in the area of Medinaceli (Spain) and the monitoring, conservation and improvement of habitats of the Black Stork, Black Vulture, Spanish Imperial Eagle, and other birds of prey in the province of Ávila (Spain)

DISTRIBUTION ACTIVITY

In Portugal, continuity was given to the 2013 Environmental Promotion Programme, which among other environmental projects, included the PENAS Project - Specific National Programme for Wild Birds. In 2013, with an overall budget of EUR 609,000 and which included:

- The correction of potentially dangerous power lines; 38.8 km of power lines of a planned total of 68.8 km were corrected;
- White stork nests; work was carried out on 166 nests;
- Assessment of the working life of the anti-electrocution equipment installed in 2012;
- Review of the risk maps for the targeted species: imperial eagle, black vulture, Bonelli's eagle and osprey; and
- Conclusion of the great bustard collision charter that will be available as a first version during the first quarter of 2014.

The completion of the construction work of the substations of North Gijón and Rojales is to be highlighted in Spain, both with environmental monitoring and improvement projects for the Genestoso-Leitariegos and Beleño-Camporriondi distribution lines. The latter are included in areas where brown bears are potentially present. The brown bear is an endangered species, and the works had to be suspended as replanning was required.

OTHER INITIATIVES

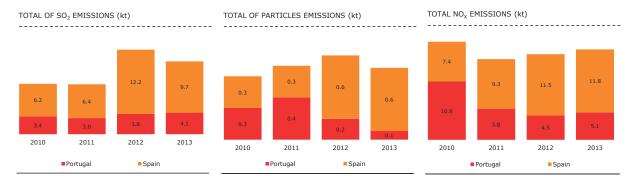

The Fundación HC Energía undertakes general projects for the rehabilitation of protected natural areas, which include planting trees, fish restocking in Asturian rivers and collaboration with the Brown Bear Foundation.

The new Environmental Impact Assessment law in Spain (Ley 21/2013, 9/12) means that new projects shall provide for the implementation of compensatory measures when located within the Rede Natura 2000 network. This law establishes the creation of Nature Conservation Banks to generate credits to which project developers may voluntarily contribute as a mechanism of compensation, repair or restoration of the net loss of natural assets, in accordance with regulations.

2.3.4. AIR EMISSIONS

One of the most significant environmental aspects of EDP Group business activities is air emissions arising from combustion to generate electricity by thermal means. These aspects are continuously and/or periodically monitored in order to verify compliance with the values established in legislation.

The reduction of SO_2 and particles emissions occurred due to market factors, which influenced the performance of the energy sector, and an increase in the renewable energy generation. The details of air emissions by facility can be consulted at www.edp.pt> about edp> business units> electricity generation.

2.3.5. WASTE AND BY-PRODUCTS

Waste management by EDP follows the procedures of the environmental management systems, which continually seek to reduce their production at source and their hazardous nature, as well as increase the percentage of waste channeled for energy recovery. The total waste sent to final disposal reduced significantly due to less thermal generation.

EDP's generation activities produce large quantities of fly ash and slag from the burning of coal and also gypsum from the desulphurisation of air emissions, also at coal-fired power stations. The byproducts sold during the year increased significantly due to the new markets found.

Equipment contaminated with PCBs at concentrations below 500 ppm may remain in operation until the end of its useful life, under existing legislation. However, EDP is bringing forward its disposal, giving priority to this type of equipment in equipment replacement plans. 95 tons of waste containing PCBs were sent for final disposal in 2013

2.3.6. PREVENTION AND EMERGENCY RESPONSE

EDP has procedures for the identification and handling of near misses. This operates as a preventive process, aiming to prevent and minimise potential negative impacts. All facilities also have emergency plans, which identify the risks that can occur, how to act and the human and material resources available on-site. They ensure that employees or contractors are aware of these practices. The facilities test their emergency plans through regular drills (additional information in page 62).

An environmental "near miss" occurred at the Setúbal Power Station in 2013, during a fuel oil transfer operation. No damage to the surrounding environment occurred because the implemented mechanisms allowed the situation to be managed.

2.4. RESPONSIBLE EMPLOYER

⁽¹⁾ Pecém powerplant has not been considered for the purposes of detailed human resources (135 employees) (2) Includes information regarding na expatriate employee, presently in the People's Republic of China.

EDP makes the commitment to its employees to combine ethical conduct and professional objectivity with giving merit to work, promoting the development of skills and merit and the articulation of the balance between personal and professional life.

The human resources policies cover areas such as attractiveness, enhancement and development, recognition, diversity, work/life balance, health and safety, innovation, opportunity management, volunteering and personal data protection.

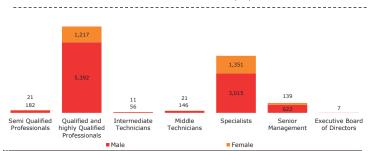

The details of the business organisation model, employee benefits and initiatives in progress, among other information on the social performance of EDP are available in the Social Report. This report is available at www.edp.pt> edp> about edp> human resources.

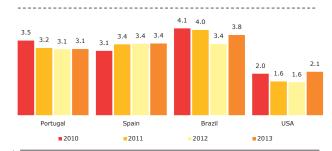

The number of employees decreased slightly from 12,275 to 12,179. This reduction is due to the number of employees retiring in Portugal, only partially offset by new hires. On the other hand, there was a slight increase in the business of both EDP Renováveis and in Brazil, justified by organic growth. Turnover in 2013 increased slightly from 5.6% to 6.2% due to increased number of employees leaving the Group. In 2013, 10 local hiring for senior management positions occurred, in a total of 614 contracts for permanent staff.

DISTRIBUTION OF EMPLOYEES BY PROFESSIONAL CATEGORY (No.)

ABSENTISM RATE BY COUNTRY (%)

LABOUR RELATIONS

EDP has a regular relationship with official employees' entities and representatives – Workers' Committees and Trade Unions - for the introduction, modification or termination of standards or regulatory procedures, and as regards negotiations for the review and update of legal regulations.

73 individual meetings with unions and 30 meetings with all the unions present were held during the year to ensure the adequacy of internal regulations and legislative standards in Portugal.

Meetings with social partners and trade unions representing about 61% of employees were and continue to be held in order to negotiate the new Collective Labour Agreement (CLA) for EDP in Portugal.

During 2013, there was a flick of pressure on labour relations within the negotiation process of revising the Agreement of HC Energía, a process which was concluded with no incidents. In the remaing geographies there was no kind of labour dispute for internal reasons of the company.

The collective legal instruments in place in the countries where EDP operates do not include a specific clause to set the deadline for communicating operational changes to company employees that may impact on them. Nevertheless, EDP announces organisational changes that impact on employees, which go beyond the requirements of national labour law in some countries. Communications are sent to unions, workers' committees and employees in Portugal at least 30 days beforehand. The communication of organisational changes in Brazil is initially made by the unions, followed by communication by EDP of the changes relative to each phase of the negotiations and a deadline is set for the clarification of doubts and inquiries. The minimum period in other locations is defined in national law.

2.4.1, ATTRACTING AND RETAINING EMPLOYEES

ATTRACTIVITY

EDP has promoted the development of some practices and consolidated its relationship with institutions which are its main sources of recruitment. It has also established partnerships with various national and international associations and communities, including Best - Board of European Students of Technology and CEMS - Community of European Management School.

The following attraction programmes developed in 2013 are of note:

- IST Management Challenge, a strategy and management competition, supported by EDP and organised by SDG Simuladores e Modelos de Gestão, in partnership with the Instituto Superior Técnico, of the Lisbon Technical University. Around 150 students took part, with 8 teams of students qualifying for the Global Management Challenge 2014, where they will be supported by EDP;
- Global Management Challenge, a business simulation organised by SDG, where each team must run
 a business with the aim of getting the highest price for its shares on the Stock Exchange. In the 2013
 edition, about 500 teams took part and EDP supported 20 of them, one of which won the National Final
 of the competition and will represent Portugal in the International Final of the 2013 edition, to be held in
 Sochi, Russia;
- PowerTrade Universidades, a game that simulates the electricity market in a competitive
 environment, directed at final year students of Engineering, Management and Economics Master's
 Degrees. The qualifying teams will present a business case of one of the Group companies at the
 simulation stage, which is then presented to an EDP jury. The members of the winning team of the 2013
 competition, from Instituto Superior Técnico, were awarded work placements in EDP. Work placements
 were also awarded to other participants who stood out for their performance, given the potential
 identified in the 2013 competition;
- FabLab Challenge, a competition aimed at final year students of renowned secondary school or
 vocational technical courses. The students are challenged to create a renewable and/or energy efficiency
 project, developing a prototype of it in EDP's FabLab. The winning team of the 2013 competition, from
 the electrical systems technical course of Rio Maior Vocational School, was awarded apprenticeships;

- Workshop "Promover o Saber", Workshop, an initiative designed by EDP with the aim of contributing
 to the development of skills among students of technical courses, secondary schools or renowned
 vocational schools, specifically in preparation for entering the labour market. 5 sessions were held
 during 2013 involving about 80 students from various schools in Portugal;
- **EDP University Challenge**, a college annual contest that encourages interaction between universities and companies through the allocation of scholarships. In 2013, eight students were awarded, three in Portugal and five in Spain;
- **Partnership with CEMS** Community of European Management Schools, under which are annually offered internships in different geographies for the students of the Master of International Management. Over the past two years, this partnership has resulted in the hiring of 1 employee.

RECRUITMENT AND SELECTION

EDP considers in the recruitment and selection process not only the specific skills defined for the role but also behavioural skills, on the basis of organisational culture. The implementation of this process has been based on the development of practices, the highlights of which in 2013 were:

- Programa ON TOP EDP Recruitment Program aims to attract and capture young people with potential, making EDP known to students and promoting the company's proximity with the school community. In Portugal, the company was present in 9 job fairs in benchmark universities and in Talent City, which currently has more than 48,000 users, and it also lectured to several key segments. In Brazil, it allowed the business proximity to 44 trainees, of whom 27% were admitted;
- **EDP** *Trainee Program* is a recruitment program of young professionals, preceded by a trainee program aiming to provide young people with an across-the-board view of EDP over 20 months. It rests on three fundamental pillars: training, job rotation and project development. The first edition ended with the hiring of 15 young high potential people for the staff of EDP. The 2nd edition of the programme will be Iberian in scope and will have 25 vacancies.

Technical Academy of the Energy Sector

With the aim of encouraging the "know-how", according to the different work profiles of a technical nature and to assign qualification certificates, EDP set up the Technical Academy of the Energy Sector, along with other business partners and the Portuguese Institute of Employment and Professional Training.

This project will ensure the hiring of trained personnel to carry out the work in power distribution networks with the required high quality standards, foster the creation of qualified employment and create conditions to confirm the conversion of professionals in the areas of energy, through certification of technical skills acquired.

INDUCTION AND INTEGRATION

EDP has devoted special attention to the arrival of new staff, fixed-term employees, interns and expats, ensuring the best conditions so that the induction and integration of each employee has a positive impact on their professional life in EDP. The 205 new employees who joined the company in 2013 in Portugal have undertaken a number of activities included in the Induction and Integration Programme over their 1st year, aimed at imparting knowledge about the business, the assimilation of the values and culture and promoting networking that enhances synergies. These activities of a corporate nature are complemented by specific initiatives in each business area where the employee is located.

WORK PLACEMENTS IN EDP

EDP conducts annual recruitment and selection processes to award work placements, enhancing the identification of future employees with growth potential, who may contribute to the development of the business. 969 work placements were organised in 2013. 680 of those were school/curricular placements, 239 were vocational work placement and 50 were summer work placements.

CAREER DEVELOPMENT

An integrated career management model was launched in 2013 in order to identify, describe and publicise the set of functional profiles/families existing in the company, aligning them with the value chain of the business. This model also aims to create a framework to support decisions on the development and mobility of staff, allowing people to adapt to business needs and serving as input for other human resource management processes. It began in Portugal and it is planned to extend its scope to other geographical areas during 2014.

MOBILITY

Internal Mobility is considered by EDP to be strategic, as it allows culture and knowledge to be strengthened while promoting interaction between employees with different backgrounds and experiences, valuing the employee by enhancing their skills and preparing them to take on new challenges and responsibilities. Globally, in EDP, 823 cases of mobility (of which 67% intra-company, inter-company 31% and same geography and geographies between 2%), corresponding to 7% of all employees were registered. About 70 campaigns were opened, in Portugal, with a very diverse range of vacancies in varied functional areas.

EMPLOYEE SATISFACTION

Valuing experience

The 3rd edition of the Valuing Experience Programme was held in 2013, which is addressed at employees with over 30 years service in the EDP Group, and which aims to recognise their accumulated experience, enhancing knowledge sharing in the organization. The Programme has involved more than 900 employees, resulting in 500 initiatives to share experience and knowledge of the companies and the Group. It also aims to extend this initiative to more than 3,000 eligible employees in EDP.

In February 2013, the Valuing Experience Programme won an award at the «SEDES 2012 Excellence» awards, page 17.

EDP conducts employee climate studies every 2 years to collect, record and analyse the opinions and motivations of employees and, based on the findings, propose actions to improve the areas with the greatest potential for improvement and development. A study of employee satisfaction was conducted in 2013, covering the entire population of the company. Levels of participation in the study were 89%. The slight decrease in the Overall Satisfaction Index from 81 in 2011 to 80 points in 2013 is due mainly to decreased levels of employee satisfaction in Europe, related to external factors outside the company, in particular the negative economic environment that has assailed Europe in recent years. In addition to the study of the internal climate, external satisfaction studies of employees are conducted annually by various businesses in order to complement the analysis carried out internally and follow the best international practices in human resources.

2.4.2. VALUE AND DEVELOP

TRAINING

Coaching - people development tool

Coaching in EDP develops through 3 different practices:

- Leadership style: preparing and making leaders aware of coaching for the management of their teams through the design and implementation of specific training for different leadership levels;
- Internal Coaching: launch of the Internal Coaching Programme certifying employees as coaches to be available for the development needs of different segments
- External Coaching: pool de external coaches, identified according to criteria of excellence, experience and diversity, ensuring the best fit with the Executive Coaching goals and fit with the coachee.

EDP undertook a reorganisation of the training area, centralising the training management activities and documentation and specialised information services in the EDP University (UEDP). The training for non-university graduate staff prior to 2013 was based on the catalogue of training solutions managed by one of the group companies. In 2013, with the centralisation of all training activities in UEDP, the work began to launch in the UEDP schools a structured training offer addressed to non-university graduate staff, which is expected to be implemented in 2014.

There has also been the full implementation in Portugal of the Campus Online platform and additional Content Management and Pedagogical Support services, enabling the growth of distance learning. This focus aims to allow flexible access to training, learning according to individual rhythms and capacities, self-education, the reduction of costs and facilitate knowledge sharing and interaction among EDP employees.

The preparatory work for the qualification of technicians was also developed, in activities considered a priority for the operation of the electricity distribution grid and training

courses were held to train trainers in order to facilitate the creation in the market of educational supply in this field.

ASSESSMENT OF POTENTIAL AND PERFORMANCE

The Assessment of Potential and Performance is a structuring tool for the management of people, which is essentially based on two dimensions: Skills Assessment, which considers the behaviour that contributes to the actual achievement of the vision, values, principles and strategy of the company and the Assessment of Goals/KPI that measure the actual contribution of the employee to the results.

In 2013, the assessment was extended 270° to all senior managers and operating technical managers, reinforcing the importance of feedback from various stakeholders. This model went on to have an e-learning course available to all employees in 2013, allowing in a quick and affordable way to train supervisors and employees regarding the process and its implementation.

CAREER AND SUCCESSION

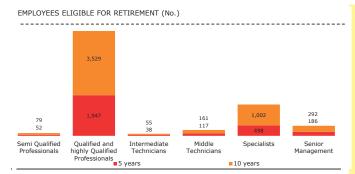

The succession plan of the company was created in 2009. It identifies potential successors for the senior management roles of the EDP Group and it constitutes a management and decision support tool that is annually updated on a multi-company and multi-country philosophy and with the active involvement of the Executive Board of Directors.

LEADERSHIP

EDP has consistently invested in training and support for the exercise of leadership. The "EDP Leader Guide" was updated in 2013 in the light of current practices. It is a manual that gathers information about the EDP Leader profile and key Human Resources processes. The Lead Now Programme was also designed and implemented. This programme is aimed at leaders recently appointed to senior positions and it aims to support the transition, raising awareness and adjustment to a new role in the team.

EXIT MANAGEMENT

795 employees left EDP in 2013, with an average age of 49 years and an average seniority of 23 years. 2,873 and 5,136 employees of the current total of 12,179 are eligible for retirement in the next 5 and 10 years, respectively.

For a number of years the company has offered outplacement support to employees who have taken early retirement. Over a period of one year employees are supported in reflecting, analysing and defining new and interesting life proposals.

2.4.3. REMUNERATION AND BENEFITS

In terms of compensation and benefits the company recognises and establishes the principle of internal equity and external competitiveness, i.e. it seeks to differentiate according to the contribution/remuneration relationship, positioning itself as a reference in the market in terms of remuneration policy.

Certificate of Retirement Responsibility

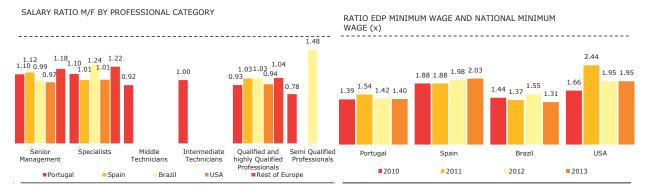

The Portuguese Association of Investment Funds, Pensions and Wealth has promoted the 1st round of awards of "Certificates of Retirement Responsibility", valued by the Portuguese Insurance authority. The aim is to identify the pension funds that would ensure adequate supplementary values of the values of the pension to be drawn after the period of active life.

The criteria for the award of the "Certificate of Retirement Responsibility" include:

- The recognition of the principle of universality, i.e. the inclusion of all workers in access to benefits attributed by the pension fund.
- The allocation of rights acquired by the pension plans to certify, which promotes labour mobility and reduces the risks of not achieving the pension expectations created among workers.

EDP was awarded the certificate as it is one of the companies that develops good market practices in a context of promotion of the habit of saving for retirement.

On the other hand, it recognises the merits of its employees, either by assigning Prize Distribution Results and Merit awards. Concerning social benefits, EDP highlights retirement and health care protection: pension plans and medical plans for all employees. Additionally, concerning the family axis, EDP helps supporting the studies of employees' children.

2.4.4. DIVERSITY AND EQUAL OPPORTUNITIES

DIVERSITY

Under the approval of the Diversity Policy in 2013, EDP made a public commitment to (www.edp.pt> about edp> principles and policies):

- Promote mutual respect and equal opportunities vis-à-vis diversity;
- Recognise differences as a source of strengthening human potential and valuing diversity in the organisation, in management and strategy;

 Adoption of positive discrimination measures and raising awareness internally and in the community with a view to the actual implementation and effectiveness of the diversity policy.

An Action Plan was also approved with a set of measures to implement in the three year period 2013-2015, consisting of 4 areas in terms of diversity (gender equality, people with disabilities, nationality and integration of socially vulnerable people), already partially implemented.

In terms of Gender Equality, taking into account that the number of women is 23% of all employees (22% in 2012), measures were developed in order to support the career development of women, including:

- Membership of the European Professional Women's Network EPWN, which promotes the professional development of women through networking and sharing of knowledge;
- Participation of female employees in Corporate Development Programmes, ensuring at least the proportionality that exists in the target audience.

Also in this field, EDP joined the Business Forum on Gender Equality (IGEN), promoted by CITE - Commission for Equality in Labour and Employment, where it also made a commitment to promote good practices in gender equality.

In relation to disabled persons, the EDP Group currently has 197 employees with some level of disability; a measure was launched for the identification of vacancies for external recruitment that can be occupied by such persons.

Another measure developed in 2013 was the introduction of the theme of diversity in the training courses on organisational culture aimed at managers.

In parallel, a question related to Diversity and Gender Equality was included in the Organisational Climate questionnaire, with 84% of employees agreeing or totally agreeing that "People of any age, sex, race, colour, sexual orientation/religion/politics are treated with the same fairness and respect in EDP".

2.4.5. BALANCING WORK AND FAMILY LIFE

EDP is a responsible company and accordingly it promotes balance between the professional and personal life of its employees, aware that the professional, personal and family pillars all have great importance in people's lives.

EDP has developed the Conciliar Programme since 2007, in accordance with this commitment. This is an initiative that involves the gradual implementation of a set of policies and measures.

As a result of the work undertaken and the diversity and quality of the implemented measures, EDP is certified as a company promoting work-family balance and equality, by Fundación Más Familia. EDP Portugal, where 57.3% of Group employees work, obtained this certification on 18 January 2013. HC Energía, Naturgás and EDP Renováveis renewed the certification obtained between 2011 and 2012.

CORPORATE VOLUNTEERING

A fundamental pillar of EDP's Conciliar Programme, the Volunteering Programme mobilised the participation of 1,869 employees in EDP volunteering initiatives in 2013, corresponding to 13,506 hours of volunteer service during working hours. The Volunteering Programme contributes to strengthening team spirit, fostering a culture of social responsibility and corporate citizenship and it is a way of deepening the relationship between the company and communities. Additional information on this topic can be found on page 78.

2.5. WELL BEING, HEALTH AND SAFETY

EDP annually evaluates its performance vis-à-vis the strategic objective: "Zero accidents, no personal harm". EDP has built a culture of prevention and safety to ensure compliance with this commitment and it has adopted an occupational health and safety management system, based on the OSHAS 18001 standard, following the guidelines of the International Labour Organization and cemented in internal regulations.

The Corporate Safety Management System (CSMS) of EDP reflects its Safety Policy and reinforces the principle that occupational health and safety issues are managed according to common and harmonised criteria in the group companies and extended to service providers' employees.

Each business unit locally adopts the Corporate Management System directly or takes it as a reference to develop its own safety management system, which is stand-alone or integrated with the environment and/or quality fields, taking into account the business activity.

The themes of prevention, safety, health and the wellbeing of employees are covered in the agreements concluded with trade unions.

Employees are involved in the management of occupational health and safety through representation on safety committees and sub-committees. During 2013, 540 meetings were held, with worker representativeness of 91%.

Further details of the most relevant activities and commitments made by the company can be found at www.edp.pt> sustainability> occupational health and safety.

2.5.1, HEALTH AND WELL BEING OF EMPLOYEES

EDP provides occupational and non-occupational health care under its commitment to the well-being, health and safety of employees. The "medical assistance" benefit is provided in all existing companies/countries for reasons related to employment contracts, general agreements and other applicable legislation, in particular fiscal and para-fiscal law. How this benefit is provided and its scale differs between companies. It extends to immediate family by rule, although the subsidization is lower than for employees.

An Alcohol Prevention and Control Policy Programme to inform and raise awareness was sponsored aiming the reduction of non-occupational hazards. 98 training sessions were conducted involving about 4,949 employees of EDP group companies in Portugal and employees of external service provider companies of the generation and distribution segments.

The company, aware of the importance of road accident prevention to the safety of its employees when travelling as part of their duties or commuting to work, has an ongoing road safety campaign that includes making information available and defensive driving and off-road driving courses.

2.5.2 REDUCING ACCIDENTS

The implementation of the company's annual occupational health and safety programme was based on a set of actions aimed at preventing the occurrence of occupational accidents. The annual programme led to a reduction in the frequency rates and severity of accidents and

Occupational Stress Management Programme

A study of the determining factors of psychosocial risks began in 2012, to act preemptively in reducing health risks and with the aim of launching an occupational stress management programme in EDP. This study is conducted in partnership with the Preventive Medicine Institute of the Lisbon School of Medicine.

The aim of this programme is to equip employees with the tools for balanced stress management. The diagnostic phase occurred in 2012, covering a sample of about 5,000 people, and the 2nd and 3rd phases occurred in 2013, in a universe of about 5,800 people.

The results of the psychosocial risk assessment programmes of Portugal and Spain do not indicate psychosocial determining factors in the companies which could point to the existence of health and safety hazards for employees.

occupational diseases, and it included the education and training of the employees of EDP and service providers, the constant evaluation and control of occupational hazards and the implementation of an internal and external audit and inspection plan vis-à-vis the premises and construction projects of EDP.

Unfortunately, we mourn the occurrence of 4 fatal accidents involving EDP employees as a result of aeronautical, electrical, trapped and road accidents.

Regarding service providers, there were the occurrence of eight fatalities, of which five in Portugal, two of electrical nature, one by falling from height, one from an object fall and one from an object impact. Three occurred in Brazil, one of electrical nature, one by falling from height and one fall from a tree. There were 42 occupational accidents involving EDP employees (4 more than in 2012), there were 224 occupational accidents involving one or more days of absence among the group of service providers employees. 197 cases of near misses were reported. These numbers are associated with construction works of big hydroelectric power plants and with the high turnover of service provider's employees.

7 fatal accidents of electrical origin were recorded on EDP premises or equipment, involving persons unconnected to the company's business activity, which are related to situations of civil works in the proximity of power lines in tension (5) and intrusion (2).

TRAINNING AND AWARENESS

The analysis of registered performance reflects, on the one hand, the results of actions and initiatives taken during the year in strengthening preventive action among services providers, particularly in the fields of training and awareness, assessment and control of risks and the increase of audits programme and inspections and, secondly, the need for priority actions for continued realization of thematic workshops on prevention and safety with the participation of service providers.

EDP is committed to ensuring that employees and service providers have adequate conditions for sustainable development in terms of occupational safety.

In harmony with this commitment, EDP employees and the employees of contractors and subcontractors are provided the necessary training for carrying out their tasks in safe conditions. The employees of EDP and of contractors and subcontractors, in addition to these training courses, take part in activities that promote safe behaviour and prevent the specific risks of certain activities or facilities.

489 first aid training courses were held for the employees of EDP and contractors and subcontractors. Moreover, 708 information courses were held, in collaboration with firefighting services, vocational and secondary schools, employers' associations and trade unions, on procedures to follow when fighting fires in electrical installations, in gas networks and systems or locations in their vicinity, as well as the precautions to take when handling electrical equipment.

Various initiatives were organised to inform and raise the awareness of civil society on the generation and distribution of electricity and the care to take when in the vicinity of electrical infrastructure.

PREPARATION FOR EMERGENCY RESPONSE

241 simulation exercises concerning the management of emergency situations (41 in Portugal, 107 in Spain, 31 in Brazil, 37 in the USA and 25 in other countries) were performed in various industrial and administrative facilities and active construction sites. The aim of these drills was to test the effectiveness of the respective emergency plans. External entities were also involved in these drills, such as civil defence forces, fire services and the police and public safety authorities.

The performance of suppliers is essential to the success of the EDP Group. The relationship based on trust, collaboration and the creation of values shared with suppliers results in the joint capacity to innovate, strengthen Corporate Social Responsibility policy and improve the quality of service provided to customers. This significantly contributes to EDP keeping the leadership in its areas of operation and it is a factor inducing competitiveness in the markets in which it operates.

The EDP Group's overall procurement activity in 2013 totalled EUR 2,661 million. Negotiation savings exceeded EUR 200 million. These figures do not include the purchase of fuel for energy production or the purchase of electricity in the market.

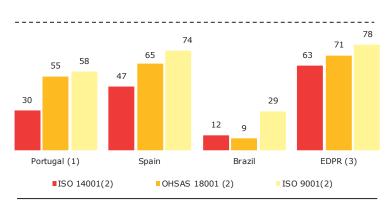

2.6.1. OVERALL PROCUREMENT

LOCAL SUPPLIES

| | Unit | Group | Portugal | Spain | Brazil (1) | EDPR EU | EDPR NA |
|---------------------|----------------|--------|----------|-------|------------|------------|------------|
| Suppliers | | | | | | | |
| Suppliers | # | 19,034 | 5,726 | 2,994 | 3,868 | 2,322 | 4,124 |
| Local | % | 97 | 93 | 98 | 99 | 97 | 99 |
| Foreign | % | 3 | 7 | 2 | 1 | 3 | 1 |
| Turnover | | | | | | | |
| Turnover | 000€ | 2,661 | 1,090 | 235 | 387 | 518 | 431 |

| Foreign | % | 8 | 6 | 5 | 0 | 24 | 2 |
| (1) Include EDP Ren | ováveisBrasil. | | | | | | |

Due to the size, nature and recurrence of many of the EDP Group's acquisitions, there is a very positive influence on the local economy by promoting the quality and competitiveness of economic agents in the regions where it is present. The distribution of this activity follows the Group's business in the countries where it operates. The volume of purchases from local suppliers accounted for approximately 92% of total procurement in 2013.

CERTIFIED SUPPLIERS (%)

- $\textbf{(1)} \ Number of suppliers registered with the Corporate Supplier Registration System of the EDP Group. \\$
- (2) No information is available of EDPR NA.
- (3) Include only EDPR EU.

In 2013, about 60% of suppliers delivering over EUR 75,000 in goods and services were registered on the Suppliers Registration System. Of these, 55% have quality management systems that have been certified by independent parties. For environmental management and safety systems, 31% and 45% of companies are certified, respectively.

2.6.2. FUEL

EDP joined **Bettercoal**, an international initiative to promote best practices and the integration of sustainability principles in the coal supply chain.

Bettercoal is a non-profit association created in 2012 by a group of companies of the electricity sector. Its mission is to promote the continuous improvement of environmental, social and ethical practices in the coal supply chain through the involvement of the different interested parties in complying with a code of conduct.

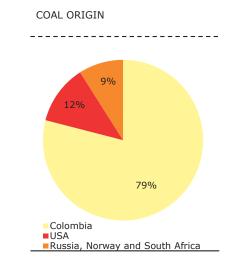

This code requires that mining companies comply with the rules of performance and conduct, the use of management systems, and there is the reporting and disclosure of good ethical practices, compliance with human and labour rights, health and safety prevention, and the management of social and environmental impacts.

The practices and performance of the mining companies will be audited in order to ensure compliance with the code and, if necessary, corrective and improvement plans will be established.

The members of Bettercoal are currently, and besides EDP, Dong, DRAX, EDF, Enel, E.ON, Gas Natural Fenosa GDF Suez, RWE and also Vattenfall.

In 2013, EDP purchased EUR 1,069 million in natural gas to operate in the spanish market and 266 million for the Portuguese market. Purchases of LPG amounted to EUR 1.66 million exclusively for the portuguese market. In respect to coal, the acquisition in Spain amounted to EUR 66 million and Portugal to EUR 202 million.

In the past year, EDP maintained its strategy of sourcing coal primarily through long-term contracts, and buying on the spot market to ensure coverage of specific needs. This sourcing was undertaken with the best practices of the market as benchmarks, such as SCoTA (Standard Coal Trading Agreement) for coal. In order to minimise risks, EDP has also sought to procure coal with shipping included or transportation and delivery to site, using the API#2 index as a reference for the price of imported coal, performing hedging operations through derivatives transactions.

The qualification of counterparties is undertaken before the contracting phase. This involves an economic, financial, logistics, environmental and social evaluation. In relation to coal, the counterparties are primarily headquartered or have representation in the UK, Ireland and Switzerland, although 79% of the coal purchased by EDP in 2013 originated from Colombia (67% in 2012). Moreover, only 52% of the coal was purchased directly from producers. The rest was acquired on the market from various types of intermediaries. Accordingly, counterparties are assessed through a combination of procedures, including the identification of producers with OHSAS and ISO certification and Sustainability Reports, and traders with advanced CSR policies, those listed on the 2013 DJSI electricity and form part of the Bettercoal initiative. EDP also joined Bettercoal in November 2013, aiming to promote progress in the implementation of mining best practices by strengthening local audits and the widespread standardisation of assessment criteria. (see highlight box).

2.6.3. MANAGEMENT SYSTEMS

EDP has an Integrated Supplier Management System using Supplier Relationship Management (SRM) tools. The adopted model is based on five different phases: Registration, Selection, Evaluation, Management and Development. This relationship solution fosters proximity with the different partners, permitting the sharing of methodologies and promoting closer relations between both parties. The suppliers' familiarity with the company's business fosters better purchase terms and optimises the entire supply process. EDP is implementing in this area a risk analysis method for strategic suppliers that allows it to identify critical situations or supply disruptions in time and ensure the continuity of contracted supplies.

The system for finding, selecting and segmenting suppliers of the EDP Group – the Supplier Registration System (SRF), enables it to take clear, transparent, efficient action, fostering win-win partnerships.

The SRF is based on a philosophy of centralisation and sharing of available information in the suppliers' database, which is centrally checked, managed and maintained and is made available to the members of the community – Achilles. In 2013, this database reached 23,059 registered companies, more 13% than in 2012.

Registered companies also enjoy a number of advantages, such as:

Equal opportunities for equivalent/separate business areas;

- Increased business opportunities;
- Guarantee that their customers have quick and reliable access to the information;
- Single registration visible to several companies;
- No need to present various kinds of documentation when applying for contracts or pre-tender qualification.

For registered suppliers, SRF has a questionnaire on Corporate Social Responsibility, which aims to evaluate suppliers practices in these matters and support procurement management teams in operational decisions. 47% of the registered suppliers in this system and with contracts with EDP, submitted their answers on the questionnaire.

ELECTRONIC TRADING

Sinergie - Supply Integration for Energy (www.sinergie.edp.pt) is a corporate-wide web platform fully developed by the EDP Group procurement team. It aims to streamline the relationship between the procurement areas of the Group and the market in a simple and secure manner.

In the events of EDP Group Electronic Queries, suppliers may submit their proposals online in a simple and direct manner that optimises time through Sinergie. Electronic queries are only available to suppliers registered in the Suppliers' Registration System of the EDP Group.

Electronic trading allows the EDP Group's suppliers to assess their performance against the market in real time, and take part in web-based trading from anywhere in the world. Electronic trading also allows suppliers to achieve, in a swift manner, an increase in their sales to the EDP Group.

ASSESSMENT

The EDP has developed formal mechanisms for assessing their supply chain: o Sistema de Avaliação de Fornecedores (SAF), in Europe, e o Índice de Desempenho de Fornecedores (IDF), in Brazil. These systems aim to mitigate risks and improve performance in the supply chain. Consequently, the evaluation systems optimize the selection of suppliers and encourage their commitment to the best international practices and procedures.

Thus , both the SAF as the IDF , although with particular variants, allow the evaluation of the supplier performance in the areas of Certification , Innovation , Logistics , Sustainability and Quality through specific forms, with the appropriate criteria, on services (enforcement, prevention and safety, environment and compliance) and on materials supply (receiving, inspection, complaints and behavior of the product) .

Fundamental part of the suppliers assessment lies in conducting assessments with the consequent identification of improvement programs, involvement of the entities and monitoring progress. In 2013, in the Iberian Peninsula, EDP ensured the review of 458 suppliers and 456 audits. For 107 of these suppliers were identified the need of improvements.

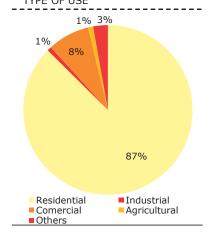

EDPARTNERS PROGRAMME

One year after the creation of the EDPartners Awards (www.edpartners.edp.pt), which gave accolades to the top domestic suppliers in various categories, the EDP Group decided to promote two roadshows believing that business opportunities in the near future will be concentrated in the Asian and Latin American markets. This initiative aimed to promote the internationalisation of suppliers by ensuring special contacts that promote new business in emerging markets, whether through the export of goods and services or in the establishment of joint ventures.

The event in São Paulo, with the support of EDP Brasil, attracted about 40 Portuguese and 42 Brazilian companies operating in various areas of the power sector. Presentations and discussions focused on the Brazilian market occurred over the three days of the event. More than 150 networking meetings were registered.

In Beijing, China, where EDP's relations with the market and Chinese companies are strengthened through its main shareholder, China Three Gorges, the event was accompanied at the highest level by representatives of the Chinese state and the Portuguese State. 45 Portuguese and 49 Chinese companies attended the event, operating in various sectors ranging from the financial industry to the metalworking and engineering sector, from information technology to marketing. Companies had the opportunity to present their business, create a network of contacts and develop business and partnership opportunities, during the two-day event. 127 networking meetings between Portuguese companies and their Chinese counterparts were registered.

The second phase of the roadshow is to monitor the results of these meetings to discover the success stories and assess the possibility of similar initiatives in the future.

The EDP Group supplies electricity to end consumers in three countries - Portugal, Spain and Brazil. It ended 2013 with 9.880.899 electricity customers and 1.171.184 gas customers.

In Portugal, there is an ongoing process of extinction of transitional regulated tariffs for electricity and natural gas (in regulated markets), which should be completed by the end of 2015. There is the expectation that all customers will have exercised their right of choice by the end of this period regarding the suppliers operating in the liberalised electricity and gas markets. EDP retained the leadership in the liberalised electricity market at the end of 2013, both in terms of number of customers and also consumption. On the other hand, concerning natural gas free market, EDP won the lead of costumers.

In Spain, EDP continued its organic growth process, which included starting operations in Barcelona. It ended the year with approximately 1.118.056 electricity customers and 796.196 natural gas customers.

EDP is present in the electricity supply segment of the liberalised and regulated markets in Brazil (through the Bandeirante and Escelsa suppliers). The liberalised market has an insignificant number of customers (around 500).

COSTUMERS AND ENERGY BY TYPE OF COMMERCIALIZATION

- (3) EDP market share in liberalised market.

2.7.2 PRODUCTS AND SERVICES

EDP intends to create smart and sustainable energy solutions, made available in a simple and engaging manner that promotes the well-being of customers. EDP offers a wide range of competitive products and services that are developed with the needs of its residential and business customers in mind.

EDP provides on the Iberian Peninsula (Portugal and Spain) an extensive range of products and services (www.energia.edp.pt and www.edpenergia.es), in addition to electricity and natural gas supplied in the regulated market. Moreover, all electricity in Spain supplied to domestic costumers and smal businesses have a certificate of origin for energy from 100% renewable sources. Corporate costumers only have acced to the certificate when required. In Brazil, EDP has sought to expand its offer beyond the supply of electricity in the regulated market. It already provides a varied set of services for both the residential segment and the business segment. These services include some that are in great demand, such as feasibility analysis, risk management, infrastructure services – construction, distribution lines and substations. Go to the www.edp.com.br for more information about these products and services.

VEVERENDING ENERGY

COSTUMERS AND ENERGY BY PRODUCT AND SERVICE

2013

| Green electricity | Unit | Group | Portugal | Spain | Brazil |
|-----------------------|------|-----------|----------|---------|--------|
| Costumers | # | 586,115 | 4,934 | 581,181 | n/a |
| Sold green energy (1) | GWh | 4,934 | 11 | 4,923 | n/a |
| Telemetering | | | | | |
| Adherent customers | # | 308,097 | 57,262 | 227,118 | 23,717 |
| Electronic bill | | | | | |
| Adherent customers | # | 1,337,812 | 979,020 | 355,262 | 3,530 |

 $(1) In USA all electricity sold is certified as green electricity. In 2013 the value was 10.146 \,GWh.$

RESIDENTIAL AND SMALL BUSINESS CUSTOMERS

EDP provides a wide range of products and services for this segment. The latest of these and/or those that most contribute to more sustainable use of resources are highlighted.

PORTUGAL

EDP customers, besides the specifics of each product and service, also have the possibility of being part of EDP Community, providing an exclusive set of benefits from the network of partners of EDP spread from the north to south of the country, including exclusive discounts on various goods and services. The EDP Community also provides a set of useful tools for small businesses for the promotion and dissemination of their business.

| Casa e Negócio Total | Casa Verde | Funciona, Funciona Plus Funciona Negócios | Re:Dy |
|-----------------------------------|---|--|---|
| Joint gas and electricity product | Electricity product generated from 100% renewable energy sources | Revision of system and maintenance of gas and electricity equipment. | Launched at end of 2013. It is a system that manages, monitors and measures energy use. |

SPAIN

The product highlights made available in this segment in the Spanish market for domestic and small business customers are

| Fórmula Gás e Luz Funciona | Powerhome | Funciona, Funciona Clima | Car-e |
|---|---|--|--|
| Joint gas and electricity and Funciona service product. | Device that optimizes contracted power to a minimum, allowing energy savings. | Revision of system and maintenance of gas and electricity equipment, including air conditioning. | A solution for charging electric vehicles, with installation of a charging point in single-family units. |

Customers benefit from a points programme when purchasing these products and services. This programme offers exclusive rewards for being EDP customers, including the possibility of contributing to social causes.

BUSINESS CUSTOMERS

PORTUGAL

In this segment, EDP offers a customised proposal for electricity, natural gas and services appropriate to the needs of each company, in particular energy efficiency solutions tailored to the specifics of each company (e.g. cost reductions and energy savings, improved operation and safety of electrical systems). The following products are of note:

| Empresa Verde | Ea:se light, standard and premium | Energy Audit | Integrated energy efficiency project |
|---|--|---|--|
| Supply of electricity from 100% renewable energy sources. | Service for the management of energy consumption, energy certification and technical services, with service levels tailored to the needs and profile of customers. | Detailed energy audit service, including technical site visits and spot measurements, including recommendation of energy efficiency measures. | Service of the design and implementation of integrated solutions for energy efficiency measures (turnkey service), that are economically feasible through the generated savings. |

SPAIN

EDP offers customised electricity and natural gas supply proposals in this segment, which include:

| Tariffs consult | Maintenance centers | Improving the quality of supply | Actir, Energy Audit, Óptima, Telemedia |
|---|---|--|---|
| Service for the analysis and supply of the most suited solutions to save energy and reduce the energy bill. | Maintenance and servicing of all high voltage installations from a company. | Service that identifies quality anomalies and presents alternatives for improving energy supplies for businesses | Services that allow customers to consult real time information where and when they want, regarding consumption, billing, contracted power, learning about new products, analysis of consumption trends and contacting a personal manager. |

2.7.3 ENERGY EFFICIENCY

Promoting energy efficiency in consumption is a commitment that EDP makes to its customers. In addition to energy efficiency products and services that are part of the business portfolio, EDP also supports energy savings measures, programmes and projects.

EDP has a special programme in Portugal to promote energy efficiency with, in particular, an exclusive web page for this theme - www.eco.edp.pt - where consumers can find, for example:

- Information and advice on energy efficiency;
- Energy efficiency and CO₂ emissions simulators;
- Practical guide for an efficient home.

The EDP Group's participation in the Plan for Promoting the Efficient Electricity Consumption (PPEC) promoted by the Energy Services Regulatory Authority (ERSE) is also of note. A new tender programme was launched in 2013 (PPEC 2013-2014). EDP had 16 measures approved, as part of its commitment to supporting families and businesses in saving energy, which corresponds to 40% of all approved measures. It is estimated, considering the lifetime of these measures, that their implementation will allow savings of about 508 GWh of energy and a reduction of 28,131 tons of carbon dioxide, a global benefit of about EUR 161 million. For more information about these measures, visit

www.erse.pt/pt/planodepromocaodaeficiencianoconsumoppec/ppec1314/Paginas/default.aspx

Additionally, EDP also offers a free online service - Full Management - that enables customers to manage energy consumptions in https://energia.edp.pt/particulares/servicos/gestao-total.aspx.

EDP also has a programme to support the implementation of energy efficiency projects in Portuguese firms - Save to Compete (www.savetocompete.com/pt). Since its launch in Portugal, 164 applications were registered, 85 of which were completed and validated, and executed contracts in the amount of EUR 7.2 million. It is estimated that the programme will have prevented the emission of 7,300 tons of carbon dioxide by the end of 2013, to obtain a saving of 12 GWh in energy consumption and approximately EUR 2 million. These results are accounted online and can be found on the Save to Compete website. The success achieved in Portugal with this programme led to its launch in Spain, in Astúrias, in November 2013. It received 10 applications and 7 of those have been completed and validated.

In Spain, EDP also has a programme to promote energy efficiency, which can be consulted on the website: www.educacionedp.es/eficiencia. EDP continued to implement projects concerning public procurement in Spain. Of these, we highlight:

- Competition Mayor of Noja Municipal Council conversion of diesel boilers in natural gas boilers, energy supply and maintenance of systems in public schools and sports halls;
- Open the Port Authority of Gijón (APG): Electrical service management of buildings located in the Port of Gijón, which will last until May 2014;
- Competition HEI Valladolid: implementation of energy efficiency measures, namely the transformation
 of premises diesel to natural gas, and improvements in lighting public buildings belonging to the
 autonomous community of Castile and León.

The investment in Brazil in electricity efficiency programmes in 2013 was EUR 8.5 million, with estimated energy savings of about 36GWh and 16MW less demand at peak periods. These demand management programmes include residential, commercial, institutional and industrial initiatives, which consist of demonstrating the importance to society and the economic feasibility of initiatives to combat the waste of energy and to improve the energy efficiency of equipment, processes and end uses of energy (www.edp.com.br/inovacaosustentabilidade/programa-de-eficiencia-energetica). The highlights are:

• **Good energy in the community**: Conservation initiatives aimed at low income populations, through the donation of efficient equipment;

- Good solar energy: Conservation initiatives of conventional residential and low income populations, promoting the replacement of the traditional electric shower for solar heating systems with smart electric showers:
- **Good energy in schools**: Initiatives to train teachers to serve as multipliers of the concepts of energy conservation and the rational use of energy, among students of basic primary public education.

In order to improve equitable distribution and relieve pressure at times of peak consumption, EDP created some projects that help manage the everyday demand for energy.

In Portugal and Spain, part of the management of this demand is done by the existence of tariffs discriminated on the basis of demand: dual tarrif and triple tariff plans. These tariffs have different prices per kWh depending on usage in peak, off-peak and super off-peak periods.

EDP also continues to focus on the extension of the InovGrid project, currently being implemented in Portugal, Spain and Brazil (see additional information on page 74).

2.7.4 ACCESS TO ENERGY

EDP has allocated part of its investment in maintenance over the years to the universal contribution to access to energy and for upgrading grid infrastructure and the incorporation of technologies that enable higher supply quality.

The electrification of the areas where EDP operates in Portugal and Spain is almost completed, so EDP focuses on ensuring a quality service to all consumers.

In Brazil, where the distribution grid is less developed, EDP has been leading projects with the goal of mitigating the energy exclusion of communities in the country still without access to an electricity distribution grid. The **Portable Light Project** continued in 2013, coordinated by Instituto EDP Energias do Brasil in partnership with the Ideas NGO and funding from IDB. The project donated photovoltaic panels to isolated communities living in the Tapajós – Arapiuns Reserve in Pará. **The Dark Island Project** was also implemented, which aims to take energy to 2 communities of São José dos Campos, with 15 homes. An analysis was done of those homes and they were altered internally in order to receive the photovoltaic and solar heating system. The equipment was all donated, including efficient appliances such as refrigerators. In addition to the homes, 3 solar street lighting posts were also installed in the common area of this community.

Also to be highlighted this year are the activities of the **Cabiri Solar Village**, in Angola. This project consists of the implementation of sustainable energy solutions with the objective of meeting the basic needs of local populations - approximately 3,000 people, while respecting their social, environmental and cultural situation and promoting economic and social development. This project is a partnership between Fundação EDP and the Angolan company EIH - Energia Inovação Holding. The construction phase has already been completed, with 505 solar photovoltaic systems installed in 500 family houses and social facilities (school, health centre, training centre, community space and technical building) and 83 solar street lighting posts. Inauguration is expected during 2014.

SOCIAL TARIFF

In the supply activity in the countries where EDP operates there are social support plans for economically vulnerable customers.

Portugal has three distinct, but cumulative social supports: social tariffs for natural gas and electricity and the Extraordinary Social Support for the Energy Consumer (ASECE).

The Ministry of Industry has created a special rate for customers in Spain with installed capacity below 3 kVA and who are classified as socioeconomically deprived (the retired, unemployed and large families).

The social electricity tariff in Brazil is applied to low income families. These tariffs allow discounts that vary according to the conventional rate established for each company.

SOCIAL TARIFF AND SPECIAL NEEDS COSTUMERS AND ELECTRICITY COMMERCIALIZATION

| | 2013 | | | | 2012 | | | | |
|-------------------------------|------|---------|----------|---------|---------|---------|----------|---------|---------|
| | Unit | Group | Portugal | Spain | Brazil | Group | Portugal | Spain | Brazil |
| Social tariff | | | | | | | | | |
| Costumers | # | 329,713 | 54,844 | 61,460 | 213,409 | 264,611 | 68,194 | 60,900 | 135,517 |
| Commercialization electricity | MWh | 571,989 | 110,505 | 114,587 | 346,897 | 487,591 | 148,953 | 115,170 | 223,469 |
| Special needs | | | | | | | | | |
| Costumers | # | 813 | 479 | n/a | 334 | 874 | 589 | n/a | 285 |

2.7.5 ACCESS TO COMMUNICATION SERVICES

Portugal:

- Bills and customer guides and energy efficiency information in Braille;
- •Telephone line to access the services from abroad;
- E-mail address and a dedicated phone line for information and support on social tariffs and Extraordinary Social Support for Energy Consumers (ASECE).
- Sites according to WAI-AA standards (Web Accessibility Initiative level AA).
- Mobile web page platform: www.energia.edp.pt.

Spain:

- Use of other languages besides Spanish for communications, including Basque and Catalan.
- Multilingual websites (Spanish, Basque and English)
- Sites according to WAI-AA standards (Web Accessibility Initiative level AA).

Brazil:

- Virtual agency (online service) for consulting debits, issuing a 2nd copy of the bill, providing meter readings, view consumption history, among others (www.edpbandeirante.com.br and www.edpescelsa.com.br).
- Special telephone service for customers with hearing disabilities.
- Mobile web page platform: www.edp.com.br

All EDP customers benefit from a wide network of access channels to services, including stores, agents, telephone lines, mail and e-mail addresses, websites and mobile access through mobile applications for smartphones and tablets. Visit the following websites to find out more:

- http://energia.edp.pt
- www.edpenergia.es
- www.edp.com.br

EDP has some special initiatives to address the specific needs of certain customer segments.

PRODUCT SAFETY

The information for the safe use of energy is available in all countries on the companies' websites, small leaflets, Customer Guides, etc. Anyone can report either via internet or by telephone, situations that represent imminent danger of accidents, namely fallen power lines, electrical cabinets, etc.

In Brazil, in addition to safety information (the Good Energy in the Community Programme promotes conferences on safe consumption and the dangers and risks of the misuse of electricity). Apeals for safe behaviour are reinforced in the festive seasons. In 2013 this programme involved 610,000 customers. In education, the Good Energy programme was created for schools, which aims to convey an educational message through the participating students. 286 schools participated in 2013, training 1,500 teachers to pass the message on safety and responsible use of electricity to 122,000 students.

PRIVACY PRACTICES

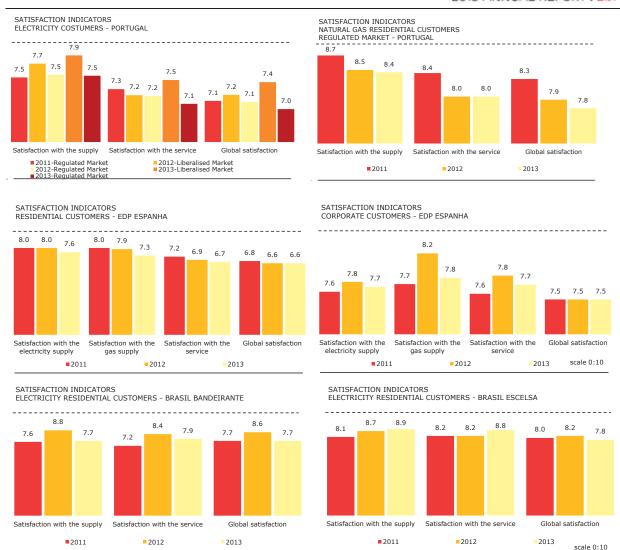

Our commitment to information confidentiality and integrity is laid down in the code of ethics of EDP Group and the codes of conduct of our companies, as well as on EDP's information security policy. Also the contracts with Clients and our internal procedures – the main publicly available and accessible in our webpage – are established to guarantee care and protection of information and customer data.

Customer permission is requested to record and use personal data and disclose it to third parties, for the purposes of market survey or direct marketing. More information about guaranteeing data privacy can be found at www.edp.pt> about edp> principles and policies.

During 2013, EDP Group paid 553 million euros of fines relating to treatment of customer data and privacy, the value corresponding to procedures already reported in previous years. EDP has changed the procedures on the framework of the relationship with commercial agents and Customers, strengthening the guarantee of confidentiality and data protection.

2.7.6 QUALITY OF SERVICE

EDP places great importance on the service provided, intending to ensure maximum customer satisfaction. Accordingly, EDP listens to its customers, conducting customer voice studies, in partnership with certified external entities. These studies are primarily aimed at hearing what customers think in terms of the quality of the services provided by EDP as well as the experience of customers during the services. Customer Experience is translated into a set of macro-indicators, which include overall satisfaction, satisfaction with energy supply (electricity and/or gas) and satisfaction with the service.

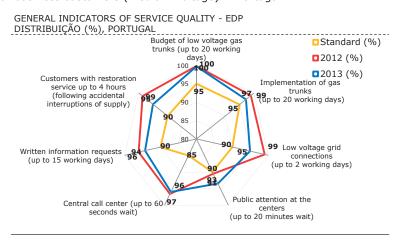

As a result of these studies EDP promoted initiatives mainly related with the different country websites' customer areas to facilitate the functionality and ease of access for customers.

EDP improved the layout and design of costumers reserved area, in Portugal, and also made video tutorials available with explanations of the key themes, such as reading the bill or how to take the meter reading. In Spain, new features were included such as the online delivery of meter readings, payments made in instalments, change of address and banking entity, as well as specific requests and queries about the Funciona service.

The TIEPI (Equivalent Interruption Time of Installed Capacity) for the distribution activity in Portugal was 84 minutes and 38 minutes in Spain. Both underwent increases from 2012 due to extreme weather conditions, particularly in January and December 2013. The 2013 figures are, however, an improvement on 2011. SAIFI (*System Average Interruption Frequency Index*) registered 2.01 disruptions in both domestic customers and small businesses (low voltage) and 2.00 for business customers (medium voltage) in Portugal.

Technical service quality indicators in Brazil are classified in two levels: DEC (Equivalent Duration of Interruption per Consumer) and FEC (Equivalent Frequency of Interruption per Consumer Unit). In 2013, EDP Bandeirante obtained a DEC result of 8 hours and FEC of 5.51 hours, which corresponds respectively to reductions of 15% and 9% from 2012. EDP Escelsa achieved a DEC of 9.67 hours, i.e. 2% less than the previous year; and a FEC of 5.78 hours, which is 9% less than the previous year.

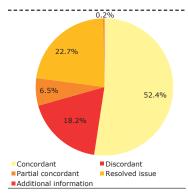

The quality of service provided to customers in 2013 by the operator of the distribution grid in Portugal were slightly lower than the previous year. In terms of service in call centres there was an improvement of 2%, from 91% to 93%. The telephone answering and budgets for line extension services for residential customers remained at the same level of service quality. Overall, EDP remains above the standard values in terms of the quality of service provided.

In Brazil, 69% of cases (average of the two distribution operators), the cuts due to non-payment were rewired in less than 24 hours. Detailed information can be found in the Annual Report of EDP in Brazil. In Spain, the percentage of compliance with the reconnections in less than 24 hours was 98%.

CUSTOMER OMBUDSMAN

The Customer Ombudsman was created in 2008. It is an external and independent entity, with the mission of building confidence in relations between the EDP Group companies and their customers. The main activity of this entity is to assess requests from customers that are not satisfied with the reply to their complaints. The opinions of the Ombudsman are based on transparent principles guided by criteria of fairness and the guiding frameworks adopted in the European Union. Customers may appeal directly to the Ombudsman via the website www.provedordocliente.edp.pt, and its powers can be found on page 124.

ORIENTATION OF OMBUDSMAN ANSWER

The Ombudsman received 2,261 requests for appraisal in 2013, 85% of which were complaints regarding electricity. Most requests (74%) concerned issues related to Supply and Meter readings/Invoicing/Bill Payments. By the end of 2013, 2,199 requests had been answered, with the Ombudsman concordant in 52.4% of cases.

Improvements have been made to the Ombudsman process and to the website to raise levels of overall customer satisfaction. Consequently, the customer response time was decreased by 5 working days which represents a reply time improvement of over 15%.

According to the satisfaction indicators and the number of incidents received by the Ombudsman, EDP developed programmes and initiatives in 2013 with an effective impact on increasing customer satisfaction.

2.8. INNOVATION AND R&D

2.8.1. RESEARCH & DEVELOPMENT AND INNOVATION STRATEGY

Continuous innovation is a core characteristic of the EDP Group. This positioning allows the Company to anticipate trends and customer needs and act quickly.

The EDP Group reorganised its area of innovation in 2013, creating four groups that embody the most relevant innovation themes for the Company and which promote greater proximity between the innovation areas and business units, namely:

- · Clean and Flexible Generation
- Smart grids
- Customer Focused Solutions
- Innovative IT and data management

The EDP Group's expenses on R&D+i in 2013 was around EUR 31 million. This amount represents an estimate of EUR 24 million in Portugal for the development of ongoing projects in the previous year. It was calculated based on the estimated variation in responses to the National Technological and Scientific Potential Survey of the group companies. It should be noted that the calculation of the final figure for 2013 according to the methodology that has been followed since 2006, will be completed a few months after closing the company accounts. The referred amount includes the cost of R&D undertaken in Brazil and Spain, totalling approximately EUR 7 million.

CLEAN AND FLEXIBLE GENERATION

WIND ENERGY

EDP continued to invest in technology development for offshore wind power, which continues to grow and position itself as a possible path for expansion in the renewable generation field.

The most relevant initiative is the **WindFloat** project, which started in 2010 and is led by EDP in consortium with other companies (Principle Power, A. Silva Matos, InovCapital, Vestas and Repsol). This project is in the final demonstration phase. The reliability and performance of the implemented innovative technology has been proven - 2 MW wind turbine installed on a floating platform off the coast of Póvoa de Varzim. The machine had generated over 8 GWh by the end of 2013. Also noteworthy is the beginning of development of the precommercial stage, which will consist of the creation of a small wind farm with 3-5 WindFloats equipped with turbines each with a capacity of 5 to 8 MW.

EDP is also carrying out a project in the area of advanced maintenance of wind turbines, in partnership with the Fibersensing and Critical Materials companies. It comprises the application of optical sensors for the identification of problems in the blades of the wind turbines and their preventive maintenance.

SOLAR ENERGY

Several initiatives have been developed in the area of solar energy, to support decision-making and optimisation of conventional photovoltaic technologies, and to create technological options in this sector:

- SunLab Project:photovoltaic module testing in different climate conditions and different orientations, collecting data at the four mini-testing centres located in Portugal and beginning of internal analysis and dissemination of results.
- Completion of the first phase of a photovoltaic thin film demonstration project called **Crystalsol**, in partnership with the National Energy and Geology Laboratory (Portugal). Another project is also underway in Brazil to evaluate similar technology;
- Development of the technological component of EDP's offer for "Access to Energy" solutions based on decentralised PV solar power (further information on chap.Customers);
- In Brazil we developed a system of mini-grids powered by PV solar panels to supply isolated areas.

CARBON CAPTURE AND STORAGE

A cycle of projects was developed from 2006 to 2013 focusing on the issue of carbon capture and sequestration (CCS), given the importance of this issue for thermoelectric generation. These projects focused on the study of solutions that might combine the continued use of fossil fuels in electricity generation, such as coal and natural gas, with a drastic reduction of the carbon dioxide emissions that result from burning those fuels.

Those activities arise from taking part in the following international projects of the European Union's 7^{th} R&D Framework Programme, concluded in 2013:

- DECARBit (http://decarbit.com/);
- FLEXI BURN CFB (www.vtt.fi/sites/flexiburncfb/);
- COMET (http://comet.lneg.pt/).

OPERATIONAL EFFICIENCY

The following projects in the area of flexible generation and high energy availability, developed in 2013 and continued in 2014, deserve note outside the context of CCS:

- Pregas2013 Predicting and optimisingblast furnace gas consumption at the Sidergás cogeneration power plant;
- Carbiotor2014 –Testing the combustion of torrefied biomass at thermoelectric power stations.
- Teca2014 -Diagnosis and predict faults in combined cycle boilers
- **SAFEnergia**, in partnership with Instituto Soldadura e Qualidade to develop diagnostic and nonintrusive inspection technologies for use in thermoelectric power stations.
- Online smart system to assess the loss of service life of components of hydro-generators due to fatigue and changes in the generation system
- System for power transformers diagnosis with maintenance techniques based on condition and computational intelligence
- Smart geo-referenced supervision system for dam reservoirs through autonomous vehicle;
- Non-invasive and innovative geophysical method, to be incorporated in software for processing, analysis
 and modelling of artificial seismic vibrations to determine the physical parameters of dams;

ECOEFFICIENCY

The following projects should be highlighted in the area of improving eco-efficiency:

- Multiyesos2015 Demonstrate new desulphurisationgypsum applications
- AirQ2014 Detail air qualitypollution sources
- Ashfoam2014 Use thermoelectric power station ash as an additive for the production of aluminium composites and foams
- Adequate methodologies for the prediction and rehabilitation of erosion phenomena, aimed at improving the performance of reservoirs for power generation;
- Risk analysis system for the sustainable handling of cyanobacteria in hydroelectric power station reservoirs;
- Artificial neural network for predicting siltation in hydroelectric reservoirs from hydro-sedimentology and bank erosion data;

SMART GRIDS

DISTRIBUTION TECHNOLOGY (INOVGRID)

InovGrid is EDP's smart grid project. The dual focus of the project on energy efficiency and facilitating the integration of renewable technology positions smart grids as the industry's response to the global challenge of sustainability.

Évora municipality in Portugal hosted the first field implementation of the InovGrid project which involved building the entire infrastructure that supports **InovCity**, allowing the population to have special access to a number of technological innovations. The infrastructure covers the entire municipality, which is about 32,000 electricity customers with an approximate annual consumption of 270 GWh. There are also around 140 medium voltage customers, with an annual consumption of 110 GWh.

The Evora InovCity's infrastructure covers the automatic collection of meter readings, the monitoring and automation of transformer stations, integration of consumer information in the central systems as well as the sharing of information with the customer.

The data collected in the second year of the project confirm a potential increase in energy efficiency of about 4%.

The InovGrid project is currently being extended to six new municipalities in Portugal in order to test different communication technologies, replicating the concept in areas with different socioeconomic conditions and specific grid characteristics, with the aim of increasing the integration of smart grids in the normal business processes.

In Spain, the municipality of Pola de Siero (Asturias) was selected as the InovGrid pilot project, the first village of the distribution network of HC Energía to have 100% of smart meters, for customers with installed power up to 15kW. The low-voltage network of the municipality has been adapted to enable the use of these meters functionalities.

In Brazil, the InovCity project started in 2010 in the municipality of São Paulo and is being replicated in two new municipalities of Espírito Santo state.

Moreover, a wide range of R&D projects have been supported aimed at better grid management and quality of service in various countries:

PORTUGAL

- The **PREDIS** project Distributed Forecast of Real Time Consumption, for predicting low voltage loads, intends to visualise and predict consumption in real time, allowing optimised grid management;
- The **Synapse** Project allows us to anticipate supply or quality of service problems, allowing the faster restoration of electricity supply.

BRAZIL

- Pilot project for assessing consumer reaction to the prepayment system and the different low voltage rates in the smart grids environment;
- Development of new smart grid technologies to tackle new climate challenges;
- Electronic metering for electricity smart grids;
- Intelligent automated system for identifying and locating faults in electricity distribution;
- New paradigm for planning and managing the maintenance of distribution systems based on continuity indicators;
- Development of an intelligent electronic multi-function metering module, with measurement and management of energy quality parameters features.

SPAIN

- RedOx2015 Development of a redox flow battery (35kW) with Spanish technology
- Localiza2013 –Development of an algorithm for locating short circuits in medium voltage grids
- Libatt2014 –Testing the functionalities of Lithium-ion batteries for low voltage customers

CUSTOMER FOCUSED SOLUTIONS

ENERGY EFFICIENCY

EDP, continuing its leadership in promoting energy efficiency in Portugal, has made a significant investment in the preparation of the **PPEC 2013-2014** tender, with 16 measures approved, including leading position in the domestic segment (86%), commerce and services (88%) and industry and agriculture (43%).

EDP has carried out studies to support the phase-out of high pressure mercury lamps for street lighting and their replacement by LED lamps, at competitive prices, with huge energy savings and better performance. It has developed prototypes of luminaires for this purpose.

EDP continued to develop several projects in the energy efficiency area, namely:

- EnRiMa decision support system for managers of public buildings with poly-generation, in Spain;
- Agrega2015 Dynamic modelling system for low voltage consumption clusters in Spain;
- **Home Energy Management** service platform for home energy management. A campaign of preapplication was launched at the end of 2013, in Portugal, aimed at installing the platform in a limited number of customers from the first quarter of 2014;
- Product line for the optimisation and control of residential energy use in Brazil: **Smart TUG** plug used to control residential appliances; **Smart Meter** plug associated with low cost meter, for measuring active energy; **Home Display** Multi-functional display which will be the interface of the consumer with the supplier;
- Intelligent device for reducing demand at peak hours in white goods equipment, in Brazil;
- Computational method and electronic device for collecting data to aid in the detection of street lighting energy losses, in Brazil;
- Elenna2015 Creation of new energy advice techniques using plain language messages, in Spain.

ELECTRIC MOBILITY

The pilot phase of the electric mobility programme in Portugal (MOBI.E) continued in 2013, allowing to assess the adhesion of users to electric mobility and the equipment and systems developed for the project. SGORME – Sociedade Gestora de Operações da Rede de Mobilidade Eléctrica continued to manage the public charging network, in collaboration with all operators of electric charging infrastructure.

The **Opencharge** project will be concluded in March 2014, having developed a complete, ready for preproduction series of a robust pole loading and much lesser cost than all other solutions in the market. Two units have been installed in São Paulo, Brazil and 10 more are scheduled to be installed. The **Wallbox Opencharge** was also developed in order to support the EDP electrical mobility range of products, particularly in the residential market.

In Brazil, we proceeded to the evaluation of possible scenarios, experimentation and measuring the impacts of electric vehicles on the EDP distribution systems.

Moreover, EDP participated in working groups in this field, in particular the FOREVE forum in Spain.

VIDING ENERGY

INNOVATIVE ICT AND DATA MANAGEMENT

One of the four priority areas for innovation arising from the new operational framework is based on new developments in Information and Communication Technologies and how these can contribute in a profound and cross-cutting manner to meeting the challenges facing the energy sector. Some technologies and market trends were identified in this field:

- Big Data enhances agility in the marketplace, operational optimisation and the creation of new products and services;
- Searching leads to greater simplification and speed in internal and external access to information;
- **Cloud Computing** enables flexible management of the IT infrastructure, speeding up the allocation of technical resources and reduce investments.

These trends allowed a number of initiatives to be launched during 2013, the most notable being:

- PREDIS Distributed Forecast of Real Time Consumption (already mentioned in the smart grids section);
- Big Data development of skills, which aims to indigenise EDP knowledge in relation to approaches, processes, technologies and architectures that allow the mass processing of large data volumes;
- **Get to know customers and the market better**, based on the development and incorporation of automatic processing solutions for unstructured data, based on external and internal sources.
- **SearchBox** Optimise information searching in the Group, with the aim of providing the Group with advanced and smart information search engines using a common platform **Intranet.Searching** that leads to greater simplification and speed in accessing information, internally and externally.

2.8.2. OTHER INNOVATION INITIATIVES

EDP Ventures had already invested, by the end of 2013, more than EUR 16 million in innovative companies and funds in the cleantech area, particularly in Arquiled and Principle Power. It has also committed to an additional investment of around EUR 4 million in 2014.

In parallel, EDP has continued to develop a set of activities with a significant impact both internally and in relations with different partners. The following are some of the main initiatives developed in 2013:

- **EDP Starter** With the aim of moving EDP closer to entrepreneurs and researchers, EDP created this innovative concept to support entrepreneurship at all stages of the value chain, from the idea to investment. EDP Starter is an incubator structure for accelerating great innovative ideas of small businesses. In 2013, EDP Starter supported the development of 12 new start-ups in the energy area, generating new jobs and contributing to the growth of the Portuguese business fabric and the implementation of national technology in international markets (http://www.edpstarter.com/);
- Technological Observatory it aims to monitor and publicise technological development in the
 energy sector, focusing on "clean energy". The InovNotes website was developed for this purpose, for
 the publication of some of the studies conducted, e.g. "Potential of residential load management", in
 2013 (inovnotes.edpinovacao.com);
- **EDP Inovação Prize** Annual competition in Portugal and Brazil that encourages the development of innovative business projects in clean energy technology or other sustainable areas (e.g. smart cities). The team of the winning project receives a cash prize (BRL 100,000 in Brazil and EUR 50,000 in Portugal) to establish the company and implement the project (www.edpbr.com.br/premio and www.premioedpinovacao.edp.pt).

2.9. SIDE BY SIDE WITH THE COMMUNITY

EDP promotes and supports cultural and social initiatives with the aim of contributing to the sustainable development of societies, based on citizenship shared by all, and continuously strengthening its reputation. EDP, to achieve this, socially invests in communities and explains the results it intends to achieve, evaluating the projects it engages in. It has adopted and actively participates in the development of the LBG methodology - London Benchmarking Group, for this purpose (www.lbg-online.net).

2.9.1. SOCIAL INVESTMENT

Total voluntary Social Investment of the EDP Group in 2013 was EUR 27 million (see table) and involved more than two million people and 1,816 institutions. The collaboration with EDP helped, in many cases, leverage support of around EUR 1.2 million for third parties. The three EDP foundations absorbed a major part of the funds and projects, within the scope of their responsibilities, developing innovative community engagement policies and ensuring the expansion of the LBG methodology to all group countries. Voluntary Social Investment by the business units involves promoting and supporting significant social responsibility projects seeking rapprochement and dialogue with communities - a fundamental principle of EDP's intervention, and ensuring the territorial capillarity that the energy generation, distribution and sales activities actually possess.

About 85% of the overall investment was in the form of direct monetary contribution, 2% in the form of donations in kind and volunteers' time, provided during working hours, and 13 % corresponded to promotion costs and project management (see table).

Portugal absorbed 76% of all social investment. This share should be interpreted bearing in mind both the size of the heritage protected by EDP as well as the number of local communities connected to production centres. Moreover, at all group countries level, 84% of the investment has been allocated to strategic projects. Six per cent of the investment was assigned to projects underpinned by criteria of a more cyclical nature. Only 10% was associated in some way with promotional purposes of commercial interest for EDP.

Projects to improve the social well-being, education, health and regional development received close on 64% of total investment in 2013, i.e. projects primarily relate

of total investment in 2013, i.e. projects primarily related to the reduction of regional disparities and the social integration of people with disabilities.

-edp/

Fundación EDP was created on 5 November with the aim of coordinating and enhancing the patronage activity and socio-cultural activities of the business units of the EDP Group in Spain. The new foundation joins the group of large Spanish foundations since the value of social investment activities, that are now channelled through Fundación EDP, in 2013 amounted to EUR 3.8 million.

The defined objectives for Fundación EDP enable it to interact and work jointly with the other two foundations of the EDP Group - Instituto Brasil and Fundação EDP, and include the promotion, development and support of social, cultural, scientific, technological, educational, environmental, sporting, and protection of heritage initiatives, and also the promotion of the study, preservation and dissemination of cultural, scientific and technological heritage associated with energy.

The administration of the new foundation is chosen by the management of Hidroeléctrica del Cantábrico, Naturgas Energía Grupo, EDP Renováveis and EDP Energías de Portugal, Sucursal em Espanha. The directors are not paid wages.

2.9.2. VOLUNTEER WORK

The volunteering policy plays an irreplaceable role and one of great potential in the relationship between EDP and the Communities. EDP promotes the development and well-being of its employees and teams by encouraging volunteering, which also fosters a culture of social responsibility and corporate citizenship (additional information on page 60). Moreover, EDP volunteering is a means of building the capabilities of institutions of the Third Sector when it involves volunteering employees' skills. Lastly, the volunteering policy is an instrument for bringing EDP closer to the Communities and fostering links.

EDP joined GCVC/IAVE in 2013, with the aim of sharing its experience and identifying the best practices for developing meritorious volunteering programmes. The International Association for Volunteer Effort (IAVE) was founded in 1970 by a group of volunteers from different areas. The organisation grew and became a global volunteering network present in 70 countries that seeks to promote, strengthen and enhance the development of volunteering worldwide. IAVE subsequently created a council, the Global Corporate Volunteering Council (GCVC), which encompasses the large companies with volunteering programmes that share the vision of "A world where the needs of a community are best met through the energy, passion and talent of the employees of locally operating international companies.'

In the EDP Group as a whole, 255,644 people directly benefited from the activities of EDP Volunteering in 2013, and 15,519 people were indirectly benefited. A total of 1,763 EDP volunteers participated in these initiatives (3% higher than in 2012). They were joined by 3,636 volunteers who are not employed by EDP. This mobilisation generated 13,506 hours of voluntary work during working hours (29% higher than in 2012), which equates to an investment of EUR 410,636 by EDP in terms of company working hours.

Since its inception in 2011, the EDP Volunteering Programme has mobilised 11,229 interventions, granting 31,406 hours of volunteer work during working hours, which equates to EUR 866,000.

The results of the EDP Volunteering Programme earned the company three awards in 2013. On a nationwide scale, EDP won a Junior Achievement Portugal award, which is an association of companies that promotes entrepreneurship culture among students through corporate volunteering, and an award from the Meios e Publicidade magazine. On the international stage, EDP won an award from the Federation of European Business Communicators Associations (FEIEA).

EDP joined the Global Corporate Volunteering Council to ensure the best volunteering practices are adopted and to share experiences [see highlighted box]. In 2013, EDP recorded 37 signed partnership agreements, by setting

targets directly linked to the Volunteering Programme as a means of ensuring the expansion of the model, the improvement of the processes and effectiveness of the results. This result meant the 2015 goal was achieved ahead of schedule. At the organisational level, the EDP business units consolidated strategies and reporting, validating processes, maximising resources and prioritising actions increasingly focused on volunteer skills, through cooperation between the Foundations and Human Resources departments.

An example of this strategy is the creation of an Electrician Volunteers Pool, together with EDP Distribuição. Launched as a pilot scheme in June 2013 with Santa Casa da Misericordia de Lisboa, EDP Distribuição expanded the pool to the entire country. It now has 22 volunteers and covers 10 locations. The creation of an Energy Auditor Volunteers Pool is planned for 2014, following the first pro bono energy audit of the Red Cross building in Porto.

Similarly, after the successful startup of the Lean volunteering of EDP Produção in 2012, which has taken the LEAN methodologies to schools, involving teachers, students, parents and school administrators, it is now underway in all the schools of the Abrigada schools group, involving about 70 teachers, 40 staff, 800 students and parents. The method is now starting up in two other school groups, in Constância and Figueira da Foz.

2.9.3. LOCAL COMMUNITIES

EDP aims to contribute to the development of the local communities territorially linked to generation centres. It promotes the strengthening of continuous and lasting relationships. A specific example of this volunteering policy for sharing with communities is the 101 projects supported by EDP as part of the agreement with the National Association of Portuguese Municipalities in the municipalities where ordinary status hydroelectric plants are sited. The funds for this programme totalled EUR 5 million in 2013. Another patent example is the "EDP Solidária Barragens" programme, designed to support social projects. It supported 10 projects in 2013, selected from 60 applications by regional welfare institutions, in a total of EUR 200,000.

EDP contributes, besides Voluntary Social Investment, with socio-environmental measures associated with the construction of new energy harnessing plants, which are not limited by but arise from binding commitments. In this context, EDP ensures the involvement of local communities in a process of continuous dialogue and it seeks to integrate their expectations in the definition of the measures, (www.a-nossa-energia.edp.pt). EDP focuses on programmes targeting local development priorities, aiming to maximise the results. The local development programmes of the Sabor and Tua regions are an example of this, which enabled the creation of 85 new companies and more than 100 new jobs in 2013.Furthermore, about 30% of the workers/subcontracted services for the construction projects were of local origin, in the same period.

VEVERENDING ENERGY

Support was also provided to an entrepreneurship training project that encompassed 123 students, with the purpose of fostering the economic development of the region. In another field, the "Novos Povoadores" project attracted two families to settle in Alijó. In parallel, an organisation of producers was created in connection with the "Sustentabilidade Rural" project and another one is in the process of establishment, aimed at the production and marketing of stone fruit and vegetables. An initiative to regularly supply households with baskets of countryside produce for general consumption and Easter and Christmas hampers was also implemented. More than 1,600 deliveries were made in 2013.

IMPACTS ON COMMUNITIES

EDP will identify the individual communities affected by projects in developing communities and establish close relationships with them, solving any problems they might have

A set of actions has been developed to perform this, which are divided into 3 major groups, namely:

1. INFORMATION

- Sessions for project presentations
- Interviews published in the media on relevant themes;
- Leaflets providing information about projects, or on specific issues;
- Warnings and notices posted in specific locations;
- Placards and information boards.

parte de nós

The Christmas campaign was launched in coordination with all the countries in which the EDP Group operates, to promote a more humane Christmas, distributing affection to children and the institutionalised elderly. This campaign ran from 9 December 2013 to 10 January 2014.

Overall, 96 initiatives were implemented, involving 89 institutions and directly benefiting a total of 7,704 people. 908 volunteers provided 5,494 hours of voluntary work. The initiatives were very diverse, such as team initiatives in Brazil or collecting donations for a village in Honduras, carried out by EDP Renováveis, to which 863 employees made a donation. The collection of donations allowed cash amounts and needy equipment to be offered to the institutions in the amount of EUR 63,883.

2. CONSULTATION

- · Surveys of local populations and studies of social habits, conducted by specialised institutions;
- E-mail addresses and telephone contacts for Public clarification;
- Information kiosks offering in-person customer service.

3. PARTNERSHIP

- Public sessions (often in cooperation with local government);
- Negotiation and consensus meetings with segments of the community.

In addition to the referred initiatives, various environmental impacts shall be monitored during the construction, particularly those impacting on local populations. If any unusual situations are recorded, strict environmental monitoring of the project is imposed.

Lastly, it should be noted that most operating generation centres have Environmental Management Systems (EMS) certified by the ISO 14001 standard and registered under EMAS regulations. These systems also include the management of local communities.

EDP seeks to achieve the lowest possible social and environmental impact through its operations. To achieve this objective, the company uses methods of assessing impacts and to find out about the expectations of the people involved, and establishes programmes to mitigate the negative effects. Distribution lines and hydroelectric plants construction projects in 2013 entailed the development of plans for the relocation of families, involving the affected communities, municipalities and EDP. Examples of this are:

- The Itapeti São José Overhead Distribution Line, Brazil, entailed the relocation of 18 families. In
 partnership with the Mogi das Cruzes municipal council, which built the new housing development, EDP
 provided the electricity infrastructure (construction of the secondary network and branch lines to the
 distribution poles) for the new homes;
- The new Jari hydroelectric plant in the municipality of Santo Antônio do Jari, Brazil, involves the construction of a new village to provide homes to the 34 families of the village of Iratapuru. The new village will be provided with basic sanitation, power and health, security and leisure facilities;
- The Cachoeira Caldeirão hydroelectric development at Amapá, Brazil, will flood about 2,600 hectares of land. The relocation of 244 families is forecast, 102 to the rural area and 142 to the urban area of Porto Grande. This comprises a significant relocation programme.

2.10. BUSINESS FINANCIAL ANALYSIS

EDP GROUP

In 2013, the EDP Group's net profit attributable to EDP Shareholders reached EUR 1,005 million, compared with EUR 1,012 million in 2012. Net profit decreased 1%, supported by a 3% decrease in EBIT.

INCOME STATEMENT - EDP GROUP

| EUR Million | 2013 | 2012 | Δ % |
|---|-------|-------|-----|
| Gross Profit | 5,551 | 5,428 | 2% |
| Net Operating costs | 1,934 | 1,800 | 7% |
| EBITDA | 3,617 | 3,628 | -0% |
| EBIT | 2,085 | 2,143 | -3% |
| Net Profit for the period | 1,194 | 1,182 | 1% |
| Net Profit attributable to EDP shareholders | 1,005 | 1,012 | -1% |
| Non-controlling interests | 189 | 170 | 11% |

EDP Consolidated EBITDA was kept almost stable in 2013 (-0.3% year-on-year), at EUR 3,617 million, despite the regulatory changes (-EUR 201 million, mainly in Spain) and the decommissioning of Setúbal fuel oil plant in 2013 (-EUR 98 million year-on-year). EBITDA resilience was grounded on: (i) operations in Brazil (+EUR 47 million), deepened by significant recovery of past tariff deviations in distribution, (ii) wind operations (+EUR 81 million excluding the EUR 71 million hit from regulatory changes), backed by capacity additions and higher average load factors; and (iii) liberalised activities, on strong hydro resources and higher revenues obtained from energy management. Also, Forex had a negative impact of EUR 97 million backed by 13% depreciation of the Brazilian real and by 3% depreciation of US dollar, both versus the Euro. EBITDA adjusted for Forex impact would have grown by 2%.

^{BO} EBITDA

| EUR Million | 2013 | 2012 | Δ % |
|-------------------------------|-------|-------|-----|
| LT Contracted Generation | 726 | 802 | -9% |
| Liberalised Activities Iberia | 349 | 316 | 11% |
| Regulated Networks Iberia | 1,023 | 1,057 | -3% |
| Wind Power | 947 | 938 | 1% |
| Brazil | 582 | 535 | 9% |
| Other | (11) | (20) | 42% |
| Consolidated | 3,617 | 3,628 | -0% |

EDP continues to diversify its portfolio geographically: in 2013, Portugal accounted for 44% of the group's EBITDA, Spain for 25%, Brazil for 16%, United States of America for 10% and the Rest of Europe (excluding Iberia) accounted for 5% of EBITDA.

EDP Group's net operating costs increase by 7% year-on-year, to EUR 1,934 million in 2013. EDP Group's controllable operating costs (supply and services, personnel costs and costs with social benefits) fell by 2% year-on-year, to EUR 1,573 million in 2013, backed by the successful execution of our corporate efficiency program OPEX III. Other net operating costs rose by EUR 161m year-on-year, to EUR 361 million in 2013, mainly including: i) new taxes, namely in Spain (EUR 121 million); ii) EUR 43 million of penalties at Pecém I; iii) a EUR 56 million gain on the sale of gas assets in Spain and iv) EUR 13 million year-on-year from higher gains with the sale of real estate in Brazil.

Net depreciation and amortisation (net of compensation from depreciation and amortisation of subsidised assets) increased by 1% to EUR 1,477 million in 2013, reflecting: i) +EUR 26 million at EDP Brasil driven by both Pecém I coal plant commissioning and an impact from the accelerated depreciation of some distribution assets; ii) new hydro capacity in Portugal; and iii) a EUR 31 million impairment at most of our co-generation and waste facilities in Spain, following the announced regulatory cuts; which were mostly compensated by iii) -EUR 15 million at EDP Renováveis on the back of lower impairments (EUR 53 million in 2012 versus EUR 20 million in 2013); and iv) the combined effects of the decommissioning of our Setubal fuel-oil power plant in Portugal, the sale of our Soporgen cogeneration facility in Portugal, fewer working hours at our coal plants in Spain and a 10 years extension (from 25 to 35 years) of the useful life of our CCTGs.

Financial results, EUR 32m lower year-on-year at -EUR 737million in 2013, reflect a EUR 0.2 billion increase in the average net debt and a 40bp year-on-year rise in average cost of debt (to 4.4% in 2013).

Non-controlling interests went up 11% year-on-year to EUR 189 million in 2013, driven by higher net profit at the level of EDP Renováveis and by EDP Renováveis sale of minority stakes in wind farms to Borealis (Vento II), China Three Gorges (EDP Renováveis Portugal) and Fiera Axium (Wheat Field).

Consolidated capex decreased 2% year-on-year to EUR 1,978 million in 2013. Note that in January 2013, EDP Renováveis cashed-in a EUR 91 million cash-grant in the United States of America related to Marble River wind farm installed in the fourth quarter of 2012). Excluding this impact, consolidated capex went up 3% year-on-year to EUR 2,069 million, driven by a 7% increase in expansion capex, translating the on-going construction of new hydro and wind capacity. Maintenance capex fell 5% year-on-year to EUR 656 million in 2013, reflecting lower needs for both investments at our Iberian regulated networks and maintenance works at our Spanish thermal plants.

CAPEX

| EUR Million | 2013 | 2012 | Δ % |
|--|-------|-------|------|
| Long-Term Contracted Generation Iberia | 57 | 44 | 29% |
| Liberalised Activities Iberia | 531 | 524 | 1% |
| Regulated Networks Iberia | 387 | 404 | -4% |
| Wind & Solar Power | 536 | 606 | -12% |
| Brazil | 426 | 388 | 10% |
| Other | 41 | 44 | -7% |
| EDP Group | 1,978 | 2,011 | -2% |
| Expansion Capex | 1,322 | 1,319 | 0% |
| Maintenance Capex | 656 | 692 | -5% |

Capex in hydro capacity in Portugal totalled EUR 455 million in 2013, which was devoted to the on-going construction of new hydro plants Baixo Sabor Ribeiradio-Ermida, Foz Tua and repowering of Venda Nova III and Salamonde II, with installed capacity of 173 MW, 81MW, 252 MW, 756 MW and 207 MW, respectively. It is expected that Baixo Sabor and Ribeiradio-Ermida enter into operation in the fourth quarter of 2014, Venda Nova III and Salamonde in the second quarter of 2015 and Foz Tua in the second quarter of 2016.

Capex in new wind and solar capacity, at EDP Renováveis level, totalled EUR 536 million, or EUR 627 million excluding the EUR 91 million cash-grant received in January 2013. This capex was allocated to capacity additions in 2013 (+50MW of solar in Romania and +387MW of wind, from which 357MW were installed in Europe and 30MW regard to EDP Renováveis's first wind project in Canada) and to the 224MW of capacity under construction, most of which in the United States of America (200MW).

In Brazil, capex totalled EUR 426 million in 2013, the bulk of which (71%) devoted to new generation capacity: EUR 44 million invested in Pecém I, our 360MW coal plant which was commissioned in the second quarter of 2013; and EUR 257 million invested in new hydro plants, namely Jari (373MW due in January 2015) and Cachoeira Caldeirão (219MW due in January 2017).

NET DEBT

EDP Group's consolidated net debt at the December 2013 amounted to EUR 17,451 million, resulting from a gross nominal debt of EUR 19,792 million deducted mainly by an amount of cash and equivalents of EUR 2,180 million, which was held, mainly, at EDP S.A., EDP Finance BV and other (EUR 1,624 million), Group's Brazilian subsidiaries (EUR 291 million), and EDP Renováveis (EUR 265 million), and collateral deposits in the amount of (EUR 449 million).

When compared to December 2012, the Group's net debt was nearly EUR 782 million lower, mostly due to securitization of electricity tariff deficit and the reclassification of Cachoeira Caldeirão and Jari as assets for sale and consequent deconsolidation of its debt (BRL 1,057 million).

In terms of maturity, EDP Group's consolidated debt breaks down into 19% in short-term and 81% in medium and long-term, with an average maturity of 4 years.

EDP maintained in 2013 its policy of centralizing funding at EDP S.A., EDP Finance BV and EDP Sucursal, which represented 88% of the Group's consolidated debt. The remainder consists of debt contracted by the Brazilian

holdings (7%) and project finance debt (mainly from the subsidiaries of the EDP Renewables Group – 4%, and EDP Producão Group - 1%).

Regarding the loan markets, in January 2013, EDP Finance B.V. entered into a new Term Loan Facility, in the amount of EUR 1,600 million with a tenor of 5 years and involving a syndicate of 16 banks. The facility was fully drawn during the year mostly to refinance two facilities that had been raised in 2006 and 2008 and matured in April and November.

In the second semester of 2013, EDP Finance BV issued in September a 7 year bond in the amount of EUR 750 million and in November a long 7 year in the amount of EUR 600 million bond. These issues allowed EDP to reach different markets and investors and to strengthen its liquidity position.

During 2013 the Group received EUR 487 million from the FADE, the Spanish Electricity Deficit Amortisation Fund, through its subsidiary Hidroeléctrica Del Cantábrico S.A. for the securitization of the Spanish Tariff Deficit.

In Portugal, EDP sold a portion of approximately EUR 440.5 million, and the respective interest, of the 2012 tariff deficit and EUR 149.8 million of the 2011 tariff deficit and has entered into an agreement for the assignment, by means of a true sale without recourse to Tagus – Sociedade de Titularização de Créditos, S.A., of a portion of the 2012 Tariff Deficit, and respective interest, for an amount of EUR 450 million.

In January 2013, the Group contracted a project finance for Romania in the total amount of EUR 50 million, with maturity of 14 years and contracted a project finance for Poland in the total amount of PLN 136 million, with maturity of 15 years.

Maintaining a prudent financial management policy, by December 2013 EDP had access to EUR 2,159 million of available credit lines and EUR 100 million of commercial paper with underwriting commitment, fully available. It is the Group's policy to diversify its liquidity sources through high credit standing banks.

Additionally the Group has a EUR 1,000 million Euro Commercial Paper programme (ECP) at EDP SA level and a EUR 500 million "Pagarés" programme at HC Energia. Both programmes are not committed, being used for the Group short term treasury management. As at 31 December, the total amount issued of ECP and "Pagarés" amounted to EUR 107.5 million.

In 2013, the average cost of debt of the EDP Group was 4.4% per year and approximately 47% of its debt and borrowings had a fixed rate.

In terms of currencies, Euro continues to be the main funding currency of EDP at 75%. The USD financing contracted to fund the capex of the Group's US subsidiary justifies the exposure to USD of 17%.

RATING

In March 2013, following the revision of the sovereign rating, Standard & Poor's ("S&P") affirmed EDP's rating at "BB+" revising its outlook from negative to stable. In September, S&P placed its "BB+" long-term corporate credit and issue ratings on EDP on CreditWatch with negative implications. At the same time, S&P affirmed short-term corporate credit debt ratings on EDP at "B". The negative CreditWatch placement mirrors that on the Republic of Portugal, on 18 September, since by S&P's rating criteria, sovereign risk is a key factor that influences utilities' credit strength. After year end, in January 2014, S&P affirmed its 'BB+' long-term and 'B' short-term corporate credit ratings on EDP and removed the long-term ratings from CreditWatch with negative implications. The outlook is stable. The affirmation and removal from CreditWatch follows S&P's similar action on Portugal, on January 17th, 2014. A lowering of S&P's long-term rating on Portugal by up to two notches would leave the rating on EDP unchanged, all else remaining equal.

In June and again in November 2013 Moody's Investors Service Limited ("Moody's") affirmed EDP's rating at "Ba1" with negative Outlook.

In July 2013, Fitch Ratings ("Fitch") placed all utilities with sizeable exposure to Spain, including EDP, on Rating Watch Negative, following the Spanish Government's announcement, on July 12th, of proposed new regulatory measures to permanently resolve the excess cost or tariff deficit generated by the Spanish electricity system. In January 2014, Fitch has maintained EDP on Rating Watch Negative.

EDP's credit rating stands as of December 2013 two notches above the Republic of Portugal by Moody's and one notch by Standard and Poor's and by Fitch.

LONG-TERM CONTRACTED GENERATION IN IBERIA

EBITDA from long-term contracted generation was 9% lower year-on-year at EUR 726 million in 2013 as higher mini-hydro output stemming from rainy weather in 2013 (+EUR 32 million in 2013), was offset by the end of Setúbal fuel oil plant PPA in Dec-12 (EBITDA: EUR 98 million in 2012); and the sale of Soporgen's cogeneration plant (EBITDA: EUR 12 million in 2012).

Gross profit from PPA/CMEC dropped by EUR 131 million in 2013 to EUR 769 million, following the end of Setúbal PPA (EUR 113 million in 2012).

The annual deviation between market gross profit under CMECs assumptions and gross profit under current market conditions ('revisibility') amounted EUR 129 million in 2013: EUR 116 million in the first half of 2013 and

EUR 13 million in the second half of 2013, mainly driven by low spot prices. Deviation at hydro plants totalled EUR 37 million as the impact from a production 14% above CMEC's reference was overwhelmed by an average realised price 22% below CMEC's reference. In turn, market gross profit at our Sines coal plant stood EUR 92 million below the CMEC's reference, due to shorter volumes and average clean dark spread below the CMEC's reference, by 15% and 14%, respectively.

Gross profit from production under the special regime rose by EUR 25 million, to EUR 113 million in 2013, propelled by a 131% surge in mini-hydro's output which more than compensated the sale of Soporgen's 67MW cogeneration plant in January 2013 (EUR 14 million gross profit in 2012).

LIBERALISED ACTIVITIES IN IBERIA

EBITDA from liberalised activities in Iberia rose by 11% in 2013, to EUR 349 million. Despite the adverse regulatory and market environment, EBITDA growth was prompted by: i) doubling hydro output, propelled by rainy weather in 2013 versus 2012, which justified a 16% drop in the average generation cost; ii) 3% fall in average cost of electricity purchases in the wholesale market due to adequate management of volatility in the energy markets and iii) higher volumes and average selling prices to final clients: +5% and +3%, respectively. In terms of regulation, EBITDA was hit by EUR 78 million of new generation taxes in Spain in 2013, no capacity payments in Portugal in 2013 versus EUR 7 million in 2012 and by a EUR 9 million reduction in capacity payment in Spain.

In the electricity business, gross profit in the electricity business went up 11%, to EUR 825m in 2013, driven by a higher average unit margin which rose from EUR 11.4/MWh in 2012 to EUR 13.4/MWh in 2013.

Volumes sold rose by 3% to 45TWh in 2013, reflecting a 5% increase in volumes sold to retail and 1% increase in volumes sold in wholesale market. Average sourcing cost fell by 6% year-on-year following the combined impact from lower generation costs (-16%) on higher hydro volumes and cheaper electricity purchases (-3%). Average selling price was 1% lower in 2013, as higher average selling prices to retail clients offset the 9% fall in the average selling price in wholesale markets.

In the liberalised generation activity in the Iberian market, output from our generation plants (unadjusted for hydro pumping) was 1% higher in 2013, at 13.3TWh, since the surge in hydro output (+2.2TWh) offset the fall in CCGT (-1.7TWh) and coal (-0.3TWh). Average production cost dropped by 18%, to EUR 32/MWh in 2013, reflecting an increase in the contribution from hydro (cheaper technology). As from 1-January-2013, there are no CO2 free allowances for the power sector and all emission allowances are to be bought in the market.

Output from our coal plants fell 5% in 2013, backed by strong hydro and wind resources in Iberia during the year. Average load factor was 2pp lower, at 50% in 2013. Generation from Spanish domestic coal amounted to 648GWh in 2013 versus 1,044GWh in 2012. Average production cost rose by 9%, to EUR 40/MWh due to higher CO2 costs following the end of free allowances.

Output from our CCGTs retreated by 54% in 2013, driven by lower demand for thermal production and low competitiveness of gas versus coal, implying a 5pp decline in average load factor, to 4% in 2013. Average production cost rose to EUR 106/MWh in 2013, mostly driven by a lower dilution of gas procurement fixed costs.

Output from our Hydro generation doubled in 2013, propelled by both rainy weather conditions and additional capacity (Alqueva II). Despite higher volumes of pumping (840GWh in 2013 versus 626GWh in 2012), the average cost of hydro production fell 56% to EUR 4.2/MWh, reflecting stronger hydro resources. Pumping activity was concentrated at Alqueva plant.

Regarding regulation, in Portugal, CCGT's capacity payments were interrupted as from 1-June-2012 (EUR 7 million in 2012) and are due to be replaced by lower incentives as from the year after the end of Portugal's bailout program. In Spain, the government approved in December 2012 several taxes aimed at ensuring the sustainability of the electricity sector, including a 7% tax on revenues and different taxes on gas/coal consumption, water use and nuclear waste. Following the RDL9/2013, the government submitted to the Spanish Regulator a set of Royal Decrees drafts which define namely: i) changes in the remuneration rules for ancillary services; ii) cut in the capacity payment from EUR 26/kW to EUR 10/kW although doubling the remaining payment period; and iii) change in the availability incentive mechanism.

In the electricity supply business in Spain, electricity volume supplied to our clients in the free market fell by 9% in 2013, to 17.8TWh, despite a 12% increase in the number of clients supplied, following EDP's strategy to focus on the most attractive customer segments. Market share was 2pp lower year-on-year, at 10% in 2013.

In the electricity supply business in Portugal, electricity volume supplied to EDP clients in the free market in Portugal increased by 33% year-on-year, to 13.1TWh in 2013, propelled by a 124% expansion of our client base. EDP's market share in the free market rose from 40% in 2012 to 44% in 2013, in line with EDP's strategy to focus on the more attractive residential/SMEs segments.

Our gas sourcing activity in 2013 was based on an annual 4.2bcm portfolio of long term contracts, whose flexibility has been enhanced through several contract renegotiations including changes in take or pay levels.

Moreover, rather than using volumes available solely for electricity generation and for the sale to clients in the free market, EDP has chosen to divert part of its take-or-pay gas volumes to wholesale markets, where prices are significantly higher. As a result, our gas consumption declined 12% to 39TWh (3.3bcm) in 2013 supported by a 51% drop in consumption by our gas fired power plants which more than offset the 6% increase in volumes sold to clients.

Volumes of gas supplied to our clients in the liberalised market in Spain rose by 4%, to 28.6TWh in 2013, following the 3% expansion in the client portfolio. Market share decline 1pp to 5% in 2013.

Volumes of gas supplied to our clients in the liberalised market in Portugal was 13% lower in 2013, at 5.3TWh, reflecting weaker volume in the industrial segment, stemming from the loss of one large client (cogeneration plant) in the third quarter of 2013. This was partially compensated by the volume increase in the residential segment following the gas market liberalisation. The strong pace of gas supply liberalisation, along with our successful dual offer (electricity + gas) to residential clients, prompted a jump in the number of clients from 56,000 in December 2012 to 224,000 in December 2013.

In accordance with the rules and calendar defined for the liberalisation of electricity supply in Portugal, the electricity last resort supplier (EDP Serviço Universal) can no longer accept new customers (with the exception of those entitled to the social tariff). Additionally, all remaining consumers under the regulated tariff will have to move to the free market until the end of the on-going transitory period: until December 2014 for clients with contracted power above 10.35 kVA and until December 2015 for clients with contracted power below 10.35 kVA. During the transitory period, the regulator may update the transitory tariff every quarter to promote the switch to the free market. In this context, the switching of electricity consumers to the free market during the fourth quarter of 2012 and 2013 was very strong. During 2013, the numbers of consumers in the free market doubled, to 2.3 million and as of December 2013 84% of B2B clients and 37% of residential consumers were already in the liberalised market, corresponding to 73% of total consumption.

REGULATED NETWORKS IN IBERIA

Regulated networks activity in Iberia includes our activities of distribution of electricity and gas in Portugal and Spain and our activity of transport of gas in Spain.

EBITDA from regulated networks in Iberia was 3% lower year-on-year (-EUR 34 million), at EUR 1,023 million in 2013, mainly driven by: i) lower regulated revenues, namely in the electricity distribution in Portugal based on a lower regulated rate of return on assets (-EUR 44 million, stemming from a return on RAB of 8.56% in 2013 versus 10.05% in 2012); ii) application of Law 9/2013 in Spain in the second half of 2013 resulted in a EUR 9 million negative impact in EBITDA for electricity distribution in Spain; iii) -EUR 5 million in gas distribution on no inflation indexing in 2013; which was partially compensated by tight cost control focused on OPEX efficiency.

Regulatory receivables in Iberia include tariff adjustment in electricity and gas in Portugal and Spain and the revisibility component associated to CMEC. Regulatory receivables in Iberia from regulated activity increased by EUR 65 million in 2013, from EUR 2,621 million in December 2012 to EUR 2,686 million in December 2013, driven by a EUR 225 million increase in Portugal and a EUR 160 million decrease in Spain.

EBITDA from electricity distribution and last resort supply activities in Portugal fell 5% year-on-year (-EUR 32 million) to EUR 619 million in 2013, mainly impacted by a decline in the regulated rate of return on assets from 10.05% in 2012 to 8.56% in 2013. This decline, derived from the decline of Portuguese Republic 5-year CDS, resulted in a EUR 44 million erosion in gross profit.

Last resort supplier regulated revenues decreased by 12% (-EUR 11 million), to EUR 82 million in 2013, reflecting the fast consumers' switching to the free market. As part of the rules and calendar defined for the phasing out of regulated tariffs in Portugal, EDP Serviço Universal can no longer accept new clients as from 1 January 2013, while the regulator can apply quarterly tariff increases in order to encourage clients' transfer to a liberalised supplier. The volume of electricity supplied by last resort supplier fell 29% year-on-year, to 14.0TWh in 2013 due to clients' migration to the liberalised market. Total clients supplied declined 1,224 thousands year-on-year to 3,807 thousands in December 2013.

On 15 December 2013, ERSE published a final version of tariffs and regulated revenues for 2014 for our electricity distribution and last resort supply activities in Portugal setting a 2.8% average annual increase for electricity tariffs in Portugal.

EBITDA from our electricity distribution activity in Spain was 9% lower year-on-year, at EUR 118 million in 2013, reflecting flat regulated revenues (in the wake of different regulatory initiatives throughout 2013) and a lower impact from the application of IFRIC18 (-EUR 16 million year-on-year, largely due to EUR 15 million income in the third quarter of 2012 following the commissioning of the substation in Gijón (Asturias)). Electricity distributed by EDP España, mostly in the region of Asturias, increased by 2% to 9.1TWh in 2013.

EBITDA from regulated gas distribution in Spain amounted to EUR 237 million in 2013 (+EUR 22 million year-on-year), supported by: (i) a EUR 56 million gain stemming from the sale of our transmission gas assets to Enagas in the first quarter of 2013; (ii) -EUR 27 million derived from the de-consolidation of gas transmission assets; and (iii) regulated revenues in the distribution business 1% lower year-on-year.

Regulated revenues declined by 14% (-EUR 32 million) to EUR 203 million, mainly due to the disposal of gas transmission assets (-EUR 31 million) and lack of inflation indexing (-EUR 5 million). The volume of gas distributed was 8% lower year-on-year, at 52TWh, dragged by lower activity by some industrial clients.

EBITDA from gas distribution in Portugal was 19% lower year-on-year (-EUR 12 million), at EUR 50 million, essentially due to a EUR 13 million positive impact from the agreement for the economic and financial balance of the concession (July 2012).

Notwithstanding the 6% growth in the number of supply points prompted by the continuing effort of new client connection in the region operated by EDP, volume distributed fell by 5% year-on-year, driven by the loss of one large client to the very high pressure grid.

On 14 June 2013, ERSE published the new regulatory framework defined for the regulatory period from July 2013 to June 2016. ERSE set: (i) a 3.9% increase in the average last resort supply tariff as from 1 July 13 until 30 June 2014; (ii) rate of return on assets of 9% (on a preliminary basis); (iii) regulated revenues of EUR 65 million for the first regulatory year. It should be noted that for the new regulatory period, ERSE indexed the regulated rate of return on assets to the average of Portuguese Republic 5-year bond yield between 1-October and 30- September prior to the beginning of each regulatory year, with a floor at 7.83% and cap at 11%.

EDP RENOVÁVEIS

EDP Renováveis owns and operates EDP Group wind and solar power assets and develops projects for new renewable capacity. The two main markets in which EDP Renováveis operates are the United States of America (35% of EDP Renováveis' EBITDA in 2013) and Spain (33%). Other markets include Portugal (14%), France, Poland, Romania, Belgium, Italy and Brazil (the latter 6 representing 18% of EDP Renováveis' EBITDA in 2013).

EDP Renováveis' EBITDA rose 1% year-on-year (+EUR 9 million) to EUR 947 million in 2013 driven by strong load factor in Iberia in 2013, negative regulatory developments in Spain and higher installed capacity but lower prices in Poland and Romania. EBITDA in 2013 includes the negative cumulative impact of EUR 71 million related to all 2013 Spanish regulatory changes. Forex impact on EBITDA totaled -EUR 13 million due to a 3% depreciation of US dollar and Brazilian real versus Euro.

In the United States, installed capacity totaled 3.6 GW as of December 2013, stable year-on-year. Electricity output increased by 2% year-on-year, reaching 10.1 TWh as higher average installed capacity in operation during the period offset the lower load factor year-on-year. Average selling price (excluding revenues from PTCs) for energy sold through PPA/hedged increased 1% year-on-year to USD53/MWh resulting from the contracted price escalators and the contribution of new PPAs in the period. Average selling price for merchant wind farms improved 2% year-on-year to USD32/MWh, following an increase in wholesale electricity prices. Overall, average selling price in the United States increased 3% year-on-year to USD49/MWh in 2013. Gross profit (including revenues from PTCs) increased by 4% to USD 648 million, while EBITDA rose USD 42 million year-on-year to USD 450 million in 2013 including the USD 18 million one off impact from the restructuring of the off-taking volumes of a long-term PPA for 200MW (from 100% to 80%). It should be noted that in the fourth quarter of 2013, EDP Renováveis concluded the sale of a 49% equity stake in a 97MW wind farms' portfolio to Fiera Axium.

In Spain, in the first half of 2013, all the wind energy produced in Spain was remunerated according to the Feed-in Tariff of the RD661/2007. In July 2013, the Spanish Government announced the RDL 9/2013, setting changes for renewable assets' remuneration scheme. The proposal for a new mechanism is available for consultation but its entry into force is still pending.

In Spain, EDP Renováveis' EBITDA decreased by 8% to EUR 320 million year-on-year in 2013 negatively impacted by EUR 32 million from the 7% tax over sales in Spain introduced in January 2013 and EUR 17 million related to changes in remuneration framework for renewable assets, introduced in July 2013 and pending for approval. Average load factor improved 3pp year-on-year to 29% in 2013, while electricity generated went up by 14% year-on-year to 5.8TWh in 2013 on the back of stronger wind resource. Average selling price reached €80/MWh, down 7% year-on-year driven by the end of the transitory regime and changes in regulation (all capacity in fixed tariff option) and cumulative changes in regulation during the year.

In Portugal, EDP Renováveis' EBITDA increased by 9% year-on-year to EUR 129 million in 2013, up EUR 11 million year-on-year. Wind production increased 10% year-on-year to 1,593GWh following an increase of average load factor by 3pp to 29%. Average tariff decreased by 3% year-on-year to EUR 99/MWh due to negative correlation between prices and annual working hours. Still in Portugal, EDP Renováveis holds an equity stake in ENEOP consortium (equity consolidated), licensed to build 1,335MW of wind capacity (535MW attributable to EDP Renováveis). In June 2013, EDP Renováveis completed the sale of a 49% equity stake, and a 25% of the shareholders loans in EDP Renováveis Portugal (excluding ENEOP) to China Three Gorges, for EUR 368 million. As of December 2013, ENEOP had an installed capacity of 1,138MW (455MW attributable to EDP Renováveis). In December 2013, EDP Renováveis signed a Memorandum of Understanding with CTG for the sale of 49% in EDP Renováveis' 40% share in ENEOP consortium whose conclusion is expected in 2015.

In European markets out of Iberia, gross profit increased 19% to EUR 217 million due to a 23% year-on-year increase of output to 2,132GWh in 2013 following a 42% or 403MW increase of installed capacity over the last 12 months. However, EBITDA decreased by 6% year-on-year (-EUR 11 million) to EUR 161 million in 2013 due to a

gain related to the allocation of purchase price allocation to the identifiable assets acquired and liabilities, the bulk of it in Italy and Romania booked in 2012.

In France, EDP Renováveis has 322MW of capacity (+8MW year-on-year). Wind power in France is sold through fixed tariffs indexed to inflation for 15 years. In 2013, average tariff was EUR 90/MWh (+1% year-on-year). In Oct-13, EDP Renováveis sold 49% equity shareholding and outstanding shareholders loans in a wind farm portfolio of 100MW located in France to Axpo Group, which is still pending approval. As of December 2013, EDP Renováveis had 12MW under construction in France.

In Belgium, EDP Renováveis has 71MW of capacity (+14MW year-on-year), which sell its power through PPA at a fixed selling price of EUR 112/MWh.

In Italy, EDP Renováveis has 70MW (+30MW year-on-year) of capacity installed in December 2013. Average selling tariff was EUR 138/MWh in 2013. For capacity installed in 2013 and onwards, wind farms will be remunerated under a feed-in tariff scheme defined by tenders.

In Poland, EDP Renováveis has 370MW of capacity (+180MW in 2013): i) 120MW from Margonin wind farm, which power is sold in the wholesale market and for whose EDP Renováveis has a 15 years long term contract for the sale of Green Certificates; ii) 70MW from Korsze wind farm, which output is sold through a 10 year PPA and iii) the remaining 180W, whose output is sold at "regulated electricity price + Green Certificates" (regulated price for 2013 is PLN201.4/MWh). In 2013, average selling price decreased by 6% year-on-year to PLN401/MWh. As of December 2013, EDP Renováveis had 10MW under construction in Poland.

In Romania, EDP Renováveis has 521MW of capacity (+172MW in 2013), of which 50MW are solar PV (+12MW in 2013). Wind production is sold at 'market price plus Green Certificates', whose value is subject to a floor and a cap set in Euros (for 2013, floor was set at EUR 28.9/MWh and the cap at EUR 58.8/MWh). In 2013, average selling price decreased by 19% year-on-year to RON490/MWh, impacted by lower green certificate prices driven by the uncertainty created through the approval by the Romania Government of the "Emergency Government Ordinance 57/2013".

In Brazil, EDP Renováveis has 84MW in operation remunerated through long term contracts (20 years). EDP Renováveis has currently 236MW under development in Brazil awarded at the energy A-5 auctions with PPA's for a period of 20-years from which 120 MW will start in January 2016 with a price set at BRL97/MWh, indexed to the Brazilian inflation rate and 116MW will start in January 2018 with price set at BRL109/MWh, indexed to the Brazilian inflation rate.

EDP BRASIL

EDP Brasil's contribution to consolidated EBITDA advanced by 9% (+EUR 47 million), to EUR 582 million in 2013, driven by 24% increase in local currency, to BRL 1,670m, and an unfavourable Forex impac of -EUR 83 million stemming from a 13% depreciation of the Brazilian real versus the Euro. EBITDA from distribution rose by 41% year-on-year (+BRL 243 million), benefiting from the recovery in 2013 of significant past tariff deviations, through CDE contributions. EBITDA from generation and supply rose by 14% year-on-year (+BRL 115 million), mainly reflecting a positive evolution of Pecém I coal plant versus 2012 (positive contribution in the second half of 2013).

EBITDA from our electricity distribution activity in Brazil went up 41% year-on-year (+BRL 243 million) to BRL 832 million in 2013, reflecting a strong increase in negative tariff deviations (+BRL 331 million), with 2013 deviations being nearly compensated by CDE ("Conta de desenvolvimento energético") contributions (+BRL 595 million), positive tariff readjustments at our distribution companies and market growth.

Volumes of electricity sold went up 2% year-on-year in 2013, reflecting a 5% increase in the 'residential, commercial and other' segments, justified by a wider client base and higher consumption per capita. Volumes sold in the regulated market to the industrial segment fell 4% year-on-year, due to the migration of clients to the free market. At the same time, volumes distributed to industrial clients in the free market advanced 6% year-on-year, backed by growing activity in auto and metallurgy sectors, which supported a 4% year-on-year increase of electricity distributed.

In January 2013, ANEEL approved an 18% decrease in tariffs for residential customers and up to a 32% decrease for industrials, on the back of a cut in electricity costs achieved through Provisory Act No. 579, then converted into Law 12.783/13, which translated into a drop in electricity sector charges, and lower generation costs, following the concessions' renewal contracts which matured between 2015 and 2017. The subsequent mismatch between the energy procurement contracts and supply obligations led to involuntary short contracting positions at our distribution companies. In March 2013, through DL 7.945/13, the Brazilian Government approved the transfer of funds, from an electricity sector account called CDE, to compensate distribution companies facing higher costs, derived from the strong thermal dispatch and the subsequent hike in spot prices, as well as from the short contracting position, as distribution companies had to satisfy demand through electricity purchases at high spot prices.

EBITDA from our electricity generation activities in Brazil went up 13% year-on-year (+BRL 96 million) to BRL 855 million in 2013, partly reflecting lower negative contributions from Pecém I coal plant (-BRL 104 million in

2012 and -BRL 53 million in 2013). Excluding the impact from Pecém I, EBITDA went up 5% year-on-year (+BRL 45 million) to BRL 908 million in 2013, reflecting higher average selling prices and improved hydro conditions in the fourth quarter of 2013, with generators not having to purchase energy at market prices to meet their PPA obligations, contrarily to what happened in the fourth quarter of 2012, due to the strongly adverse hydro conditions that shaped the end of 2012.

Electricity volumes sold rose 15% year-on-year to 11TWh in 2013 on the back of Pecém I contribution. Excluding this impact, volumes sold stood relatively flat at 8.2TWh in 2013. Average selling price went up 10% year-on-year, following: i) PPA prices inflation updates, as most of the capacity is contracted under long term PPAs; ii) the termination, in December 2012, of some contracts with a selling price well below average; and iii) short-term contracts for 2013 closed at higher prices as part of the seasonality strategy.

In December 2013, within the scope of EDP's strategic partnership with China Three Gorges, EDP Brasil signed a Memorandum of Understanding with CWE Investment Corporation, a fully owned subsidiary of China Three Gorges, for the joint development of renewable projects, including the disposal by EDP Brasil of a 50% stake in Jari and a 50% stake in Cachoeira Caldeirão.

The trading and supply activity in Brazil is carried out by our EDP Comercializadora subsidiary in the free market essentially through a service of energy sourcing to large industrial clients without incurring in material energy market risk. In 2013, electricity supply gross profit rose BRL 56 million year-on-year to BRL 76 million in 2013, reflecting a favorable long position and higher volumes supplied to clients, benefiting from higher spot prices. Note that in 2012, EBITDA includes a BRL 21 million gain related to the reversal of impairment losses on an energy contract, following an agreement reached with Ampla.

EVERENDING ENERGY

2.11. VALUE CREATION TO SHAREHOLDERS

The creation of shareholder value is sustained in the ability of the company to increase its net income, dividends and share prices, ie, is supported by the sum of strategic decisions affecting the sustainability of the Group's business activities assuming strategic importance the low risk profile assumed by EDP.

As opposed to the previous year, 2013 was marked by the recovery of the European utilities sector increasing 9.2%. However the sector was still one of the lowest performing sectors in Europe (fifth lower performance from the twenty European super-sectors). The sector benefited by a better macro outlook pointing to the end of recession in Europe, which compensated additional regulatory pressures, namely in Spain with the announcement of further measures to reduce the tariff deficit impacting Iberian utilities.

In this context, EDP stock closed the year with a return of 16.6%. Based on the payment of dividends to shareholders held on May 23, 2013 (ε 0.185 per share) which implied a dividend yield of 6.9% (based on December 31th closing price), generating a total shareholder return for 2013 of 24.7%.

DIVIDEND DISTRIBUTION POLICY

EDP has followed a sustained policy of dividend distribution that seeks to reconcile strict compliance with the relevant provisions of the law and Articles of Association and division among all its shareholders of a significant portion of the value created by the Group, in keeping with the specific conditions of the company and market. This policy is designed to enable shareholders to obtain an adequate return on their investment without compromising the company's value.

Pursuant to these rules, the table below shows the dividends distributed by EDP in the last two terms of office of the corporate bodies:

| Year | Approval Date | Payment Date | Gross Dividend |
|------|---------------|--------------|----------------|
| 2006 | 4/12/2007 | 5/4/2007 | € 0.110 |
| 2007 | 4/10/2008 | 5/8/2008 | € 0.125 |
| 2008 | 4/15/2009 | 5/14/2009 | € 0.140 |
| 2009 | 4/16/2010 | 5/13/2010 | € 0.155 |
| 2010 | 4/14/2011 | 5/13/2011 | € 0.170 |
| 2011 | 5/16/2012 | 5/11/2012 | € 0.185 |
| 2012 | 5/23/2013 | 5/20/2013 | € 0.185 |

For the 2012 financial year, the Executive Board of Directors of EDP submitted to the approval of the General Meeting of Shareholders of 6 May 2013 a proposal for the appropriation of the net profit of 832.7 million euros, 676.5 million euros of which was for distribution to shareholders in the form of dividends. The proposal was approved by a majority of votes (99.9998%) at the General Meeting and a gross dividend of 0.185 euros per share was paid on 23 May 2013.

EDP believes that a transparent relationship with investors and the market involves the definition of clear criteria and reasonable objectives for the dividend distribution policy, as the growing demands of the investor community, faced with the instability of the capital markets in recent years, have made clear.

On the latest Investor Day held on 23 May 2012 with Portuguese and foreign investors and analysts, the goal of proposing to the General Meeting of Shareholders an annual payout of 55%-65% of the recurring net profit was reinforced, with a minimum of the dividend per share paid in 2011 (€0.185 per share).

FACTORS INFLUENCING CHANGE IN EDP SHARE PRICE

In the year of 2013 the markets assisted to an improvement of the major indexed versus the previous year. The European index Stoxx Europe 600 rose 17% with peripheral economies leading the gains as economies started to rebound (the Spanish index advancing 21% and the Athens index rising 28%). The major US indexes performed positively during the year as well, with changes varying between 27% and 38% (the S&P 500 index marked its best year since 1997). As for the Asian markets, the Nikkei followed the occidental markets trend going up by 57% on the back of an aggressive economic stimulus, while the Shanghai index reduced 7%. Emerging markets fared poorly on concerns that the Fed's move to scale backs its stimulus programme will choke off capital flows into their economies.

The movement in the European markets was quite erratic this year. By March European shares shriveled as fears concerning Cyprus bailout program (that included a contribution by depositors) flooded investor's confidence in European markets. The second quarter on the other hand was characterized by a surveillance of European and American monetary policy guidelines. Poorer macroeconomic data in Europe increased expectations of a cut in interest rates, being afterwards offset by concerns regarding FED (Federal Reserve) suspension of economic stimulus, Greek's political tension and concerns regarding Chinese credit crunch, closing the first half of the year at minimums. The pressures from FED's tapering were only clarified in December with the announcement of a tempered reduction of bond buying program.

During the second half of the year, markets followed a more positive trend. The series of good company results pushed global indices to maximums (European markets reached five year maximums) despite the US

government shutdown, consequence of the divergence regarding debt ceiling, which bucked the markets movements.

The year of 2013 was also marked by a political crisis, which committed the improvement on investor's confidence implying a deterioration of Portuguese yields and consequently the PSI20 index contracted 5.6% in that day.

In the start of the third quarter, Standard & Poor's placed Portugal's "BB" rating under negative watch, after a positive revision in the beginning of the year, as a consequence of potential failure in achieving the established targets. On the other hand Moody's revised the outlook to stable given better fiscal consolidation and growth perspectives, but still rated below investment grade ("Ba3").

Following these actions, in September Standard & Poor's placed EDP's "BB+" rating under negative credit watch as well while Moody's maintained its "Ba1" rating with negative outlook. In July, the credit agency Fitch placed several utilities with significant exposure to Spain under negative watch given the announced regulatory measures to resolve the tariff deficit generated by the Spanish electricity system. This included EDP's "BBB-" rating.

Despite the negative outlook revisions and rating below investment grade, EDP was able to refinance its funding needs over the year. In January EDP has signed a five year credit facility of 1,600 million euros through a club deal with 16 domestic and international banks. On September, the company issued a Eurobond in the Irish market. The issue amounted 750 million euros, maturing at September 2020. This was not the only issue in this market as latter one, in November it issued an additional 600 million euros bond maturing at 2021 being able to extend its average debt maturity.

The company was able to successfully launch several securitization programs during the year. Regarding the Portuguese tariff deficit, the company was capable to securitize a total of 1,040 million euros, 973 million euros regarding the tariff deficit originated in 2012 and the remaining concerning the annual adjustment of the compensation due to the early termination of the PPAs (power purchase agreements). In Spain, FADE (Fondo de Amortización del Deficit Elétrico), entity responsible for the securitization of the Spanish electric system tariff deficits, was able to securitize some tranches of the tariff deficit, through private placements or public issues, in the amount of 8,010 million euros, of which 6.08% (or 487 million euros) belong to EDP Group through its subsidiary Hidrocantábrico.

During the year, the transactions announced referring to the sale from EDP Renováveis of its 49% stake in EDP Renováveis Portugal and 25% shareholder loans to China Three Gorges (CTG) and of the sale to Enagás of the Spanish gas transmission business were concluded.

There were also further developments regarding the strategic partnership established with CTG in 2011. At December 6th, two transactions were announced giving visibility to the 1 billion euros target investment by CTG. The announced transactions included the sale of 50% of the participation in Cachoeira Caldeirão and 50% participation in Jari for a total value of R\$865 million (including future co-investment commitments), and the sale of 49% stake in Eólicas de Portugal (ENEOP) to CTG under similar terms to the previous deal announced in December 2012.

As foreign exchange rate is concerned, the euro appreciated against the American dollar during the year on average by 3%, having a negative impact in the operating results for that country. Considering year end quotes the euro gained 4% to the American dollar softening the dollar denominated debt price, used to finance EDP's investments in US wind-farm assets. As for the Brazilian real, the euro appreciated on average 14% resulting in a reduction of the operating income of Brazilian assets. At year end, the euro closed appreciating 20% versus the Brazilian real.

Within the scope of the Brazilian A-5 auction carried in December, EDP Group was awarded, through EDP Brasil, the concession of São Manoel hydro plant with an installed capacity of 700 MW and under a PPA agreement for 30 years. In the same auction EDP Renováveis Brasil secured a 20 year PPA to sell electricity in the regulated market.

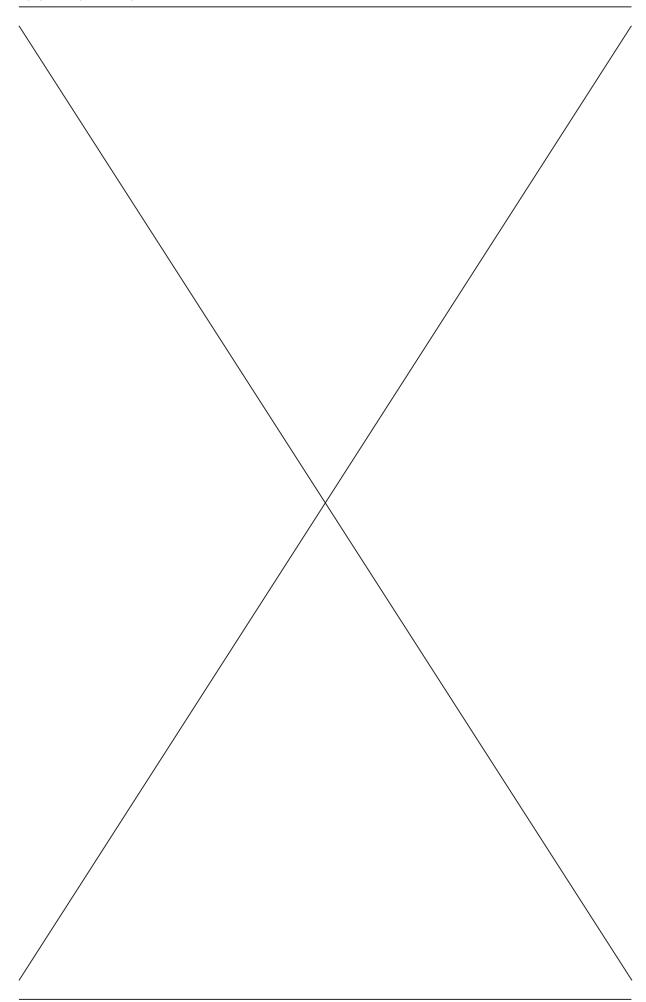

2013 was also a year of important regulatory changes within the electric sector, namely in Portugal, Spain and Brazil

In Portugal, it was proposed in the state budget for 2014 an extraordinary contribution by the energy sector of around 150 million euros, from which 50 million euros will be allocated to the tariff deficit. At the same time it was also announced a reduction of the corporate tax rate from 25% to 23%.

In July, the Spanish government announced some measures to improve the sustainability of the Spanish electricity system and resolve the tariff deficit problem permanently. Under these measures, the contributions from Iberian electricity companies included: a reduction in regulated networks remuneration, new regulatory method for renewable energy and cut in capacity payments.

In Brazil, the new regulatory methodology was applied to Escelsa since August, and included the downward revision of the rate of return on regulated asset base to 7.5% real pre-tax.

Regarding changes in the shareholder structure it is to highlight, the reduction of Portuguese State stake in EDP to 0%, through the sale by Parpública of its 4.14% participation in EDP's share capital on February 22nd.

PART I – INFORMATION ON OWNERSHIP STRUCTURE, ORGANISATION AND CORPORATE GOVERNANCE

A - OWNERSHIP STRUCTURE

I. CAPITAL STRUCTURE

1. CAPITAL STRUCTURE

EDP's share capital to the amount of EUR 3,656,537,715.00 is represented by 3,656,537,715 shares.

There are no limitations on the transferability of ordinary (or Category A) shares as, pursuant to the Securities Code, shares traded on a market are freely transferrable, although EDP's Articles of Association contain rules limiting the exercise of voting rights, which apply to both ordinary shares (or Category A) shares and Category B shares.

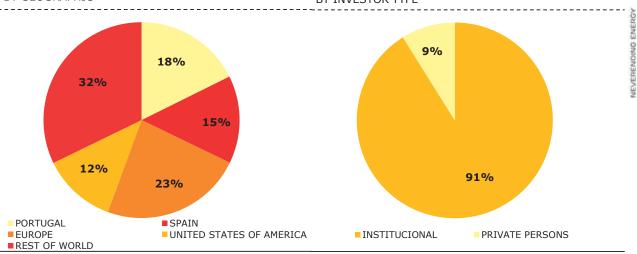

Although the Articles of Association still refer to Category B shares, on 14 February 2013 Parpública – Participações Públicas (SGPS), S.A. used accelerated bookbuilding to sell the 151,517,000 Category B shares with a face value of 1 euro each, equivalent to 4.14% of EDP's share capital, that it still owned. As a result of the settlement of this operation, on 19 February 2013, Parpública – Participações Públicas (SGPS), S.A. has decreased to 0% of EDP's share capital. As mentioned in Article 4 (5) of EDP's Articles of Association, Category B shares only continue to be in this category if they are owned by public bodies. Their transfer to non-public bodies results in their conversion into Category A shares. Therefore, as a result of the transfer of the shares owned by Parpública – Participações Públicas (SGPS), S.A. and their automatic conversion into Category A shares, there are no Category B shares.

EDP's share capital is therefore represented exclusively by 3,656,537,715 Category A shares, which are ordinary and have a face value of 1 euro each.

The geographical and investor type breakdown of the EDP shareholder structure on 31 December 2013 was as follows:

BREAKDOWN OF SHAREHOLDER STRUCTURE BY GEOGRAPHIC

BREAKDOWN OF SHAREHOLDER STRUCTURE BY INVESTOR TYPE

2. RESTRICTIONS ON SHARE TRANSFERABILITY

In statutory terms (article 4(4)), category B shares are the shares to be re-privatised, which have restrictions on their ownership - they may only be held by public bodies. However, this rule was no longer applicable following the extinction of category B shares described in the previous paragraph.

There are no restrictions on the transferability of Category A shares, which currently represent the entire share capital.

3. TREASURY STOCK

As at 31 December 2013, EDP owned 27,597,268 treasury stock shares, corresponding to 0.75% of the share capital and 0.75% of the voting rights.

4. CHANGE OF COMPANY CONTROL

As far as the Executive Board of Directors knows, EDP is not a party to any significant agreements that come into effect, are amended or cease in the event of a change of company control following a takeover bid (except normal market practice in terms of debt issue).

93

5. DEFENSIVE MEASURES

EDP has not taken any measures to prevent takeover bids that would put the interests of the company and its shareholders at risk.

On this subject, it is important to note that, pursuant to Article 14 (3) of EDP's current Articles of Association, votes cast by a shareholder on his own behalf or representing another will not be considered if they exceed 25% (twenty-five percent) of all the votes corresponding to the share capital.

Although EDP's Articles of Association impose this limitation on the exercise of voting rights, under which votes cast by a shareholder on his own behalf or representing another will not be considered if they exceed 25% (twenty-five percent) of all the votes corresponding to the share capital (pursuant to the allocation of voting rights set out in Article 20 (1) of the Securities Code), this limitation is not a measure to prevent successful takeover bids.

In fact, the inability of the limitation on voting rights to prevent the success of a takeover bid is the result of EDP's current capital structure, in which the largest shareholding is 21.35%, and of the compliance of the deliberative quorum of two-thirds of the votes cast, which is set out in EDP's Articles of Association for an amendment to the company agreement on this matter with Article 182 (2) of the Securities Code.

No defensive measures have been taken aimed at or resulting in serious erosion of EDP's assets in the event of transfer of control of the company or a change in the composition of the Executive Board of Directors, thereby prejudicing the free transferability of the shares and free appraisal by the shareholders of the performance of the members of the Executive Board of Directors.

SHAREHOLDER AGREEMENTS

Pursuant to Article 7 of EDP's Articles of Association, shareholder agreements regarding the company must be communicated in full to the Executive Board of Directors and the General and Supervisory Board by the shareholders that have signed them in the 30 (thirty) days following their conclusion.

According to information provided to the company by the shareholders, the Executive Board of Directors is aware of the existence of a single shareholder agreement, which was entered into on 11 April 2007 by Parpública - Participações Públicas (SGPS), S.A. ("(Parpública"), Caixa Geral de Depósitos, S.A. ("CGD") and Société Nationale pour la Recherche, la Production, le Transport, la Transformation et la Commercialisation des Hydrocarbures ("(Sonatrach").

Under the terms of this shareholder agreement, which were announced publically, Parpública and CGD made the following commitments:

- To support the continued membership of Sonatrach (or of a person indicated by it) in EDP's General and Supervisory Board, provided that Sonatrach maintains a shareholding of at least 2% (two percent) of EDP's share capital and the strategic partnership remains in effect; and
- To refrain from promoting, supporting and/or voting in favour of any change in EDP's Articles of Association
 that prevents the continued membership of Sonatrach (or of a person indicated by it) in EDP's General and
 Supervisory Board.

Although Parpública has sold its shareholdings in EDP's share capital and CGD does not own a qualifying shareholding in EDP's share capital, according to information at EDP's disposal this does not represent automatic cessation of the effects of the shareholder agreement. EDP has not been informed of any agreement to revoke or amend the said shareholder agreement.

II. SHAREHOLDINGS AND BONDS OWNED

QUALIFYING HOLDINGS

In March 2013 Liberbank, S.A. and Masaveu S.L. informed EDP of the conclusion of an irrevocable agreement under which (i) 183,257,512 shares representing 5.01% of EDP's share capital and voting rights, 1.5% were owned by Liberbank and 3.51% by Cantábrica de Inversiones de Cartera, S.L. (a Liberbank subsidiary) had been transferred to Oppidum Capital, S.L. and (ii) 42,789,104 shares representing 1.17% of EDP's share capital and voting rights owned by Masaveu S.L. had also been transferred to Oppidum Capital, S.L.

Following this agreement, Oppidum Capital S.L. now held 226,046,616 shares representing 6.18% of EDP's share capital and voting rights. As at 31 December 2013, the company owned 263,046,616 shares representing 7.19% EDP's share capital and voting rights.

Pursuant to Article 8 (1) (b) of CMVM Regulation 5/2008, we are providing the following information on qualifying holdings owned by EDP shareholders as at 31 December 2013 and their voting rights in accordance with Article 20 (1) of the Securities Code.

SPECIAL POWERS OF THE MANAGING BODY WITH REGARD TO DECISIONS TO INCREASE SHARE CAPITAL

The Executive Board of Directors has the powers enshrined in the law and Articles of Association to perform its duties, which are indicated in detail in point 21.

Regarding approval of decisions on share capital increases, the Executive Board of Directors has the power to approve one or more share capital increases up to an aggregate limit of 10% of the current share capital in the amount of EUR 3,656,537,715.00, via the issue of Category A shares to be subscribed by new entries in cash, in accordance with the issue terms and conditions that it defines. The draft decision must be submitted to the General and Supervisory Board subject to a majority of two-thirds of votes of the respective members (Article 4 (3) of EDP's Articles of Association). The General Meeting of Shareholders held on 17 April 2012 decided to approve the renewal for five years of the Executive Board of Directors' authorisation pursuant to Article 4 (3) of the Articles of Association. The Executive Board of Directors has not yet used this renewed power to increase EDP's share capital.

The Executive Board of Directors also has the power to submit proposals to the General Meeting for approval of increases in share capital after receiving a favourable opinion from the General and Supervisory Board. In these case, the General Meeting is responsible for approving the decision to increase the share capital (Article 17 (2) (g) and 11 (2) (c) of EDP's Articles of Association).

SIGNIFICANT BUSINESS RELATIONSHIPS BETWEEN OWNERS OF QUALIFYING HOLDINGS AND THE COMPANY

In the course of its activity and irrespective of their relevance, EDP concludes deals and performs operations under normal market conditions for similar operations with different entities, particularly with financial institutions, including owners of qualifying holdings in EDP's share capital and companies related to them.

On 11 May 2012, after the strategic partnership agreement concluded with China Three Gorges Corporation ("CTG") came into effect in December 2011, this company (and three other group companies) took a place on EDP's General and Supervisory Board.

Under the strategic partnership with China Three Gorges Corporation, on 28 June, 2013, EDP Renováveis, S.A. sold for a total final price global of EUR 368 million to a CTG Group company (CITIC CWEI Renewables S.C.A.,) a 49% shareholding in EDP Renováveis Portugal and 25% of the loan capital and supplementary capital contributions paid to this company and additional contributions under the rules of additional contributions to this company.

Also under this partnership, on 6 December, 2013, EDP Brasil signed a memorandum of understanding with CWE Investment Corporation (CWEI), a subsidiary owned 100% by China Three Gorges (CTG), setting out the main guidelines of the partnership with a view to future joint investments between EDP Brasil and which governs the parties' participation in joint projects in Brazil. These investments by CWEI Brasil will be considered for purposes of fulfilment of the strategic partnership agreement in relation to the total investment of EUR 2 billion to be made by CTG by 2015 (including joint operating investment financing) in ready-to-build operational renewable energy generation projects.

During 2013, and in addition to financial intermediation services rendered by BCP, were sell to this Bank: i) credits in the nominal value of EUR 149,587,500, related to 2012 tariff deficit; ii) credits in the nominal value of

VEVERENDING ENERGY

EUR 149,824,737, associated to the right of recovering annual adjustment value, referent to 2011, of the compensation due for the anticipated term of energy acquisition contracts (tariff adjustments to CMEC).

To Sonatrach, in 2013, was acquired natural gas within the scope of the long-term supply contracts to EDP Group and to the Soto 4 combined cycle plant, in the amount of USD 325,778,484.73.

At last, it was acquired to Liberbank a participation of 3% of Hidroeléctrica del Cantábrico, SA share capital, in the amount of EUR 106 million, subsequently to the exercise of a put option agreed with the referred Spanish institution in 2004.

Regarding the applicable governance guiding lines, it shall be noted that this theme was further analyzed in 2008 and the General and Supervisory Board approved objective, transparent rules for identifying, preventing and resolving relevant corporate conflicts of interest entitled Framework for Handling conflicts of Interest, which were revised in late 2009.

Following a decision made by the General and Supervisory Board, on 17 May 2010 the Executive Board of Directors approved the rules on identification, in-house reporting and procedure in the event of conflicts of interest applicable to all EDP Group employees who play a decisive role in transactions with related parties. These rules are also available on EDP's website (www.edp.pt).

As part of its improvement of governance practices, on 29 July 2010, the General Supervisory and Board approved EDP's rules on conflicts of interest and transactions between related parties, which are available on EDP's website (www.edp.pt), which replace the Framework for Handling conflicts of Interest. These rules for identifying, preventing and resolving potential relevant corporate conflicts of interest have a higher level of exigency than those in the CMVM Corporate Governance Code.

The Corporate Governance and Sustainability Committee is responsible for supervising enforcement of the aforementioned rules and reports on its work to the General and Supervisory Board.

The General and Supervisory Board noted in relation to 2013, in view of the cases analysed and the information provided by the Executive Board of Directors, that no evidence was found that the potential conflicts of interest underlying the transactions made by EDP may have been settled contrary to the interests of the Company.

For more information on the matter, see Point 3.5.1. of the Annual Report of the General and Supervisory Board.

B. CORPORATE BODIES AND COMMITTEES

I. GENERAL MEETING

A) COMPOSITION OF THE GENERAL MEETING

11. NAME AND POSITION OF OFFICERS OF THE GENERAL MEETING AND THEIR TERM OF OFFICE

Pursuant to Article 12 of EDP's Articles of Association, the officers of the General Meeting are a Chairman, a Vice-Chairman and the Company Secretary, who is appointed by the Executive Board of Directors.

At the Annual General Meeting of 17 April 2012 the Chairman and Vice-Chairman of the General Meeting were elected to office for 2012-2014. The Company Secretary was appointed on 22 February 2012 (likewise for the term from 2012 to 2014).

Board of the General Meeting

| Chairman | Rui Eduardo Ferreira Rodrigues Pena |
|--------------------------|-------------------------------------|
| Vice-Chairman | Rui Pedro Costa Melo Medeiros |
| Company Secretary | Maria Teresa Isabel Pereira |

The Chairman of the General Meeting is automatically a member of the General and Supervisory Board, pursuant to Article 21 (2) of EDP's Articles of Association.

The Chairman of the General Meeting has the in-house human and logistic resources appropriate to his/her needs, including the support of the General Secretariat and Legal Department, the Investor Relations Office and the Brand and Communication Department, plus external support from a specialised entity hired by EDP to collect, process and count the votes. The logistic and administrative resources for the General Meeting are provided by the Company and the organisation is supervised by the Chairman of the General Meeting.

B) EXERCISE OF VOTING RIGHTS

12. RESTRICTIONS ON VOTING RIGHTS

Pursuant to Article 14 (2) of EDP's Articles of Association, each share corresponds to one vote.

The holders of rights representing shares under ADR (American Depositary Receipt) programmes are subject to the same provisions of the law and Articles of Association pursuant to 9 do Article 14 (9) of the Articles of Association.

100

EDP's shareholders can only participate and vote at the General Meeting, personally or through a representative, if on the date of registration, 00:00 hours (GMT) of the fifth day of trading prior to that of the General Meeting, they own at least one share (Article 14 (10) of the Articles of Association).

Proof of ownership of the shares is provided by sending the Chairman of the General Meeting, by the fifth day of trading prior to that of the General Meeting, a statement issued, certified and sent by the financial intermediary responsible for registering the shares, indicating the number of shares registered and the date of registration. It may be sent by email (Article 14 (13) of EDP's Articles of Association).

Participation in the General Meeting also requires the shareholder to express this intention to the Chairman of the General Meeting and the financial intermediary at which the individual registration account has been opened, by the end of the sixth day of trading prior to that of the General Meeting. The communication may be sent by email (Article 14 (11) of EDP's Articles of Association).

Shareholders who have expressed their intention to participate in a General Meeting pursuant to the Articles of Association and have transferred ownership of the shares between the fifth day of trading prior to that of the General Meeting and the end thereof, must inform the Chairman of the General Meeting and the CMVM immediately (Article 14 (11) of EDP's Articles of Association).

EDP's shareholders can submit a postal vote on each of the items on the agenda in a letter addressed to the Chairman of the General Meeting, as set out in Article 14 (6) of the Articles of Association.

Pursuant to Article 14 (7) of EDP's Articles of Association, voting rights may also be exercised electronically, in accordance with the requirements necessary to ensure their authenticity, which must be defined by the Chairman of the General Meeting in the invitation to the meeting.

Shareholders can find the necessary forms for postal or electronic votes on EDP's website (www.edp.pt).

EDP has taken measures to encourage shareholders to exercise their voting rights, such as elimination of financial obstacles that may affect their exercise. These measures include:

- General circulation of the notice of meeting of the General Meeting with an express indication of the channels available for the exercise of voting rights and in publications on the CMVM website (on www.cmvm.pt) and EDP website (on www.edp.pt), on the NYSE Euronext Lisbon newsletter and in mailings to shareholders;
- Payment of the costs of issuing declarations of ownership of shares for all shareholders who participate in the General Meeting (directly or by post);
- Payment of the costs involved in remote voting, including postal voting.

Since 20 February 2012 votes cast by a shareholder in his own name or as a representative of another exceeding 25% (twenty-five percent) of all the votes representing the share capital are not considered. This limitation applies to all decisions of the General Meeting, including those for which the law or EDP's Articles of Association provide for a qualified majority of the company's share capital.

Pursuant to Article 14 (4) of EDP's Articles of Association, votes for which, under Article 20 (1) of the Securities Code or any legal rule that amends or replaces it, he is responsible will be considered cast by the same shareholder.

EDP's shareholders are obliged to provide the Executive Board of Directors, in writing and in a complete, objective, clear, truthful form, and in a manner acceptable to the board, all information that it requests from them on facts concerning them and related to Article 20 (1) of the Securities Code. Noncompliance with this obligation shall result in prevention of the exercise of voting rights pertaining to the shares owned by the shareholder in question (Article 15 (2) and (3) of the Articles of Association).

If the limitation on the counting of votes affects a number of shareholders, it will operate in proportion to the ordinary shares owned by each one (Article 14 (5) of the Articles of Association).

Furthermore, pursuant to Article 20 (1) of the Securities Code, or any legal rule that amends or replaces it, shareholders who become owners of a shareholding of 5% (five percent) or more of the voting rights or share capital, must inform the Executive Board of Directors thereof within five business days of the date on which ownership occurred. They cannot exercise their voting rights until they have made this communication (Article 15 (1) of EDP's Articles of Association).

 MAXIMUM PERCENTAGE OF VOTING RIGHTS THAT CAN BE EXERCISED BY A SINGLE SHAREHOLDER OR SHAREHOLDERS THAT ARE RELATED IN SOME OF THE RELATIONS OF ARTICLE 20 (1)

See Point 12

14. DECISIONS OF SHAREHOLDERS WHO, UNDER THE ARTICLES OF ASSOCIATION, CAN ONLY BE MADE BY A QUALIFIED MAJORITY OTHER THAN THOSE PROVIDED FOR BY LAW

Decisions by the General Meeting are taken by a majority of votes cast, unless the law or the Articles of Association require a qualified majority (Article 11 (3) of the Articles of Association).

EDP's Articles of Association do not define any constitutive quorum for the General Meeting and have adopted the rule set out in the Portuguese Company Code.

Where a deliberative quorum is concerned, pursuant to EDP's Articles of Association, the General Meeting of Shareholders may decide at the first or second call however many shareholders are present or represented, including decisions on amendment of the Articles of Association, merger, split or conversion of the company (Article 11 (4) of the Articles of Association). On these matters, the deliberative quorum is actually lower than that set out in the Company Code (see Article 383 (1) of the Company Code), which requires the presence or representation of shareholders owning shares representing at least one third of the share capital.

In all other cases, the deliberative quorum set out in Article 383 (2) of the Company Code applies.

II. MANAGEMENT AND SUPERVISION

A) COMPOSITION

15. CORPORATE GOVERNANCE MODEL

EDP's governance structure is based on the dual model and consists of the General Meeting, Executive Board of Directors, General and Supervisory Board and the Statutory Auditor.

According to Article 11 (2) (b) of the Articles of association, it is the responsibility of the General Meeting of EDP to elect and dismiss the members of the Executive Board of Directors and the General and Supervisory Board, as well as their Chairmen and Vice-Chairmen, if any, and the Statutory Auditors, based on a proposal by the General and Supervisory Board (or by delegation to the Financial Matters Committee / Audit Committee). The General Meeting also appoints the members of the Environment and Sustainability Board, on proposal of the Executive Board of Directors, and Remuneration Committee of the General Meeting, which is responsible for setting the remuneration of the members of the corporate bodies (except the Executive Board of Directors, whose remuneration is set by the Remuneration Committee appointed by the General and Supervisory Board).

The separation of management and supervision roles is embodied in an Executive Board of Directors, which is responsible for the management of the company's business, and a General and Supervisory Board, the highest supervisory body.

Considering this structure, we can say that the dual model of corporate governance in place in EDP has allowed effective separation of the company's supervision and management in pursuit of the goals and interests of EDP and its shareholders, employees and other stakeholders, thereby contributing to achieving the degree of trust and transparency necessary for its adequate functioning and optimisation.

Furthermore, this model has proved appropriate to the company's shareholder structure as it allows supervision by key shareholders on the General and Supervisory Board.

For a better understanding of EDP's corporate governance, EDP's website (www.edp.pt) allows shareholders and the general public to view the up-to-date Articles of Association in Portuguese and English, the Internal Regulations of the Executive Board of Directors, General and Supervisory Board and its committees.

Moreover, the General and Supervisory Board and Executive Board of Directors have approved the Corporate Governance Manual which is also available to shareholders and the general public on the EDP website (www.edp.pt). The primary objective of this manual is to record and share an understanding of the two corporate bodies in terms of the recommendations of good corporate governance practices applying to EDP and appropriate guidelines to comply with them.

EDP sought to go beyond the legal requirements and regulations for this area, particularly concerning information reporting, given EDP's meticulousness and goals as regards the quality of its corporate governance practices. The Corporate Governance Manual therefore sought to serve the following purposes in order to achieve this basic goal:

- To reflect critically on recommendations on best practices set out in the CMVM Corporate Governance Code in order to contribute actively in optimising EDP's practices;
- To select the recommendations deemed most appropriate to EDP's governance model, focusing on measures taken and indicating potential measures for full adoption of good practices;
- To identify recommendations that are not appropriate to EDP's interests and give reasons for this position and indicate other ways of achieving the goals set out in the CMVM Corporate Governance Code;
- To help targets of the recommendations to reflect on the best governance practices to be followed at EDP;
- To draft a formal document that will help compliance with reporting obligations on corporate governance practices, such as the annual report required by law;
- Describe EDP's governance practices that are not set out in the Corporate Governance Code but achieve the goal shared by the General and Supervisory Board and the Executive Board of Directors to develop and increase the quality of EDP's governance processes.
- 16. ARTICLES OF ASSOCIATION RULES ON PROCEDURAL AND MATERIAL REQUIREMENTS FOR THE APPOINTMENT AND REPLACEMENT OF MEMBERS OF THE EXECUTIVE BOARD OF DIRECTORS AND GENERAL AND SUPERVISORY BOARD

It is the role of the General Meeting to elect and remove members of the Executive Board of Directors and the General and Supervisory Board, including their chairmen.

In the event of permanent or temporary absence of any of the members of the Executive Board of Directors, the General and Supervisory Board arranges for his/her replacement and the appointment must be ratified by the next General Meeting.

In the event of permanent absence of any of the members of the General and Supervisory Board, the substitutes on the list submitted to the General Meeting must be summoned by the Chairman of the General and Supervisory Board to replace him/her, following the order on the list. Pursuant to Article 21 (5) of EDP's Articles of Association, the substitutes on the list must all be independent. If there are no substitutes, they will be elected by the General Meeting.

COMPOSITION OF THE BOARD OF DIRECTORS, EXECUTIVE BOARD OF DIRECTORS AND GENERAL AND SUPERVISORY BOARD

The shareholders elected the members of the General and Supervisory Board and the Executive Board of Directors at the General Meeting of 20 February 2012, for the three-year period from 2012 to 2014. The term of office of these members of the corporate bodies therefore ends on 31 December 2014, though they may remain in office until a new appointment.

GENERAL AND SUPERVISORY BOARD

In the exercise of its duties – see Article 441 of the Company Code and Article 22 of EDP's Articles of Association - the main mission of the General and Supervisory Board is to constantly advise, monitor and supervise the management activities of EDP, cooperating with the Executive Board of Directors and the various other corporate bodies in pursuit of the company's interests, pursuant to the Company Code and the company's Articles of Association. It is elected by the shareholders at the General Meeting. Pursuant to Article 21 (1) of the Articles of Association, the General and Supervisory Board consists of no fewer than nine effective members, but always more than the number of members of the Executive Board of Directors. The majority of the elected members of the General and Supervisory Board must be independent, pursuant to Article 21 (4) of the Articles of Association.

At the Annual General Meeting of 6 May 2013, two new members were elected, namely Augusto Carlos Serra Ventura Mateus and Nuno Manuel da Silva Amado, following the resignations submitted by Parpública – Participações Públicas (SGPS), S.A. and Carlos Jorge Ramalho dos Santos Ferreira on 18 March and 12 April 2013, respectively

The members of the General and Supervisory Board are currently as follows:

| 102 | General and Supervisory Board | Independent Members | First appointment |
|-----|-------------------------------|------------------------|-------------------|
| | | | |

| Chairman | Eduardo de Almeida Catroga | Independent | 30/03/2006 |
|---|---|-------------|------------|
| /ice-Chairman | Dingming Zhang (em representação da China Three Gorges Corporation) | | 20/02/2012 |
| | Guojun Lu (as representative of China International Water & Electric Corp.) | | 20/02/2012 |
| | Ya Yang (as representative of China Three Gorges New Energy Co. Ltd.) | | 20/02/2012 |
| Shengliang Wu (as representative of CWEI (Europe), S.A.) | | 20/02/2012 | |
| | Felipe Fernández Fernández (as representative of Cajastur Inversiones, S.A | .) | 02/06/2008 |
| Luis Filipe da Conceição Pereira (as representative of José de Mello Energia, S.A.) | | 14/04/2011 | |
| | Mohamed Ali Ismaeil Ali Al Fahim (as representative of Senfora SARL) | | 16/04/2010 |
| | Harkat Abderezak (as representative of Sonatrach) | | 20/02/2012 |
| | José Maria Espírito Santo Silva Ricciardi | | 30/03/2006 |
| | Alberto João Coraceiro de Castro | Independent | 30/03/2006 |
| | António Sarmento Gomes Mota | Independent | 15/04/2009 |
| | Maria Celeste Ferreira Lopes Cardona | Independent | 20/02/2012 |
| | Fernando Maria Masaveu Herrero | | 20/02/2012 |
| | Ilídio da Costa Leite de Pinho | Independent | 20/02/2012 |
| | Jorge Avelino Braga de Macedo | Independent | 20/02/2012 |
| | Manuel Fernando de Macedo Alves Monteiro | Independent | 30/03/2006 |
| | Paulo Jorge de Assunção Rodrigues Teixeira Pinto | Independent | 20/02/2012 |
| | Vasco Joaquim Rocha Vieira | Independent | 20/02/2012 |
| | Vítor Fernando da Conceição Gonçalves | Independent | 30/03/2006 |
| | Rui Eduardo Ferreira Rodrigues Pena | Independent | 12/04/2007 |
| | Augusto Carlos Serra Ventura Mateus | Independent | 06/05/2013 |
| | Nuno Manuel da Silva Amado | | 06/05/2013 |

The representatives of the companies China Three Gorges Corporation, China International Water & Electric Corp., China Three Gorges New Energy Co., Ltd. and CWEI (Europe) SA, initiated their term of office on 11 May 2012, following the entry into force of the strategic partnership agreement concluded on 30 December 2011.

EXECUTIVE BOARD OF DIRECTORS

The Executive Board of Directors is responsible for managing the company's activities and representing the company, pursuant to Article 431 of the Company Code and Article 17 of the Articles of Association and is elected by the shareholders at a General Meeting. The Executive Board of Directors is currently made up of seven members. Pursuant to Article 16 (2) of the Articles of Association, the Executive Board of Directors must have a minimum of five and a maximum of seven members.

The members of the Executive Board of Directors are as follows:

| | Executive Board of Directors | First appointment date |
|----------|--|---------------------------|
| Chairman | António Luís Guerra Nunes Mexia | 30/03/2006 |
| | Nuno Maria Pestana de Almeida Alves | 30/03/2006 |
| | João Manuel Manso Neto | 30/03/2006 |
| | António Manuel Barreto Pita de Abreu | 30/03/2006 |
| | António Fernando Melo Martins da Costa | 30/03/2006 |
| | João Manuel Veríssimo Marques da Cruz | 20/02/2012 |
| | Miguel Stilwell de Andrade | 20/02/2012 |

M embers elected at the General M eeting of M arch 30, 2006 to hold office from June 30, 2006, date of entry into force of new Articles of Association and the two-tier corporate governance model.

INDEPENDENT MEMBERS OF THE EXECUTIVE BOARD OF DIRECTORS AND GENERAL AND SUPERVISORY BOARD

EDP's Articles of Association (Article 9 (1) Article 11 (2) (d), Article 21 (4), Article 22 (1) (a), Article 23 and Article 27) and the Internal Regulations of the General and Supervisory Board (Article 7)), both available on its website (www.edp.pt), lay down the rules on independence and incompatibilities for members of any of the company's corporate bodies.

The criteria of independence set out in EDP's Articles of Association are in line with those laid down in 414 (5) of the Company Code and determine that independence means an absence of direct or indirect relations with the company or one of its bodies and an absence of any circumstances that might affect impartiality of analyses or decisions, e.g. because the people in question own or are acting on behalf of owners of a qualifying shareholding of 2% (two percent) or more of the share capital of EDP or have been re-elected for more than two terms of office continuously or intermittently.

Pursuant to Article 9 (1) of EDP's Articles of Association, independence is "absence of direct or indirect relations with the company or one of its bodies and an absence of any circumstances that might affect impartiality of analyses or decisions, e.g. because the people in question own or are acting on behalf of owners of a qualifying shareholding of 2% (two percent) or more of the share capital of EDP or have been re-elected for more than two terms of office continuously or intermittently".

In view of the need to clarify the aforementioned Article 414 (5) of the Company Code, as there are diverging legal opinions, Associação de Emitentes de Valores Cotados em Mercado ("AEM") requested an opinion from the CMVM , whose opinion was that the capacity as independent is only lost if, "on the basis of the criterion of number of terms of office, in a situation likely to affect his/her impartiality in analyses or decisions if the members of the supervisory bodies of public limited companies, having been elected for a first term of office and re-elected continuously or intermittently for a second and third term, are re-elected (for the third time, therefore) for a fourth term of office."

Pursuant to its Internal Regulations, the General and Supervisory Board has in place a specific procedure regarding compliance with a large number of rules on incompatibilities and independence applicable to positions on this board (Articles 6 and 7 of the General and Supervisory Board Internal Regulations). This procedure includes the following aspects:

- Acceptance of a position as member of the General and Supervisory Board is subject to a written statement
 setting out specifically (i) the inexistence of any incompatibility under the law or Articles of Association; (ii)
 compliance with the independence requirements set out in its Internal Regulations, if the person has been
 elected as an independent member; (iii) the members' obligation to report to the Chairman of the General
 and Supervisory Board or, for the Chairman, directly to the board any subsequent event that might generate
 incompatibility or loss of independence;
- Every year, the members of the General and Supervisory Board must renew their statements as to the inexistence of incompatibility and compliance with the independence requirements, if applicable;

Also every year, the General and Supervisory Board conducts a general assessment of compliance with the rules of incompatibility and independence by its members.

At the same time, the Internal Regulations of the General and Supervisory Board has broadened the independence criteria applicable to its members, going beyond the provisions of Article 414 (5) of the Company Code and Article 9 of EDP's Articles of Association, and so people who directly or through their spouse or relative or similar in a straight line and to the collateral third degree, inclusive, are in one of the following situations cannot have independent status:

- Being holder, director, having contractual ties or acting on behalf or on the account of owners of a qualifying shareholding of 2% (two percent) or more of the share capital or voting rights in EDP or the same percentage in a company of which it is a subsidiary;
- Being a holder, director, having contractual ties or acting on behalf or on the account of owners of a
 qualifying shareholding of 2% (two percent) or more of the share capital or voting rights in a company that
 is a competitor of EDP; and

104

Having been re-elected for more than two consecutive or non-consecutive terms of office.

The rules of independence covering members of the General and Supervisory Board are particularly important regarding the following requirements:

- The board must consist of a majority of independent members (Article 434 (4) of the Company Code and Article 21 (4) of EDP's Articles of Association);
- The Financial Matters Committee/Audit Committee and the Remuneration Committee of the General and Supervisory Board must comprise a majority of independent members (Article 444 (6) of the Company Code Article 27 (1) (a) and (b) of the General and Supervisory Board's Internal Regulations).

In compliance with the above procedure, at the start of their terms of office, the members of the General and Supervisory Board stated that they were not in any of the situations of incompatibility set out in the Company Code (Article 414-A (1) (a) to (e) and (h) (ex vi Article 434 (4) and Article 437 (1)) or under the Articles of Association and, where applicable, that they complied with the independence requirements of the Internal Regulations of the General and Supervisory Board.

In early 2013, the members of the outgoing General and Supervisory Board renewed their statements on incompatibilities and independence. On 28 February, 2014, the General and Supervisory Board assessed compliance with the rules on incompatibilities and independence of the elected members at the General Meeting of 20 February, 2012 and members elected at the General Meeting of 6 May, 2013.

The Chairman and Vice-Chairman of the Board of the General Meeting made similar statements of compliance with the criteria of independence and incompatibility for their positions, as set out in Article 414 (5) and Article 414-A (1) of the Company Code and in Articles 9 and 10 of EDP's Articles of Association.

The above statements are available to the public on EDP's website, www.edp.pt.

The independent members of the General and Supervisory Board are shown in the table in Point 17 above.

 QUALIFICATIONS OF THE MEMBERS OF THE GENERAL AND SUPERVISORY BOARD AND EXECUTIVE BOARD OF DIRECTORS

See page 304 and following from the Management Report.

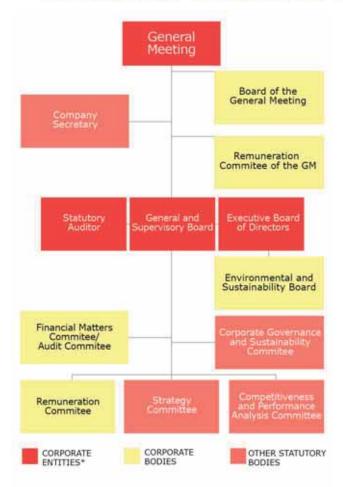

20. FAMILY, WORK-RELATED AND BUSINESS RELATIONSHIPS OF THE MEMBERS OF THE GENERAL AND SUPERVISORY BOARD AND EXECUTIVE BOARD OF DIRECTORS WITH SHAREHOLDERS OWNING A QUALIFYING SHAREHOLDING OF OVER 2% OF THE VOTING RIGHTS

The Chairman of the Executive Board of Directors, António Luís Guerra Nunes Mexia, is a director of Banco Comercial Português, S.A. which holds, directly and indirectly, a 2.63% shareholding in EDP.

As for the General and Supervisory Board, there are professional relationships between Board members and shareholders attributed a qualifying holding of more than 2% of voting rights, as described below:

- The members of the General and Supervisory Board Dingming Zhang, Ya Yang, LuGuojun and Shegliang Wu are managers of China Three Gorges Corporation which, through its subsidiary CWEI (Europe), S.A., has a 21.35% shareholding in EDP.
- The member of the General and Supervisory Board Fernando Masaveu Herrero is chairman of the management body of Masaveu International, S.L. which owns 52.9% of Oppidum, S.L., a company with a 7.19% shareholding in EDP.
- The member of the General and Supervisory Board Felipe Fernández Fernández is a manager of Liberbank, S.A. which owns 47.1% of Oppidum, S.L., a company with a 7.19% shareholding in EDP.
- The member of the General and Supervisory Board Mohamed Ali Al-Fahim is a manager of International Petroleum Investment Company (IPIC) which wholly owns Senfora, SARL, a company with a 4.06% shareholding in EDP.
- The member of the General and Supervisory Board Nuno Manuel da Silva Amado is chairman of the board of directors of Banco Comercial Português S.A. which holds, directly and indirectly, a 2.63% shareholding in EDP.
- The member of the General and Supervisory Board Harkat Abderezak is a manager of Sonatrach which has a 2.38% shareholding in EDP.

ORGANISATION CHART, DELEGATION AND DIVISION OF POWERS

*Corporate entities are also corporate bodies, pursuant to Article & of EDP's Articles Association

POWERS OF THE GENERAL AND SUPERVISORY BOARD

Pursuant to article 22 of the Articles of Association, the General and Supervisory Board is especially responsible for:

- Permanently monitor the management of EDP and its subsidiaries and provide management advice and assistance to the Executive Board of Directors, particularly with regard to strategy, goals and compliance with the law;
- Issue opinions on the annual report and accounts;
- Permanently oversee the work of the statutory auditor and external auditor and, with regard to the former, issue an opinion on their election or appointment, dismissal, independent status and other relations with the company:
- Oversee, on a permanent basis, and evaluate internal accounting and auditing procedures, the efficacy of the risk management system, internal control system and internal auditing system, including the way in which complaints and queries are received and processed, whether originating from employees or not;
- Propose to the General Meeting the removal from office of any member of the Executive Board of Directors
- Monitor the definition of criteria and responsibilities required or appropriate for the structures and internal bodies of the company or Group and their impact and draft follow-up plans;
- Provide for the replacement of members of the Executive Board of Directors in the event of permanent or temporary absence, as required by law;
- Issue an opinion on their annual vote of confidence in the directors set out in Article 455 of the Company Code, on its own initiative or when requested to do so by the CEO;
- Monitor and assess matters of corporate governance, sustainability, internal codes of ethics and conduct and compliance with these codes and systems for appraising and resolving conflicts of interest, including those associated with the company's relations with its shareholders, and issue opinions on these matters;

106

- Obtain the financial or other resources that it reasonably deems necessary for its work and ask the Executive Board of Directors to take any measures or make any corrections that it considers pertinent, with the power to hire independent consultants, if necessary;
- Receive regular information from the Executive Board of Directors on significant business relations between the company or its subsidiaries and shareholders with a qualifying holding and persons related to them;
- · Appoint the Remuneration Committee and Financial Matters Committee/Audit Committee;
- Represent the company in its relations with the directors;
- · Supervise the work of the Executive Board of Directors;
- Oversee compliance with the law and Articles of Association;
- Select and replace the company's external auditor, giving the Executive Board of Directors instructions for engagement or dismissal;
- Monitoring the bookkeeping, accounts and supporting documents and the status of any assets or securities held by the company, as and when it deems appropriate;
- Supervise the preparation and disclosure of financial information
- Call the General Meeting when it deems appropriate;
- Approve internal rules, including rules on relations with the other corporate bodies;
- Exercise any other powers that may be granted by law, the Articles of Association or by the General Meeting.

Under the corporate governance model in place at EDP, the General and Supervisory Board also has a power of particular importance. Although it does not have management powers, pursuant to Article 442 (1) of the Company Code, Article 17 (2) of the Articles of Association lays down that the approval of EDP's strategic plan and performance of the operations indicated below by EDP or its subsidiaries are subject to a prior favourable opinion from this board (see also Article 13 of the Internal Regulations of the General and Supervisory Board):

- Acquisitions and sales of assets, rights or shareholdings of significant economic value;
- Financing operations of significant value;
- Opening and closure of establishments, or important parts thereof, and substantial extensions or limitations of company activity;
- Other transactions or operations of significant economic or strategic value;
- · Formation or termination of strategic partnerships or other forms of lasting cooperation;
- Plans for splits, mergers or conversions;
- Amendments to the Articles of Association, including changes of registered office and share capital increases when on the Executive Board of Directors' initiative;
- Approval of the draft decision of the Executive Board of Directors to increase the share capital by means of
 one or more share capital increases, up to the aggregate limit of 10% of the current share capital by issuing
 Category A shares to be subscribed by new inputs of cash;
- Formation or termination of strategic partnerships or other forms of lasting cooperation.

The Chairman of the General and Supervisory Board is granted particular powers, and, pursuant to Article 18 of the Rules of Procedure of the General and Supervisory Board, is responsible for:

- Convening and presiding over meetings of the General and Supervisory Board;
- Representing the General and Supervisory Board institutionally;
- Coordinating the work of the General and Supervisory Board and ensuring the correct operation of its committees, being entitled to attend any meeting and being kept informed of their activities;
- Proposing to the plenary General and Supervisory Board the members, the Chairman and, when appropriate, the Vice-Chairman of each committee;
- Ensuring that the members of the General and Supervisory Board punctually receive the information they need for their duties;
- Requesting from the Executive Board of Directors relevant information for the General and Supervisory Board and its committees to perform their duties and ensuring that the members of the General and Supervisory Board receive it in good time;
- Taking the necessary measures to ensure that the General and Supervisory Board adequately monitors the activity of EDP and the Executive Board of Directors in particular;
- Monitoring implementation of the General and Supervisory Board's budget and managing the material and human resources assigned to it;
- Ensuring correct implementation of General and Supervisory Board decisions.

The Chairman of the General and Supervisory Board or, in his/her absence or incapacity, a member delegated by the board for that purpose, may attend meetings of the Executive Board of Directors whenever s/he sees fit and take part in the discussion of matters to be submitted to the General and Supervisory Board, without having any voting rights pursuant to Article 21 (10) of EDP's Articles of Association.

The members of the Financial Matters Committee/Audit Committee have a duty to attend the meetings of the Executive Board of Directors when the accounts are appraised, (see Article 4 (3) (e) of the Rules of Procedure of the Financial Matters Committee/Audit Committee.

With the assistance of the Corporate Governance and Sustainability Committee, the General and Supervisory Board annually performs:

- A self-assessment of its activity and performance and those of its committees, the conclusions of which are set out in its annual report (see Article 10 of the General and Supervisory Board Internal Regulations);
- An independent assessment of the activity and performance of the Executive Board of Directors, the conclusions of which are submitted to the General Meeting and are presented in an annex to the annual report of the General and Supervisory Board.

EDP, on the initiative of the General and Supervisory Board, continues to be one of the few listed companies in Portugal and abroad that has voluntarily established a formal, impartial process to assess the activity of this board and of the Executive Board of Directors. Experience of recent years has allowed the General and Supervisory Board to make some changes in the process to make it more effective and efficient. The method used comprises the following stages:

- After the year's end, the Chairman of the General and Supervisory Board sends assessment questionnaires to the members of its Board. The questionnaires are answered individually and are confidential.
- The General and Supervisory Board Support Office statistically processes the data received and prepares the information for consideration at a General and Supervisory Board meeting;
- The General and Supervisory Board issues its assessment opinions and they are included in this board's annual report;
- At the General Meeting, the Chairman of the General and Supervisory Board presents the board's opinion in the item of the agenda for assessment of the Executive Board of Directors.

POWERS OF THE EXECUTIVE BOARD OF DIRECTORS

The Executive Board of Directors is a collegial body. Individual directors in office are only allowed to represent one absent director at each meeting. All directors have equal voting rights and the Chairman has the casting vote.

The powers of the Executive Board of Directors, in accordance with the Article 17 (1) of the Articles of Association, include:

- Setting the goals and management policies of EDP and the EDP Group;
- Drawing up the annual business and financial plans;
- Managing corporate business and undertaking all actions and operations associated with the corporate object that do not fall within the responsibilities of other company bodies;
- Representing the company in and out of court, actively and passively, with the power to waive, transact and admit guilt in any legal proceedings and make arbitration agreements;
- Buying, selling or by any other means disposing or encumbering rights or immovable assets;
- Setting up companies and subscribing, purchasing, encumbering and selling shareholdings;
- Deciding on the issue of bonds and other securities in accordance with the law and the Articles of Association, in compliance with the annual quantitative limits set by the General and Supervisory Board;
- Establishing the technical and administrative organisation of EDP and the rules of procedure, particularly in relation to personnel and their remuneration;
- Appointing proxies with such powers as it sees fit, including the power to delegate;
- Appointing the Company Secretary and alternate;
- Hiring and dismissing the External Auditor on recommendation of the General and Supervisory Board;
- · Exercising any other powers that may be granted to it by law or by the General Meeting;
- · Establishing its own internal rules.

Proposals to amend EDP's Articles of Association regarding share capital increases submitted by the Executive Board of Directors require a prior opinion from the General and Supervisory Board, pursuant to Article 17 (2) (g) of the Articles of Association.

The Chairman of the Executive Board of Directors sends the Chairman of the General and Supervisory Board the notices of meetings, support documents and minutes of the meetings and, on request, provides appropriate,

timely information, which is accessible to all the members of the General and Supervisory Board and of the Financial Matters Committee/Audit Committee.

When so requested by other members of the corporate bodies, the Executive Board of Directors also provides all the required information in a timely and appropriate fashion. There is an information sharing portal for the Executive Board of Directors and General and Supervisory Board, which is accessible to all their members.

The Chairman of the Executive Board of Directors is granted particular powers by Article 18 of the Articles of Association. These powers are:

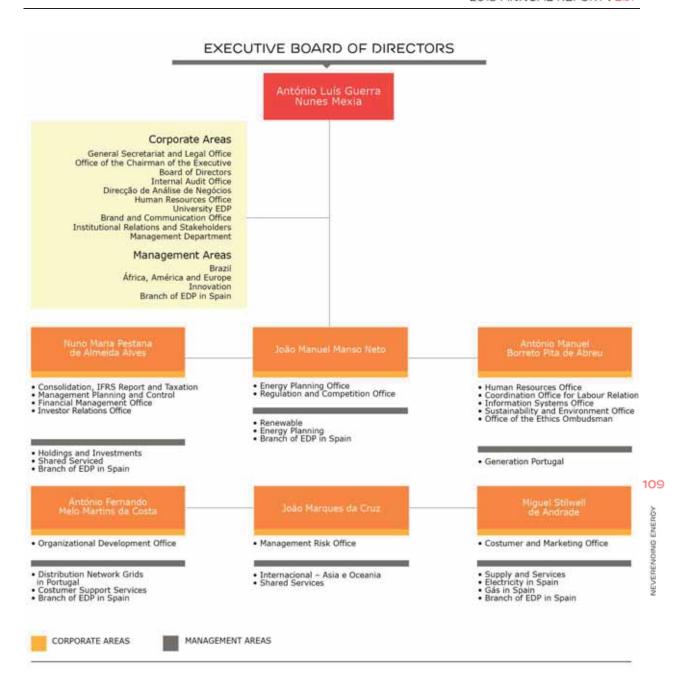

- · Representing the Executive Board of Directors;
- Coordinating the work of the Executive Board of Directors and convening and presiding over its meetings;
- Ensuring proper execution of the decisions of the Executive Board of Directors.

The Chairman of the Executive Board of Directors is entitled to attend the meetings of the General and Supervisory Board, whenever considered appropriate, except when these concern decisions on the supervision of the work of the Executive Board of Directors and, in general, any situations that may involve a conflict of interest, pursuant to Article 18 (2) of the Articles of Association.

In the Executive Board of Directors there is a functional division of management areas to each of its members. The college of directors is responsible for making decisions on all matters within its remit. Delegated powers are not granted to directors individually, because of the board's particular nature.

The activity and performance of the Executive Board of Directors are assessed continuously and independently by the General and Supervisory Board on an annual basis.

The organisation of the Executive Board of Directors is based on the following management areas and corporate matters:

EDP'S FUNCTIONAL STRUCTURE

GROUP'S ORGANISATIONAL MODEL

The Executive Board of Directors is responsible for defining the EDP Group's organisational model and dividing duties among the different business units, the service company EDP Valor - Gestão Integrada de Serviços, S.A. (EDP Valor) and central structure. This structure consists of a Corporate Centre that provides assistance to the Executive Board of Directors in defining and monitoring the execution of strategies, policies and goals.

The Corporate Centre is divided into departments and business units, allowing for optimisation and greater efficiency of the organisational structure.

The Executive Board of Directors is also assisted by specialised committees, which ensure more effective monitoring of matters and contribute to the decision-making process.

CORPORATE CENTRE

The central support structure for decision-making processes in 2013 was as follows:

OFFICES

Carlos Mata

1) The position started to be exercised by Pedro Neves Ferreira from 07.01.2014

2) Designated on 03.09.2013

The current departments and their duties are as follows:

The **General and Legal Office** provides administrative and logistical assistance to the Executive Board of Directors and legal advice to EDP companies with their head offices in Portugal, in order to ensure the effective operation of the Corporate Centre, compliance with applicable legislation and harmonisation of corporate governance policies in the Group.

The **Office of the Chairman of the Executive Board of Directors** assists the CEO in all matters within his/her remit in order to help maximise the effectiveness of decisions and instructions.

The main mission of the **Internal Audit Department** is to conduct internal audits or ensure they are performed in the Group and also run the Internal Control System for Financial Reporting ("SCIRF") in the Group. It independently assesses this system and proposes and promotes measures contributing to its effectiveness by improving and aligning processes and systems.

The **Ethics Ombudsman's Office** is responsible for conducting ethics procedures or ensuring that they are conducted in the Group, in order to maintain confidentiality and protect rights associated with these procedures.

The mission of the **Energy Planning Department** is to coordinate studies for the Group's energy portfolio development strategy in order to assist the Executive Board of Directors in building an integrated view of the portfolio and contributing to the planning of its development in the different regions in which EDP operates.

The **Business Analysis Department** coordinates studies to assist with the Group's overall business strategy and performs development operations via investments, divestitures and/or partnerships in order to assist the Executive Board of Directors in optimising EDP's business portfolio and promoting and taking new business opportunities.

The **Risk Management Department** coordinates studies to assess the Group's risk, in order to assist the Executive Board of Directors in monitoring and mitigating risk and to supply integrated analyses of return-risk.

The **Regulation and Competition Department** studies and implements regulatory strategy for the business in the MIBEL and coordinates energy regulation and competition projects for the Group, with the aim of supporting the Executive Board of Directors in decision-making and ensuring regulatory compliance by the companies covered.

The **Sustainability Department**'s mission is to analyse, propose and guarantee the Group's sustainability strategy in order to assist the Executive Board of Directors in policies and goals and to ensure their implementation in the business units.

The remit of the **Financial Management Department** is to propose and implement the Group's financial management policy and analyse and monitor management of its pension fund in order to optimise and guarantee financial sustainability and control financial liabilities in accordance with Group policy.

The **Consolidation, IFRS Reporting and Taxation Department** is in charge of the Group's IFRS reporting in order to ensure compliance with deadlines and accounting and tax processing that is appropriate and consistent in operations at all the Group companies.

The **Management Planning and Control Department** is responsible for the Group's management planning and oversight, to ensure alignment with strategic goals and monitor implementation of the business plan.

The **Investor Relations Department** communicates with analysts and investors in Group companies to ensure the sustainability of EDP's image and reputation and fulfil the information requirements of regulators and financial supervisors.

The **Organisational Development Department** analyses, proposes and coordinates the organisation's development and provides Group-wide programmes for implementing its strategy, in order to optimise the competiveness of EDP's organisation and operation.

The **Information Systems Department** is in charge of managing the Group's information and communication systems in the Iberian Peninsula and analysing and proposing the Group's ICT strategy in order to align it with the business units' strategy and create value by providing solutions that foster efficacy, efficiency and innovation in EDP's processes.

The **Human Resources Department** analyses and proposes the Group's human resource strategy and is in charge of group-wide support processes, in order to contribute to the implementation of its business strategy, value and develop all employees and develop a culture that is in line with the corporate values.

The **Labour Relations Coordination Office** manages labour relations matters and coordinates labour regulations studies in Portugal in order to achieve bargaining solutions that are in line with EDP's business goals and ensure that internal regulations are in line with labour legislation.

EDP University provides, retains and shares knowledge in the Group in order to reinforce a common culture, foster employees' vocational development and facilitate the appearance of new talents and full use of their skills.

The **Brand and Communication Department** analyses, proposes and implements the Group's communication strategy in order to maximise brand value and foster internal communication.

The **Customer and Marketing Department** analyses, proposes and monitors the commercial marketing strategy in the Iberian Peninsula in order to build a competitive market positioning and o maximise the profits of the business units covered.

The **Institutional Relations and Stakeholder Department** provides the Group's stakeholders with integrated, consistent reports, in line with its vision and strategy, in order to maximise the Group's communication potential with its stakeholders and contribute to fluid, systematised information on the Group and its shares.

The **Energy Management Unit** (UNGE) is responsible for negotiating physical and forward purchases of fuel and contracting maritime transport on behalf of the appropriate EDP Group companies. It is also responsible for spot and forward purchases and sales in the electricity market of a physical or financial nature, such as energy derivatives and foreign exchange operations. It also decides on operation and despatch programmes for the EDP Group power stations whose energy management is its responsibility in order to optimise its portfolio and supply energy to customers of the EDP Group's sellers. It also manages the EDP Group's CO2 allowance operations and green certificates.

SPECIFIC EDP COMMITTEES (FUNCTIONAL STRUCTURES)

The EDP organisational model provides for management committees that contribute in two ways to the company's decision-making process:

- They input information to assist the Executive Board of Directors in its decision-making reflecting opinions and information from the areas in the organisation most affected by the proposal in question;
- They are used by an organisational unit (belonging to the Corporate Centre, a business unit or shared service unit to assist in gathering information, alignment, decisions and implementation of policies and practices with an impact on a number of areas in the organisation;

Considering the principle of continuous improvement that the EDP Group follows and the committees' importance in the Group's organisational model, the Executive Board of Directors approved a change in the description of the committees and the appointment of new members in October 2013.

STRATEGIC CORPORATE COMMITTEES

RISK COMMITTEE

The main duties of the Risk Committee are:

- · Share information on the EDP Group's key risks and risk profile;
- Discuss the result of significant risk assessment projects undertaken in conjunction with the business units;
- Discuss and issue opinions or recommendations on policies, procedures, significant risks, risk limits and extraordinary risk situations;
- Promote and monitor maintenance of the inventory of the most significant risks (risk portal);
- Approve the periodical reporting model to be submitted by the business units or the Risk Management Department and other mechanisms for reporting and monitoring EDP's risks.

The Risk Committee's membership is as follows:

Chairman of the Executive Board of Directors

Member of the Executive Board of Directors (Finance Area)

Member of the Executive Board of Directors (Renewables Area)

Member of the Executive Board of Directors (Risk Area)

Head of Energy Planning of the Corporate Centre

Head of Financial Management of the Corporate Centre

Head of Management Planning and Control Department of the Corporate Centre

Head of Risk Management of the Corporate Centre

Head of Institutional Relations and Stakeholder of the Corporate Centre

Officer Universidade EDP

Officer Desenvolvimento Organizacional of the Corporate Centre (*)

Officer of Information Systmes of the Corporate Centre (*)

Head of Human Resources of the Corporate Centre (*)

Head of Customer and Marketing of the Corporate Centre (*)

Head of Sustainability of the Corporate Centre (*)

(*) when necessary, depending on the projects to assess

The Innovation Committee held one meeting in 2013.

INVESTMENT COMMITTEE

The Investment Committee discusses and issues opinions on proposed investment and disinvestment projects and WACC proposals for the business units.

The Investment Committee's membership is as follows:

Member of the Executive Board of Directors (Finance Area)

Head of Business Analysis of the Corporate Centre

Head of Management Planning and Control of the Corporate Centre

Head of Energy Planning of the Corporate Centre

Representative of Business Analysis Department

Responsible for the investment proposals under analysis

The Investments Committee held eighteen meetings in 2013.

REGULATION COMMITTEE

The remit of the Regulation Committee is as follows:

- Share regulatory practices in the Iberian Peninsula and the rest of Europe and those followed in Brazil;
- Analyse the European Commission's energy strategy and policies and the implementation of directives by the internal market and the competition and policies, legislation, regulations and organisation of the energy sectors in Portugal and Spain;
- Analyse prices and the implications of tariff policies and decisions on regulated activities;
- Discuss the impacts of developments and regulatory changes;
- Discuss and give an opinion on proposals for the definition of positions to be defended by the EDP Group in the Iberian and European market.

The Regulation Committee's membership is as follows:

Member of the Executive Board of Directors (Regulation Area)

Member of the Executive Board of Directors (Distribution Area)

Member of the Executive Board of Directors (Trading Area)

Head of Energy Planning

Head of Regulation and Competition

Head of Energy Management and Trading Business

Officer Gas Business

Officer HC Energia (Regulation)

Officer EDP Distribuição (Regulation)

Officer Naturgas (Regulation)

Officer EDP Brasil (Regulation)

Officer EDP Renováveis (Regulation and Markets)

Corporate Center Representatives (Regulation)

Naturgas Representative (Regulation)

Officer EDP Gás (Regulation)

EDP Soluções Comerciais Representative (Regulation)

Representative EDP Serviço Universal

The Regulation Committee held six meetings in 2013.

PRICE AND VOLUME COMMITTEE

The Price and Volume Committee's main duties are:

- · Share relevant, up-to-date information on recent developments in the Iberian electricity and gas markets;
- Discuss and align historical information and forecasts shared by business areas;
- Issue an opinion on the forward curve representing the EDP Group's best estimate on the growth of the wholesale market for a one to two- year horizon;
- Propose adjustments to management of the Iberian wholesale margin (in terms of risk coverage, commercial activity, placement of gas contracts, etc).

The Price and Volume Committee's membership is as follows:

Member of the Executive Board of Directors (Energy Trading)

Member of the Executive Board of Directors (Commercialization)

Board member of EDP Produção

Board member of EDP Comercial

Board member of EDP Renováveis

General Manager of Corporate Center and Commercial HC Energia

Head of Risk Management of the Corporate Centre

Head of Management Planning and Control of the Corporate Centre

Head of Regulation and Competition of the Corporate Centre

Head of Business Analysis of the Corporate Centre

Head of Energy Planning of the Corporate Centre

Head of UNGE

Head of Middle-Office UNGE

Head of Energy Markets UNGE

Head of HC Energia (Regulation)

Officer HC Energia (Projects)

Officer EDP Produção (Planning and Control)

Naturgas Representative

Officer EDP Renováveis (Regulation and Markets)

Representative EDP Serviço Universal

The Price and Volume Committee held three meetings in 2013.

IBERIAN COMMERCIAL AND MARKET COMMITTEE

The Iberian Commercial and Market Committee's responsibilities are as follows:

 Share information on the energy trading market and Iberian business for the supply of electricity, gas and services in all market segments (purchase of natural gas, gas sales balance sheet, customer losses, prices, competition, etc);

- Analyse the market situation and competitiveness of prices in the different electricity and gas market in segments Portugal and Spain;
- Propose preferential segments for the placement of gas and price policies in different segments, strategies
 for gas auctions, gas placement or purchase goals in gas trading, measures to retain strategic customers,
 adaptation or correction of current commercial policies and setting or revision of intra-group transfer prices;
- Monitor the implementation of the above measures.

The Iberian Commercial and Market Committee's membership is as follows:

Member of the Executive Board of Directors (Energy Management)

Member of the Executive Board of Directors (Commercialization, Spain)

Board fo Directors of EDP Comercial

General Manager of Corporate and Trading HC Energia

Board member of Naturgas

Officer HC Energia/Naturgas (Comercial B2B Espanha)

Officer HC Energia/Naturgas (Comercial B2C Espanha)

Officer Comercial B2C Espanha (HC Energia/Naturgas)

Officer Operations of Naturgas

Officer EDP Comercial (Commercial B2B)

Officer EDP Comercial (Energy Management)

The Iberian Commercial and Market Committee held nine meetings in 2013.

FUNCTIONAL CORPORATE COMMITTEES

ETHICS COMMITTEE

EDP has always operated in a framework of explicit or implicit ethical values. Examples of this are the vision, values and commitments defined by the Executive Board of Directors and the principles of sustainable development with customers, in professional relationships and commitments to shareholders.

The Ethics Committee's duties are as follows:

116

- Issue opinions on the EDP Group's policy on its code of conduct, good practices and compliance with the highest ethical standards;
- Propose guidelines on regulation of matters under its remit;
- Foster correct regulatory application of ethical matters in the EDP Group companies.

The Ethics Committee, which was set up after approval of the EDP Group's Code of Ethics, articulates with the Corporate Governance and Sustainability Committee of the General and Supervisory Board and its responsibilities are as follows:

- Draft and propose its Internal Regulations to the Corporate Governance and Sustainability Committee of the General and Supervisory Board;
- Submit corporate ethics instruments, policies, goals and targets to the Corporate Governance and Sustainability Committee;
- Receive and examine cases of infringement prepared by the Ethics Ombudsman and issue an opinion on them, which will then be submitted to the Corporate Governance and Sustainability Committee of the General and Supervisory Board;
- Issue an opinion, when requested to do so by any of the managing bodies of the EDP Group companies and entities on practices or codes of conduct in the fields of ethics or professional conduct within the framework of specific, legal or regulatory needs;
- Analyse decisions made by the Ethics Committee of EDP Energias do Brasil, S.A. (Energias do Brasil) and the Ethics Committee of EDP Renováveis, S.A. (EDP Renováveis);
- Draft quarterly reports on the EDP Group's performance in implementing the Code of Ethics;
- Annually review the Code of Ethics' suitability to the EDP Group's needs of and draw up a report, on proposal
 of the Ethics Ombudsman and the Sustainability Department of the EDP Corporate Centre.

The Ethics Committee's membership is as follows:

Chairman of the Executive Board of Directors

Board member of the Executive Board of Directors (Sustainability and Ethics)

Board member of EDP Produção

Board member of EDP Distribuição

Board member of EDP Comercial

Board member of EDP Soluções Comerciais

Board member of EDP Valor

The Commercial Share Committee and the Corporate Share Committee were abolished in October 2013, during the reorganisation of the Management Committees

CUSTOMER OMBUDSMAN

The Customer Ombudsman is an independent entity that was created in 2009 to reinforce the EDP Group's customer care policy. Its responsibilities are as follows, pursuant to Article 9 of the EDP Group Companies' Customer Ombudsman Regulations:

- Receive and examine complaints filed by customers and directly related to actions or omissions by EDP Group companies;
- Enter into dialogue with customers making a complaint;
- Arbitrate disputes and conflicts between customers and EDP Group companies;

- Issue opinions on matters relating to the activity of EDP Group companies, if requested to do so by any of their corporate bodies;
- Propose measures to improve quality of service and customer satisfaction;
- Contact third parties to obtain specialist information so that recommendations can be made to the EDP Group companies on measures to be taken to improve their customer relations.

The Customer Ombudsman's term of office is three years, and is renewable once only, for an equal period (Article 5 (2) of the EDP Group Companies' Customer Ombudsman Regulations). In the performance of his duties, the Customer Ombudsman has an independent Customer Ombudsman Office and an annual budget (Article 20 of the EDP Group Companies' Customer Ombudsman Regulations).

SUBSIDIARY IN SPAIN

Sucursal EDP Espanha manages and coordinates the energy interests of the EDP Group's dependent subsidiaries in Spain. Its management and supervisory bodies ensure optimisation of synergies and creation of value in operations and activities in Spain. It is also the organisational platform Iberian integration of support services. To this end, Sucursal EDP Espanha owns all the majority financial holdings in EDP Renováveis and HC ENERGÍA and, indirectly, in Naturgas Energía Grupo S.A. (Naturgas) via majority control of it, among others

Sucursal EDP Espanha has offices in Madrid and Oviedo. It is represented in relations with third parties by permanent representatives, who have been appointed members of the EDP Executive Board of Directors for that purpose.

The company's steering, coordination, management and representation structure consists of an Executive Committee and Management Committee. The Executive Committee is composed of five permanent EDP representatives, one Group Controller for activities in Spain, and front line managers in charge of the business units in Spain. This committee basically serves as the coordinator of the permanent representatives' activities. The Management Committee is chaired by the Group Controller and is a natural extension of the management departments at the EDP Corporate Centre, i.e. the Business Analysis, Legal, Audit, Spanish Taxation, Financial Management, Shared Services and Information Systems departments. The committee groups and performs the tasks of these departments in Spain. The Coordination Committees were abolished on 14 December 2012 as representation of Sucursal EDP Espanha passed to the EDP Iberian committees in October 2012. They are: Energy Planning Committee, Prices and Volumes Committee, Iberian Commercial and Market Committee, Distribution Grids Committee, Iberian Commercial Committee and Generation Committee.

B) OPERATION

22. LOCATION WHERE THE OPERATING REGULATIONS OF THE GENERAL AND SUPERVISORY BOARD AND EXECUTIVE BOARD OF DIRECTORS CAN SER CONSULTED

The operations of the General and Supervisory Board and Executive Board of Directors are governed by their Internal Regulations, available on EDP's website, www.edp.pt.

23. MEETINGS AND ATTENDANCE RATE OF EACH MEMBER OF THE GENERAL AND SUPERVISORY BOARD AND EXECUTIVE BOARD OF DIRECTORS

Ordinary meetings of the General and Supervisory Board are held at least once every quarter and extraordinary meetings take place whenever convened by the Chairman, on his/her own initiative or at the request of any of its members, the Executive Board of Directors or its Chairman, pursuant to Article 24 (1) of the Articles of Association and Article 19 (1) of the Internal Regulations of the General and Supervisory Board.

The General and Supervisory Board met eight times in 2013 and minutes were kept of all the meetings. Information on the attendance of each member of the board is provided in Annex I to this report.

Pursuant to the provisions of Article 20(1) of the Articles of Association and Article 6(1) of the Rules of the Executive Board of Directors, this body will have ordinarily met at least twice a month, as fortnightly meetings were compulsory. Nevertheless, the Executive Board of Directors meets weekly, as a rule.

The Executive Board of Directors met 39 times in 2013 and minutes were kept of all the meetings. Information on the attendance of each member of the board is provided in Annex II of this report.

24. COMPANY BODIES WITH POWERS TO EVALUATE PERFORMANCE OF EXECUTIVE DIRECTORS

The Corporate Governance and Sustainability Committee is responsible for supervision of individual and overall performance evaluation of the directors, reflection on EDP's governance system and identification of potential directorship candidates. There are no constraints that disrupted the work of the committee.

25. PRE-DETERMINED CRITERIA FOR PERFORMANCE EVALUATION OF EXECUTIVE DIRECTORS

These criteria for evaluating the performance of the Members of the Executive Board of Directors are set out in points 69 and 71 of the Corporate Governance report.

26. POSITIONS HELD AT OTHER GROUP OR NON-GROUP COMPANIES BY EACH MEMBER OF THE GENERAL AND SUPERVISORY BOARD AND EXECUTIVE BOARD OF DIRECTORS

The positions held by members of the General and Supervisory Board and Executive Board of Directors in other EDP Group or non-group companies are shown in Annex III.

COMMITTEES OF THE MANAGING OR SUPERVISORY BODY

27. COMMITTEES SET UP IN THE GENERAL AND SUPERVISORY BOARD AND EXECUTIVE BOARD OF DIRECTORS

The Internal Regulations of the General and Supervisory Board provide for the establishment of standing committees and ad hoc committees, composed of some of its members, without prejudice to its responsibility for the exercise of its duties as a corporate body. These committees may be set up whenever it sees fit and appropriate and have specific duties delegated to them.

The main remit of the standing and ad hoc committees is specific, continuous monitoring of the matters entrusted to them, in order to ensure informed decisions by the General and Supervisory Board or provide it with information on certain matters.

The committees' activity is coordinated by the Chairman of the General and Supervisory Board, who ensures proper articulation of the committees with the plenary board through their chairmen, who keep him informed by sending notices and the minutes of meetings.

The General and Supervisory Board believes that the committees are important to the regular functioning of the company as they can perform certain delegated duties, especially monitoring the company's financial information, reflecting on its governance system, assessing the performance of directors and evaluating its own overall performance.

The General and Supervisory Board has five specialised committees: Financial Matters Committee/Audit Committee, Remuneration Committee, Strategy Committee, Performance Analysis and Competitiveness Committee, and Corporate Governance and Sustainability Committee They were set up at the meeting of 21 February, 20012 and their membership was changed at meetings on 18 and 22 May, 2012.

28. MEMBERSHIP OF THE EXECUTIVE COMMITTEE AND/OR NAME OF MANAGING DIRECTOR(S)

Not applicable to EDP's governance model

29. DUTIES OF EACH COMMITTEE AND SUMMARY OF WORK PERFORMED WHILE CARRYING THEM OUT

A. THE COMMITTEES OF THE GENERAL AND SUPERVISORY BOARD

FINANCIAL MATTERS COMMITTEE/AUDIT COMMITTEE

The Financial Matters Committee/Audit Committee is made up of five independent members with the appropriate qualifications and experience, including at least one member with a degree in the area of the committee's duties and specific knowledge of auditing and accounting, as confirmed by the Curriculum Vitae of the Vice-Chairman, which can be viewed in the chapter on corporate bodies.

The Financial Matters Committee/Audit Committee's membership is as follows:

| Financial Matters Committee/Audit Committee | | First appointment date |
|---|--|---------------------------|
| Chairman | Eduardo de Almeida Catroga | 21/02/2012 |
| Vice-Chairman | Vítor Fernando da Conceição Gonçalves | 13/07/2006 |
| | António Sarmento Gomes Mota | 07/05/2009 |
| | Manuel Fernando de Macedo Alves Monteiro | 13/07/2006 |
| | Maria Celeste Ferreira Lopes Cardona | 18/04/2012 |

In accordance with the Articles of Association and the Internal Regulations of the Financial Matters Committee/Audit Committee, are assigned to this Committee, by delegation from the General and Supervisory Board, the following powers:

- Issue opinions on the annual report and accounts;
- Permanently oversee the work of the Statutory Auditor and the External Auditor of EDP and issue opinions
 on the Statutory Auditor's election or appointment, removal from office, independence and other relations
 with EDP;
- Permanently monitor and assess internal accounting and auditing procedures and the efficacy of the riskmanagement system, internal control system and internal audit system;
- Monitor the bookkeeping, accounting records, supporting documents and the status of any assets or securities held by EDP in any capacity, as and when it sees fit;
- Exercise the powers expressly granted by the General and Supervisory Board;
- Exercise any other powers that may be specifically granted by law.

As a specialised committee of the General and Supervisory Board, the Financial Matters Committee/Audit Committee also assists it in the hiring and dismissal of the External Auditor, pursuant to Article 4 (1) (i) of the Internal Regulations of the Financial Matters Committee/Audit Committee.

The membership, role and functioning of the Financial Matters Committee/Audit Committee are in line with the European Commission Recommendation of 15 February 2005 (2005/162/EC), supplemented by the European Commission Recommendation of 30 April 2009 (2009/385/EC).

In view of these duties, the Financial Matters Committee/Audit Committee held thirteen meetings in 2013, as envisaged in its Activity Plan. The matters addressed in those meetings were: supervision of the financial reporting and business of EDP, monitoring the activity of Internal Audit Department, monitoring the activity of the Risk Management Department of the EDP group, monitoring litigation processes in the EDP group, monitoring the situation of the EDP group pension fund, monitoring the contractual relationship with the statutory auditor and external auditor, their activities and assessing the objective conditions of their independence, market consultation for the provision of statutory audit and external audit services in the EDP Group for the 2014-2016 period, monitoring reports of irregularities (whistleblowing) and the relationship with the Audit Committees of the subsidiaries in other countries where EDP operates.

REMUNERATION COMMITTEE OF THE GENERAL AND SUPERVISORY BOARD

The Remuneration Committee appointed by the General and Supervisory Board, pursuant to Article 27 of EDP's Articles of Association, defines the remuneration of the Executive Board of Directors as well as any supplements.

According to the Articles of Association, the Remuneration Committee of the General and Supervisory Board must submit a declaration on the remuneration policy followed for the members of the Executive Board of Directors and which it has approved to the Annual General Meeting for consultative purposes, at least in the years in which this policy is established or amended. After publication of Law 28/2009 of 19 June, the Remuneration Committee has been adjusting its actions to comply with applicable legal provisions.

The Remuneration Committee held four meetings during 2013, considering its duties. The following topics were discussed: (i) the variable remuneration policy for the Members of the Executive Board of Directors, (ii) the annual statement on the remuneration policy of members of the Executive Board of Directors to submit to the Annual General Meeting, (iii) determining the variable remuneration for the 2012 financial year and the multi-year remuneration of members of the Executive Board of Directors allocated to that year and (iv) broadening the

concept of some performance indicators of the variable remuneration policy of the chairman and directors of the Executive Board of Directors, and analysis and debate on the respective remuneration policy by comparison with those in the market, namely PSI 20 and Euro StoxxUtil 600 companies.

The Remuneration Committee of the General and Supervisory Board is made up of members of the General and Supervisory Board with the appropriate qualifications and experience, who are all independent from the managing body. This committee always has a representative at the General Meetings of Shareholders.

The committee has the following members:

| Remuneration Committee of the GSB | | First appointment date | | |
|-----------------------------------|--|------------------------|--|--|
| Chairman | Alberto João Coraceiro de Castro | 13/07/2006 | | |
| | Ilídio da Costa Leite de Pinho | 22/05/2012 | | |
| | José Maria Espírito Santo Silva Ricciardi | 22/05/2012 | | |
| | Guojon Lu | 11/05/2012 | | |
| | Paulo Jorge de Assunção Rodrigues Teixeira Pinto | 18/04/2012 | | |

CORPORATE GOVERNANCE AND SUSTAINABILITY COMMITTEE

The Corporate Governance and Sustainability Committee is a specialised committee of the General and Supervisory Board. Its purpose is to permanently monitor and supervise all matters related with the following:

- Corporate governance;
- Strategic sustainability;
- Internal codes of ethics and conduct;
- Systems for assessing and resolving conflicts of interests, in particular pertaining to relations between EDP and its shareholders;
- Definition of criteria and duties to be complied with in EDP's bodies and their repercussions on their membership; and
- 128 Drafting of succession plans.

The role of the Corporate Governance and Sustainability Committee is to assist the General and Supervisory Board in the continuous evaluation of the management and the performance assessment of the General and Supervisory Board itself. The General and Supervisory Board makes this assessment annually, based on the committee's work, and publishes them in a report. The conclusions of this assessment are included in the annual report of the General and Supervisory Board and presented to shareholders at the AGM.

Two other important roles of the Corporate Governance and Sustainability Committee are the monitoring of:

- The company's governance practices; and
- Management of human resources and succession plans.

The topics covered in-depth at the three meetings in 2013 of the Corporate Governance and Sustainability Committee, in compliance with its specific duties, were the following: analysis of the EDP sustainability policies and strategies, monitoring the succession plans, monitoring the activities of the Office of the Ethics Ombudsman, monitoring the activities of the Office of the Customer Ombudsman and the reporting of relevant situations in terms of Conflicts of Interest.

The Corporate Governance and Sustainability Committee is made up of members of the General and Supervisory Board, the majority of whom are independent, with the appropriate qualifications and experience for their duties.

The General and Supervisory Board changed the membership of the Corporate Governance Committee at its meeting of 9 May, 2013 and appointed Manuel Fernando de Macedo Alves Monteiro as its Chairman, a position that had been held by Carlos Jorge Ramalho dos Santos Ferreira up to 12 April, 2013, when he submitted his resignation.

The Corporate Governance and Sustainability Committee's membership is as follows:

| Corporate Governance and Sustainability Committee | | First appointment date |
|---|--|---------------------------|
| Chairman | Manuel Fernando de Macedo Alves Monteiro | 18/04/2012 |
| | Ilídio da Costa Leite de Pinho | 18/04/2012 |
| | Maria Celeste Lopes Cardona | 18/04/2012 |
| | Vasco Joaquim Rocha Vieira | 18/04/2012 |
| | Wu Shengliang | 11/05/2012 |

STRATEGY COMMITTEE

The work of the Strategy Committee is governed by the Internal Regulations of the Strategy Committee. Pursuant to these regulations, the Strategy Committee, which was set up by decision of the General and Supervisory Board, is responsible for strategy regarding investments, financing and strategic partnerships.

The Strategy Committee was set up by the General and Supervisory Board at its meeting of 18 April 2012, and its mission is to permanently monitor the following:

- Long-term strategies and scenarios;
- · Strategic implementation, business planning and their budgets;
- Major investments and divestments;
- · Debt and financing;
- Strategic alliances;
- · Market performance and competitiveness;
- Regulation

The Strategy Committee held five meetings in 2013, at which the following topics in particular were discussed: (i) EDP Distribuição - Business Plan 2012-2015; (ii) Liberalised markets: Portugal and Spain - Business Plan 2012-2015; (iii) Impact of unconventional gas on the world gas market and the competitiveness of renewable energy; (iv) Approval of the Activities Report of the Strategy Committee – 2012; (v) EDP Brasil - Business Plan 2012-2015; (vi) review of the Multi-Year Investment Plan of EDP Renováveis 2012-2015; (vii) presentation of the Sustainability Model of the Electricity Sector in Portugal (2020); (viii) presentation of the document EDP Energy Outlook 2013; (ix) monitoring of the Framework Agreement of the strategic partnership with CTG and the results obtained in terms of the different components of the agreement; (x) the current situation of strategic partnerships and the MoU's, namely under the responsibility of EDP Internacional; (xi) strategic participation with CEM - Companhia de Electricidade de Macau; and (xii) the current situation of the major completed and ongoing technical investments (first half of 2013). It should also be noted that three workshops/seminars were organised during 2013 by the General and Supervisory Board through the Strategy Committee and involving the top management of EDP. These events provided a strategic reflection on the worldwide energy sector, technologies, the challenges and opportunities that the Company will face in the future.

The General and Supervisory Board changed the membership of the Strategy Committee at its meeting of 9 May, 2013 and appointed Augusto Carlos Serra Ventura Mateus, Nuno Manuel da Silva Amado and Wu Shengliang as members.

A Strategy Committee consists of the following members:

| Strategy Committee | | First appointment date |
|--------------------|---|------------------------|
| Chairman | Eduardo de Almeida Catroga | 18/04/2012 |
| Vice-Chairman | Zhang Dingming | 11/05/2012 |
| | Felipe Fernández Fernández | 18/04/2012 |
| | Harkat Abderezak | 18/04/2012 |
| | Jorge Braga de Macedo | 18/04/2012 |
| | José Maria Espírito Santo Silva Ricciardi | 18/04/2012 |
| | Mohamed Ali Al-Fahim | 18/04/2012 |
| | Augusto Carlos Serra Ventura Mateus | 09/05/2013 |
| | Nuno Manuel da Silva Amado | 09/05/2013 |
| | Wu Shengliang | 09/05/2013 |

PERFORMANCE ANALYSIS AND COMPETITIVENESS COMMITTEE

The Performance Analysis and Competitiveness Committee, established by decision of the General and Supervisory Board, analyses EDP's performance and competitiveness in the markets in which the company operates. The work of the Performance Analysis and Competitiveness Committee is governed by its internal regulations.

The Performance Analysis and Competitiveness Committee was set up by the General and Supervisory Board at its meeting of 18 April 2012, and its mission is as follows:

- Analyse the company's business performance;
- Benchmark EDP's performance against the industry's top companies;
- Assess the competitiveness of EDP's business portfolio.

The Performance Analysis and Competitiveness Committee met seven times during 2013. The main topics discussed were: (i) performance of the business units of the EDP Group 2012; (ii) major ongoing projects to

FRENDING ENERGY

improve operational efficiency; (iii) performance of EDP Brasil; (iv) performance of the EDP Group business units in the first quarter of 2013; (v) the relative competitiveness of the EDP Group - Comparison with Iberian peers; (vi) performance of the EDP Group business units in the first half of 2013; (vii) performance of EDP shares in the capital market in the first half of 2013; (viii) consolidated performance of the electricity generation and supply business units in Portugal and Spain; (ix) efficiency and productivity study of the EDP power stations in Portugal and Spain; (x) consolidated debt of customers and by business unit; (xi) "Integrated Multi-country System" project; (xii) performance of the EDP Group business units in the third quarter of 2013; (xiii) performance of the gas business in Portugal and Spain; (xiv) comparative study of the performance of the distribution grid companies (Portugal, Spain and Brazil); and (xv) the EDP 2014 budget - preliminary version.

The committee has the following members:

| Performance / | Analysis and Competitiveness Committee | First appointment date |
|---------------|--|------------------------|
| Chairman | Luís Filipe da Conceição Pereira | 18-04-2012 |
| Vice-Chairman | Yang Ya | 11-05-2012 |
| | Alberto João Coraceiro de Castro | 18-04-2012 |
| | António Sarmento Gomes Mota | 18-04-2012 |
| | Fernando Masaveu Herrero | 18-04-2012 |
| | Nuno Manuel da Silva Amado | 09-05-2013 |
| | Wu Shengliang | 09-05-2013 |

B. OTHER COMPANY BODIES

ENVIRONMENT AND SUSTAINABILITY BOARD

The Environment Board was set up as a company body in 1991. Its name was changed to Environment and Sustainability Board by decision of the Annual General Meeting of 30 March 2006.

As a company body, the Environment and Sustainability Board has powers to advise the Executive Board of Directors on environment and sustainability matters. In particular, it provides advice and support in defining the company's environmental and sustainability strategy and drafting opinions and recommendations on the environmental impact of projects planned by the EDP Group (Article 28 (1) of EDP's Articles of Association).

The current members of the Environment and Sustainability Board, pursuant to Article 28 (2) of EDP's Articles of Association, have acknowledged competence in the field of environmental protection and sustainability.

The members of the Environment and Sustainability Board were elected at the Annual General Meeting of 17 April, 2012 for 2012/2014.

At the Annual General Meeting on 6 May 2013, José Pedro Sucena Paiva was elected as Chairman, a position held by Augusto Carlos Serra Ventura Mateus until then.

The Environment and Sustainability Board's membership is as follows:

Environmental and Sustainability Board

| Chairman | José Pedro Sucena Paiva | | |
|----------|-----------------------------------|--|--|
| | Alberto da Ponte | | |
| | António José Tomás Gomes de Pinho | | |
| | José Manuel Viegas | | |
| | Maria da Graça Madeira Martinho | | |

REMUNERATION COMMITTEE OF THE GENERAL MEETING

The remuneration of the corporate bodies, with the exception of the members of the Executive Board of Directors, is defined by the Remuneration Committee elected by the General Meeting (Article 11 (2) (d) of EDP's Articles of Association).

Pursuant to this Article, the majority of the members of the Remuneration Committee of the General Meeting must be independent.

The Remuneration Committee of the General Meeting has the following membership:

Remuneration Committee - General Meeting

| Chairman | José Manuel Archer Galvão Teles |
|----------|--|
| | José de Mello - Sociedade Gestora de Participações |
| | Sociais, S.A. (representado por Luís Eduardo Brito Freixial de Goes) |
| | Álvaro João Duarte Pinto Correia |

III. SUPERVISION

A) COMPOSITION

30. THE SUPERVISORY BODY

EDP's two-tier model of corporate governance has made possible an effective separation between supervision and management of the company. The General and Supervisory Board is the highest supervisory body.

31. MEMBERSHIP FINANCIAL COMMITTEE - EFFECTIVE MEMBERS AND TERM OF OFFICE

The duties of the Financial Matters Committee /Audit Committee are described in Point 29 of the corporate governance report.

The Financial Matters Committee/Audit Committee is made up of five independent members with the appropriate qualifications and experience, including at least one member with a degree in the area of the committee's duties and specific knowledge of auditing and accounting, as confirmed by the Curriculum Vitae of the Vice-Chairman, which can be viewed in the chapter on corporate bodies.

This committee's membership is as follows:

| Financial Matters Committee/Audit Committee | | First appointment date | | |
|---|--|---------------------------|--|--|
| Chairman | Eduardo de Almeida Catroga | 21/02/2012 | | |
| Vice-Chairman | Vítor Fernando da Conceição Gonçalves | 13/07/2006 | | |
| | António Sarmento Gomes Mota | 07/05/2009 | | |
| | Manuel Fernando de Macedo Alves Monteiro | 13/07/2006 | | |
| | Maria Celeste Ferreira Lopes Cardona | 18/04/2012 | | |

32. INDEPENDENT MEMBERS OF THE FINANCIAL COMMITTEE

See Points 17 and 18.

33. QUALIFICATIONS OF MEMBERS OF THE FINANCIAL COMMITTEE

See page 304 and following of the Management Report.

B) OPERATION

34. LOCATION AT WHICH THE OPERATING PROCEDURES OF THE FINANCIAL MATTERS COMMITTEE/AUDIT COMMITTEE CAN BE VIEWED

The Financial Matters Committee/Audit Committee's work is governed by Internal Regulations, available on EDP's website at www.edp.pt.

MEETINGS AND ATTENDANCE RATE OF EACH MEMBER OF THE FINANCIAL MATTERS COMMITTEE/AUDIT COMMITTEE

In 2013, the Financial Matters Committee/Audit Committee met thirteen times and minutes of its meetings were kept. Information on the attendance rate of the committee's members is given in Annex IV of this report.

 POSITIONS HELD IN OTHER COMPANIES WITHIN AND OUTSIDE THE GROUP BY EACH FINANCIAL MATTERS COMMITTEE/AUDIT COMMITTEE MEMBER

See Annex III.

C) POWERS AND DUTIES

PROCEDURES AND CRITERIA GOVERNING THE SUPERVISORY BODY'S INVOLVEMENT IN HIRING ADDITIONAL SERVICES FROM THE EXTERNAL AUDITOR.

The proposal for hiring additional services of the External Auditor and Statutory Auditor is made by the Executive Board of Directors to the Financial Matters Committee/Audit Committee and any contracting requires the prior authorisation of that Committee.

Rules of procedure on the Provision of Services by the Statutory Auditor and External Auditor of EDP are in force, in this regard, and the implications on the hiring of additional services are described in point 46.

There are other rules of procedure adopted by the Executive Board of Directors that ensure all EDP Group companies comply with the rules contained in the referred rules of procedure.

38. OTHER DUTIES OF THE SUPERVISORY BODIES AND, IF APPLICABLE, OF THE FINANCIAL MATTERS COMMITTEE/AUDIT COMMITTEE

The duties of the Financial Matters Committee/Audit Committee, delegated to it by the General and Supervisory Board pursuant to the Articles of Association and the Internal Regulations of the Financial Matters Committee/Audit Committee are described in Point 29.

IV. STATUTORY AUDITOR

39. THE STATUTORY AUDITOR AND THE CERTIFIED AUDITOR REPRESENTING IT

KPMG & Associados - Sociedade de Revisores Oficiais de Contas, S.A. (KPMG), represented by Vítor Manuel da Cunha Ribeirinho, was elected EDP's Statutory Auditor for 2012-2014 at the General Meeting of 17 April, 2012.

40. NUMBER OF YEARS FOR WHICH THE STATUTORY AUDITOR HAS WORKED CONSECUTIVELY WITH THE COMPANY AND/OR GROUP

The Statutory Auditor has been working with the company for ten years.

41. OTHER SERVICES PROVIDED TO THE COMPANY BY THE STATUTORY AUDITOR

The Statutory Auditor is the company body responsible for the examination of the accounting documents. It is elected by the General Meeting for three year terms, pursuant to Article 25 of EDP's Articles of Association and Article 446 of the Portuguese Company Code.

According to the Company Code and the company's Articles of Association, the Statutory Auditor is responsible for checking (see Article 446 (3) of the Company Code):

- The regularity of the company's books, accounting records and their supporting documents;
- The cash and all assets or securities belonging to the company or received by it as guarantees, deposits or for any other purpose, whenever and however it sees fit;
- The accuracy of the accounting documents;
- Whether the company's accounting policies and valuation criteria result in an accurate assessment of its assets and results.

V. EXTERNAL AUDITOR

42. THE EXTERNAL AUDITOR AND CERTIFIED AUDITOR PARTNER REPRESENTING IT

EDP's External Auditor is KPMG and Vítor Manuel da Cunha Ribeirinho, manager of auditing at KPMG, is the partner in charge of overseeing and performing audits of the EDP Group's accounts. KPMG is registered with the CMVM under number 9093.

The external auditor performs the necessary audit work to ensure the reliability of the financial reporting and credibility of the accounting documents.

The external auditor's duties include checking compliance with remuneration policies and systems, the efficacy of internal control mechanisms and reporting of any deficiencies to the General and Supervisory Board.

EDP takes measures specifically aimed at ensuring the independence of the external auditor, in view of the scope of services provided by audit firms.

43. NUMBER OF YEARS FOR WHICH THE EXTERNAL AUDITOR AND CERTIFIED AUDITOR PARTNER REPRESENTING IT HAVE WORKED CONSECUTIVELY WITH THE COMPANY AND/OR GROUP

EDP's external auditor has been KPMG since December 2004 and Vítor Manuel da Cunha Ribeirinho has been the certified auditor partner since 2012.

44. POLICY ON AND FREQUENCY OF ROTATION OF EXTERNAL AUDITOR AND CERTIFIED AUDITOR PARTNER REPRESENTING IT

The policy on rotation of the external auditor and certified auditor partner representing it depends on the strict assessment by the Financial Matters Committee/Audit Committee of the independence and quality of the work done and consideration of the independence of the statutory auditor and external auditor and the advantages and costs of replacing them.

The General and Supervisory Board decided, under its duties of selecting and replacing the external auditor, to hold a tendering procedure at the start the fourth quarter of 2011 to select the external auditor of EDP for a three-year term. It follows that the third and fourth quarters of 2011 were marked by the 8th privatisation process of EDP, with significant impact on the EDP shareholder structure. Therefore, the composition of the

governing bodies for the 2012-2014 term was postponed to a later date, to take into account the conclusion of that process.

The General and Supervisory Board delegated in the Financial Matters Committee/Audit Committee the monitoring of this issue during 2012, and this Committee presented a proposal to keep the current Statutory Auditor/External Auditor of EDP until the end of 2013. That proposal was approved by the General and Supervisory Board

Subsequently, the work for selecting the external auditor for the 2014-2016 period was resumed still in 2013, and the General and Supervisory Board delegated in the Financial Matters Committee/Audit Committee the monitoring and structuring of this matter.

Accordingly, the Financial Matters Committee/Audit Committee launched a consultative process, inviting 4 audit firms of international repute to submit bids for the provision of statutory audit and external audit services to EDP for the 2014-2016 period.

Two committees were set up for the development of the consultation process, one for monitoring the process and analysing the bids and preparing a summary of their findings and the other had the mission of assessing the results produced by the first committee and preparing a proposal for the Financial Matters Committee/Audit Committee.

KPMG was the company that gained the highest scores in the assessment of the submitted bids, which also weighed up the audit performance conditions, including the costs and benefits of its replacement.

In this process, the Audit Committees of the EDP Group subsidiaries, Hidroeléctrica del Cantábrico, EDP Renováveis and EDP Energias do Brasil approved KPMG as the statutory auditor and external auditor for the three-year period from 2014 to 2016 - even though KPMG can only be appointed as external auditor of the EDP Energias do Brasil group from 2015.

The many items valued and highlighted in relation to KPMG included, for example, the fact that KPMG is the bidder with the most specific knowledge of the business and culture of the EDP group, that changing the service provider would require additional effort from EDP's internal resources to ensure the transition, which is particularly sensitive in the context of the varied internal transformation projects underway and planned through to 2017, and that maintaining the current external auditor gives greater security in settling issues of high accounting complexity that are already being accompanied by the current auditor.

Given the above, the Assessment Committee informed the Financial Matters Committee/Audit Committee that it considered KPMG to be the entity offering the most advantageous conditions for the provision of external audit services to the EDP Group. The Financial Matters Committee/Audit Committee analysed the results of the assessment and decided on 23 October, 2013 to propose to the General and Supervisory Board the selection of KPMG for the provision of such services in the 2014-2016 period. At its meeting of 31 October, 2013, the General and Supervisory Board decided to approve the award the bid submitted by KPMG for the provision of external audit services in the 2014-2016 three-year period.

45. BODY RESPONSIBLE FOR ASSESSING THE EXTERNAL AUDITOR AND FREQUENCY OF ASSESSMENT

The Financial Matters Committee/Audit Committee presents annually to the General and Supervisory Board a proposal for the assessment of the independence of the external auditor, which is published in the report of the General and Supervisory Board as well as the result of the appreciation of the proposal.

46. WORK OTHER THAN AUDITING DONE BY THE EXTERNAL AUDITOR FOR THE COMPANY AND/OR SUBSIDIARIES AND INTERNAL PROCEDURES FOR APPROVING HIRING OF THESE SERVICES AND REASONS FOR HIRING THEM

Proposals to hire additional services from the external auditor and statutory auditor are made by the Executive Board of Directors to the Financial Matters Committee/Audit Committee and their hiring requires prior authorisation from this committee.

The Regulations on Services Provided by EDP's Statutory Auditor and External Auditor, available on the EDP website, (www.edp.pt), on hiring of additional services, requires the Financial Matters Committee/Audit Committee to deny authorisation of additional services if:

- The additional service is prohibited;
- In accordance with the standard of an objective, reasonable informed third party, the service involves a
 possible threat to the independence of the statutory auditor or the external auditor, i.e. not allowing selfaudit or personal interest.

In order to implement this CMVM recommendation, the Regulations on Services Provided by EDP's Statutory Auditor and External Auditor define the services in the following categories:

AUDIT SERVICES

- a) Necessary services (including internal control procedures required as part of audits) for the issue of the external auditor's annual or interim reports on the accounts.
- b) Services required for compliance with local legislation (including internal control procedures required as part of audits) for the issue of legal certifications of accounts.

- Other services related to the above, with a specific or limited purpose or scope, such as: c)
- Opinion on the internal control system on financial reporting;
- Opinion on the Consumption Efficiency Plan;
- Opinion on the Environmental Development Plan;
- Opinion on regulated accounts;
- Statements of compliance under contractual agreements;
- Reports on specified accounts, accounting elements or items in an EDP financial statement;
- Comfort letters in the issue of securities.

ADDITIONAL SERVICES

- Other services for quaranteeing reliability services that take the form of a commitment, on the basis of appropriate, duly identified criteria, to evaluate or quantify a certain element for which a third party is responsible or to express an opinion providing a certain degree of certainty on this element.
- Tax consultancy advisory and support services on tax matters.
- Other non-audit related services covering all other services not included in the other additional service

The following additional services were hired from the External Auditor in 2013:

- Tax consultancy
- Studies on the impact of regulatory changes in Portugal and Spain
- Service verification, compliance and fulfilment of tax obligations

The reasons for hiring these services were essentially i) better understanding of the Group's business and tax issues associated with its business activity, ensuring appropriate knowledge of the relevant information, which favours greater agility and efficiency in providing solutions and ii) it was considered that the hiring of said services were not considered a threat to the independence of the External Auditor and did not foster any situation of personal interest in relation to the guarantee of independence given by the External Auditor.

Additional services provided in 2013 account for around 10% of the total value of services rendered to the EDP Group by these entities.

ANNUAL REMUNERATION PAID BY THE COMPANY AND/OR SUBSIDIARY OR GROUP COMPANIES TO THE AUDITOR AND OTHER NATURAL OR LEGAL PERSONS BELONGING TO THE SAME NETWORK AND BREAKDOWN OF PERCENTAGE FOR THE FOLLOWING SERVICES

KPMG is responsible for conducting an independent external audit of all the EDP Group companies in Portugal, Spain, Brazil (EDP Renováveis), USA and other countries in which the Group operates. In the subgroup of EDP Brasil independent external auditing is conducted by Price Waterhouse Coopers.

In 2013, the recognised, specialised costs of the fees of KPMG and Price Waterhouse Coopers for auditing, guarantee and reliability services, tax consultancy and services other than auditing for Portugal, Spain, Brazil, USA and other countries were as follows:

KPMG

| Type of Services | Portugal | Spain | Brazil | United States of Amercia | Other Countries | Total | |

C. INTERNAL ORGANISATION

I. ARTICLES OF ASSOCIATION

48. RULES ON AMENDMENTS TO THE COMPANY'S ARTICLES OF ASSOCIATION

EDP's Articles of Association do not set out special rules on their amendment and the general rule set out in 3 Article 386 (3) of the Company Code therefore applies, i.e. decisions to amend the Articles of Association must be approved at a General Meeting by two-thirds of the votes cast.

EDP's Articles of Association may also be amended under the powers of the Executive Board of Directors to move EDP's registered office (Article 2 (1) of EDP's Articles of Association) and increase EDP's share capital (Article 4 (3) of EDP's Articles of Association). Pursuant to the general rule set out in Article 410 (7) of the Company Code, by reference to Article 433 of this code, these decisions by the Executive Board of Directors must be passed by a majority of the votes of the directors present or represented.

II. WHISTLEBLOWING

49. WHISTLEBLOWING POLICY AND CHANNELS

The EDP Group has consistently implemented measures to ensure the good governance of its companies, including the prevention of incorrect practices, particularly in the areas of accounting and finance.

EDP provides Group employees with a channel that enables them to report any alleged unlawful practice or accounting or financial irregularity in their company directly and in confidence to the Financial Matters Committee/Audit Committee of the General and Supervisory Board.

With the creation of this channel for reporting irregular accounting and financial practices, EDP aims at:

- Ensuring that any employee can freely communicate his/her concerns in these fields to the Financial Matters Committee/Audit Committee;
- Facilitating the early detection of irregular situations that, if they occurred, might cause serious damage to the EDP Group, its employees, customers and shareholders.

The Financial Matters Committee/Audit Committee can be contacted by email, fax and post and access to information received in this regard is restricted. The members of this committee are authorised to receive these reports.

All complaints sent to the Financial Matters Committee/Audit Committee are treated in strict confidence and the complainant remains anonymous, unless this prevents investigation of the complaint.

Pursuant to the regulations, EDP guarantees that whistleblowing employees will not suffer any reprisals or disciplinary action for exercising their right to report irregularities, provide information or assist in an investigation.

On 27 October 2011, the General and Supervisory Board approved new regulations, which were submitted for registration with the National Data Protection Authority. The application was approved on 6 July 2012.

In February, 2014, the Financial Matters Committee/Audit Committee informed the General and Supervisory Board of its work as part of the whistleblowing mechanism in 2013. The conclusion was that none of the 35 reports received contained complaints with an impact on accounting, finance, internal control or audit matters. The Financial Matters Committee/Audit Committee closed 33 after analysing the responses from the competent EDP departments and the remaining two in the closing phase.

III. INTERNAL CONTROL AND RISK MANAGEMENT

50. PEOPLE, BODIES OR COMMITTEES RESPONSIBLE FOR INTERNAL AUDITS OR IMPLEMENTATION OF INTERNAL CONTROL SYSTEMS

Internal control matters are the responsibility of the Corporate Centre, which plays a structural role in assisting the Executive Board of Directors in defining and overseeing implementation of strategies, policies and goals.

The most important of the Corporate Centre departments and offices in terms of internal control are the Internal Audit Department and the Risk Management Department.

The former performs internal audits or ensures that they are performed in the Group. It is also responsible for the financial reporting internal control system (SCIRF) in the Group, with a view to an independent assessment of the internal control system and implementation of measures to make it more effective by optimising and aligning processes and systems.

The Risk Management Department's main responsibility is to coordinate the Group's risk assessment studies in order to assist the Executive Board of Directors in controlling and mitigating them and provide integrated risk-return analyses.

Under the law, the General and Supervisory Board permanently oversees and evaluates internal accounting and auditing procedures, the efficacy of the risk management system, the internal control system and the internal auditing system, including the way in which complaints and queries from employees and others are handled. This duty has been assigned to the Financial Matters Committee/Audit Committee, which, among other tasks, permanently monitors and supervises:

- (i) EDP's financial affairs;
- (ii) Internal auditing procedures, the company's accounting practices and the internal control system for financial information and financial reporting, in coordination with the Internal Audit Department;
- (iii) Matters relating to the risk management process, particularly taxation, legal and financial aspects.

51. DESCRIPTION OF HIERARCHICAL AND/OR FUNCTIONAL DEPENDENCY ON OTHER COMPANY BODIES OR COMMITTEES

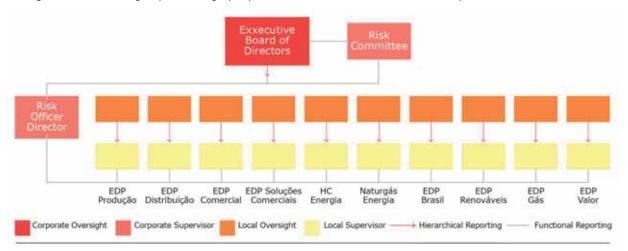

The Internal Audit Department belongs to the Corporate Centre and although it is answerable to the CEO, it reports in practice to the Financial Matters Committee/Audit Committee. The department's work is supervised by the Financial Matters Committee/Audit Committee, which approves the annual internal audit plan before it is sent to the Executive Board of Directors and monitors its systematic implementation.

52. OTHER COMPANY AREAS WITH RISK CONTROL DUTIES

The Executive Board of Directors decides the degree of exposure to risk to be adopted by the EDP Group in its different activities and, without prejudice to delegation of duties and responsibilities, defines overall risk limits and ensures that risk policies and procedures are followed. This is preceded by the definition of the Group's appetite for risk resulting from its long established business structure and criteria agreed upon by the Executive Board of Directors and the General and Supervisory Board.

The business units manage their own risks within the established criteria and delegations. There is an alignment of policies and strategies between the risk areas of its subsidiaries and the Risk Department of the Corporate Centre, ensuring coherent performance, reporting and control practices.

The Risk Management Department is one of the Corporate Centre's strategic departments. In addition to its control and methodological activities, this department conducts its own studies, thereby providing business intelligence for assessing important highly topical R2R – Return to Risk for the Group.

53. THE MAIN TYPES OF ECONOMIC, FINANCIAL AND LEGAL RISK TO WHICH THE COMPANY IS EXPOSED IN ITS BUSINESS

The main risks to which the company is exposed and which affect all the responsibility units are as follows:

ELECTRICITY GENERATION AND ENERGY MANAGEMENT:

Electricity price risk: Income from generation can be influenced by changes in the price of electricity on the wholesale markets. The Group's exposure is limited to the power stations operating in the free market (Spain, Ribatejo Power Station, Lares Power Station and new hydroelectric plants in Portugal), as most of them are subject to the CMEC – costs for maintenance of contractual equilibrium adjustment mechanism (power stations that had power purchase agreements with REN but began operating in the market on 1 July 2007). There is also exposure to the market (OMEL price) of EDP Renováveis wind farms (and also in the United States, Poland and Romania). Furthermore, the Group proactively seeks to protect the margin, with integrated action in energy and supply management. In the MIBEL, the UNGE acts in the wholesale market with a view to optimising the generation supply in the OMEL spot market and taking advantage of the forward market, OMPI, OTC and arbitration in the Spain-France interconnection. The UNGE simulates the performance of the Iberian system and uses the Unified Risk Model for periodic calculation of the margin at risk. At EDP Brasil, the market risk in electricity generation is low, as most of the installed capacity is under long-term contract.

Fuel price and CO2 risk: This risk is most important for power stations on the free market and it is managed by UNGE, which is responsible for coal purchases, operational management of gas procurement contracts for electricity generation and CO2 emissions rights and hedging solutions for fuel prices and exchange of the dollar (the last in coordination with the Financial Management Department). UNGE manages negotiation of new gas procurement contracts and also manages temporary positions of surplus or shortage between Group companies and abroad. The MUR is also used in risk assessment, making use of its capacity for assessing trends in fuel and CO2 prices.

Operating risk of power stations and wind farms: Conventional power stations and wind farms have breakdowns and other incidents that can entail a loss of revenue due to the resulting outage or downtime. This risk is mitigated by conduction and maintenance methods and safety procedures of the highest standard. The most important insurable risks are associated with generation, which is covered by insurance. They are managed by the Insurable risks Office at EDP Valor.

Environmental risk: Generation resources are the most vulnerable to this type of risk, because of their use of natural resources, the emissions and waste that thermal generation produces and the impact on biodiversity caused by wind generation and other technologies. The Group has a very strict environment policy that fits into an environmental management system aimed at abiding in full by licensing parameters for facilities and taking additional measures to improve performance and mitigate any liabilities in this area. EDP has environment liability insurance to meet new European requirements. For more information on the company's environmental performance, see the contribution section of the environmental performance chapter in the EDP Sustainability Report.

Credit risk: This risk in the organised market is not significant and for operations in the OTC market and purchase of fuel UNGE minimises it by setting exposure limits. These limits are approved internally in accordance with counterparty ratings (defined by an external entity or in-house if the information is not available).

Liquidity risk: This risk occurs mainly in hedging operations in organised markets. Almost the entire counterparty risk is mitigated in operations in organised markets but if margin accounts or other guarantees are necessary in these contracts, with periodic calculation of their market value, there may be a need for liquidity while these instruments are in effect. This management is performed by UNGE and the Financial Management Department by contracting dedicated lines of credit.

MARKET SUPPLY:

Electricity price risk: This risk is managed by UNGE. Internal prices are defined after determining sales volumes to end users by EDP Comercial – Comercialização de Energia, S.A. and HC ENERGÍA, unless it is possible to enter into contracts indexed to the market price.

Volume risk: The volume of energy for sale to end users is always uncertain, due to weather and economic conditions, as a result of customer migration from the regulated-tariff public service to the free market or migration between free suppliers. In principle, this risk is taken by suppliers, as they will have to make adjustments for surpluses or shortages at market prices. Nonetheless, MIBEL's current transition phase, which is causing considerable uncertainty as to the share of consumption on the free market with more or less attractive public tariffs and competitive dynamics, requires dynamic management of this risk by means of periodic, integrated intervention via the Price and Volumes Committee set up for the purpose.

Operational supply quality risk: In the free market, the criteria for quality of supply service are the full responsibility of the Group, which has focused on its good management.

Credit risk: Where sales are concerned, this risk is managed first by the contractual criteria and second by EDP Soluções Comerciais S.A. "EDP Soluções Comerciais"), which is responsible for meter reading, billing and collection (HC Energía and Naturgas in Spain).

LAST RESORT SUPPLY:

As required by law, consumers that receive energy at a regulated tariff are customers of EDP Serviço Universal, the supplier of last resort. In Portugal, as of 1 January 2011, this unit only covers domestic and non-domestic consumers that have not yet moved to the regulated market and that have been subject to a transition tariff since 1 January 2013. On 1 January 2013, regulated energy sales tariffs to domestic end users were abolished and so new customers have to choose a free market operator. Customers still paying a regulated tariff have a transition period to change to the liberalised market and their consumption is charged at a transition tariff fixed by the ERSE and subject to periodic review.

Regulatory risk: This activity is low risk, though deviations in forecasts of energy purchase costs made by the regulator – Entidade Reguladora dos Serviços Energéticos – and the resulting creation of high deficits or surpluses, cause concern as to the fair remuneration of this volatility. We hope that the ongoing progressive abolition of regulated tariffs for the sale of electricity will make it possible to step up the competitive balance mechanisms and monitor more closely the performance of international costs of raw materials for electricity generation.

Operational supply quality risk: Irrespective of the regulated criteria for quality of supply service (e.g. average response time in providing customer service, percentage of low voltage meter readings), the Group has put considerable effort into managing this risk, as their impacts on management of the brand erosion risk.

Credit risk: Management of this risk has been delegated to EDP Soluções Comerciais and is carried out in accordance with the regulations defined for public service customers (power cuts when bills are not settled within payment deadlines).

ELECTRICITY DISTRIBUTION:

Regulatory risk The changes in the rules on remuneration of this activity can affect income of EDP Distribuição – Energia, S.A. and HC Energia. In addition to fair defence of valuation criteria, the Group follows best practices in planning, construction, operation and maintenance of grids and seeks to achieve and, if possible, exceed gains in efficiency set out in regulatory goals.

Operational risk of quality of technical service and losses: Regardless of the criteria on quality of technical service (e.g. duration and number of interruptions and service restoration times) and incentives for reducing physical losses from the grid, the Group has placed considerable emphasis on managing this risk, as their impacts are substantial on management of the risk of erosion of the brand and efficient energy management policy.

Grid operational risk: The existence of infrastructures in the public domain (e.g. lines, cables and transformer stations) may increase the impact of outages and incidents. This risk is mitigated by conduction methods, maintenance and safety procedures in line with the highest international standards. Nonetheless, extreme, unusual weather conditions have resulted in power cuts and substantial damage and media coverage. Our response to this type of crisis has improved significantly. Insurable risks are insured.

Environmental risk: Although less than in electricity generation, there is the problem of overhead lines and birdlife, surrounding areas and even their visual impact. Careful attention is paid to all these aspects of a project. The layout is designed to minimise these effects and the structure of the pylons is made compatible with the birds that use them as perches or nesting places. The lines in migratory corridors are flagged to prevent collisions. For more information on EDP's performance in this area, see the Sustainability Committee section in Chapter II.3.

RISK MANAGEMENT IN OTHER REGIONS AND ACTIVITIES

Although the market and regulatory conditions may be different, the above principles and methods apply to the gas distribution and supply business units, Energias do Brasil and EDP Renováveis.

EDP Renováveis has been the main source of growth in the Group and of geographical diversity of investments. It has confirmed the change in the Group's generation profile to a portfolio that is less dependent on CO2 emissions and therefore to low exposure to the risks of greenhouse gas emissions. The current size requires careful management of the pipeline of projects, flexible hiring of wind turbines and operation and maintenance conditions in order to avoid the operational risks of not launching projects or not finishing them on time and not achieving the best standards of operating efficiency. The nature of this type of generation means that the results of investments are highly dependent on each country's energy and regulatory policies. This aspect is carefully weighed within the criteria of acceptable minimum return. Exposure to the electricity market price is mitigated considerably by remuneration of generation with fixed tariffs, long-term PPAs (power purchase agreements) and effective hedging strategies. In addition to the sale of energy, in some regions remuneration also consists of green certificates whose value usually carries a market risk. This risk is also considerably mitigated with long-term contracts (only for green certificates or sometimes included in the energy sales contract). Risk mitigation options depend on the remuneration structure in each country.

GROUP-WIDE RISK MANAGEMENT

Investment-associated risks: Investment assessment and decisions standardise criteria for defining discount rates to be used to assess expected cash flows and create scenarios (which include different sensitivities, such as price risk, energy volume risk and regulatory risk). These criteria help to mark out limits in the Group's appetite for risk, with the capital cost of each business unit/region being reviewed on a regular basis. The investment

committees at the business unit and corporate level allow for effective implementation of these mechanisms in the assessment phase and for the monitoring of the execution of the investments, monitoring operational risks in these phases and their potential impact on the expected value.

Financial risk: The Group's financial risks are mainly managed by the Financial Management Department, which manages the Group's cash in the Iberian Peninsula and its debt portfolio and interest rate and exchange rate risks with market financial instruments. In Brazil, Energias do Brasil abides by similar principles and methods in coordination.

The **liquidity risk** continued to warrant particular attention. EDP's credit profile in this difficult context for Portugal is higher than that of Portugal and it has issued bonds necessary for the usual rollover of debt and to finance the Group's activity. Financial deleveraging is a strong strategic commitment in the EDP Group and its goal is therefore of improving its net debt / EBITDA ratio in upcoming years. The purchase of minority stakes in EDP Renováveis to a total of EUR 2 billion by China Three Gorges by 2015 is fundamental in achieving this financial deleveraging goal (acquisition of 49% of EDP Renováveis Portugal, S.A. agreed in 2012 and signing of memorandums of understanding in December 2013 for the acquisition of 50% of the Cachoeira Caldeirão Hydroelectric Power Station, 50% of the Jari Hydroelectric Power Station and 49% of the holding of EDP Renováveis in ENEOP – Eólicas de Portugal). In terms of liquidity, in December 2013, cash and lines of credit available totalled EUR 4.439 million, of which EUR 2,180 million were cash and cash equivalents and EUR 2,259 million lines of credit. The liquidity risk has therefore been mitigated thanks to our debt management policy, the contracting of new financing and the availability of lines of credit obtained (underwritten) but not used. Thanks to the Group's financial policies, its market risk is very low and the counterparty risk is diversified and involves credible financial entities.

Liabilities resulting from the EDP Group Defined Benefit Pensions Fund and health care benefits in Portugal are fully covered by the Pension Fund assets and specific provisions included in the EDP balance sheet. An independent actuary calculates these liabilities every year based on IFRS-IAS assumptions, taking account of aspects such as the fund's performance, demographics, economic variables and applicable requirements.

Operational risk: This involves potential losses resulting from incidents caused by faulty or inadequate procedures, staff, equipment or systems or resulting from external incidents (including the risk of failure to comply with legislation and ethical standards; operating losses including economic and non-economic effects and loss of reputation).

The most significant risks that are transferable to the insurance market have to do with industrial facilities. For these and the risks resulting from complaints by third parties regarding material or personal losses and their consequences that may result from the activity of Group companies, the Insurable Risk Office at EDP Valor has been following the approved Strategic Insurance Plan based on joint programmes for all Group companies in Portugal and Spain, direct contracts with the insurance market and a more prominent role for the Group's captive insurance company, Energia RE. This joint policy has made it possible to optimise insurance costs and improve control thereof.

The Group does not expect any substantial negative repercussions in terms of **legal risks**, i.e. litigation related to operations, licensing of new facilities and necessary compliance with tax and accounting obligations.

54. IDENTIFICATION, ASSESSMENT, MONITORING, CONTROL AND MANAGEMENT OF RISKS

The Group's diversity of lines of business continued to ensure a low degree of intrinsic risk, mainly due to: (i) the high relative weight of businesses not exposed to market risks, (ii) growth in low-risk activities, such as wind generation with low exposure to electricity market prices (iii) appropriate hedging policies for mitigating financial and fuel price risks and the risk of the price and volume of electricity placed or bought on the market and (iv) greater geographical diversification of risk due to the lower weight of the Iberian Peninsula. This geographical diversification has been vital in mitigating the company's risks, especially those associated with the European sovereign debt crisis and regulated risks in specific markets.

The Group's risk organisation and processes have received the highest scores in the Dow Jones Sustainability Index, with an invitation to step up integrated R2R methods and include them in the normal management of the business units and Corporate Centre. This process is based on the following components:

- Identification de riscos Risk Assessment. Steps have been taken to ensure that this process is included in the usual cycle of preparing the business plan and budget, at least for the most important risks from a top management viewpoint. These include a risk portal for the Risk Management Department to use to record work done and consolidate the most important risks and for the business units to use as needed. This portal was developed in-house and consistently gathers information on each relevant risk, with a qualitative and, as far as possible, quantitative assessment of the overall, expected, minimum and maximum impact, probability, level of control and preparation of priority matrices for action or control. It enables us to answer the following questions: What are the most important risks for each business unit and how great are they?
- **Risk officer** This is how we clarify responsibilities in risk management, coherence in delegation of duties and contracting of supplies and services from internal or external outsourcers. For each of the priority risks, we endeavour to identify key measures than can be used to prevent or mitigate a risk or decide on the transfer of risk to another entity (e.g. insurance, hedging). This instrument answers the following questions: Who is responsible for managing a certain risk? What are the risks which it is to EDP's advantage to manage and which should it transfer to other entities?
- Appetite for risk Considering that we assess how the Group plans to grow (business areas, regions, acquisitions or in-house), how it will be financed for the purpose (and the commitment to pay dividends)

what ratings it wishes to maintain or achieve, this last one is the basic operating condition, by satisfying appropriate ratios: Net debt/EBITDA; FFO/net debt, among others Although ratings depend on a broader set of indicators, some of which are subjective, and also on the sovereign rating itself, which some rating agencies claim constitutes the limit for a country's companies' ratings (e.g. it is hard for a company's rating to be one or two levels higher than sovereign ratings), the former are the most important indicators and are part of the established controls. From a strategic point of view, the Group's Annual Report and Accounts defines the overall limits of its activity – vision – and the commitments that it makes, which delimit risk areas in which it operates (i.e. the risk of a multi-utility type strategy outside energy is not considered). It enables us to answer the following questions: Does the company have the share capital necessary for its risks? Is it overexposed or underinsured? How much risk would it like to take?

- Integrated risk assessment This aspect of risk control is designed to use bottom up methods to assess the values at risk of EBITDA, cash flow and other financial indicators relevant to the most important business units and of consolidated values within the Business Plan timeline. Top down methods are also used to calculate values at risk and make comparisons with competitors on the basis of the market performance of EDP's shares and public financial information. The aim is also to extrapolate for longer timelines the effects on our risk profile of expected changes in businesses and different strategic options for the composition of our business portfolio. This instrument answers the following question: Do the most important business decisions take account of the impact on EDP's aggregate risk?
- Governance and risk management This component of the risk management process is based on the
 Corporate Policy on Business Risk Management defined by the Executive Board of Directors and the purposebuilt structure. This instrument answers the following questions: Are there risk management and control
 processes? Are they effective?

Some of most important aspects of activity in 2013 were as follows:

- Six-monthly report Top 5 Risks/ Uncertainties of the EDP Group, which analyses the five uncertainties of the company's activity that, due to their potential for rapid growth or significant impact on the EDP Group, warrant special attention from the corporate structure.
- Aggregate top down risk analysis and comparison with rival companies, which continued to show a lower level of aggregate risk for EDP Group's business than its peers.
- Detailed bottom up risk analysis of EDP Renováveis and the main risks in the company's different regions.
- Analysis of the market, counterparty and liquidity risk of the EDP Group's debt
- Analysis of the optimal share capital structure and appropriate liquidity for the EDP Group.
- Active collaboration in EDP's implementation of new European rules on the energy sector (REMIT) and financial markets (EMIR).
- Analysis of practices and methods in credit risk management in the companies supplying energy in the Iberian Peninsula.
- Drafting of a periodic report on current risks in the European energy markets.
- Study of the impact of climate change in Portugal and Spain in average rainfall levels and wind levels in hydroelectric and wind generation. Correlations between regions, systems and long-term trends.
 Quantification of economic impact.
- Active contribution to Focus Group Enterprise Risk Management and Task Force Risk Analysis and Recommendations on Eurelectric's Power Choices Study".
- Organisation of the fourth meeting of the EDP Group's risk Officers, where employees from the different business units and Corporate Centre presented risk issues of relevance to the company and shared experiences..
- Organisation of an EDP Group conference on risk management, where relevant, topical matters were introduced and discussed, such as the expected future performance of its risk profile.
- Assistance to EDP Serviço Universal and EDP Soluções Comerciais in developing and implementing crisis and business continuity management processes.

55. MAIN FEATURES OF THE RISK MANAGEMENT AND INTERNAL CONTROL SYSTEMS IN PLACE IN THE COMPANY FOR THE DISCLOSURE OF FINANCIAL INFORMATION

The EDP Group's management includes an internal control system in the form of its Internal Control System for Financial Reporting (SCIRF), which was designed on the basis of the best international practices and the COSO and COBIT models.

In order to ensure that there are control mechanisms and procedures for mitigating the risk of fraud and materially relevant errors in its financial statements, EDP has set up a cycle of maintenance and assessment to define the activities, processes and controls and a responsibility model that sets out the duties and managers participating at corporate level and in corporate units and business units (CUs and BUs).

In 2013, as part of the maintenance of the cycle, work was done at corporate level and in subgroups and companies.

The work performed at corporate level was as follows:

- Annual planning and monitoring of the cycle, maintenance and review of reference models, methodological and conceptual support for the CUs and BUs;
- Identification of the scope of SCIRF 2013 using the model on the consolidated financial statements as at 31
 December 2012, based on criteria of materiality and top down (Corporate Internal Audit Department) and
 bottom up (CUs/BUs), which identified the companies and departments at the Corporate Centre. The SCIRF
 covered most of the companies in Portugal, Spain and Brazil separately and the units making up EDP
 Renováveis, S.A., EDP Renewables Europe, S.L. and EDP Renewables North America, LLC aggregately;
- The scope model identified new subjects for documentation and implementation of controls by local managers and the redesign of processes resulting from organisational, structural, legislative and operational changes;
- We identified the computer programmes used in the processes covered by the result of use of the scope model and pinpointed the associated service organisations. An ISAE 3402 report or an independent assessment was required on the control environment used in services provided to the EDP Group;
- The assessment cycles identified some relevant issues and recommendations that have received specific
 monitoring by the businesses and technical support and supervision from the Corporate Internal Audit
 Department. Highly significant progress was made, thereby stepping up the SCIRF's quality and solidity.
- Nonconformities identified in the assessment cycles were analysed and corrective action was identified and implemented by local managers, with oversight, support and monitoring from the IAD. The percentage of corrections was substantial;
- The self-certification process in which the SCIRF managers perform a self-assessment of their remit, starting from the processes, their controls and process groups and ending at company level, was completed successfully. The chain certificates issued in an upward sequence in the hierarchy of control in each CU/BU are explicit recognition of the sufficiency or insufficiency of the process (appropriate and up to date), control activities (with sufficient evidence), resolution of nonconformities and application of the code of ethics (knowledge and compliance);
- In partnership with the Training, Recruitment and Documentation Department at EDP Valor, new training was given to SCIRF managers in Portugal and in-house training of auditors, to further their knowledge of control concepts and practices;
- In the analysis of matrixes of incompatibilities of duties (IT and business) a comparison was made between
 real and theoretic incompatibilities. The ratio of real incompatibilities was lower than 1%. In addition, a
 schedule of access and segregation of duties was developed for supervisors to manage incompatibilities and
 validations of transactions performed by their teams in order to mitigate risks and step up control;
- An assessment was made of control design to confirm that its structure was appropriate for the timely
 prevention of materially relevant errors and/or improper appropriation of Group resources; and
- Assessment of the operational effectiveness of controls to confirm their compliance with the design and implementation of this execution by qualified practitioners.

The work performed in subgroups and companies was as follows:

- Analysis of result of application of scope model to the individual financial statements and inclusion of new subjects, such as estimates, valuations and assessments subject to professional judgements identified as high risk in a bottom-up analysis;
- The subgroup EDP Renováveis, HC Energia/Naturgas and EDP Brasil also identified their standalone scope
 with a significance and risk profile suited to their size. Independent reports on the SCIRF by external
 auditors were published in their annual reports and accounts, in line with the publication in the consolidated
 reports and accounts;
- The EDP Brasil SCIRF was assessed by PricewaterhouseCoopers Brazil, the new external auditor in Brazil in coordination with KPMG Portugal, for the Group's independent report;
- Identification, review and appointment of SCIRF managers based on the result of the model and revision and/or updates resulting from organisational, structural, legislative and operational changes in the business units;
- Documentation of new processes and controls and redesign of processes and controls documented in previous cycles;
- · Necessary action to resolve nonconformities identified in the assessment tests; and
- Self-assessment in which the SCIRF managers assess the sufficiency and update status of documentation and maintenance of evidence in control activities at different levels of each hierarchy.

The SCIRF 2013 was performed by the Group's External Auditor in accordance with ISAE 3000 – International Standard on Assurance Engagements in all the regions covered by the scope model, with the assistance of PricewaterhouseCoopers for EDP Brasil.

The Group's procedures in the maintenance, assessment and monitoring of the SCIRF show a reasonable degree of certainty as to the reliability of the financial information provided to the market, ensuring quality and solidity in line with the best practices and international standards. No material deficiencies were detected.

The External Auditor issued an independent report on the Group's Internal Control System for the financial statements as at 31 December 2013, as described in Annex "External Checks".

IV. INVESTOR RELATIONS

56. COMPOSITION, DUTIES AND INFORMATION PROVIDED BY THESE SERVICES AND THEIR CONTACT INFORMATION

The essential role of the Investor Relations Department is to act as the interlocutor between EDP's Executive Board of Directors and investors and the financial markets in general. It is responsible for all the information provided by the EDP Group, in terms of disclosure of privileged information and other market communications and publication of periodic financial statements.

In carrying out its duties, the department is in constant contact with investors and financial analysts, providing all the information that they request, while observing the applicable legal and regulatory provisions.

EDP's Investor Relations Department comprises six people and is coordinated by Miguel Viana. It is located at the company's head office:

Praça Marquês de Pombal, n.º 12, 3º Piso

1250-162 Lisboa

Telephone: +351 21 001 2834

Fax + 351 21 001 2899 E-mail: ir@edp.pt Website: www.edp.pt

The table following shows the communication channels through which EDP provides its shareholders with information on each type of documentation.

57. REPRESENTATIVE FOR MARKET RELATIONS

The representative for market relations is Nuno Maria Pestana de Almeida Alves, member of the Executive Board of Directors.

58. PERCENTAGE OF AND RESPONSE TIME TO QUERIES RECEIVED IN THE YEAR OR PENDING FROM PREVIOUS YEARS

EDP's goal is for communication with the market to consist of objective, transparent information that is understandable to all stakeholders and financial market agents.

This is only possible with a financial reporting policy based on transparent, consistent information provided to investors and analysts, as the company has been doing.

The company has therefore made a systematic effort to meet the needs of investors and analysts, which is not an easy task due to the complexity of the sector, always with a view to fostering relationships of trust with financial agents and markets.

In 2013 research reports were written by 21 institutions and at the end of the year, there were six recommendations to buy, nine to hold and six to sell.

In 2013, EDP participated in events with analysts and investors to inform the market of the company's strategy and operational and financial performance. These included roadshows, presentations to analysts and investors, meetings and conference calls.

184 market communications were made in 2013. The Investor Relations Department received 498 requests for information and had 642 meetings with analysts and investors. The average response time to queries was less than 24 hours and no requests were held over into 2014.

The company's efforts have been rewarded at a number of events. At the "IR Magazine Europe Awards 2013", EDP was considered the best European utility company and best Portuguese company and came 14th overall. EDP also won first place in the best sustainability practices category. In addition, EDP was recognised by the "IR Global Rankings 2013" as the best company in terms of financial reporting for analysts and investors, out of more than 300 listed companies worldwide that underwent scrutiny by IR Global Rankings analysts.

V. WEBSITE

WEBSITE ADDRESS

EDP's website (www.edp.pt) provides comprehensive legal or corporate governance information, updates on the Group's activity and complete financial and operational data in order to facilitate searches and access to information by shareholders, financial analysts and others.

The information made available through this channel in Portuguese and English includes data on the company, financial statements and accounts, privileged information, the Articles of Association and internal regulations of corporate bodies, the Group's shareholder structure, preparatory documentation for General Meetings, historical performance of EDP share prices, a calendar of company events, the names of members of the corporate bodies and the representative for market relations, contact information for the Investor Relations Department and other information of potential interest about the Group. EDP's website also allows visitors to view or request accounting documents for any financial year since 1999.

60. LOCATION OF INFORMATION ABOUT THE COMPANY, ITS STATUS AS A PUBLIC LIMITED COMPANY, HEAD OFFICE AND OTHER DETAILS MENTIONED IN ARTICLE 171 OF THE COMPANY CODE

The information set out in Article 171 of the Company Code is available on EDP's website on:

http://www.edp.pt/en/aedp/governosocietario/Pages/Dados%20da%20Sociedade.aspx

61. LOCATION OF THE ARTICLES OF ASSOCIATION AND REGULATIONS OF BODIES OR COMMITTEES

The Articles of Association and regulations of bodies and committees are available on EDP's website on:

http://www.edp.pt/en/aedp/governosocietario/estatutoseregulamentos/Pages/Estatutos.aspx

62. LOCATION OF INFORMATION ON THE NAMES OF MEMBERS OF THE CORPORATE BODIES, MARKET RELATIONS REPRESENTATIVE, INVESTOR RELATIONS OFFICE OR EQUIVALENT BODY, THEIR DUTIES AND FORMS OF ACCESS

The names of members of the corporate bodies, market relations representative, investor relations office or equivalent body, their duties and forms of access are available on EDP's website on:

http://www.edp.pt/en/aedp/governosocietario/orgaosgovernosocietario/Pages/default_new.aspx

http://www.edp.pt/en/aedp/governosocietario/Pages/Dados%20da%20Sociedade.aspx

63. LOCATION OF ACCOUNTING DOCUMENTS, WHICH MUST BE AVAILABLE FOR AT LEAST FIVE YEARS AND THE SIX-MONTHLY CALENDAR OF COMPANY EVENTS DISCLOSED AT THE START OF EACH HALF YEAR, INCLUDING GENERAL MEETINGS, DISCLOSURE OF ANNUAL, SIX-MONTHLY AND, IF APPLICABLE, QUARTERLY ACCOUNTS

The accounting documents and calendar of company events are available on EDP's website on:

http://www.edp.pt/en/Investidores/Resultados/Pages/Resultados.aspx

http://www.edp.pt/en/investidores/calendario/Pages/Calendario.aspx

64. LOCATION OF NOTICE OF MEETING FOR GENERAL MEETINGS AND ALL THEIR PREPARATORY AND SUBSEQUENT INFORMATION

The notice of meeting for General Meetings and all their preparatory and subsequent information are available on EDP's website on:

http://www.edp.pt/en/Investidores/assembleiasgerais/assembleiasanuais/Pages/AssembleiasAnuais.aspx

65. LOCATION OF HISTORY OF DECISIONS MADE AT THE COMPANY'S GENERAL MEETINGS, THE SHARE CAPITAL REPRESENTED AND RESULT OF VOTES FOR THE PREVIOUS THREE 3 YEARS

The history of decisions made at the company's General Meetings, the share capital represented and result of votes are available on EDP's website on:

http://www.edp.pt/en/Investidores/assembleiasgerais/assembleiasanuais/Pages/AssembleiasAnuais.aspx

D. REMUNERATION

•

I. POWER TO SET REMUNERATION

66. POWER TO SET THE REMUNERATION OF CORPORATE BODIES AND COMPANY DIRECTORS

Pursuant to the Articles of Association, payments to the company officers are fixed by a Remuneration Committee appointed by the General Meeting of Shareholders, with the exception of the remuneration to members of the Executive Board of Directors, which is fixed by a Remuneration Committee appointed by the General and Supervisory Board.

When establishing the remuneration of the members of the General and Supervisory Board and Statutory Auditor, the Remuneration Committee of the General Meeting takes account of its fixed nature and the imperative rules on its determination, in particular Article 440 (2) of the Company Code, which sets out the criteria for setting the remuneration of the General and Supervisory Board, Article 374-A of the Company Code on the remuneration of members of the officers of the General Meeting and Article 60 of Decree-Law 224/2008 of 20 November on the remuneration of the Statutory Auditor.

II. REMUNERATION COMMITTEE

67. MEMBERSHIP OF THE REMUNERATION COMMITTEE, INCLUDING NAMES OF THE NATURAL OR LEGAL PERSONS HIRED TO ASSIST AND DECLARATION ON INDEPENDENCE OF EACH MEMBER AND CONSULTANT

The membership of the Remuneration Committee of the General Meeting and the Remuneration Committee appointed by the General and Supervisory Board is set out in Point 29.

No natural or legal persons were hired to assist the Remuneration Committee in its duties in 2013. Therefore, no-one who provides or has provided in the last three years services to any body answering to the Executive Board of Directors or the Executive Board of Directors itself or who is currently a company consultant was hired. This statement covers any natural or legal persons that are related to them by an employment or service agreement.

68. KNOWLEDGE AND EXPERIENCE OF REMUNERATION POLICY OF THE MEMBERS OF THE REMUNERATION COMMITTEE

The Remuneration Committee of the General and Supervisory Board is composed of members of the General and Supervisory Board with qualifications and experience in remuneration policy.

III. REMUNERATION STRUCTURE

69. REMUNERATION POLICY OF MANAGEMENT AND SUPERVISORY BODIES

EXECUTIVE BOARD OF DIRECTORS

Remuneration policy for the members of the managing body is set by the Remuneration Committee appointed by the General and Supervisory Board. This committee defined the remuneration of the directors, intending for it to reflect the performance of each member of the Executive Board of Directors in each year of their term of office (annual variable remuneration) and their performance during their term by fixing a variable component that is consistent with maximisation of EDP's long-term performance (variable multi-annual remuneration).

The recommendation uses an undetermined concept whose satisfaction depends on the concrete circumstances of the issuing company and especially on its shareholders' understanding of what is reasonable in these circumstances. Interpretation of the reasonability of the relative weight of the variable remuneration against the fixed remuneration must take account of the other elements in the recommendation, particularly of orientation towards alignment of the remuneration structure with the shareholders' long-term interests. One of the natural consequences of this principle is an increase in the weight of the variable component in order to create appropriate incentives for the company's executive directors to foster sustainable growth.

The relative weight of the variable remuneration against the fixed remuneration take account particularly of orientation towards alignment of the remuneration structure with the shareholders' long-term interests. As a result the weight of the variable component is higher to create appropriate incentives for the company's executive directors to foster its sustainable growth.

The remuneration policy statement, as approved by the shareholders, lays down that the total variable component can reach twice the fixed component during a term of office, thereby placing a maximum limit of two-thirds of the remuneration depending on fulfilment of strict company performance goals. Variable remuneration

depends on whether the executive directors achieve a performance of 90% of the business plan. Only if they achieve 110% fulfilment will they receive the maximum amounts allowed by the company's remuneration policy.

Variable remuneration is divided into annual, which may only reach 80% of fixed remuneration, and multi-annual, which may reach 120% of the fixed remuneration. Variable multi-annual remuneration is only paid if the goals have been met and is paid three years after the financial year in question.

If the remuneration goals are fully met in a term of office, 60% of the directors' variable remuneration is deferred for no less than three years.

If we compare this percentage with that set out for credit institutions and financial companies, pursuant to Directive 2010/76/EU of the European Parliament and of the Council of 24 November, as it is a paradigm that was widely analysed and discussed in Europe, we find that EDP's policy on variable remuneration is equivalent to the strictest used by these entities.

In accordance with the remuneration policy of the members of the Executive Board of Directors proposed by the Remuneration Committee of the General and Supervisory Board "a significant part of the variable remuneration" corresponding to the variable multi-annual remuneration may be a maximum of 120% of gross annual remuneration and it will be paid three years after the financial year in question.

The remuneration policy statement approved by the General Meeting on 6 May, 2013 for 2012/2014 sets out the following:

- **Fixed remuneration** EUR 600,000 annual gross for the CEO and 80% of this sum for the remaining members of the Executive Board of Directors. Maintenance of directors' retirement savings plans during their term of office, at a net amount of 10% of their fixed Annual remuneration. The characteristics of these retirement savings plans are set out in current legislation applicable to these financial products;
- Annual variable remuneration for each member of the Executive Board of Directors it may vary between 0% and 80% of their gross annual fixed remuneration. The amount is determined on the basis of the following indicators for each year in office: performance of the EDP Group's total shareholder return against Eurostoxx Utilities and PSI-20, ROIC/WACC, growth in gross margin, growth in net profit, performance of EBITDA and free cash flow. The weighted average of these indicators is given an overall weight of 80% for all members of the Executive Board of Directors, when determining their performance bonus. The other 20% is based on an individual assessment by the Remuneration Committee of the General and Supervisory Board.
- Multi-annual variable remuneration also for each member of the Executive Board of Directors, this component may be between 0% and 120% of their gross annual remuneration based on an annual accumulated assessment of the directors' performance in achieving economic sustainability for the EDP Group. The award of this multi-annual remuneration, although calculated on an annual basis, only takes effect if, at the end of the term of office, at least 90% of the strategic objectives have been achieved. These will be assessed on the basis of performance and comparison with defined strategic benchmarks. This payment component is fixed on the basis of the following factors: performance of the EDP Group's EBITDA in the term of office, ROIC/WACC, relative performance of total return for the Group's shareholders against Eurostoxx Utilities and PSI-20 in the term of office, performance of the sustainability index applied to the EDP Group (DJSI method) and relative performance of free cash flow in the term of office. The weighted average of these indicators is given an overall weight of 68% for all members of the Executive Board of Directors, when determining their performance bonus. As for annual indicators, 32% of the remuneration that is determined by internal assessment of the Executive Board of Directors by the Remuneration Committee of the General and Supervisory Board is reserved.

GENERAL AND SUPERVISORY BOARD

The remuneration of the members of the General and Supervisory Board is fixed, in view of their duties.

The remuneration of the Chairman of the General and Supervisory Board was fixed on the basis of the full-time performance of his duties, unlike the rest of the members.

At the Annual General Meeting on 6 May, 2013, the Chairman of the Remuneration Committee of the General Meeting submitted an appreciation of the remuneration policy for the corporate bodies, with the exception of the Executive Board of Directors, for the current three-year period, as follows:

- A simple, clear, transparent policy in line with EDP's culture so that remuneration practices can be based on uniform, consistent, fair, balanced criteria.
- A policy consistent with effective risk management and control in order to avoid excessive exposure to risk and conflicts of interest and achieve coherence with the company's long-term goals and values.
- Assessment and encouragement of meticulous action in which merit is properly rewarded, while ensuring levels of homogeneity compatible with the necessary cohesion of the General and Supervisory Board but still taking account of the economic and financial situation of the company and the country.
- Alignment of remuneration of the members of corporate bodies in companies with the highest market capitalisation and especially Iberian counterparts.
- The latest recommendations of the European Union and CMVM.
- Consideration of the effects of the serious economic crisis and current financial constraints, in order to meet requirements of great social justice in the country and in the company's different remuneration schemes.

Based on these criteria the committee decided that:

- a) The remuneration of the members of the General and Supervisory Board, including its Chairman, must be lower than those of the members of the Executive Board of Directors and there will be no variable component or any other remunerative supplement.
- b) The difficulties that the country is experiencing as a result of the worldwide economic, financial and social crisis require containment of remuneration, though account should always be taken of the merits and the complexity of the work of the members of each body in order not to jeopardise the company's cohesion, stability and development.
- c) The progressive increase in work and responsibility of the Audit Committee members must be taken into consideration in order to differentiate them from the other members of the General and Supervisory Board.
- d) It is also important to distinguish other specific positions in the General and Supervisory Board, such as the coordination work of the Chairman and Vice-Chairman.

The shareholders approved the statement of remuneration policy.

70. HOW REMUNERATION IS STRUCTURED TO ALLOW ALIGNMENT OF THE INTERESTS OF THE MEMBERS OF THE MANAGING BODY WITH THE COMPANY'S LONG-TERM INTERESTS AND HOW IT IS BASED ON ASSESSMENT OF PERFORMANCE AND DISCOURAGES EXCESSIVE RISK-TAKING

As set out in the remuneration policy described in Point 69, remuneration is structured to allow alignment of the interests of the members of the Executive Board of Directors with the company's long-term interests.

The time period considered for determining the multi-annual variable component of remuneration (paid three years after the financial year in question), the use of qualitative criteria aimed at a strategic medium-term perspective in the company's development, existence of a cap on variable remuneration and the relative weight of this component in total remuneration are decisive elements in fostering company management that is not focused only on short-term goals but also includes the medium and long-term interests of the company and its shareholders.

The members of the managing body have not concluded any agreements with the company or third parties that have the effect of mitigating the risk of variability of their remuneration fixed by the Remuneration Committee.

71. REFERENCE TO A VARIABLE REMUNERATION COMPONENT AND ANY IMPACT OF PERFORMANCE EVALUATION ON THIS COMPONENT

As described above in point 69, remuneration policy in effect for 2012/2014 involves three main components: i) fixed remuneration, ii) annual variable remuneration and iii) multi-annual variable remuneration.

The indicators used to assess the performance of the Executive Board of Directors in order to determine annual and multi-annual variable remuneration are as follows:

ANNUAL PERFORMANCE INDICATORS

1) Quantitative component and its weight

Total shareholder return vs. Eurostoxx utilities and PSI20: 19%

ROIC/WACC: 19%

Growth in gross profit: 14% Growth in net profit: 14% Performance of EBITDA: 7%

Performance do Free Cash-Flow: 7%

The 80% resulting from the weighted sum of these indicators reflects a performance common to all the members of the Executive Board of Directors.

2) Qualitative component

The other 20% is based on an individual assessment by the Remuneration Committee of the General and Supervisory Board, based on the individual performance of each member of the Executive Board of Directors.

The resulting amount of the quantitative and qualitative component is then weighted, as mentioned above, by a coefficient of 80% of the annual fixed remuneration.

MULTI-ANNUAL PERFORMANCE INDICATORS

1) Quantitative component and its weight

Total shareholder return vs. Eurostoxx utilities and PSI20: 17%

ROIC/WACC: 17%

Performance of EBITDA: 8.5%

Performance do Free Cash-Flow: 8.5%

VERENDING ENERGY

Sustainability performance Indicator: 17%

The 68% resulting from the weighted sum of these indicators reflects a performance common to all the members of the Executive Board of Directors.

Qualitative component

The other 32% is based on an individual assessment by the Remuneration Committee of the General and Supervisory Board, based on the individual performance of each member of the Executive Board of Directors.

The resulting amount of the quantitative and qualitative component is then weighted, as mentioned above, by a coefficient of 120% of the annual fixed remuneration.

72. DEFERRAL OF PAYMENT OF VARIABLE COMPONENT OF REMUNERATION AND ITS LENGTH

The multi-annual variable remuneration is calculated every year and only becomes effective at the end of the term of office if at least 90% of the strategic goals have been achieved, as assessed on the basis of company performance and its comparison with the strategic benchmarks and the individual contribution of each member of the Executive Board of Directors.

All multi-annual eventual variable remuneration are paid three years after the financial year in question.

73. CRITERIA ON ALLOCATION OF VARIABLE REMUNERATION IN SHARES AND EXECUTIVE DIRECTORS' MAINTENANCE OF THESE SHARES, ANY AGREEMENTS CONCLUDED CONCERNING THESE SHARES, SUCH AS HEDGING OR RISK TRANSFER CONTRACTS, THEIR LIMIT AND THEIR ASSOCIATION WITH TOTAL ANNUAL REMUNERATION

The members of the Executive Board of Directors do not own company shares under variable remuneration schemes.

74. CRITERIA ON ALLOCATION OF VARIABLE REMUNERATION IN OPTIONS, PERIOD OF DEFERRAL AND PRICE OF EXERCISE

EDP has no variable remuneration option schemes.

75. MAIN PARAMETERS AND BASIS OF ANY ANNUAL BONUS SYSTEM AND ANY NON-MONETARY

Company directors do not receive any significant remuneration in the form of non-monetary benefits.

76. MAIN CHARACTERISTICS OF SUPPLEMENTARY PENSION OR EARLY RETIREMENT SCHEMES FOR DIRECTORS AND DATE OF APPROVAL INDIVIDUALLY AT A GENERAL MEETING

EDP has no specific benefits system in place for its directors. The remuneration fixed by the Remuneration Committee of the General and Supervisory Board provides for a retirement savings plan-type standard financial product for the members of the Executive Board of Directors, who contribute 10% (ten percent) of their net fixed annual remuneration. It was granted by decision of the General Meeting of 6 May, 2013 as part of the remuneration policy statement. This financial product does not entail any cost to EDP in the future, as it is merely a subscription to a financial product while the members of the managing body hold their positions and is not covered by Article 402 (1) of the Company Code.

IV. DISCLOSURE OF REMUNERATION

77. ANNUAL AGGREGATE AND INDIVIDUAL REMUNERATION PAID TO THE MEMBERS OF THE COMPANY'S MANAGING BODY BY THE COMPANY, INCLUDING FIXED AND VARIABLE REMUNERATION AND ITS DIFFERENT COMPONENTS

The total gross amount paid by EDP to the members of the Executive Board of Directors in 2013 was 5,270,329.58 euros

The table below shows the gross amounts of remuneration paid individually to the members of the Executive Board of Directors .

| Euros | Remunieration paid by EDP | | |
|--|---------------------------|-----------------|--|
| Euros | Fixed | Variable (2012) | |
| António Luís Guerra Nunes Mexia (Presidente) | 737,931.04 | 250,642.00 | |
| Nuno Maria Pestana de Almeida Alves | 590,344.72 | 200,513.00 | |
| João Manuel Manso Neto | 562,018.24 | 200,513.00 | |
| António Manuel Barreto Pita de Abreu | 546,768.68 | 117,569.00 | |
| António Fernando Melo Martins da Costa | 562,946.96 | 128,629.00 | |
| João Manuel Veríssimo Marques da Cruz | 297,505.88 | 90,641.00 | |
| Miguel Stilwell de Andrade | 571,442.06 | 172,865.00 | |

The remuneration of the Chairman and directors of the Executive Board of Directors include the amounts associated with the retirement savings plan. The amounts of the variable remuneration were fixed on the basis of the tax treatment applicable in the director's country of tax residence. The amounts paid by EDP subsidiaries refer solely to their period of residence abroad.

78. AMOUNTS PAID FOR ANY REASON BY OTHER SUBSIDIARY OR GROUP COMPANIES OR COMPANIES UNDER COMMON CONTROL

The table below shows the gross amounts of remuneration paid by other subsidiary or Group companies or companies under common control.

| Euros | Remunerations paid by companies majority held by ED | |
|---------------------------------------|---|-----------------|
| | Fixed | Variable (2012) |
| João Manuel Veríssimo Marques da Cruz | 240,000.00 | |

79. REMUNERATION IN THE FORM OF PROFIT-SHARING AND/OR PAYMENT OF BONUSES AND REASONS FOR THESE BONUSES OR PROFIT SHARING

EDP has no schemes in place for payment of remuneration in the form of profit-sharing and/or payment of bonuses.

80. COMPENSATION PAID OR OWED TO FORMER EXECUTIVE DIRECTORS FOR TERMINATION IN THE FINANCIAL YEAR

There are no agreements between the company and members of the managing and supervisory bodies providing for compensation in the event of termination, as proven by the remuneration policy statement in effect for 2013. As a result no compensation for termination was paid or is owed to former directors.

It should also be noted that there are no contracts for severance payment in force, nor does the remuneration policy provide for such, in the event of dismissal or termination by agreement from the post of director.

In particular, the company does not assign compensation beyond the legally required in case of dismissal from the post of director founded in inadequate performance neither was any payments made in this context during the year 2013.

81. ANNUAL AGGREGATE AND INDIVIDUAL REMUNERATION PAID TO THE MEMBERS OF THE COMPANY'S SUPERVISORY BODIES

1. GENERAL AND SUPERVISORY BOARD

The total gross amount paid by EDP to the members of the General and Supervisory Board in 2013 was 1,739,354.14 euros.

The table below shows the remuneration paid in 2013 to the members of the General and Supervisory Board:

| Euros | Fixed |
|--|------------|
| Eduardo de Almeida Catroga | 490,500.00 |
| China Three Gorges Corporation | 72,000.00 |
| China International Water&Electric Corporation | 51,999.96 |
| China Three Gorges New Energy Corporation Ltd. | 51,999.96 |
| China Three Gorges International (Europe) | 51,999.96 |
| Cajastur Inversiones, S.A. | 51,999.96 |
| Luis Filipe da Conceição Pereira | 57,000.00 |
| Mohamed Ali Ismaeil Ali Al Fahim | 51,999.96 |
| Sonatrach | 51,999.96 |
| José Maria Espírito Santo Silva Ricciardi | 51,999.96 |
| Alberto João Coraceiro de Castro | 57,000.00 |
| António Sarmento Gomes Mota | 69,999.96 |
| Maria Celeste Ferreira Lopes Cardona | 69,999.96 |
| Fernando Masaveu Herrero | 51,999.96 |
| Ilídio da Costa Leite de Pinho | 51,999.96 |
| Jorge Braga de Macedo | 51,999.96 |
| Manuel Fernando de Macedo Alves Monteiro | 69,999.96 |
| Paulo Jorge de Assunção Rodrigues Teixeira Pinto | 51,999.96 |
| Vasco Joaquim Rocha Vieira | 51,999.96 |
| Vítor Fernando da Conceição Gonçalves | 84,999.96 |
| Rui Eduardo Ferreira Rodrigues Pena | 57,000.00 |
| Augusto Carlos Serra Ventura Mateus | 33,927.39 |
| Nuno Manuel Silva Amado | 33,927.39 |

Remuneration was also paid in 2013 to the members of the General and Supervisory Board (Parpública – Participações Públicas (SGPS), S.A. and Carlos Jorge Ramalho dos Santos Ferreira, who were in office until 18 March and 16 March 2013 respectively.

| Euros | Fixed |
|---|-----------|
| Carlos Jorge Ramalho Santos Ferreira | 19,000.00 |
| Parpública - Participações Públicas, (SGPS), S.A. (1) | 0.00 |
| (1) Resigned remuneration | |

2. OTHER COMPANY BODIES

ENVIRONMENT AND SUSTAINABILITY BOARD

The members of the Environment and Sustainability Board are paid in attendance vouchers of EUR 1,750 per meeting. In 2013, the remuneration paid to the members of the Environment and Sustainability Board was as follows:

Euros

| José Pedro Silva Sucena Paiva | 1,750.00 |
|-----------------------------------|----------|
| Alberto Manuel Rosete da Ponte | 0.00 |
| António José Tomás Gomes de Pinho | 1,750.00 |
| José Manuel Viegas (1) | 0.00 |
| Maria Graça Madeira Martinho | 1,750.00 |
| (1) Resigned remuneration | |

REMUNERATION COMMITTEE OF THE GENERAL MEETING

The members of the Remuneration Committee of the General Meeting received the following remuneration in 2013:

Euros

| José Manuel Archer Galvão Teles | 15,000.00 |
|--|-----------|
| Luís Eduardo Brito Freixial de Goes (em representação | 10,000.00 |
| da José de Mello - Sociedade Gestora de Participações Sociais, S.A.) | 10,000.00 |
| Álvaro João Duarte Pinto Correia | 10,000.00 |

82. REMUNERATION OF THE CHAIRMAN OF THE GENERAL MEETING. IN THE YEAR

The Chairman and Secretary of the General Meeting do not earn any remuneration in that capacity, given that they are remunerated as a member of the General and Supervisory Board and company Secretary, respectively. The Vice-Chairman of the General Meeting is paid an amount of EUR 2,000 a year, plus EUR 2,000 for each meeting over which s/he presides.

V. AGREEMENTS AFFECTING REMUNERATION

83. CONTRACTUAL LIMITATIONS FOR COMPENSATION PAYABLE TO DIRECTORS FOR DISMISSAL WITHOUT DUE CAUSE AND THEIR ASSOCIATION WITH THE VARIABLE COMPONENT OF REMUNERATION.

In accordance with the remuneration policy statement in effect for 2013, EDP has no existing contracts providing for payments in the event of dismissal or termination by mutual agreement of directors.

84. DESCRIPTION AND AMOUNTS OF AGREEMENTS BETWEEN THE COMPANY AND MEMBERS OF THE MANAGING BODY AND DIRECTORS, AS SET OUT IN ARTICLE 248-8 (3) OF THE SECURITIES CODE, PROVIDING FOR COMPENSATION IN THE EVENT OF DISMISSAL WITHOUT DUE CAUSE OR TERMINATION OF EMPLOYMENT FOLLOWING A CHANGE OF COMPANY CONTROL

Considering Article 248-B (3) of the Securities Code, EDP has no directors other than the members of the corporate bodies. In addition to the members of these bodies, there are no managers who have regular access to privileged information and participate in decisions on the company's management and business strategy.

Furthermore, we reiterate that, in accordance with the remuneration policy statement approved at a General Meeting and in effect for 2013, EDP has no existing agreements providing for payments in the event of dismissal or termination by mutual agreement of directors.

VI. STOCK PURCHASE OPTION PLANS OR STOCK OPTIONS

85. PLAN AND ITS BENEFICIARIES

The only stock option plan currently in effect is that for the managing body in 2003/2005.

As a part of the variable remuneration of the Chairman of the Board of Directors, the Chairman of the Executive Committee and the members of the Executive Committee who held positions from 2003 to 2005, the Remuneration Committee at the time allocated options for each year, based on a qualitative and quantitative assessment of each financial year. Under this plan, each call option can be exercised up to a maximum of 1/3 on each first anniversary of the date of award. Options not exercised become null and void at the end of eight years from the date of allocation.

86. DESCRIPTION OF THE PLAN (CONDITIONS FOR AWARD, CLAUSES ON NON-SALEABILITY OF SHARES, SHARES PRICE CRITERIA, PRICE OF OPTIONS IN FINANCIAL YEAR, PERIOD IN WHICH OPTIONS CAN BE EXERCISED, CHARACTERISTICS OF SHARES OR OPTIONS, INCENTIVES FOR PURCHASE OF SHARES OR EXERCISE OF OPTIONS)

In 2013, 416,511 options were exercised, as shown in the table below, which also details all allocations for 2003 to 2005. The options plan set up in April 2004 terminated in April 2012 and the unexercised options expired.

| Date of option | Nº of Benef. | N.º of Options | Option Price | Date of Commencement | Date of expiry | Nº of O Exerc | • |
|----------------|--------------|-------------------|-----------------|----------------------|----------------|------------------|-----------|
| | | | | | | In 2013 | Total |
| 30/06/2005 | 6 | 932,328 | 2.21 | 30/06/2006 | 29/06/2013 | 192,258 | 932,328 |
| 02/05/2006 | 6 | 1,461,497 | 2.21 | 02/05/2007 | 01/05/2014 | 224,253 | 1,310,807 |

87. STOCK OPTIONS OF COMPANY EMPLOYEES

There are no stock options for company employees.

88. CONTROL MECHANISMS SET OUT IN ANY EMPLOYEE SHARE SCHEME SO THAT THEY DO NOT EXERCISE THEIR VOTING RIGHTS DIRECTLY

The company has no such control mechanisms.

E. TRANSACTIONS WITH RELATED PARTIES

I. MECHANISMS AND PROCEDURES OF CONTROL

89. COMPANY MECHANISMS FOR MONITORING TRANSACTIONS WITH RELATED PARTIES

The General and Supervisory Board approved objective, transparent rules on the identification, prevention and resolution of relevant corporative conflicts of interest called Framework on Handling of Conflicts of Interest, which was revised in late 2009.

Following a decision made by the General and Supervisory Board, on 17 May, 2010 the Executive Board of Directors approved the rules on identification, in-house reporting and procedure in the event of conflicts of interest applicable to all EDP Group employees who play a decisive role in transactions with related parties.

These rules are also available on EDP's website.

As part of its improvement of governance practices, on 30 July, 2010, the General Supervisory and Board approved EDP's rules on conflicts of interest and transactions between related parties, which are available on EDP's website (www.edp.pt), which replace the Framework for Handling conflicts of Interest. This set of rules on the prevention, identification and resolution of potential corporate conflicts of interest has a wider scope of application than that set out in CMVM Regulation 4/2013.

The Corporate Governance and Sustainability Committee is responsible for supervising enforcement of the aforementioned rules and reports on its work to the General and Supervisory Board.

For further information on this matter, see Point 3.5.1. of the annual report of the General and Supervisory Board.

90. TRANSACTIONS THAT UNDERWENT CONTROLS IN THE YEAR

The General and Supervisory Board noted that, on the basis of the cases analysed and information provided by the Executive Board of Directors for 2013, there was no evidence that the potential conflicts of interest in EDP's operations were resolved contrary to the company's interests.

91. PROCEDURES AND CRITERIA APPLICABLE TO THE SUPERVISORY BODY'S PRIOR ASSESSMENT OF TRANSACTIONS BETWEEN THE COMPANY AND HOLDERS OF QUALIFYING SHAREHOLDINGS OR ENTITIES RELATED TO THEM IN ANY WAY

The current rules on the issue and waiving of a prior opinion from the General and Supervisory Board were approved on 7 May, 2009, along with the procedures for communication and clarifications between it and the Executive Board of Directors.

Pursuant to EDP's Articles of Association, the General and Supervisory Board fixes the parameters for measuring the economic or strategic value of operations submitted to it for an opinion and sets up speedy mechanisms for issuing an opinion in urgent cases or when the nature of the subject so warrants and the situations in which this opinion can be waived (Article 21 (7)). The mechanism for waiving a prior opinion from the General and Supervisory Board may only be used in cases of exceptional urgency or if the nature of the subject so warrants, as set out in EDP's Articles of Association and the regulations of the General and Supervisory Board in effect in 2011 (current Article 13 (5)). There are therefore very few situations in which only three members of the Corporate Governance and Sustainability Committee can be consulted

All matters in which a prior opinion is waived are later appraised at meetings of the General and Supervisory Board, which has the power to eliminate any deficiencies or irregularities.

Furthermore, the General and Supervisory Board has set out strict rules on transactions between related parties in order to prevent conflicts of interest.

In 2013, 13 operations with an average value of EUR 308 million and a maximum value of EUR 740 million were submitted to the General and Supervisory Board for a prior opinion. Eleven operations with an average value of EUR 247 million and a maximum value of EUR 600 million were submitted to the General and Supervisory Board after waiving of a prior opinion.

II. BUSINESS INFORMATION

92. LOCATION OF ACCOUNTING DOCUMENTS PROVIDING INFORMATION ON TRANSACTIONS WITH RELATED PARTIES, PURSUANT TO IAS 24, OR REPRODUCTION OF THE INFORMATION

Information on transactions with related parties, pursuant to IAS 24, is set out in Note 46 of the consolidated and individual financial statements

PART II - ASSESSMENT OF CORPORATE GOVERNANCE

CORPORATE GOVERNANCE CODE IN EFFECT

EDP – Energias de Portugal, S.A. (EDP) is a listed company whose securities are admitted to trading on the NYSE Euronext Lisbon stock market.

Pursuant to Article 2 (1) of CMVM Regulation 4/2013 on governance of companies issuing shares admitted to trading in a regulated market located or operating in Portugal, EDP abides by the recommendations set out in the Corporate Governance Code, as approved by the CMVM in July 2013, available on www.cmvm.pt. It has not opted to follow any other code of recommendations in this matter.

This report is structured in compliance with Article 1 (4) of CMVM Regulation 4/2013, and therefore abides by the model in its Annex I, not including the sections not applicable to EDP's corporate governance model.

COMPLIANCE WITH THE CORPORATE GOVERNANCE CODE

The following table lists the CMVM recommendations on corporate governance established in the refered Corporate Governance Code and indicating whether or not they ewre adopted y EDP, as well as where more detailed information can be found in this report on the adoption of each specific recommendation.

| | Comments report | | Chapter B Title I No. 12 Page 99 | Chapter B Title I No. 14 | Chapter B Title I No.12 page 99 | Over the past five years, the subject of statutory limitation on voting rights has already been discussed by the General Meeting of EDP on two occasions. The limitation of the number of votes set out in Article 14 of the Articles of Association reflects the will of the shareholders of EDP expressed through resolutions of the General Meeting, in the defence of the company's specific interests: (i) a change of the limit from 5% to |
|-------------------------|-----------------|--------------------------------------|---|--|--|--|
| | Adoption status | | Adopted | Adopted | Adopted | Not adopted |
| STATEMENT OF COMPLIANCE | Recommendation | I. VOTING AND CONTROL OF THE COMPANY | I.1. Companies must encourage their shareholders to take part and vote in general meetings, for instance by not fixing an excessively large number of shares required to have voting rights and introduce the means necessary for postal and online votes. | A L.2. Companies must not use mechanisms that hinder decisionmaking by their shareholders, such as by fixing a deliberative quorum larger than that provided for by law. | I.3. Companies must not set up mechanisms that result in a time lapse between the right to receive dividends or subscribe new securities and the voting right of each ordinary share, unless this is duly justified by the shareholders' long-term interests. | I.4. The articles of association of companies that limit the number of votes that can be held or cast by a single shareholder, individually or with other shareholders, must also set out that the amendment or maintenance of this provision must be submitted to the vote of the general meeting at least every five years – with no increased quorum requirement above that laid down by law – that all the votes cast must be counted without the aforementioned limitation on this decision. |

| | | | Chapter A Title I No. 4 and 5 pages 93 and 94 |
|--|--|--|---|
| 94.16% of the votes cast; (ii) a later increase to the current 25% was approved at the General Meeting of 20 February 2012, involving participation of 71.51% of the capital and approval by a majority of 89.65% of the votes cast. | The shareholders have thus been periodically called on to decide on limiting the number of votes. The continued existence of the limitation has prevailed and the reflection on the adjustment of the relevant ceiling for counting voting rights, precisely to progressively increase this level. | The momentum of shareholders of the Company has thus proven to be perfectly in tune with the sense advocated in the Recommendation and sufficiently apt for pursuing its goals, avoiding rigid formulas for this review set down in the Articles of Association, which has also fostered the particularly intense scrutiny of this clause by shareholders. | |
| | | | Adopted |
| | | | I.5. No measures must be taken that have the effect of requiring payments or liability for expenses on the part of the company in the event of transfer of control or a change in the membership of the management body that may interfere with the free transmissibility of shares and free appreciation by the shareholders of the members of the management body board. |

| II. SUPERVISION, MANAGEMENT AND OVERSIGHT | | | |
|--|----------------|--|---|
| II.1. SUPERVISION AND MANAGEMENT | | | |
| II.1.1. Within the limits of the law and unless the company becomes too small, the board of directors must delegate the everyday running of the company. The powers delegated must be indicated in the annual Corporate Governance Report. | Not applicable | This recommendation does not apply to the company's current governance model. The delegation of powers granted in the Latin model to delegated directors does not exist in the Executive Board of Directors of EDP. It only has an allocation of management areas to each of the members of the Executive Board of Directors, with the college of directors responsible for taking decisions on all matters under its jurisdiction. Moreover, Article 431(3) of the Portuguese Company Code on the powers of the Executive Board of Directors establishes that the powers of management and representation of directors is governed by the scheme provided for in Article 406, 408 and 409 and excludes Article 407 concerning the delegation of management powers. | |
| II.1.2. The Board of Directors must ensure that the company acts in accordance with its goals and must not delegate its powers to: i) define the company's general strategy and policies; ii) define the group's corporate structure; iii) make decisions that must be deemed strategic due to their amount, risk or special characteristics. | Not applicable | This recommendation does not apply to the company's current governance model. According to the two tier model of governance, the Executive Board of Directors does not delegate any of the matters referred to in this Recommendation. However, the supervisory body and management monitoring body issues prior opinions concerning the approval of the strategic plan and certain strategic or significant operations (Article 17(2) of the Articles of Association) | |
| II.1.3. In addition to the exercise of its supervisory duties, the General and Supervisory Board must take full responsibility for the company's governance and so the articles of association or an equivalent provision must enshrine the board's obligation to give its opinion on the company's strategy and main policies, definition of the group's corporate structure and decisions that must be deemed strategic due to their amount or risk. This | Adopted | | Chapter B Title II No. 21 page 105 |

| | Adopted | | Not applicable |
| board must also assess compliance with the company's strategic plan and implementation of its main policies. | II.1.4. Unless the company becomes too small, the Board of Directors and the General and Supervisory Board, depending on the model used, must set up any necessary committees to: a) Make a competent, independent assessment of the performance of the executive directors and their own overall performance and that of the other committees; b) Reflect on the system, structure and governance practices used, verify their efficacy and propose improvement measures to the competent bodies. | II.1.5. The Board of Directors or General and Supervisory Board, depending on the applicable model, must set goals for risks and create systems to control them in order to guarantee that risks actually run are consistent with these goals. | II.1.6. The Board of Directors must include a number of non-executive members to guarantee its effective capacity to monitor, supervise and assess the work of the remaining members of the management body. |

| 11.1.7. The non-executive directors must include an appropriate proportion of independents, depending on the company's governance model, size, shareholder structure and free float. The independence of the members of the General and Supervisory Board and of the Audit Committee will be measured in accordance with current legislation. Where the other members of the Board of Directors are concerned, independent directors are persons who are not associated with any group with specific interests in the company and who are not in a situation liable to affect their impartial analysis or decision, due, for example, to: a. Having been employees of the company or a subsidiary or group company in the last three years; b. Having provided services or done significant business with the company or a subsidiary or group company in addition to the remuneration from their position as director; d. Living in a common-law marriage or being the spouse, relative or similar in a direct line to the third degree, inclusive, in the collateral line of directors or natural persons directly or indirectly owning qualifying shareholdings; e. Owning qualifying shareholdings or being the representative of a shareholder owning qualifying shareholdings. | Adopted | Chapter B Title II No. 18 page 103 |
|---|----------------|------------------------------------|
| II.1.8. Directors who perform executive duties when asked to do so by other members of the corporate bodies must provide the information requested by these bodies in a timely fashion and in the appropriate form. | Adopted | Chapter B Title II No. 21 page 105 |
| II.1.9. The chairman of the executive management body or executive committee must send the invitations and minutes of their meetings to the Chairman of the Board of Directors, Chairman of the Supervisory Board, Chairman of the Audit Committee, Chairman of the General and Supervisory Board and Chairman of the Financial Committee, as applicable. | Adopted | Chapter B Title II No. 21 page 105 |
| II.1.10. If the chairman of the management body performs | Not applicable | |

158

| executive duties, this body must appoint from among its members an independent director to coordinate the work of the other non-executive members and the right conditions for them to make independent, informed decisions or find another equivalent mechanism for this coordination. | |
|---|--|
| II.2. OVERSIGHT | |

| II.2.1. Depending on the model in question, the chairman of | Adopted | Chapter B |

| ensuring that the appropriate conditions exist in the company for the provision of the services. | | No.s 21 and 29, |
| | | pages 105 and 126 |
| II.2.3. The oversight body must assess the external auditors | Adopted | Chapter B |
| every year and propose to the competent body their dismissal or termination of their service contract whenever so justified. | | Title II |
| | | No.s 21 and 29, |
| | | pages 105 and 126 |
| 4. The oversight body must assess the internal | Adopted | Chapter B |
| risk management systems and propose any necessary adjustments. | | Title II |
| | | No.s 21 and 29, |
| | | pages 105 and 126 |
| II.2.5. The Audit Committee, General and Supervisory Board | Adopted | Chapter C |
| and the Supervisory Board must give their opinion on work plans and resources allocated to internal audit services and | | Title II |
| compliance services and must receive these services' reports at least when they cover matters related to rendering of accounts, | | No. 49 |
| identification or resolution of conflicts of interest and detection of potential illegalities. | | page 135 |
| | | |
| II.3. FIXING REMUNERATION | | |
| II.3.1. All members of the Remuneration Committee or | Adopted | Chapter B |

160

| uivalent must be independent from the executive members | |
|--|--|
| the management body and include at least one member with | |
| owledge and experience of remuneration policy | |

| equivalent must be independent from the executive members of the management body and include at least one member with knowledge and experience of remuneration policy. | | | Title II No. 29 page 126 |
|--|----------------|---|---|
| II.3.2. No natural or legal person who provides or has provided services to any unit answerable to the management body, the company's management body itself or with a current relationship with the company or consultant of the company in the last three years may be hired to assist the Remuneration Committee in its duties. This recommendation also applies to any natural or legal person related to the former under an employment or service agreement. | Adopted | | Chapter D Title II No. 67 page 144 |
| II.3.3. The remuneration policy statement by the management and supervisory bodies set out in Article 2 of Law 28/2009 of 19 June must also contain: a) Explicit identification of the criteria used to determine the remuneration paid to the members of the corporate bodies; b) Information on the maximum potential individual amount and the maximum potential aggregate amount payable to the members of the corporate bodies and an indication of the circumstances in which these maximum amounts may be payable; d) Information as to whether payments for dismissal or termination are required or not. | Adopted | | Chapter D Title III No.s 69, 70, 71, 72 and 80 Pages 145 to 148 |
| II.3.4. The proposal on approval of plans to allocate shares and/or share options or based on variations in share prices to members of the corporate bodies must be submitted to the General Meeting. The proposal must contain all the necessary elements for a proper assessment of the plan. | Adopted | | Chapter D Title VI No. 85 page 150 |
| II.3.5. The proposal on approval of any retirement benefit system for members of the corporate bodies must be submitted to the General Meeting. The proposal must contain all the necessary elements for a proper assessment of the system. | Not applicable | EDP has not set up a specific retirement benefit system for the members of its management and supervisory bodies. Nevertheless, the members of the Executive Board of Directors receive a "standard" retirement savings plan financial product corresponding to 10% of the fixed component of the annual remuneration, which was assigned by the General Meeting of 6 May 2013 under the Remuneration Policy Statement. | |

| III. REMUNERATION | | | |
|--|------------------|---|----------------------------------|
| III.1. The remuneration of the management body's executive Adopted members must be based on actual performance and discourage excessive risk taking. | p | | Chapter D Title III |
| | | | No.s 69 and 70 pages 145 and 146 |
| 1 | y applicable and | | Chapter D |
| must not include any component that depends on the | 3 | | Title III |
| company's performance of value. | | | No. 69 |
| | | | page 145 |
| | P | | Chapter D |
| generally reasonable in relation to the fixed remuneration component and maximum limits must be set on all | | | Title III |
| components. | | | No. 69 |
| | | | page 145 |
| III.4. A significant part of variable remuneration must be Adopted | P | | Chapter D |
| deferred for ho less than three years and the right to receive it must be dependent on the continued good performance by the | | | Title III |
| company in this period. | | | No. 72 |
| | | | page 147 |
| III.5. The members of the management body must not Adopted | P | There are no contracts entered into by the members of | Chapter D |
| conclude agreements with the company or with third parties that have the effect of mitigating the risk of variability in | | the management body that include such clauses. | Title III |
| remuneration fixed for them by the company. | | | No. 70 |

| |

| III.6. Up to the end of their term of office, the executive directors must keep the company shares to which they have had access under variable remuneration schemes up to a limit of twice the amount of their total annual remuneration, with the exception of shares that need to be sold to pay taxes resulting from benefits from them. | Not applicable | There is only one share allocation scheme in effect for 2003 to 2005 and the members to whom it applied left their positions on 30-03-2006. The plan therefore applies to a time prior to the publication of the recommendation in question, which was not yet in effect. This recommendation does not therefore apply to any member of the management board currently in office | |
|---|----------------|---|--|
| III.7. If variable remuneration includes share options, the start of the exercise period must be deferred for no less than three years. | Not applicable | No stock options plan exists. | |
| III.8. If the dismissal of a director is not the result of a serious breach of his/her duties or unfitness for normal performance of his/her job, but is still due to inadequate performance, the company has the appropriate, necessary legal instruments to ensure that no compensation other than that legally payable can be demanded. | Adopted | | Chapter D Title IV No. 80 Page 148 |
| IV. AUDIT | | | |
| IV.1. As part of his duties, the external auditor must verify compliance with remuneration policies and systems for the corporate bodies and the efficacy and efficiency of internal control mechanisms and report any deficiencies to the company's oversight body. | Adopted | | Chapter B Title III No. 42 page 133 |
| IV.2. Neither the company nor any of its subsidiaries must contract services other than audit services from the external auditor or any entities in the same group or network with him. If it is necessary to contract such services (which must be approved by the oversight body and set out in its Annual Corporate Government Report), they must not amount to more than 30% of the total value of the services provided to the company. | Adopted | | Chapter B Title III No. 46 Page 134 |

| 163 |
|--------------------|
| NEVERENDING ENERGY |

| IV.3. Companies must endeavour to change auditors after two or three terms of office, depending on whether they are for four or three years, respectively. Their continuation beyond this limit must be justified in a specific opinion from the oversight body that expressly indicates the auditor's independence and the advantages and costs of his replacement. | Adopted | Chapter B Title III No. 44 page 133 |
|---|---------|-------------------------------------|
| V. CONFLICTS OF INTEREST AND RELATED-PARTY TRANSACTIONS | ACTIONS | |
| V.1. The company's business with shareholders owning qualifying shareholdings or with entities in any way related to them, pursuant to Article 20 of the Securities Code must be conducted under normal market conditions. | Adopted | Chapter A Title II No. 10 |

| V.2. The management or oversight body must establish | Adopted | Chapter B |
|--|---------|-----------|
| procedures and criteria for defining the relevant degree of significance of business with shareholders owning qualifying | | Title II |
| shareholdings (or with entities in any of the relationships set out in Article 20 (1) of the Securities Code) and business deals | | No. 21 |

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

1. ECONOMIC ACTIVITY OF EDP GROUP

The Group's parent company, EDP - Energias de Portugal, S.A. (EDP, S.A.), was incorporated in 1976 as a result of the nationalisation and merger of the major Portuguese companies in the electricity sector operating in mainland Portugal. EDP S.A.'s head office is located in Lisbon at Praça Marquês de Pombal, 12. During 1994, as established by Decree-laws 7/91 and 131/94, the EDP Group (EDP Group or Group) was set up following the split of EDP, S.A., which led to a number of directly or indirectly wholly owned subsidiaries of EDP, S.A.

The Group's businesses are currently focused on the generation, distribution and supply of electricity and distribution and supply of gas. Although complementary, the Group also operates in related areas such as engineering, laboratory tests, vocational training, energy services and property management.

The EDP Group operates essentially in the European (Portugal, Spain, France, Poland and Romania) and American (Brazil and the United States of America) energy sectors.

Activity in the energy sector in Portugal

Electricity - Portugal

The National Electricity System (SEN) basis of organization and operation, as well as the general basis applicable to the production, transportation, distribution and supply activities of electricity, and to the market organization, are established by the Decree-Law (DL) 29/2006 of 15 February, this DL was developed by the DL 172/2006 of 23 August. The DL 29/2006 was updated by DL 104/2010 of 29 September, by DL 78/2011 of 20 June, by the DL 75/2012 of 26 March and by the DL 215-A/2012 and B/2012 of 8 October, incorporating essentially the principles of the European Parliament and Council's Directive 2009/72/CE of 13 July, establishing common rules for the electricity internal market.

The National Electricity System includes the activities of generation and supply of electricity under free market competition conditions, through licensing, and the activities of transmission and distribution provided through exclusive public service concessions.

The transmission, distribution and supply of last resort activities are subject to regulation by Entidade Reguladora dos Serviços Energéticos - ERSE (Energy Sector Regulator), which is responsible for the preparation, issuance and enforcement of regulations and for establishing the tariffs and prices related to network usage -access tariffs - and electricity supply for clients in the regulated market - electricity tariffs charged by the Supplier of Last Resort.

For transmission, distribution and supply of last resort activities, the law establishes a remuneration right fixed by ERSE, under the tariff regulations, to ensure economic and financial balance under an efficient management.

Electricity transmission is ensured by the National Transportation Network (RNT) and is carried out under public service concessions, exclusively by REN - Redes Energéticas Nacionais, SGPS, S.A., for a period of 50 years.

Generation

The generation of electricity covers generation under ordinary and special regimes. Under the ordinary regime, where EDP Group is represented by EDP Gestão da Produção, S.A., electricity is generated and sold under free market conditions, in organised markets or through bilateral agreements, being subject only to licensing.

The special regime (PRE) allows producers to deliver electricity to the network, through bilateral agreements with the Supplier of Last Resort (CUR), being subject to specific legislation, namely to promote the use of endogenous renewable resources, cogeneration or micro generation. The EDP Group is present in this segment through its subsidiaries EDP Gestão da Produção, S.A. and EDP Renováveis Portugal, S.A., among others.

Following the publication of Decree-Law 240/2004 of 27 December, which established the creation of a compensation mechanism to maintain the contractual balance (CMEC), in January 2005 the EDP Group signed the early termination of contracts for the Power Purchase Agreements (PPAs) related to the binding electricity production plants of the EDP Group, effective as of 1 July 2007, date of the launch of the Iberian Electricity Market (MIBEL).

On 16 February 2007 the Portuguese Government confirmed its decision to early terminate the PPAs and implement the CMEC mechanism and defined the rules to calculate the compensations due to the power generators for such early termination, which essentially consisted in an adjustment of the reference market price of electricity used to calculate the CMEC initial compensation amount. On 15 June 2007, EDP and REN agreed on the early termination of the PPAs, effective as of 1 July 2007. The new CMEC regulation sets the compensation due at 833,467 thousands of Euros, which in accordance with the legislation can be subject to securitisation.

In June 2007, Decree-Law 226-A/2007 of 31 May, which approves the new legal regime for using hydric resources under the terms of the new Water Law (Lei da Água), came into force. This Decree-Law extends the period on which the companies, holders of hydroelectric plants relating to the various dams, can operate the public hydric resources. The extension of the operating period, and the consequent extension of the useful life of the related hydraulic fixed assets, implied a payment by the holders of the hydroelectric plants for economic and financial compensation. On that basis, the Government (INAG), REN and EDP Gestão da Produção de Energia signed on 8 March 2008, several service concession arrangements for which EDP Gestão da Produção de Energia paid approximately 759 millions of Euros (corresponding to the contractual compensation following the Dispatch 16982/07) for the extension of the period to operate the public hydric domain for an additional average period of 26 years.

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

On 20 August 2012, the Administrative Order 251/2012 was published. This regulation replaces the previous mechanisms and establishes a new incentive scheme to energy generators. Capacity payments should contribute decisively and rationally to maintain the production capacity of electricity (availability incentive) and to perform future investment in new production capacity (investment incentive), and therefore, to ensure security supply levels that are not guaranteed by the operation of the normal market mechanisms. The availability incentive is applicable to thermoelectric power plants until the end of the operating license, beginning in the calendar year following the date of termination of the PAF ("Programa de Apoio Financeiro"). This incentive corresponds to an annual compensation of 6,000 Euro/MW/year. Investment incentive is applicable to new hydroelectric power plants and power enhancement projects, during the first 10 years after the formal recognition of their eligibility to receive the incentive.

On 27 February, the Administrative Order 85-A/2013 was published, approving the nominal tariff applicable to the tariff repercussion of the yearly fixed amount of the costs for maintenance of the Contractual Stability Compensation (CMEC), setting the rate at 4.72%. This rate is applicable between 1 January 2013 and 31 December 2027 and reflects a costs reduction for the system of approximately 13 millions of Euros per year, which corresponds to a present value of 120 millions of Euros. This adjustment results from the application of the calculating mechanism of the interest rate related with the fixed portion set out in Decree-Law 240/2004, of 27 December, amended by Decree-Law 32/2013, of 26 February (point iv) of paragraph b) n. 4 of article 5. °).

Following the publication of Law 74/2013 of 4 June, which established a regulatory scheme in order to ensure the balance of competition in the wholesale electricity market, determining that the costs of general economic interest (CIEG) of the UGS tariff should also be supported by the producers under the ordinary regime and other producers not included in the guaranteed return system, the Dispatch 12955-A/2013, of 10 October fixed the payment per MWh injected into the network, for each one of the power plants covered, in 3€ for on-peak hours and 2€ for off-peak, during the period from 11 October to 31 December 2013. Directive 26/2013 of 27 December, established the terms and conditions of the business relationship between those electricity producers covered by Decree-Law 74/2013

Distribution

Electricity distribution is carried out through the National Distribution Network (RND) and consists of a medium and high-tension network and a low-tension distribution network, exclusively under public service concessions.

The distribution of electricity in medium and high-tension has been licensed to EDP Distribuição by the Portuguese Government for a period of 35 years, from 25 February 2009.

In accordance with specific legislation (Decree-law 344-B/82, with the amendments set out in Decree-law 297/86 of 19 September, Decree-law 341/90 of 30 October and Decree-law 17/92 of 5 February), the right to distribute low-tension electricity in Portugal is attributed to the municipalities (local authorities). However, Service Concession Arrangements were celebrated generally with a 20 year term between each of mainland Portugal municipalities and EDP Distribuição. These concessions are in return for payment of a rent to the respective municipalities, determined in accordance with Decree-Law 230/2008 of 27 November.

Supply

The Electricity supply market is open to competition, subject only to a licensing regime. Suppliers have the right of access to the national transmission and distribution networks upon payment of the access charges set by ERSE. The activity of free supply is developed by EDP Comercial, S.A. The activity of supply of last resort (CUR), including universal public service obligations, is guaranteed by EDP Serviço Universal, S.A., a company wholly owned by EDP Distribuição S.A.

Electric Energy Price Regime

In the non-regulated market, electricity tariffs are defined by an agreement between each supplier and its customers. In the regulated market the tariffs charged by the Supplier of Last Resort are defined by ERSE.

The Decree-Law 104/2010 of 29 September, establishes the end of regulated tariffs for very high, high, medium and low-tension customers from 1 January 2011. For the low-voltage segment, the Decree-Law 75/2012 of 26 March, establishes the extinction of the regulated tariffs for sale to final customers from 1 July 2012 for customers with contracted power higher or equal to 10.35 kVA, and from 1 January 2013, for customers with contracted power less than 10.35 kVA. This law also establishes a system of transitional rates set by ERSE, as well as for economically vulnerable customers the right to join the contract on the open market or choose to keep the supply by the supplier of last resort, benefiting, in any case from discounts in the price of access provided by law.

Public Domain Assets

In Portugal some fixed assets relating to electricity generation and distribution in the regulated market are subject to the public domain regime. These assets are directly related with the Group's activity, which can freely manage them, but cannot dispose of them for private commercial purposes while they are related with the public domain regime.

NEVERENDING ENERGY

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

Gas - Portugal

The National Natural Gas System (SNGN) basis of organization and operation, was established by the Decree-law 30/2006 of 15 February. This DL was developed by the DL 140/2006 of 26 July, that established the general basis applicable to the SNGN activities. The DL 231/2012 of 26 October, proceeds to the third amendment to the DL 140/2006, changed by the DL 65/2008 of 9 April and by the DL 66/2010 of 11 June, incorporating essentially the principles of the European Parliament and Council's Directive 2009/73/CE of 13 July, establishing common rules for the natural gas internal market.

In the distribution activity for natural gas, EDP Group develops its activity in Portugal through its subsidiary Portgás, S.A. EDP Group is present in the commercialization of natural gas, both in the regulated market (EDP Gás Serviço Universal) and the free market (EDP Gás.com and EDP Comercial). EDP Gás.com and EDP Comercial, with a trading license in the free market since 2008 and 2010, respectively, have operated in the market since the start of 2009. Additionally, the Group develops the supply business of propane gas, through EDP Gás GPL,S.A.

Since 1 January 2013 the retail rates published by ERSE have a transitory character, being susceptible to quarterly reviews, according to DL 74/2012 of 26 March. This transitional period ends: (i) at 30 June 2014, for customers with annual consumption over 10,000 m3; (ii) 31 December 2014, for customers with annual consumption over 500 m3 and less than or equal to 10,000 m3; and (iii) 31 December 2015 for customers with annual consumption of less than or equal to 500 m3.

On 15 June 2013, the tariffs set by ERSE were published for the years 2013-2014 as well as the parameters for the regulatory period 2013-2016. The income allowed for Portgás S.A. include the initial revaluation of its assets (with reference to 31 December 2007), approved by the Finance Ministry. On 20 December, ERSE published the directives 29/2013 and 30/2013 that approve the transitional sale tariffs for customers with annual consumption of less than or over to 10,000 m3 effective in the first quarter of 2014.

Activity in the energy sector in Spain

Electricity - Spain

In Spain, Hidroeléctrica del Cantábrico (HC Energia) is the parent company of an industrial group that operates in the electricity and gas sectors. In the electricity sector, HC Energia generates, distributes and supplies electricity. Production is based essentially on traditional coal thermal power plants and, on a smaller scale, on hydroelectric and nuclear power plants.

Electric Sector Regulation

On 27 November 1997 the Electric Sector's Law 54/1997 was approved, which (i) implements the principles included in the Protocol signed on 11 December 1996 between the Ministry of Industry and Energy and the major electric power companies regarding greater liberalization and competition in the electricity sector and (ii) incorporates into Spanish law the provisions contained in Directive 96/92/EC on common rules for the internal electricity market. Additionally, on 6 July 2007 the Law 17/2007 of 4 July came into force, amending the Law 54/1997, to adapt it to the Directive 2003/54/EC of the European Council and Parliament of 26 June 2003 on common rules for the internal market of electricity. Law 54/1997 was updated by the Royal Decree 13/2012 of 30 March, incorporating the principles of the European Parliament and Council's Directive 2009/72/CE of 13 July that revokes the Directive 2003/54/CE. On 27 December, was published in the Official State Gazette the Law 24/2013 which replaces Law 54/1997 maintaining the principles established in previous legislation but with particular emphasis on economic and financial sustainability of the electricity sector.

The referred Law 24/2013, provides, among others, the following basic principles defined in the previous legislation:

Generation

Since 1 January 1998 electricity generation operates on a free market competition basis, which covers the purchase and sale of energy and other services related to the supply of electricity.

The market structure for electricity generation has been widened by Law 17/2007 of 4 July, in order to include the forward market and the intraday market, as well as technical issues, complementary services, deviations management and non-organised markets. The organisation and regulation of the market for electric power generation is defined by Royal Decree 2019/1997 of 26 December, and its implementing standards.

Electric energy is paid at the system's marginal price plus a component for the adjustment services necessary to ensure an adequate supply. Additionally, the Order ITC/2794/2007 of September 27, which revised the electricity tariffs from 1 October 2007, replaced the concept of "power availability" remuneration of electricity generation by the concept of "capacity payments" stated in article 16 of the Law 54/1997 (amended by Law 17/2007), which sets a remuneration of the availability service - for the procurement of capacity in the medium term develop on the Order ITC/3127/2011 - and the incentive to invest in long-term capacity.

The installation of new generation units is liberalised, subject to obtaining the necessary permits.

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

Producers have the right to use primary energy sources in their generation units as deemed most appropriate, with the applicable environmental restrictions. As at 1 October 2010, the Royal Decree Law 1221/2010 was approved (which changed the Royal Decree Law 134/2010 of 12 February) that establishes the procedure for supply restrictions, as a protective measure to promote the consumption of local coal. As at 23 December of the same year entered into force the Royal Decree Law 14/2010, which obliges the producers to pay for the use of the transmission and distribution networks. On 27 January 2012 the promulgation of the Law 1/2012, temporarily suspended the new facilities' right to benefit from the specific remuneration regime of the facilities which use renewable energy sources, waste or cogeneration (applicable to the facilities that, since 28 January 2012, do not fulfill the administrative requirements referred in this standard). From 1 January 2013, the amounts of the premiums applicable to the remuneration of all facilities of the special regime were also eliminated, leaving only the tariff option or market price (Royal Decree-Law 2/2013).

On 12 July 2013, the Spanish Government approved, the Royal Decree-Law 9/2013, which changes the remuneration scheme for facilities that use cogeneration, renewable energy sources and waste based on standard costs (investment and operation costs) by type of facility. The rate of return on assets will considerer the rate of the Spanish Government ten-year bonds yield, plus 300 b.p. The economic effect of this measure depends on the assumptions for each technology, as well as the number of operation years of each facility. This Royal Decree provides a reduction for the investment incentive in long-term capacity in combined cycle plants for 10,000€ /MW/year against 26,000€ /MW/year previously allocated, besides the extension of tthe applicable period to the double.

Transmission

Red Eléctrica de España, S.A. performs the activities of Transmission Manager and System Operator, being responsible for its technical management, to ensure the continuity of supply and efficient management of the generation and transmission systems. The responsibility for the economic management of the system is guaranteed by OMI - Polo Español, S.A.

The entities and qualified consumers have free access to the transmission and supply networks, setting out a system of "tariffs" for traffic. The remuneration for the transmission and distribution activities is set by the regulatory entity.

The Royal Decree 325/2008 of 29 February, established a new fee regime applicable to electricity transportation facilities, that entered into service from 1 January 2009. However, since the adoption of the Royal Decree 9/2013, the retribution will be calculated based on the Spanish Government ten year bond yield, plus 200 basis points.

According to the Law 24/2013 the transmission activity is performed by a single entity. There is also a distinction made between the primary transmission system (facilities > 380 kV with international networks and with extra-peninsular and insular systems) and the secondary transmission system (facilities < 220 kV other than primary transmission systems and less but fulfilling the functions of transmission).

Distribution

Law 54/1997 established that the remuneration for each company must respect criteria based on the costs needed to develop the activity, taking into account a model of characterization of distribution areas and other parameters. On 19 March 2008, the Royal Decree 222/2008 of 15 February entered into force, establishing a new system of remuneration for the electricity distribution activity and modified the system of "Acometidas" (system that regulates the installation, that connects the distribution network to the point of delivery of energy to the customers). This remuneration system is based on investments and increased demand of each distributor. On 1 April 2012, came into force the Royal Decree 13/2012, amending the remuneration criteria of the distribution activity related to the assets in use that are not amortised, taking as basis for their financial retribution and their net amount. Additionally, the return on assets in use in the year t shall be initiated at 1 January t+2. However, since the adoption of the Royal Decree 9/2013, the distribution activity renumeration will be calculated based on the Spanish Government ten-year bonds yield, plus 100 b.p. during the second quarter of 2013 and 200 b.p. from 2014 forward. These principles were embodied in the new Law 24/2013.

Supply

Law 54/1997 established a progressive liberalisation of electricity supply and the introduction of supply activities to enable customers to progressively choose their suppliers and liberalising the supply market from 1 January 2003. Additionally, since 1 July 2009, distributors can no longer act as suppliers (sell electricity) acting strictly as network operators. Law 24/2013 determines that certain consumers are entitled to be provided with tarrifs for small consumers and last resort tarrifs for reference traders.

Electricity Tariffs Regime

The activities for the energy supply are paid by consumers, through fees and charges and by specific items of the state budget (Law 15/2012 and Royal Decree-Law 9/2013) and by other items to be determined.

Fees, exclusive in Spain, must be determined with the methodologies determined by the National Markets and Competence Commission (CNMC) considering the costs of the system as defined in the Law 24/2013. Charges applicable to consumers and producers are determined by calculation methods adopted by the Government and CNMC that will serve to cover certain costs of the system, without prejudice of what is in force for transport and distribution.

Transitionally, and while these methods are not approved, fees and charges are defined by the Ministry of Industry and Tourism.

On the other hand, on 1 July 2009 the system of electricity tariffs became extinct and all consumers were transferred to the free market. However, the Royal Decree 485/2009 of 3 April, provides that the consumers of low-tension, with contract capacity not exceeding 10 kW, are eligible for voluntary prices for the small consumer, which determines the maximum price of supply. These tariffs will be applicable by the suppliers of last resort, where EDP Comercializadora Último Recurso, S.A. is included.

VEVERENDING ENERGY

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

Vulnerable Consumers

The Royal Decree 13/2012 defined vulnerable consumers as individuals who meet certain social characteristics of consumption and consumer purchasing power determined by the Ministry of Industry, Tourism and Trade. Until then, these customers applied the criteria defined by Royal Decree 6/2009 of 30 April on the social allowance, which is a subsidy covering the difference between the value of the Tariff of Last Resort (TUR) and the reference value.

The Royal Decree-Law 9/2013 establishes that social allowance will be financed by vertically integrated companies that perform simultaneously the activities of production, distribution and sale of electricity. Law 54/2013 maintains the established by Royal Decree-Law 9/2013 and determines that the social allowance will cover the difference between the voluntary price for small consumer and a baseline, called tariff of last resort and will be applied by the correspondent reference supplier in the invoices of the covered consumers.

Gas - Spain

NG Energia, a subsidiary of HC Energia Group which operates in the natural gas distribution and supply, owns all the EDP Group's gas assets in Spain. The transport and distribution of natural gas in Spain is a regulated activity.

Law 34/1998, approved on 7 October 1998, amended by Law 12/2007 of 2 July 2007, transposed to Spanish legislation the provisions of Directive 2003/55/EC of the European Parliament and Council of 26 June 2003 related with common rules for the natural gas internal market. Law 34/1998 was updated by the Royal Decree 13/2012 of 30 March, incorporating the principles set by the European Parliament and Council's Directive 2009/72/CE of 13 July which came to revoked the Directive 2003/55/CE.

The aforementioned legislation identifies the following operators in the context of the supply of natural gas by pipeline:

- § Gas transport companies, owners of facilities for regasification of liquefied natural gas, transport or storage of natural gas. After the publication of Royal Decree 13/2012, companies that hold the equipment from the main network of transport must operate and manage their own networks or hand over their management to an independent operator, in the cases referred by legislation;
- § Distribution companies, owners of distribution facilities, whose function is to distribute natural gas by pipeline, as well as build, maintain and operate such facilities in order to bring natural gas to the consumption points;
- § Suppliers, companies that hold access to the facilities owned by third parties, purchase natural gas for sale to consumers or other suppliers for the purpose of international exchanges;
- § Final consumers, who purchase natural gas for own consumption and direct consumers in the market, who have direct access to third party facilities.

The Royal Decree 6/2000 of 23 June, also creates the figure of Technical Manager of the System, which is responsible for the technical management of the basic gas network and secondary transmission network, attributed to ENAGÁS, S.A.

The system of provisioning and supplying based on tariffs for natural gas distribution companies expired on 1 July 2008. Since then, new last resort tariffs have been set, that can benefit consumers who are covered by the regulation (from July 2009 defined as those consuming less than 50,000 kWh / year), and which will be implemented by the suppliers, that in accordance with Article 82 of Law 34/1998 have an obligation as suppliers of last resort. EDP Comercializadora Último Recurso, S.A. is one of the trading companies designated by the Ministry.

For suppliers of last resort, the Royal Decree 485/2009 makes it possible for groups of companies that have the obligation to provide last-resort electricity and gas, to aggregate in a single company both obligations (EDP Comercializadora de Último Recurso, S.A. currently covers suppliers obligations of last resort for gas and electricity).

The Royal Decree 104/2010 of 5 February, regulates the supplier of last resort in the natural gas sector and establishes that the last resort tariff (TUR) became the only tariff from 1 January 2010, denying to suppliers of last resort the application of discounts over customers with TUR.

Law 15/2012, of 27 December, of Fiscal measures for the Energetic Sustainability, modifies the type of taxes applied to hydrocarbons of natural gas that until this date was 0% with the exception of vehicles gas, establishes three types of taxes depending of the natural gas use, and the tax payer becomes the supplier rather than the distributor.

The Ministerial Order IET/2812/2012, establishes the tariffs and the revenues related with the access to the gas sector installations by third parties, eliminating the revenues updates for the transport and distribution activities, as it defines as zero the efficiency factor applied to these infrastructures.

The Ministerial Order IET/2446/2013, of 27 December, establishes the tariffs and the revenues related with the access to the gas sector installations by third parties and the remuneration of regulated activities for the year 2014. Among other measures, it restores the revenue updates mechanism for the distribution and transport activities that had been eliminated in the previous year.

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

Activity in the energy sector in Brazil

Electricity - Brazil

In Brazil, the EDP Group generates, distributes and supplies electric energy through its subsidiary EDP Energias do Brasil, S.A. (EDP Energias do Brasil).

In early 90s, the Brazilian electricity sector has undergone major structural and institutional changes, having migrated from a monopoly run by the State to a market model, involving private capital. This market model includes the existence of two distinct systems, the regulated system and the liberalised system.

Regulated System

The Regulated Contracting Environment is for the sale of electricity between generators, energy importers or retailers, selling energy to distributors who in turn, acquire energy to ensure supply to consumers.

Since 2004, the main form of contracting by a distributor concessionaire is through the realization of public auctions regulated by ANEEL. The rules of these auctions are designed so that the winner is the one with the lowest price.

The distribution companies must estimate the amount of electricity to contract in auctions and they are obliged to purchase 100% of their needs respecting the condition that, market increases must be met by energy from new ventures, contracted 3 years (Auction A-3) or 5 years (Auction A-5) in advance. Failure to comply with the supply of energy to its markets may result in severe fines.

Liberalised system

In the liberalised market, electricity is traded among production concessionaires, independent power producers, auto-producers, agents and free consumers. In this market, the contractual conditions, such as price, duration and amount of the contract are traded freely and negotiated between the parties (Decree No. 5.163/04). Free consumers can return to the regulated system under certain conditions.

The Federal Government has defined changes in the electric sector through Provisional Measures. The Provisional Measure 577, published on 31 August 2012, addresses the termination of public service concessions of electricity and the temporary service, and the intervention for the suitability of the public service of electricity.

Regulatory changes

Several significant changes in regulation regarding the electric sector occurred during 2012, such as the Provisional Measure 579/2012, in which the Federal Government presented measures to reduce electric energy bill to the consumer. The expected average reduction for Brasil amounted to 20.2% due to government actions: Concession Renewals (13%) and changes of Sector charges (7%). This measure results in the Law 12,783 of 11 January 2013.

Regarding concessions renewal, the generation concessionaires in which contracts expire between 2015 and 2017 may renew their concessions and shall make available their physical energy guarantee for the quotas system to be distributed proportionally to the market share of each distributor, affecting the energy acquisition contracts. The transmission concessionaires in which contracts expire between 2015 and 2017 may renew their concessions and, considering that the assets bounded to the electricity transmission service are totally depreciated, only the operation and maintance costs will be considered for the annual allowed revenues calculation.

On 23 January 2013, was published the Provisional Measure 605, which objective was to increase the scope of application of the resources of the CDE (Energy Development Account), which began promoting resources to cover the discounts applied to the tariffs and involuntary exposure of distributors resulting from the non-adherence to the extension of part of the generation concessions, this measure amended the Law 10,438/2002 which establishes the application of CDE resources.

The Decree 7,891 of 23 January 2013, establishes more options for the implementation of CDE resources, which can be used to compensate the discount on the electricity tariffs established by law, such as the social tariff of low income, rural, water, sewage and sanitation, among others. Thus, the difference the revenue due to the discounts will no longer be reimbursed through the tariffs of other consumers. This decree was amended on 7 March 2013, by the Decree 9,745, which increased the costs that can be incurred with funds from the Energy Development Account - CDE.

Eletrobrás, the managing company of the sector funds, among them the CDE, is responsible for monthly transfering to the distribution utilities of the costs related to: generation allocated under the Energy Relocation Mechanism - ERM (Hydrological Risk Quotas); replacement amount not covered by quotas (Involuntary Exposure) and the additional cost of the thermal power plants activation outside the order of merit (ESS - Energy Security), occurred from January to December 2013 and the annual amounts approved by ANEEL to cover, entirely or partially, the positive balances in "Conta de Compensação de Variação de Valores de Itens da Parcela A - CVA", arising from the cost of purchasing electricity and System Services Charge - ESS.

Following the tariff readjustment process of EDP Escelsa, which occured on 30 July 2013, Resolution 1,576/13 approved the amount of 90,670 thousands of Reais, for EDP Bandeirante this process occurred on 23 October 2013 and Resolution 1,641/13 approved the amount of 237,874 thousands of Reais. These values were transferred by Eletrobrás, as a lump sum to cover the positive balances of CVAs corresponding to the acquisition of electricity and the ESS, as established in Decree 7,891, with redaction of the Decree 7,945.

NEVERENDING ENERGY

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

On 24 January 2013, ANEEL approved the Extraordinary Tariff Review - ETR specific for the adjustment of energy costs, transmission costs, and sectorial charges, from all distributors. Thus, the unmanageable costs and supply tariffs will be reduced, with no impact in the distributors margin. These effects will be noticeable by consumers, from the end of January 2013.

The hydropower concessions held by EDP Group - Energias do Brasil have been granted after February 1995, corresponding to the date of the entry into force of Law 8,987, thus they are not covered by the regulatory changes introduced. Still, these changes will influence the rules that will be applied on the renewal of these concessions in the future, according to the following conditions:

- § Each hydroelectric plant should be remunerated by a tariff calculated by the ANELL;
- § Power selling (Physic guarantees) defined through production quotas dedicated exclusively to the regulated sector, that is to the distributors; and
- § Compliance with the quality service standards determined by ANEEL.

Generation

The generation market is based predominantly on the existence of Power Purchase Agreements (PPA) between generators and distributors, with tenders to supply long-term demand, the adjustment of medium and short term and daily market for deviations, or spot market.

Electricity generation in Brazil relies mostly on hydroelectric technology. Power generation plants are the object of concession, permit or registration, according to the type of plant, the power capacity to be installed and the destination of the energy. Depending on the destination of energy, power generation plants can be classified as:

- § Generation companies, producing electricity for public service distribution;
- § Independent producers (which assume the risk of the sale of electricity with distributors or directly with free consumers);
- § Auto-producers (energy generation for own consumption, the excess of which can be sold through an authorization).

Transmission

The Brazilian transmission system, with a capacity equal or above 230 kV, is divided into transmission and sub-transmission networks, depending on the disaggregation level of the consumers market. The primary network is responsible for the transmission of electricity to large consumers and the supply of energy to any consumer of high dimension. The secondary network is basically an extension of the primary network with the objective of delivering electricity to small consumers and providing energy to large industrial customers.

In December 2012, ANEEL published the Authorization Resolution No. 3,788, authorizing the transfer of the corporate direct control of Evrecy Participações Ltda., owned by EDP - Energias do Brasil S.A., to the Companhia de Transmissão de Energia Elétrica Paulista - CTEEP.

Distribution

The public service concession arrangements for electricity distribution are allocated by tender and establish rules regarding price, regularity, continuity, safety, timeliness and quality of services and supplies provided to consumers and users. These arrangements also define penalties for possible irregularities.

In most states, mainly in the North and Northeast, the concession area corresponds to the state boundaries. However, mainly in São Paulo and Rio Grande do Sul, the concessions for distribution may cover smaller areas than the state itself. In some cases, the concession area is extended beyond the geographical limits of the state where the distribution company is located.

The distribution activity operates in a regulated environment, with tariffs determined in the context of incentive regulation ("price cap") with a remuneration on the basis of the assets used in the distribution energy service (BRR). The tariff also includes a portion to cover the operating costs established from a standard company, the reference company (with costs that would be charged by an efficient operator at the concession area). The regulatory EBITDA has two parts: (i) regulatory depreciation of BRR assets and (ii) return on capital prudently invested multiplied by the regulatory WACC, i.e. by the rate of weighted average cost of capital of sector companies. Finally, the tariffs also consider the costs of acquiring energy, hiring the use of transmission and sector-based charges as costs to be included in the tariff. The tariff portion that includes the regulatory remuneration, the depreciation charge and the value of the operating costs is called portion B. The costs of buying energy, hiring of basic network and charges, set up the portion A of the tariffs as set out in the concession contracts for distribution companies.

Tariffs are adjusted annually based on changes in portion A costs and in the monetary correction of portion B costs, by the index of variation of Market prices index (IGPM), discounted of productivity gains (factor X). The adjustment index is calculated in such a way to pass the non-controlling cost variations of the portion A and the corrected portion B. Periodically (on average every 4 years), a Periodic Tariff Review occurs, generating the recalculation of all costs, the definition of a new BRR and a new reference company, capturing productivity gains occurred in the period between revisions. At the beginning of 2010 an addendum to the concession contracts of distribution companies was signed to ensure the neutrality of sector costs.

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

Supply

The electricity suppliers that do not own electric assets, are authorised to act exclusively in the free market (ACL), selling or buying energy in quantity, conditions and prices freely negotiated. The commercialization of energy with a distributor is only possible through participation in the "Auction set by the distributors", with the negotiation of contracts, for a maximum of two years, and commencement of energy delivery within a period not exceeding two years.

Public Domain Assets

In Brazil, fixed assets used in the distribution and the supply activities are binded to these services and cannot be removed, sold, transferred or mortgaged without the prior and express consent of the regulator (ANEEL).

Activity in the Renewable Energies Sector

In December 2007 the EDP Group incorporated EDP Renováveis, S.L. in Spain so as to concentrate the Group's subsidiaries in the renewable energies sector. On 18 March 2008, EDP Renováveis was converted into a public limited company.

On 4 June 2008, a share capital increase of EDP Renováveis was made through an Initial Public Offering (IPO) of 196,024,306 shares. This share capital increase was not subscribed by the EDP Group, resulting in a dilution of the interest held in EDP Renováveis from 100% to 77.53%. The share capital increase amounted to 1,566,726 thousands of Euros, of which 980,121 thousands of Euros relates to the capital increase and 586,605 thousands of Euros relates to the share premium.

Electricity - Renewable

Generation

In December 2013, EDP Renováveis, the subsidiary of EDP Group for the renewable energies sector, holds the share capital of EDP Renewables Europe, S.L. (EDPR EU, previous designated as Nuevas Energias del Ocidente, S.L.), EDP Renewables North America, L.L.C. (EDPR NA, previous designated as Horizon Wind Energy, L.L.C.) and EDP Renováveis Brasil, S.A., operating respectively in Europe, in the United States of America and in Brazil.

EDP Renewables Europe operates through its subsidiaries located in Portugal, Spain, France, Belgium, Poland, Romania, Italy and United Kingdom. EDPR EU's main subsidiaries are: EDP Renováveis Portugal, EDP Renewables España, EDP Renewables France, Greenwind (Belgium), EDP Renewables Polska, EDP Renewables Romania and EDP Renewables Italia. As at 31 December 2012, Spain and Portugal are the most relevant geographical markets where EDPR EU operates.

In July 2007 the EDP Group acquired from Goldman Sachs, 100% of the share capital of EDPR NA, which develops, manages and operates wind farms in the United States of America. EDPR NA holds a series of wind farms in operation and a pipeline of projects under development for the construction of wind farms.

Regulatory framework for the activities in Spain

The Electrical Sector in Spain is regulated by Law 54 of 27 November 1997 and the subsequent amendments to legislation. In May 2007, the Spanish Government approved the Royal Decree (RD 661/2007) which implemented the new regulatory framework for wind energy installations to be built from 2008 to 2012, which will be applicable for all operating assets from 31 December 2012.

According to RD 661/2007 of 25 May 2007, published in 26 May 2007, wind farms are entitled to choose between two remuneration schemes: (i) Fixed tariff and (ii) market plus premium: wind farms receive for each hour the pool price plus a variable premium. Once the decision between the two schemes has been made for a specific wind farm, it is binding for, at least, one year. Wind farms installed before January 2008 are ruled by the transitory regime, established by Decree 436/2004. Under this transitory regime, that ended in December 2012, wind farms could choose between a fixed tariff and a market option receiving market price plus a fixed premium.

In July 2010, the Ministry of Industry established an agreement with two major associations of renewable energy (Spanish Wind Energy Association and Protermosolar) to change the existing regulation. This agreement resulted in the approval of Royal Decree 1,614/2010, of December 7, which defines (i) for the years 2011 and 2012 a reduction of 35% in the income applicable to wind generation defined by Royal Decree 661/2007, (ii) an addendum to article 44,3 of Royal Decree 661/2007 clarifying that future revisions of the income for energy production through renewable sources will only be applied to the installed capacity from 2012 and (iii) the definition of a limit of 2,589 hours of operation for the installed capacity.

On 28 January 2012 the Spanish Government enacted Royal-Decree Law 1/2012 that approves a temporary suspension of the remuneration for renewable energy capacity not included in the pre-assignation registry.

In December 2012, through the Law 15/2012 of 27 December, the Spanish Government approved a 7% across-the-board tax on electricity generation. The tax will be applied from 1 January 2013 onwards.

On 4 February 2013, the Spanish Government published in the Official State Gazette the Royal Decree-Law 2/2013 that includes a set of regulatory modifications applicable to the Spanish electricity sector and affecting the wind energy assets.

The main regulatory modifications that Royal Decree-Law 2/2013 presents towards the Royal Decree-Law 661/2007 with impact in EDP Renováveis S.A. (EDPR) effective from 1 January 2013 onwards, are as follows:

- § Every energy production facilities operating under the special regime are to be remunerated according to current feed-in tariff schemes for the remaining useful life of the asset;
- § Energy production facilities operating under the special regime currently remunerated according to the market option were able to chose, until 15 February 2013 and for the remaining useful life of the asset, a remuneration based on the electricity wholesale market price with no renewable energy premium, and neither cap nor floor prices;
- § The index used to annually update all the regulated activities in the electricity sector is the annual inflation excluding energy products and food prices, and any impact of tax changes.

The Spanish government disclosed the Energy Market Reform, which aims to end with the Spanish tariff deficit. The government claims that the reform may eliminate 4.5 billions of Euros/year of the structural deficit by: (i) 2.7 billons of Euros reduction in regulated costs of utilities and renewable energy source companies, and (ii) 0.9 billions of Euros contribution from the Spanish Treasury which will pay throught the Budget 50% of the extra costs of generation in the non-mainland territories. However, and only with effect in 2013, the Government removed 3.6 billons of Euros of State Budget contributions which caused a tariff deficit that was not initially forecasted.

The complete regulatory package will consist of: (i) a Royal Decree-Law (RD-L 9/2013, published in the Diário Oficial da União on 13 July), (ii) eight Decrees and Administrative Orders and (iii) the submission in the Parliament of the Project of Law ("Anteproyecto de Ley").

Until now, RD-L 9/2013 is the only rule approved and published: it outlines the principles that will govern the renewable energy source energy sector but it does not disclose the details of the new remuneration. According to this RD-L, renewable energy source plants will be subject to a new legal and economic framework: previous RD 661 framework will disappear and renewable energy source plants will receive the market price plus a payment per installed MW, so that the return on investment will be equivalent to the Spanish Government 10-year bonds yield plus a spread of 300bp. This Royal Decree-Law also suppresses the renewables remuneration for reactive power (2€/MWh).

On 26 November 2013, the Government submitted to the CNMC ("Comisión Nacional de los Mercados y la Competencia"), a draft decree describing the new remuneration policy for renewables facilities. This draft decree did not include the required parameters to calculate the remuneration for the renewables' sector activities, defining that should be retrospectively applied since 14 July. These parameters were released on 3 February 2014 when the CNMC disclosed the draft Ministerial Order containing the needed parameters to calculate the remuneration for each one of the 1,600 different types of renewable installations defined by the government.

According to these parameters, wind farms built in 2004 or earlier are not eligible to receive any incentive while newest farms will receive a flat premium per installed MW untill the end of their regulatory life. The flat premium will be subject of tri-annual modifications due to updates in the forecast of the parameters affecting the profitability of the installations. Overall, the wind sector will receive 1,191 millions of Euros in 2014 which compares to the forecast of 2,000 millions of Euros that would have been received under the old regulation. This cut of approximately 800 millions of Euros in the wind sector represents 45% of the total savings for the whole renewable sector that were estimated at 1,750 millions of Euros in the budget published within the tariff and charges order draft.

The spanish government did not make the announced payment of 900 millions of Euros to eliminate part of the Spanish deficit that was securitized by the own Government.

The spanish government has cancelled the results of the CESUR (Contratos de Energía para el Suministro de Último Recurso) auctions dated of 19 December 2013, that would have led to a 26% increase in the electricity price to be charged to regulated residential customers in the first quarter of 2014. Instead, there was an increase of 2,8% in the electricity cost and a 0,9% increase in the access tariff. The government has also announced a structural change in the procedure of fix the electricity prices that will be designed and published in the next months.

On 26 December 2013, the Spanish government published a new regulation that will govern the electricity sector (Law 24/ 2013) replacing the existing from 1997 (Law 54 /1997).

The government defines that the new law's objective is to guarantee the supply of electricity and adapt to the consumers needs at the lowest possible cost. It refers the need to finish the sector's structural deficit that has been accumulated during the last decade as the motivation to undertake the reform.

Regarding the renewable sector, the development of new installations will be conditioned to market needs, and their retribution will be based on market price with complementary revenues in order to ensure a reasonable return rate. Details on the renewable remuneration will be disclosed in the next months upon approval of the Royal Decree-Law for renewables, namely for wind farms and cogeneration assets.

VEVERENDING ENERG

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

Regulatory framework for the activities in Portugal

The Portuguese Government published on 28 February 2013, the Decree Law 35/2013, that maintains the legal stability of the current contracts (Decree-Law 33-A/2005) and protects the value of the investments made by the wind energy producers in the Portuguese economy. The wind energy producers can voluntarily invest to secure further remuneration stability, through a new tariff scheme to be applied upon the actual 15 years established by law. The total investment will be used to reduce the overall costs of the Portuguese electricity system. In order to maximise the number of wind developers that voluntarily adheres to the extension of the remuneration framework, the Government proposed four alternative tariff schemes to be elected by each of the wind developers, that include the following conditions: (i) alternative cap and floor selling prices; (ii) alternative durations to the new scheme beyond the initial 15 years of the current contracts; and consequently (iii) alternative levels of investment (on a per MW basis) to adhere to the new scheme. EDPR has chosen a 7 year extension of the tariff defined as the average market price of previous twelve months, with a floor of 74€/MWh and a cap of 98€/MWh updated with inflation from 2021 onwards, in exchange for a payment of 5,800€/MW from 2013 to 2020. This decree also includes the possibility for wind farms under the new regime (i.e. ENEOP) to adhere to a similar scheme, still in negotiation.

This Decree-Law modifies the remuneration regime applicable to the production of electricity by mini hydro plants (PCH). Establishes that the PCH that were framed by a remuneration regime prior to Decree-Law 33-A/2005, of 16 February, benefit from that remuneration regime for a period of 25 years from the date they were attributed the exploration license or until the expiration date of their water use license, whichever occurs first. After this 25- year period and as longer as the above mentioned license remains valid, electricity produced by these plants will be sold at market prices.

Regulatory framework for the activities in the United States of America

The United States federal government and various state governments have been implementing policies to promote the growth of renewable energy, particularly wind power. The main federal renewable energy incentive program is the Production Tax Credit (PTC), which was created by the U.S. Congress as part of 1992 EPACT. Additionally, several states have passed legislation, mainly in the form of renewable portfolio standards ("RPS"), which require utilities to purchase a certain percentage of their energy supply from renewable sources, similar to the Renewable Energy Directive in the EU.

On 1 January 2013, the US Congress approved "The American Taxpayer Relief Act" that includes an extension of the Production Tax Credit (PTC) for wind energy, including the possibility of a 30% Investment Tax Credit (ITC) instead of the PTC. Congress set 31 December 2013 as the new expiration date of these benefits and changed the qualification criteria (projects will only qualify as long as they are under construction by year-end 2013). The legislation also includes a depreciation bonus on new equipment placed in service which allows the depreciation of a higher percentage of the cost of the project (less 50% of the Investment Tax Credit) in the year that it is placed in service. This bonus depreciation was 100% in 2011 and 50% for 2012.

2. ACCOUNTING POLICIES

a) Basis of presentation

The accompanying consolidated and company financial statements of EDP - Energias de Portugal, S.A. reflect the results of the company's operations and its subsidiaries (EDP Group or Group) and the Group's interest in its associated companies, for the years 31 December 2013 and 2012.

EDP S.A.'s Executive Board of Directors approved the consolidated and company financial statements (referred to as financial statements) on 27 February 2014. The financial statements are presented in thousands of Euros, rounded to the nearest thousand.

In accordance with Regulation (EC) 1606/2002 of the European Council and Parliament, of 19 July 2002, as transposed into Portuguese legislation through Decree-law 35/2005 of 17 February, the company's financial statements and the Group's consolidated financial statements are prepared in accordance with International Financial Reporting Standards (IFRS), as endorsed by the European Union (EU). IFRS comprise accounting standards issued by the International Accounting Standards Board (IASB) as well as interpretations issued by the International Financial Reporting Interpretations Committee (IFRIC) and their predecessor bodies. The EDP Group's consolidated and company financial statements for the years ended 31 December 2013 and 2012 were prepared in accordance with IFRS as adopted by the E.U. until 31 December 2013.

The accounting policies used by the Group in preparing its accompanying consolidated financial statements as at 31 December 2013 are consistent with those used in preparing the annual consolidated financial statements as at 31 December 2012.

However, as described in note 50, the Group adopted in the preparation of consolidated financial statements as at 31 December 2013, the accounting standards issued by IASB and IFRIC interpretations effective since 1 January 2013. The accounting policies used by the Group in preparing the consolidated financial statements described in this note were adopted in accordance. The adoption of these new standards and interpretations in 2013 did not have a significant impact on the Group's accounts.

The new standards and interpretations recently issued but not yet effective and that the Group has not yet applied on its consolidated financial statements, can also be analysed in note 50.

These financial statements also present the fourth quarter income statement of 2013 with comparative figures for forth quarter of previous year.

The financial statements were prepared under the historical cost convention, modified by the application of the fair value accounting to derivative financial instruments, financial assets and liabilities at fair value through profit or loss and available-for-sale investments, except those for which fair value is not available. Assets and liabilities that are hedged under hedge accounting are stated at fair value in respect of the hedged risk. Non-current assets and disposal groups held for sale are stated at the lower of carrying amount and fair value less costs to sell. Liabilities for defined benefit plans are recognised at the present value of the obligation net of plan assets fair value.

In accordance with IFRS 3 - Business Combinations, if the initial purchase price allocation of assets, liabilities and contingent liabilities acquired is identified as provisional, in the subsequent 12 months after the business combination transaction, the legal acquirer should make the final allocation of the purchase price related to the fair value of the assets, liabilities and contingent acquired. These adjustments with impact on the amount of goodwill determined and booked in previous periods, originates a restatement of the comparative information, which are reflected on the Statement of financial position, with effect from the date of the business combinations transactions liabilities.

The preparation of financial statements in conformity with IFRS requires the Executive Board of Directors to make judgments, estimates and assumptions that affect the application of the accounting policies and the reported amounts of assets, liabilities, income and expenses. The estimates and related assumptions are based on historical experience and other factors that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments regarding the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates. The issues involving a higher degree of judgment or complexity, or where assumptions and estimates are considered to be significant, are presented in note 3 (Critical accounting estimates and judgments in preparing the financial statements).

In 2013, the Group began to present the segregation of provisions and employee benefits liabilities between current and non-current. Current provisions correspond to reimbursement estimates that will occur within twelve months. Employee benefits current liabilities include the contributions to be made to the pension and health care plans, and the respective payments of employee benefits expected over the next twelve months. In accordance with IAS 1, the Group retrospectively restated the comparative of 2012 having reclassified 42,798 thousands of Euros to current provisions and 182,587 thousands of Euros to current employee benefits (see notes 36 and 37).

Accounting policies have been applied consistently by all Group companies and in all periods presented in the consolidated financial statements.

b) Basis of consolidation

The accompanying consolidated financial statements reflect the assets, liabilities and results of EDP, S.A. and its subsidiaries (Group or EDP Group) and the equity and results attributable to the Group, through the investments in associates.

As from 1 January 2010 onwards, the EDP Group applied IFRS 3 (revised) for the accounting of business combinations. The changes in accounting policies resulting from the application of IFRS 3 (revised) are applied prospectively.

Subsidiaries

Investments in subsidiaries where the EDP Group has control are fully consolidated from the date the Group assumes control over their financial and operating activities until the moment that control ceases to exist. Control is presumed to exist when the Group owns more than half of the voting rights. Control also exists when the Group has the power, directly or indirectly, to manage the financial and operating policies of the entity to obtain benefits from its activities, even if the percentage of shareholding is less than 50%.

Until 31 December 2009, when the accumulated losses of a subsidiary attributable to non-controlling interests exceed the non-controlling interests in its equity, the excess was attributed to the Group and charged to the income statement as incurred. Profits subsequently reported by the subsidiary were recognised as profits of the Group until the losses attributable to the non-controlling interests previously recognised by the Group have been recovered. As from 1 January 2010, the due proportion of accumulated losses are attributed to non-controlling interests, implying that the Group can recognise negative non-controlling interests.

As from 1 January 2010, on a step acquisition process resulting in the acquisition of control the revaluation of any investee previously acquired is booked against the income statement when goodwill is calculated. On a partial disposal resulting in loss of control over a subsidiary, any participation retained is revalued at market value on the sale date and the gain or loss resulting from this revaluation is booked against the income statement, as well as any gain or loss resulting from the disposal.

Associates

Investments in associates are accounted for by the equity method from the date the Group acquires significant influence to the date it ceases. Associates are entities over which the Group has significant influence, but not control, over its financial and operating policies. Generally, when the Group holds more than 20% of the voting rights of the investee it is presumed to have significant influence. If the Group holds, directly or indirectly, less than 20% of the voting rights of the investee, it is presumed not to have significant influence, unless such influence can be clearly demonstrated.

The existence of significant influence by the Group is usually evidenced by one or more of the following:

- Representation on the Executive Board of Directors or equivalent governing body of the investee;
- Participation in policy-making processes, including participation in decisions about dividends and other distributions;
- Existence of material transactions between the Group and the investee;
- Interchange of managerial personnel;
- Provision of essential technical information.

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

The consolidated financial statements include the Group's attributable share of total reserves and profits or losses of associates, accounted for under the equity method. When the Group's share of losses exceeds its interest in an associate, the Group's carrying amount is reduced to zero and recognition of further losses is discontinued, except to the extent that the Group has a legal or constructive obligation to cover such losses on behalf of the associate.

Jointly controlled entities

Jointly controlled entities, which are consolidated under the proportionate consolidation method, are entities over which the Group has joint control defined by a contractual agreement. The consolidated financial statements include the Group's proportional share of the joint ventures' assets, liabilities, revenue and expenses, from the date the joint control begins and until it ceases.

Accounting for investments in subsidiaries and associates in the company's financial statements

Investments in subsidiaries and associates not classified as held for sale or not included in a disposal group which is classified as held for sale are accounted for at cost in the company's financial statements, and are subject to periodic impairment tests, whenever indication exists that certain financial investment may be impaired.

Goodwill

Following the transition to International Financial Reporting Standards (IFRS) on 1 January 2004 and as permitted under IFRS 1 - First-time Adoption of International Financial Reporting Standards, the EDP Group decided to maintain the goodwill resulting from business combinations that occurred prior to the transition date, calculated in accordance with the Group's previous accounting policies.

Business combinations that occurred after 1 January 2004 are accounted for using the purchase method of accounting. The acquisition cost corresponds to the fair value determined at the acquisition date, of the assets given and liabilities incurred or assumed including the costs directly attributable to the acquisition, for acquisitions up to 31 December 2009.

As from 1 January 2010 onwards, costs directly attributable to the acquisition of a subsidiary are booked directly in the income statement.

As from the transition date to IFRS (1 January 2004), positive goodwill arising from acquisitions is recognised as an asset carried at acquisition cost and is not subject to amortisation. Goodwill arising on the acquisition of subsidiaries and associates is defined as the difference between the cost of acquisition and the corresponding share of the fair value of the net assets acquired.

As from 1 January 2010 onwards, the EDP Group has the possibility to book non-controlling interests at fair value or at cost, implying that the full amount of goodwill can be booked in the financial statements, including the portion attributable to the non-controlling interests, against non-controlling interests, if the first option is chosen. Goodwill arising on the acquisition of subsidiaries and associates is defined as the difference between the cost of acquisition and the total or corresponding share of the fair value of the net assets acquired, depending on the option taken.

Negative goodwill arising on an acquisition is recognised directly in the income statement in the period the business combination occurs.

The recoverable amount of the goodwill in subsidiaries is assessed annually, regardless of the existence of any impairment triggers. Impairment losses are recognised in the income statement. The recoverable amount is determined based on the value in use of the assets, calculated using valuation methodologies supported by discounted cash flow techniques, considering market conditions, the time value of money and the business risks.

Until 31 December 2009, contingent acquisition prices were determined based on the best estimate of probable future payments, being the future changes in the estimate booked against goodwill. As from 1 January 2010, goodwill is no longer adjusted due to changes in the initial estimate of the contingent purchase price and the difference is booked in the income statement.

Purchases of non-controlling interests and dilution

Until 31 December 2009, in the acquisition of non-controlling interests, the difference between the fair value of the non-controlling interests acquired and the consideration paid, was accounted against goodwill. The acquisitions of non-controlling interests through written put options related with investments in subsidiaries held by non-controlling interests, were recorded as a financial liability for the present value of the best estimate of the amount payable, against non-controlling interests. The difference between the non-controlling interests acquired and the fair value of the liability, was recorded as goodwill. The fair value of the liability was determined based on the contractual price which may be fixed or variable. In case of a variable price, the changes in the liability were recognised as an adjustment to the cost of the business combination against goodwill and the effect of the financial discount of the liability (unwinding) was recognised as a financial expense in the consolidated income statement. This accounting treatment is maintained for all options contracted until 31

Until 31 December 2009, when an interest in a subsidiary was disposed, without a loss of control, the difference between the sale price and the book value of the net assets held by the Group, plus the carrying value of goodwill in that subsidiary, was recognised in the income statement of the period as a gain or loss resulting from the disposal. The dilution effect occurs when the percentage of interest in a subsidiary decreases without any sale of interest in that subsidiary, for example, if the Group does not participate proportionally in the share capital increase of that subsidiary. Until 31 December 2009, the Group recognised the gains or losses resulting from a dilution of the interest in a subsidiary following a sale or capital increase, in the income statement.

NEVERENDING ENERGY

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

As from 1 January 2010 onwards, in an acquisition (dilution) of non-controlling interests not resulting in a loss of control, the difference between the fair value of the non-controlling interests acquired and the consideration paid, is accounted against reserves. The acquisitions of non-controlling interests through written put options related with investments in subsidiaries held by non-controlling interests, are recorded as a financial liability for the present value of the best estimate of the amount payable, against non-controlling interests. The fair value of the liability is determined based on the contractual price which may be fixed or variable. In case of a variable price, the changes in the liability are recognised against the income statement as well as the effect of the financial discount of the liability (unwinding).

Investments in foreign operations

The financial statements of the foreign subsidiaries and associates of the Group are prepared using their functional currency, defined as the currency of the primary economic environment in which they operate. In the consolidation process, the assets and liabilities of foreign subsidiaries are translated into Euros at the official exchange rate at the balance sheet date.

Regarding the investments in foreign operations that are consolidated using the full consolidation method, proportionate or equity method, the exchange differences between the amount of equity expressed in Euros at the beginning of the period and the amount translated at the official exchange rates at the end of the period, on a consolidated basis, are booked against reserves.

Foreign currency goodwill arising on the acquisition of these investments is remeasured at the official exchange rate at the balance sheet date directly against reserves.

The income and expenses of foreign subsidiaries are translated into Euros at the approximate exchange rates at the dates of the transactions. Exchange differences from the translation into Euros of the net profit for the period, arising from the differences between the rates used in the income statement and those prevailing at the balance sheet date are recognised in reserves.

On disposal of a foreign subsidiary, the related exchange differences previously recognised in reserves, are accounted for in the income statement.

Balances and transactions eliminated on consolidation

Inter-company balances and transactions, including any unrealised gains and losses on transactions between Group companies, are eliminated in preparing the consolidated financial statements. Unrealised gains and losses arising on transactions with associates and jointly controlled entities are eliminated to the extent of the Group's interest in those entities.

c) Foreign currency transactions

Foreign currency transactions are translated at the exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currency are translated into Euros at the exchange rates at the balance sheet date. These exchange differences arising on translation are recognised in the income statement.

Foreign currency non-monetary assets and liabilities accounted for at historical cost are translated using the exchange rates at the dates of the transactions. Foreign currency non-monetary assets and liabilities stated at fair value are translated into Euros at the exchange rates at the dates the fair value was determined.

d) Derivative financial instruments and hedge accounting

Derivative financial instruments are recognised on the trade date at fair value. Subsequently, the fair value of derivative financial instruments is remeasured on a regular basis, being the gains or losses on remeasurement recognised directly in the income statement, except for derivatives designated as cash flow hedging instruments. Recognition, in the income statement, of the resulting gains and losses on remeasurement of hedging derivatives depends on the hedge model used.

The fair value of derivative financial instruments corresponds to their market value, when available, or is determined by external entities using valuation techniques.

Hedge accounting

The Group uses financial instruments to hedge interest rate risk, exchange rate risk and price risk resulting from its operational and financing activities. Derivatives not qualified for hedge accounting under IAS 39 are accounted for as trading instruments.

Hedging derivatives are recorded at fair value, being the gains and losses recognised in accordance with the hedge accounting model applied by the Group. Hedge relationship exist when:

- (i) At the inception of the hedge there is formal documentation of the hedge;
- (ii) The hedge is expected to be highly effective;
- (iii) The effectiveness of the hedge can be reliably measured;
- (iv) The hedge is revalued on an on-going basis and is considered to be highly effective throughout the reporting period;
- (v) The forecast transaction being hedged must be highly probable and must be exposed to changes in cash flows that could ultimately affect profit or loss.

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

Fair value hedge

Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recorded in the income statement, together with any changes in the fair value of the hedged assets and liabilities or group of hedged assets and liabilities that are attributable to the hedged risk. When the hedging relationship ceases to comply with the requirements for hedge accounting, the accumulated gains or losses concerning the fair value of the risk being hedged are amortised over the residual period to maturity of the hedged item.

Cash flow hedge

Changes in the fair value of derivatives qualified as cash flow hedges are recognised in reserves.

The cumulative gains or losses recognised in reserves are reclassified to the income statement when the hedged item affects the income statement.

When a hedging relation of a future transaction is discontinued, the changes in the fair value of derivative recognised in reserves remain recognised in reserves until the future hedged transaction occurs. When the future transaction is no longer expected to occur, the cumulative gains or losses recognised in reserves are recorded immediately in the income statement.

Net investment hedge

The net investment hedge model is applied on a consolidated basis to investments in subsidiaries in foreign currencies. This model allows that the exchange differences recognised in the exchange differences consolidated reserves to be offset by the foreign exchange differences in foreign currency loans or currency derivatives contracted. The ineffective portion of the hedging relationship is recognised

The accumulated foreign exchange gains and losses regarding the net investment and the related hedging instrument recognised in equity are transferred to the income statement when the foreign entity is sold, as part of the gain or loss resulting from the disposal.

Effectiveness

For an hedge relationship to be classified as such, in accordance with IAS 39, its effectiveness must be demonstrated. Therefore, the Group performs prospective tests at the inception date of the hedge and prospective and retrospective tests in each balance sheet date, to demonstrate its effectiveness, showing that any adjustments to the fair value of the hedged item attributable to the risk being hedged are offset by adjustments to the fair value of the hedging instrument. Any ineffectiveness is recognised in the income statement when it occurs

e) Other financial assets

The Group classifies its other financial assets at acquisition date, considering the underlying purpose, in the following categories:

Financial assets at fair value through profit or loss

This category includes: (i) financial assets at fair value through profit or loss, acquired for negotiation purposes in the short term, and (ii) other financial assets designated at fair value through profit or loss at inception (fair value option).

Available-for-sale investments

Available-for-sale investments are non-derivative financial assets which: (i) the Group intends to hold for an undetermined period of time, or (ii) are designated as available-for-sale on initial recognition.

Initial recognition, measurement and derecognition

Purchases and sales of: (i) financial assets at fair value through profit or loss, and (ii) available-for-sale investments, are recognised on the trade date, which is the date on which the Group commits to purchase or sell these financial assets.

Financial assets are initially recognised at fair value plus transaction costs except for financial assets at fair value through profit or loss, in which the transaction costs are recognised directly in the income statement.

Financial assets are derecognised when: (i) the contractual rights to receive their future cash flows have expired, (ii) the Group has transferred substantially all risks and rewards of ownership or (iii) although retaining some, but not substantially, the risks and rewards of ownership, the Group has transferred control over the assets.

VEVERENDING ENERGY

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

Subsequent measurement

After initial recognition, financial assets at fair value through profit or loss are subsequently carried out at fair value, being the gains or losses arising from changes in their fair value recorded in the income statement.

Available-for-sale investments are also subsequently carried out at fair value, however, gains and losses arising from changes in their fair value are recognised in fair value reserves until the financial assets are derecognised or impaired, being the cumulative gains or losses previously recognised in fair value reserves recognised in the income statement. Foreign exchange differences relating to these assets are also recognised in fair value reserves if arising from shares, and in the income statement if arising from debt instruments. Interest, calculated using the effective interest rate method, as well as dividends received are recognised in the income statement.

The fair value of listed investments in active markets is based on current bid price. The Group determines the fair value of unlisted securities through (i) valuation methodologies, such as the price of similar recent arm's length transactions and discounted cash flow techniques, and (ii) valuation assumptions based on market information.

Financial assets whose fair value cannot be reliably measured are stated at cost, being any impairment loss booked against the income statement.

Reclassifications between categories

The Group does not transfer financial instruments into or out of the fair value through profit or loss category at the moment of its initial recognition being the variations recognised in the income statement (fair value option).

Impairment

At each balance sheet date an assessment is performed as to whether there is objective evidence of impairment, namely for those which result in an adverse effect on estimated future cash flows of the financial asset or group of financial assets, and when it can be reliably measured.

For the financial assets taht present evidence of impairment, the respective recoverable amount is determined, and the impairment losses are recognised in the income statement.

A financial asset or a group of financial assets is impaired if there is objective evidence of impairment as a result of one or more events that occurred after their initial recognition, such as: (i) in the case of listed securities, a significant or prolonged decline in the listed price of the security, and (ii) in the case of unlisted securities, when that event (or events) has an impact on the estimated amount of the future cash flows of the financial asset or group of financial assets, that can be reliably estimated.

If there is objective evidence of impairment on available-for-sale investments, the cumulative potential loss recognised in fair values reserves, corresponding to the difference between the acquisition cost and the fair value at the balance sheet date, less any impairment loss on that financial asset previously recognised in the income statement, is transferred to the income statement.

For debt instruments, if in a subsequent period the amount of the impairment loss decreases, the previously recognised impairment loss is reversed in the income statement up to the amount of the acquisition cost, if the increase is objectively related to an event occurring after the impairment loss was recognised. For equity instruments, impairment losses can not be reversed and any subsequent event which determines a fair value increase is recognised in equity under fair value reserves.

f) Financial liabilities

An instrument is classified as a financial liability when there is a contractual obligation for the issuer to liquidate capital and/or interests, through delivering cash or other financial asset, regardless of its legal form. Financial liabilities are recognised (i) initially at fair value less transaction costs and (ii) subsequently at amortised cost, using the effective interest method; or at fair value, whenever the Group chooses, on initial recognition, to designate such instruments as at fair value through profit or loss using the fair value option.

g) Equity instruments

A financial instrument is classified as an equity instrument when there is no contractual obligation at settlement to deliver cash or other financial asset to another entity, regardless of its legal form, and there is a residual interest in the assets of an entity after deducting all its liabilities.

Costs directly attributable to the issuance of equity instruments are recognised in equity, as a deduction to the amount issued. Amounts paid or received relating to sales or acquisitions of equity instruments are recognised in equity, net of transaction costs.

Distributions related to equity instruments are deducted from equity, as dividends, when declared.

Preference shares issued by the Group are considered as an equity instrument when the there is no contractual obligation to redeem the shares and dividends are paid at the discretion of the Group. Preference shares issued by subsidiaries, classified as equity instruments and held by third parties, are recognised as non-controlling interests.

h) Property, plant and equipment

Property, plant and equipment is stated at acquisition cost less accumulated depreciation and impairment losses. On transition to IFRS, on 1 January 2004, the Group decided to consider as deemed cost the revalued amount of Property, plant and equipment in accordance with the Group's previous accounting policy, which was comparable in general terms to the depreciated cost determined in accordance with IFRS.

Subsequent costs are recognised as property, plant and equipment only when it is probable that future economic benefits associated with the item will flow to the Group. Repair and maintenance costs are charged in the income statement as incurred, according to the accrual principle.

The Group carries out impairment tests whenever events or circumstances may indicate that the book value of an asset exceeds its recoverable amount, being any impairment recognised in the income statement.

The recoverable amount is the higher of net sale price and value in use, the latter being calculated by the present value of the estimated future cash flows obtained from continued use of the asset and its sale at the end of its useful life.

Land is not depreciated. Depreciation of tangible assets is calculated on a straight-line basis over their estimated useful lives, as follows:

| | Number of years |
|-------------------------------------|-----------------|
| Buildings and other constructions | 8 to 50 |
| Plant and machinery: | |
| - Hydroelectric generation | 32 to 75 |
| - Thermoelectric generation | 25 to 40 |
| - Renewable generation | 25 |
| - Electricity distribution | 10 to 40 |
| - Other plant and machinery | 5 to 10 |
| Transport equipment | 4 to 25 |
| Office equipment and tools | 4 to 10 |
| Other property, plant and equipment | 10 to 25 |

According to IFRS, the estimate of the useful life of assets should be reviewed whenever a change in the expected economic benefits occurs flowing from the assets as well as when the technical use planned for the assets differs from previous estimates. Changes occurring in the depreciation charge for the year are accounted prospectively.

Borrowing costs and other directly attributable costs

Borrowing costs that are directly attributable to the acquisition or construction of assets are capitalised as part of the cost of the assets. A qualifying asset is an asset that needs a substantial period of time to be ready for its intended use or sale. The amount of interest costs eligible for capitalisation is determined by applying a capitalisation rate to the expenditures on those assets. The capitalisation rate corresponds to the weighted average of the borrowing costs applicable to the outstanding borrowings during the period. The capitalisation of borrowing costs begins when expenditure for the assets is being incurred, borrowing costs have been incurred and activities necessary to prepare all or part of the assets for their intended use or sale are in progress. Capitalisation ceases when substantially all the activities necessary to prepare the qualifying assets for their intended use or sale are completed. Other expenses directly attributable to the acquisition and construction of the assets, such as cost of consumed materials and personnel costs, are also capitalised as part of the cost of the assets.

Government grants

Government grants are initially booked as deferred revenue, under non current liabilities only when there is reasonable certainty that the grant will be received and that the Group will fulfil the grant term conditions. Grants that compensate the Group for expenses incurred are booked in the income statement on a linear basis, on the same period in which the expenses are incurred. Grants that compensate the Group for the acquisition of assets are recognised in the income statement over the related assets useful life.

Transfers of assets from customers

The International Financial Reporting Interpretations Committee (IFRIC) issued in November 2008, the interpretation IFRIC 18 - Transfers of Assets from Customers. This interpretation was approved by the European Commission on 27 November 2009, being applicable for periods beginning after 31 October 2009. For EDP Group, the first period after the approval of this interpretation is the year 2010.

IFRIC 18 is applicable for agreements in which an entity receives from a customer an item of Property, plant, and equipment that the entity must then use either to connect the customer to a network or to provide the customer with ongoing access to a supply of energy. This interpretation clarifies:

- the conditions in which an asset is under this interpretation;
- recognition of the asset and its initial measurement;
- identification of the services identified (one or more services in exchange for assets transferred);
- income recognition; and
- accounting for the transfer of money from customers.

NEVERENDING ENERGY

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

The Group adopted this interpretation for the allowances received from customers, recognising the assets received by its estimated construction cost against operating income. The assets are depreciated based on its useful life.

i) Intangible assets

The Group's intangible assets are booked at acquisition cost less accumulated amortisation and impairment losses.

The Group performs impairment tests whenever events or circumstances may indicate that the book value of the asset exceeds its recoverable amount, being any impairment recognised in the income statement. The recoverable amount is the higher of net sale price and value in use, the latter being calculated by the present value of the estimated future cash flows obtained from continued use of the asset and its sale at the end of its useful life.

Acquisition and development of software

The costs of purchasing software and the costs incurred by the Group to implement it are capitalised and amortised on a straight-line basis over the expected useful life of the asset.

Costs incurred by the Group directly related to the development of software, that are expected to generate economic benefits beyond one year, are recognised as intangible assets. Such costs include employee costs directly associated to the project and are amortised on a straight-line basis over its estimated useful life.

Software maintenance costs are charged in the income statement when incurred.

Concession rights on distribution of electricity and gas

The concession rights on distribution of electricity in Brazil and the concession rights related to the distribution of gas in Portugal, are recorded as intangible assets and amortised on a straight-line basis over the concessions period, not exceeding 30 and 40 years, respectively.

Concession rights to use the public hydric domain

Portuguese concession rights to use the public hydric domain are booked as intangible assets and depreciated on a straight-line basis over the concession period, which currently does not exceed 45 years. EDP Group records as concession rights the financial compensations for the use of public domain assets, whenever these compensations are paid and for all the Group subsidiaries.

The accounting policy related to intangible assets assigned to concessions is described in note 2aa), Group concession activities.

Industrial property and other rights

Industrial property and other rights are amortised on a straight-line basis over the estimated useful life of the assets, which does not exceed 6 years.

j) Leases

The Group classifies its lease transactions as finance leases or operating leases based on the substance of the transaction rather than its legal form. A lease is classified as a finance lease if it transfers to the lessee substantially all the risks and rewards incidental to ownership. All other leases are classified as operating leases.

Operating leases

Lease payments under operating lease contracts are recognised as an expense in the period to which they relate.

Finance leases

Finance leases are recognised by the lessee, at the inception of the lease, as assets and liabilities at the fair value of the leased assets which is equivalent to the present value of the future lease payments.

Lease payments include the interest charges and the amortisation of the outstanding principal. The interest charges are recognised as costs over the lease period in order to produce a constant periodic rate of interest on the remaining balance of the liability.

Lessors record assets held under finance leases as leased capital, by the net amount invested in the lease.

Lease payments include the financial income and the amortisation of the outstanding principal.

Financial results recognised reflect a constant periodic rate of return on the outstanding net balance of the lessor.

Determining whether an Arrangement contains a Lease

Following the issuance by International Financial Reporting Interpretations Committee (IFRIC) of IFRIC 4 - Determining whether an arrangement contains a lease, applicable from 1 January 2006, arrangements including transactions that, although do not take the form of a lease, convey the right to use an asset in return for a payment, are recognised as leases, provided that, in substance, they comply with the requirements defined in the interpretation.

k) Investment property

The Group classifies as investment property, property held for capital appreciation and/or for rental purposes.

Investment property is recognised initially at acquisition or production cost, including directly attributable transaction costs, and is subsequently measured at cost less accumulated depreciation and any impairment losses.

Subsequent expenditures on investment property are only added to the cost of the asset when it is probable that additional future economic benefits will arise when compared to initial recognition.

I) Inventories

Inventories are measured at the lower of acquisition cost and net realisable value. The cost of inventories includes purchases, conversion and other costs incurred in bringing the inventories to their present location and condition. The net realisable value is the estimated selling price in the ordinary course of business less the estimated selling costs.

The cost of inventories is determined by using the weighted average method.

CO2 licences held by the Group for trade purposes are booked as inventories and measured at fair value, at each balance sheet date, against the income statement.

m) Accounts receivable

Accounts receivable are initially recognised at fair value and subsequently measured at amortised cost less impairment losses and being presented in the statement of financial position net of impairment losses which are associated.

Impairment losses are recorded based on the regular assessment of the existence of objective evidence of impairment resulting from doubtful accounts receivable as of the balance sheet date. Impairment losses are recognised in the income statement, being subsequently reversed through the income statement if the estimated losses decrease, in a later period.

204 n) Employee benefits

Pensions

Some EDP Group companies grant post-retirement benefits to employees under defined benefit and defined contribution plans, namely pension plans that grant retirement complementary benefits for age, disability and surviving pensions, as well as early retirement pensions.

Defined benefit plans

In Portugal, the defined benefit plan is funded through a closed Pension Fund complemented by a specific provision. The Pension Fund covers the liabilities for retirement pension complements as well as for early retirement.

In Brazil, Bandeirante has two defined benefit plans managed by the CESP Foundation, a closed complementary welfare entity with its own assets, segregated from those of its sponsors. Escelsa has a defined benefit plan that grants complementary benefits for retirement due to age, disability and survival pensions. Escelsa also has a special complementary benefit plan for retired employees who served in the Brazilian army.

The Group's pension plans are defined benefit plans, since the criteria used to determine the amount of the pension to be received by employees on retirement is usually dependent on one or more factors such as age, years of service and salary level.

The Group's pension liability for each plan is calculated annually at the balance sheet date, by independent experts individually for each plan, using the projected unit credit method. The discount rate used in the calculation is determined based on market interest rates of high quality corporate bonds denominated in the currency in which the benefits will be paid and that have similar maturity to the related pension liability.

Actuarial gains and losses resulting from (i) differences between financial and actuarial assumptions used and actual amounts and (ii) changes in the actuarial assumptions, are recognised against equity.

The increase in past service costs arising from early retirements (retirements before the normal retirement age) or plan amendments are recognised in the income statement when incurred.

The Group recognises as operational expenses, in the income statement, the current and the past service costs. Net interest on the net defined benefit liability (asset) is recognised in financial results.

The assets of the plan comply with the recognition criteria established by IFRIC 14 - IAS 19 and the minimum funding requirements established by law or by contract.

Defined contribution plans

In Portugal, Spain and Brazil, some companies have defined contribution social benefit plans that complement those granted by the Social Security System, under which they pay an annual contribution to the plans, calculated in accordance with the rules established in each plan.

Other benefits

Medical benefits and other plans

In Portugal and in Brazil some EDP Group companies provide medical benefits during retirement and early retirement, through complementary benefits to those provided by the Social Security System. The medical benefits plans are classified as defined benefit plans, the liability being covered by provisions booked in the Group's statement of financial position. Measurement and recognition of the medical benefits liabilities are similar to those of the defined benefit plans pension liabilities, explained above.

Variable remuneration paid to employees

In accordance with the by-laws of some Group companies, the shareholders approve in the Annual General Meeting a variable remuneration to be paid to the management and employees (bonus), following a proposal made by the Executive Board of Directors. The variable remuneration is charged to the income statement in the year to which it relates.

o) Provisions

Provisions are recognised when: (i) the Group has a present legal, or constructive obligation, (ii) it is probable that settlement will be required in the future and (iii) a reliable estimate of the obligation can be made.

Provisions for dismantling and decommissioning in electric power plants

The Group accounts for provisions for dismantling and decommissioning of assets when there is a legal, contractual or constructive obligation at the end of the assets' useful life. Therefore, such provisions have been booked for the electric power plants to cover the cost of restoring the location and land to their original condition. The provisions are calculated at the present amount of the expected future liability and are accounted for as part of the cost of the related property, plant and equipment being depreciated on a straight-line basis over the useful life of those assets.

Decommissioning and dismantling provisions are remeasured on an annual basis based on the best estimate of the settlement amount. The unwinding of the discount at each balance sheet date is charged to the income statement.

p) Recognition of costs and revenues

Costs and revenues are recognised in the year to which they relate regardless of when paid or received, in accordance with the accrual basis. Differences between amounts received and paid and the corresponding revenue and costs are recognised under other assets or other liabilities.

Revenue includes amounts invoiced on the sale of products or services rendered, net of value added tax, rebates and discounts and after elimination of intra-group sales.

The invoicing of electricity sales is performed on a monthly basis. Monthly electricity invoices are based on real meter readings or on estimated consumptions based on the historical data of each consumer. Revenues regarding the energy to be invoiced based on actual consumption not yet metered as at the balance sheet date is accrued on the basis of recent average consumptions.

Differences between estimated and actual amounts are recorded in subsequent periods.

q) Financial results

Financial results include interest costs on borrowings, interest income on funds invested, dividend income, foreign exchange gains and losses, realised gains and losses, as well as gains and losses on financial instruments and changes in the fair value of hedged risks, when applicable.

Interest is recognised in the income statement on an accrual basis. Dividend income is recognised on the date the right to receive is established.

Financial results also include impairment losses on available-for-sale investments.

r) Income tax

Income tax recognised in the income statement includes current and deferred tax. Income tax is recognised in the income statement except to the extent that it relates to items recognised directly in equity, in which case it is recognised in equity.

Deferred taxes arising from the revaluation of available-for-sale investments and cash flow hedge derivatives recognised in equity are recognised in the income statement in the period the results that originated the deferred taxes are recognised.

Current tax is the tax expected to be paid on the taxable income for the period, using tax rates enacted at the balance sheet date and any adjustment to tax payable in respect of previous years.

Deferred taxes are calculated in accordance with the balance sheet liability method, considering temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and their respective tax basis, using the tax rates enacted or substantively enacted at the balance sheet date for each jurisdiction and that is expected to be applied when the temporary difference is reversed.

Deferred tax liabilities are recognised for all taxable temporary differences except for goodwill not deductible for tax purposes, differences arising on initial recognition of assets and liabilities that affect neither accounting nor taxable profit and differences relating to investments in subsidiaries to the extent that they will probably not be reversed in the future. Deferred tax assets are recognised to the extent it is probable that future taxable profits will be available to absorb deductible temporary differences for taxation purposes.

The Group offsets, as established in IAS 12, the deferred tax assets and liabilities if, and only if:

- (i) the entity has a legally enforceable right to offset current tax assets against current tax liabilities; and
- (ii) the deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities which intend either to settle current tax liabilities and assets on a net basis, or to realise the assets and settle the liabilities simultaneously, in future periods in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

s) Earnings per share

Basic earnings per share are calculated by dividing the consolidated and the company net profit attributable to the equity holders of EDP, S.A. by the weighted average number of ordinary shares outstanding during the period, excluding the average number of shares held by the Group and by EDP, S.A., respectively.

For the diluted earnings per share calculation, the weighted average number of ordinary shares outstanding is adjusted to consider conversion of all dilutive potential ordinary shares, such as convertible debt and stock options granted to employees. The dilution effect corresponds to a decrease in earnings per share resulting from the assumption that the convertible instruments are converted or the options granted are exercised.

206

t) Share based payments

The stock options remuneration program enables the Group's employees to acquire EDP, S.A. shares. The exercise price of the options is calculated based on the listed price of the shares at the grant date.

The fair value of the options granted, determined at the grant date, is recognised in the income statement against equity during the vesting period, based on their market value calculated at the grant date.

If the option is exercised, the Group acquires shares in the market to grant them to employees.

u) Non-current assets held for sale and discontinued operations

Non-current assets or groups of non-current assets held for sale (groups of assets and related liabilities that include at least one non-current asset) are classified as held for sale when their carrying amounts will be recovered mainly through sale, the assets or groups of assets are available for immediate sale and the sale is highly probable.

The Group also classifies as non-current assets held for sale, non-current assets or groups of assets acquired exclusively for its subsequent resale, that are available for immediate sale and the sale is highly probable.

The measurement of all non-current assets and all assets and liabilities included in a disposal group, is adjusted in accordance with the applicable IFRS standards, immediately before their classification as held for sale. Subsequently, these assets or disposal groups are measured at the lowest between their carrying amount and fair value less costs to sell.

v) Cash and cash equivalents

Cash and cash equivalents include balances with maturity of less than three months from the balance sheet date, including cash and deposits in banks. This caption also includes other short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, and specific demand deposits in relation to institutional partnerships that are funds required to be held in escrow sufficient to pay the remaining construction related costs of projects in institutional equity partnerships in U.S.A., in the next twelve months.

w) Operating segments

The Group presents the operating segments based on internal management information.

In accordance with IFRS 8, an operating segment is a Group component:

- (i) that engages in business activities from which it may earn revenues and incur expenses;
- (ii) whose operating results are reviewed regularly by the entity's chief operating decision maker in order to make decisions about resources to be allocated to the segment and assess its performance; and,
- (iii) for which discrete financial information is available.

x) Tariff adjustments

In regulated activities, the regulator establishes, through the tariff adjustment mechanism, the criteria to recognise gains or losses of one period in future periods. The tariff adjustments accounted for in the EDP Group financial statements represent the difference between the amounts invoiced by Portuguese regulated companies (based on the applicable tariffs published by ERSE in December of the previous year) and the regulated revenue calculated based on actual costs. The assets or liabilities resulting from the tariff adjustments are recovered or returned through the electricity and gas tariffs charged to customers in subsequent periods.

Decree-Law 165/2008 of 21 August recognised the unconditional right of the regulated operators of the electric sector to recover the tariff adjustments under a regime identical to the one used for the tariff deficits. Consequently, EDP Group booked under the income statement caption Turnover - Electricity and network access, the effects resulting from the recognition of tariff adjustments, against Debtors and other assets from commercial activities. According to the referred Decree-Law, the tariff adjustments determined annually, will be recovered by the regulated operators even in case of insolvency or cease of operations. ERSE is the entity responsible to establish the method to ensure that the entity entitled to these rights continues to recover the tariff adjustments until its complete payment. The Decree-Law also allows the transfer of the right to receive the tariff adjustment to third parties, in whole or in part, through future electricity tariffs.

Decree-Law 87/2011, approved on 14 April and published in Diário da República on 17 July, confirmed the unconditional right of the regulated operators of the natural gas sector to recover the tariff adjustments. Consequently, EDP Group booked under the income statement caption Turnover of Gas and network accesses the effects resulting from the recognition of tariff adjustments against Debtors and other assets from commercial activities and Trade and other payables from commercial activities, in the same terms defined for the electric sector as mentioned above.

y) CO2 licences and greenhouse gas emissions

The Group holds CO2 licences in order to deal with gas emissions resulting from its operational activity and licences for trading. The CO2 and gas emissions licences held for own use are booked as intangible assets and are valued at the quoted price in the market on the date of the transaction.

The licences held by the Group for trading purposes are booked under Inventories at acquisition cost, subsequently adjusted at the lower of aquisition cost and net realisable value. Gains and losses resulting from these adjustments are recognised in the income statement of the period.

z) Statement of Cash Flow

The Statement of Cash Flow is presented under the direct method, by which gross cash flows from operating, financing and investing activities are disclosed.

The Group classifies cash flows related to interest and dividends paid as financing activities and interest and dividends received as investing activities.

aa) Group concession activities

The International Financial Reporting Committee (IFRIC) issued in July 2007, IFRIC 12 - Service Concession Arrangements. This interpretation was approved by the European Commission on 25 March 2009 and is applicable for the annual periods beginning after that date.

In the case of the EDP Group, the first annual period after the approval date is 2010 and, therefore, the EDP Group adopted IFRIC 12 for comparative purposes as of 1 January 2009. Under the terms of IFRIC 12, this interpretation was applied prospectively considering that the retrospective application was impracticable. The effect of the retrospective application would have a similar effect as a prospective application.

IFRIC 12 is applicable to public-private concession contracts in which the public entity controls or regulates the services rendered through the utilisation of certain infrastructure as well as the price for such services and also controls any significant residual interest in the infrastructure.

According to IFRIC 12, the infrastructures allocated to concessions are not recognised by the operator as tangible fixed assets or as financial leases, as the operator does not control the assets. These infrastructures are recognised according to one of the following accounting models, depending on the type of remuneration commitment of the operator assumed by the grantor within the terms of the contract:

Financial Asset Model

This model is applicable when the operator has an unconditional right to receive certain monetary amounts regardless the level of use of the infrastructure within the concession and results in a financial asset recognition, booked at amortised cost.

Intangible Asset Model

This model is applicable when the operator, within the concession, is remunerated on the basis of the level of use of the infrastructure (demand risk) and results in an intangible asset recognition.

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

Mixed Model

This model is applicable when the concession includes simultaneously guaranteed remuneration and remuneration based on the level of use of the infrastructure within the concession.

Under the terms of the concession contracts of EDP Group to which IFRIC 12 is applicable, the construction activities are outsourced to specialised entities. Therefore, EDP Group has no margin in the construction of the assets assigned to concessions, thus the revenue and the expenditure with the acquisition of these assets have equal amounts (see note 7).

Intangible assets within concessions are amortised over their respective useful lives during the concession period.

The Group carries out impairment tests to the intangible assets within concessions whenever events or circumstances may indicate that the book value of an asset exceeds its recoverable amount, being any impairment recognised in the income statement.

Grants received from customers related to assets within concessions are delivered to the Group on a definitive basis and, therefore, are not reimbursable. These grants are deducted from the value of the assets allocated to each concession.

3. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS IN PREPARING THE FINANCIAL STATEMENTS

IFRS require the use of judgement and the making of estimates in the decision process regarding certain accounting treatments, with impact in total assets, liabilities, equity, costs and income. The actual effects may differ from these estimates and judgements, namely in relation to the effect of actual costs and income.

The main accounting estimates and judgements used in applying the accounting policies are discussed in this note in order to improve the understanding of how its application affects the Group's reported results and disclosures. A broader description of the accounting policies employed by the Group is disclosed in note 2 to these Condensed Consolidated Financial Statements.

Considering that in many cases there are alternatives to the accounting treatment adopted by EDP Group, the reported results could differ if a different treatment was chosen. The Executive Board of Directors believes that the choices made are appropriate and that the financial statements present fairly, in all material respects, the Group's financial position and results.

Impairment of available-for-sale investments

The Group determines that available-for-sale investments are impaired when there has been a significant or prolonged decline in their fair value.

Determination of a significant or prolonged decline requires judgement. In making this judgement, the Group assesses, among other factors, the normal share price volatility, assuming as significant a decline of more than 20% in listed shares. In addition, valuations are generally obtained through market prices or determined by external entities, or through valuation models that require assumptions or judgment in making the fair value estimates.

Alternative methodologies or the use of different assumptions and estimates could result in different impairment losses being recognised with a consequent impact in the Group's income statement.

Fair value of financial instruments

Fair values are based on listed market prices, if available, otherwise fair value is determined either by the price of similar recent transactions under market conditions or determined by external entities, or by pricing models based on net present value of estimated future cash flows techniques considering market conditions, time value, yield curves and volatility factors. These methodologies may require the use of assumptions or judgements in estimating fair values.

Consequently, the use of different methodologies or different assumptions or judgements in applying a particular model, could generate different financial results from those reported.

Contractual Stability Compensation - CMEC

Following a Portuguese Government decision to extinguish the Power Purchase Agreement (PPA), EDP and REN agreed to the early termination of the PPAs, with effect from 1 July 2007.

As a result of the PPAs termination and in accordance with the applicable legislation, a contractual stability compensation (CMEC) was granted to EDP Group. The mechanism for granting this compensation includes three types of compensation: initial compensation, compensation resulting from the revisable mechanism and final compensation.

Initial compensation was recognised when the PPAs terminated as an account receivable of 833,467 thousands of Euros, booked at its net present value, against deferred income. Part of the initial compensation is recognised as operating income each year against a reduction of the deferred initial compensation. According to the applicable legislation, securitization of this amount is possible. Compensation resulting from the revisable mechanism refers to the correction of the initial compensation for each year considering the actual conditions and is recognised as a loss or gain in the year to which it relates. Final compensation will be calculated in accordance with the terms defined by the legislation relating to the termination of the PPAs, after the end of the revisable mechanism period (10 years). Interest resulting from the discount rate used is booked in the period to which it relates, based on the respective implicit rate, against income for each period.

NEVERENDING ENERGY

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

Contractual Stability Compensation - Revisable mechanism

The revisable mechanism consists in correcting on an annual basis, during a 10-year period after the termination of the PPAs, the positive and negative variations between the estimates made for the initial stability compensation calculation and the actual amounts occurred in the market for each period. This mechanism gives rise to compensation resulting from the correction of the estimate referred to as CMEC revisable mechanism. In each period, the EDP Group calculates the CMEC considering market prices and the actual quantities sold, using the assumptions defined in the Valorágua model, according to the current legislation. Consequently, the use of different methodologies or assumptions from the used model, could give rise to different financial results from those considered.

Review of the useful life of the assets

The Group reviews the reasonability of the useful lives used to determine the rates of depreciation of assets assigned to the activity on an annual basis and prospectively changed the depreciation charge of the year.

In the second quarter of 2011 EDPR Group changed the useful life of the wind farms from 20 to 25 years. The redefinition of the useful life of the wind generation assets was based on a technical study performed by an independent entity which considered the technical availability for an additional period of 5 years of useful life of these assets. The referred study covered 95% of wind installed capacity of EDPR Group, in the different geographies (Europe and North America), considering assumptions and estimates that required judgement.

On 7 February 2012, the regulatory authority of Brazil, Agência Nacional de Energia Elétrica (ANEEL), issued the Normative Resolution 474, which revised the economic useful life of assets associated to distribution concessions, and established new annual depreciation rates with retroactive effect from 1 January 2012 onwards. The implementation of this change in annual depreciation rates led to an increase in the average useful life of Bandeirante's and Escelsa's assets from 22 to 24 years and 20 to 22 years, respectively.

In the third quarter of 2013, the Group reviewed and extended the useful life of the combined cycle plants from 25 to 35 years based on a technical study conducted by an independent entity which considered the technical availability for an additional period of 10 years. The referred study covered the combined cycle plants in Portugal (Lares and Ribatejo) and Spain (Castejon 1 and 2, Grupo 4 and Soto 5).

Useful lives of generation assets - Hydro independent generator in Brazil

The hydro generation assets in Brazil for Independent Generators are amortised during the estimated useful lives, considering the existing facts and circumstances at the date of preparation of the financial statements which includes, among other issues, EDP's best estimates of the useful lives of such assets, which are consistent with the useful lives defined by the regulator (ANEEL) and the technical and legal opinions and the respective contractual residual indemnification values at the end of each concession period. The remaining period of amortisation and the indemnification values at the end of the concessions, may be influenced by any changes in the Regulatory Legal Framework in Brazil.

Tariff adjustments

Tariff adjustments in Portugal represent the difference between costs and income of the National Electricity and Gas System, estimated at the beginning of each period for purposes of calculating the tariff, and the actual costs and income of the System established at the end of each period. The tariff adjustments assets or liabilities are recovered or returned through electricity tariffs to customers in subsequent periods.

In Portugal, the Decree-Law 237-B/2006 of 19 December, and the Decree-Law no 165/2008 of 21 August, recognised an unconditional right of the operators of the binding electric sector to recover or return the tariff ajustments and the related interest expenses, regardless of the form of its future payment or in situations of insolvency and cease of operations. The Decree-Law also allows the transfer of the tariff deficit collection right to a third party. Additionally, the legislation allows the transfer to third parties of the right to receive tariff adjustments, therefore, under this legislation regulated companies may provide to third parties, in whole or in part, the right to receive the tariff adjustments through the electricity and gas tariffs. In accordance with the accounting policy in force, the EDP Group recorded in the income statement under the caption Turnover - Electricity and network access, the effects of the recognition of tariff adjustments in the electricity sector, against Debtors and other assets from commercial activities and Trade and other payables from commercial activities.

For entities of the natural gas sector, Decree-Law 87/2011 of July 18, also establishes the unconditional right of regulated operators in this sector to recover or return tariff adjustments and related interest expenses, regardless of the form of its future payment or in situations of insolvency and cease of operations, allowing the transfer to third parties of the right to receive tariff adjustments. The EDP Group recorded in the income statement, under the caption Turnover - Gas and network access, the effects of the recognition of tariff adjustments of Natural Gas, against Debtors and other assets from commercial activities and Trade and other payables from commercial activities

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

In Spain, the Royal Decree Law 6/2009, published on 7 May 2009 established, among other matters: (i) the possibility to securitise the Spanish tariff deficit supported by the electric sector companies using a State guarantee through the tariff deficit amortisation fund; (ii) the calendar for the elimination of the tariff deficit, such that on 1 January 2013, access tariffs would be enough to cover regulated activities' costs, without the creation of an ex-ante tariff deficit and, in order to ease this gradual elimination, the Royal Decree Law also provided for the passage of some costs included in the electricity tariff to the Spanish State Budget; (iii) the revocation, as from 1 July 2009, of Royal Decree Law 11/2007, which established the obligation to return the additional revenues obtained from the incorporation of CO2 costs in markets prices, and which was to be in force until 2012; (iv) the creation of a social subsidy, which translates to a lower tariff for low income consumers and (v) the charge to electric companies of the costs with the management and treatment of radioactive waste from nuclear power plants and fuels consumed. However, Royal Decree Law 29/2012, endorsed on 28 December, abolished the regulatory requirement mentioned in paragraph (ii) above. The direct consequence of this suppression is that access tariffs will not be related to the sufficiency of the tariffs, so there may be temporary imbalances, to be recovered in a single annual fee in subsequent years.

In 2010, the Royal Decree Law 14/2010 was published and addressed the correction of the tariff deficit of the electricity sector. As a result, the temporal mismatch of the settlement for 2010 came to be considered as a revenue deficit of the electricity system and established a set of measures to ensure that the various industry players contribute to the reduction, including: the establishment of generation rates, financing plans for energy efficiency and savings by the generation companies, and various regulatory measures that help reduce the additional costs of certain technologies in the special regime.

In 2012, the Royal Decree Law 1/2012 was published, establishing a moratorium on adding new facilities in the pre-allocation records for remuneration and the Royal Decree Law 13/2012 which provides reductions in the remuneration for the distribution activity and an extraordinary decrease on other regulated activities. Both decrees were adopted with urgency to reduce the tariff deficit in order to achieve the limit provided for 2012 in the Royal Decree Law 14/2010.

Based on the legislation issued, EDP considers that the requirements for the recognition of tariff deficits as receivables against the income statement are accomplished.

Impairment of long term assets and Goodwill

Impairment tests are performed, whenever there is a trigger that the recoverable amount of property, plant, equipment and intangible assets is less than the corresponding net book value of the assets.

On an annual basis, the Group reviews the assumptions used to assess the existence of impairment in goodwill resulting from acquisitions of shares in subsidiaries. The assumptions used are sensitive to changes in macroeconomic indicators and business assumptions used by management. The goodwill in associates is reviewed when circumstances indicate the existence of impairment.

Considering the uncertainties regarding the recoverable amount of property, plant and equipment, intangible assets and goodwill as they are based on the best information available, changes in the assumptions can result in changes in the determination of the amount of impairment and, consequently, on the Group's results.

Doubtful debts

Impairment losses related to doubtful debts are estimated by EDP based on the estimated recoverable amounts, the date of default, debt write offs and other factors. Certain circumstances and facts may change the estimated impairment losses of doubtful debts, namely changes in the economic environment, economic sector trends, client's credit risk and increases in the rate of defaults. The evaluation process in determining whether an impairment loss should be recorded in the income statement is subject to numerous estimates and judgement. Changes in the estimates and judgement could change the impairment test results which could affect the Group's reported results.

Revenue recognition

Electricity sales revenue is recognised when the monthly electricity invoices are issued, based on actual meter readings or estimated consumption based on the historical data of each consumer. Revenue relating to electricity to be invoiced, regarding consumption up to the balance sheet date but not measured, is booked based on estimates which take into consideration factors such as consumption in prior periods and analysis relating to the energy balance of the operations.

The use of different estimates and assumptions can affect the Group's revenue and, consequently, its reported results.

Income taxes

The Group is subject to income taxes in several jurisdictions. Certain interpretations and estimates are required in determining the global amount of income tax.

There are several transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. Different interpretations and estimates could result in a different level of income taxes, current and deferred, recognised in the period.

In Portugal, the tax authorities are entitled to review the EDP, S.A. and its subsidiaries' determination of their annual taxable earnings for a period of four years. In case of tax losses carried forward, this period can be five years for annual periods starting from 2012, four years for annual periods of 2011 and 2010 and six years for previous annual periods. In Spain the period is four years and in Brazil it is five years. In the United States of America, in general, for the IRS (Internal Revenue Service) to issue additional income tax assessments for an entity is three years, from the date that the income tax return is filed by the taxpayer. As a result, it is possible that some additional taxes may be assessed, mainly as a result of differences in interpretation of the tax law. However, EDP Group and its subsidiaries believe that there will be no significant corrections to the income tax booked in the financial statements.

Pensions and other employee benefits

Determining pension and other employee benefits liabilities requires the use of assumptions and estimates, including actuarial projections, estimated rates of return on investments, discount rates and pension and salary growth and other factors that can impact the cost and liability of the pension, medical plans and other benefits. Changes in the assumptions can materially affect the amounts determined.

Provisions for dismantling and decommissioning of power generation units

The EDP Group considers that there are legal, contractual or constructive obligations to dismantle and decommission of Property, plant and equipment assets allocated to electricity generation operations. The Group records provisions in accordance with existing obligations to cover the present value of the estimated cost to restore the locations and land where the electricity generations units are located. The calculation of the provisions is based on estimates of the present value of the future liabilities.

The use of different assumptions in the estimates and judgement from those referred could lead to different financial results than those considered.

Measurement criteria of the concession financial receivables under LFRIC 12

In 2012, the Provisional Measure 579/12 was published in Brazil, meanwhile converted into Law 12.783/13, which determines the amount of the indenisation payable to the distribution companies regarding the assets not amortised or depreciated at the end of each concession, that should be determined based in the methodology of the new replacement value. This methodology determined an increase in the indenisation amount (financial asset IFRIC 12) of Bandeirante and Escelsa, booked, under IFRIC 12 terms, against other operating income. This amount corresponds to the difference between the new replacement value versus the historical cost.

Regulatory changes occurred in Spain

On 12 July 2013, the Spanish Government approved the Royal Decree-Law 9/2013 which comprises a set of relevant changes in the remuneration scheme applicable to the entities operating in the electric sector in Spain, including the one regulated by the Royal Decree-Law 2/2013.

The main changes applicable to renewable energy producers are as following: (i) Derogation of the present remuneration scheme regulated by the Royal Decree-Law 661/2007 and subsequents, (ii) the remuneration of wind energy and cogeneration activity will be determined according to the reasonable rate, which will have in consideration the average of ten-year bond yield, in secondary market, plus 300 basis points, (iii) definition of a standard model for activity income and expenses. This model will determine the remuneration's reasonable rate, considering the standard income of energy sales in market and the standard production costs and investment in standard facilities.

On 26 November 2013, the Government submitted to CNMC ("Comisión Nacional de los Mercados y la Competencia"), a draft decree describing the new remuneration scheme for renewable generation. This draft decree did not include the required parameters to calculate the remuneration for the renewables' sector activities, but defined that it should be retrospectively applied since 14 July. These parameters were released on 3 February 2014 when the CNMC disclosed the draft Ministerial Order containing the needed parameters to calculate the remuneration for each one of the 1,600 different types of renewable installations defined by the government.

According to these parameters, wind farms built in 2004 or earlier are not eligible to receive any incentive while the new wind farms will receive a flat premium per installed MW until the end of their regulatory life. The flat premium will be subject to tri-annual modifications due to updates in the forecast of the parameters affecting the profitability of the installations. Overall, the wind sector will receive 1,191 millions of Euros in 2014 which compares to the forecast of 2,000 millions of Euros that would have been received under the old regulation. This cut of approximately 800 millions of Euros in the wind sector represents 45% of the total savings for the whole renewable sector that were estimated at 1,750 millions of Euros in the budget published within the tariff and charges order draft.

As a consequence of this measure, EDP Group estimated and booked the impact in the profit and loss for the year and calculated the impairment for wind farm assets and cogeneration assets as at 31 December 2013. As a result, an impairment loss of 16 millions of Euros and 31 millions of Euros was booked by EDPR Europe and HDC Group, respectively.

4. FINANCIAL-RISK MANAGEMENT POLICIES

Financial risk management

The EDP Group's business is exposed to a variety of financial risks, including the effect of changes in market prices, foreign exchange and interest rates. The Group's exposure to financial risks arises essentially from its debt portfolio, resulting in interest and exchange rate exposures. The unpredictability of the financial markets is analysed on an on-going basis in accordance with the Group's risk management policy. Derivative financial instruments are used to minimise potential adverse effects, resulting from interest rate and/or foreign exchange rate risks on EDP Group's financial performance.

The management of financial risks of EDP, S.A. and other EDP Group entities is undertaken centrally by the Financial Department of EDP S.A., in accordance with policies approved by the Executive Board of Directors. The Financial Department identifies, evaluates and submits to the Board for approval, hedging mechanisms appropriate to each exposure. The Executive Board of Directors is responsible for the definition of general risk management principles and the establishment of exposure limits.

All transactions undertaken using derivative financial instruments require prior approval by the Executive Board of Directors, which defines the parameters of each transaction and approves the formal documents describing their objectives.

As for the subsidiaries in Brazil, the Local Risk Management Department is responsible for the management of financial risks arising from fluctuation in interest and exchange rates. This management is performed according to the principles/policies set by the EDP Group for this geographical area.

Exchange-rate risk management

EDP, S.A. Financial Department is responsible for managing exchange rate risk exposure resulting from foreign currency loans, seeking to mitigate the impact of exchange rate fluctuations on the financial costs of the EDP Group companies and, consequently, on the consolidated results, through exchange rate derivative financial instruments and/or other hedging structures.

The policy implemented by the EDP Group consists of undertaking derivative financial instruments to hedge exchange rate risk with characteristics similar to those of the hedged asset or liability. The operations are revalued and monitored throughout their useful lives and, periodically, their effectiveness in controlling and hedging the risk that gave rise to them is evaluated.

EDP Group is exposed to the exchange rate risk in US Dollars (USD), British Pounds (GBP), Japanese Yen (JPY), Swiss francs (CHF), Brazilian Reais (BRL), Romanian Leu (RON), Canadian Dollars (CAD) and Zloty (PLN). Currently, the exposure to USD/EUR, PLN/EUR and RON/EUR exchange rate risk results essentially from investments of EDP Group in wind parks in the USA, Poland and Romania. These investments were financed with debt contracted in USD, PLN and RON, which allows to mitigate the exchange rate risk related to these assets.

The Brazilian subsidiaries exposed to the USD/BRL exchange rate risk as a result of their USD debt, use derivative financial instruments to hedge this risk. Additionally, investments in the Brazilian subsidiaries of EDP Energias do Brasil, whose net assets expressed in BRL are exposed to exchange rate risks, are monitored through analysis of the evolution of the BRL/EUR exchange rate. Regarding investments in wind farms of EDP Renováveis in Brazil, the Group decided to follow the strategy that has been adopted to hedge these investments in USA and Poland, by contracting a financial derivative instrument to cover the exchange rate exposure of these assets.

The exchange rate and interest rate risk on the GBP, CHF and JPY bonds issued by EDP Finance B.V. under the Medium Term Notes Program for the Issuance of Debt Instruments have been hedged as from their issuing date. The EDP Group's remaining debt, except for the debt contracted by the Brazilian subsidiaries, is denominated in Euros.

Sensitivity analysis - exchange rate

Regarding the financial instruments that result in an exchange rate risk exposure, a fluctuation of 10% in the Euro exchange rate in relation to the following currencies, as at 31 December 2013 and 2012, would lead to an increase / (decrease) in the EDP Group results and/or equity as follows:

| | Dec 2013 | | | | |
|--------------------|----------------|---------|---------|--------|--|
| | Profit or loss | | Equ | uity | |
| Thousands of Euros | +10% | -10% | +10% | -10% | |
| USD | 32,758 | -40,038 | -16,047 | 19,613 | |
| RON | 1,019 | -1,246 | | | |
| PLN | 20,883 | -25,524 | | | |
| | 54,660 | -66,808 | -16,047 | 19,613 | |

Dec 2012 Profit or loss Equity Thousands of Euros +10% -10% +10% -10% USD 40,462 -49,454 -27,842 34.029 RON 5,957 -7,280 PLN 11,628 -14,213 58.047 -70,947 27.842 34.029

This analysis assumes that all other variables, namely interest rates, remain unchanged.

Interest rate risk management

The aim of the interest rate risk management policies is to reduce the financial charges and to reduce the exposure to interest rate risk from market fluctuations through the settlement of derivative financial instruments.

In the floating rate financing context, the EDP Group engages interest rate derivative financial instruments to hedge the cash flows associated with future interest payments, which have the effect of converting floating interest rate loans into fixed interest rate loans.

Long-term loans engaged at fixed rates are, when appropriate, converted into floating rate loans through interest rate derivative financial instruments designed to reduce financial charges and to level them to market conditions. In addition to these operations, more structured collar operations are engaged, as necessary, to mitigate exposure of the debt cash flows to market rate fluctuations.

All the operations are undertaken on liabilities in the EDP Group's debt portfolio and mainly involve perfect hedges, resulting in a high level of correlation between the changes in the fair value of the hedging instrument and the changes in fair value of the interest rate risk or future cash flows.

The EDP Group has a portfolio of interest rate derivatives with maturities up to 15 years. The Group's Financial Department undertakes sensitivity analyses of the fair value of financial instruments to interest rate fluctuations. After the covering effect of the derivatives 47% of the Group's liabilities are at fixed rate.

Sensitivity analysis - Interest rates (excluding the Brazilian operations)

Based on the debt portfolio engaged by the Group, except for Brazil and the related derivative financial instruments used to hedge the related interest rate risk, a 50 basis points change in the reference interest rates at 31 December 2013 and 2012 would lead to the following increases / (decreases) in equity and/or results of the EDP Group:

| | Dec 2013 | | | | |
|--|-----------|-------------------|--------|----------|--|
| | Profit of | Profit or loss | | iity | |
| | 50 pb | 50 pb 50 pb | | 50 pb | |
| Thousands of Euros | increase | increase decrease | | decrease | |
| Cash flow effect | | | | | |
| Hedged debt | -12,561 | 12,561 | - | - | |
| Unhedged debt | -35,321 | 35,321 | - | - | |
| Fair value effect | | | | | |
| Cash flow hedging derivatives | - | - | 23,759 | -25,783 | |
| Trading derivatives (accounting perspective) | -2,428 | 338 | - | - | |
| | -50,310 | 48,220 | 23,759 | -25,783 | |

| | | Dec 2012 | | | | | |
|--|----------|----------------|----------|----------|--|--|--|
| | Profit o | Profit or loss | | ity | | | |
| | 50 pb | 50 pb | 50 pb | 50 pb | | | |
| Thousands of Euros | increase | decrease | increase | decrease | | | |
| Cash flow effect | <u>'</u> | | | | | | |
| Hedged debt | -10,061 | 10,061 | - | - | | | |
| Unhedged debt | -41,619 | 41,619 | _ | - | | | |
| Fair value effect | | | | | | | |
| Cash flow hedging derivatives | - | - | 26,993 | -29,800 | | | |
| Trading derivatives (accounting perspective) | -2,008 | 678 | - | | | | |
| | -53,688 | 52,358 | 26,993 | -29,800 | | | |

This analysis assumes that all other variables, namely exchange rates, remain unchanged.

Counterparty credit risk management

The EDP Group's policy in terms of counterparty risk on financial transactions is managed through an analysis of the technical capacity, competitiveness, credit rating and exposure to each counterparty, avoiding significant concentrations of credit risk. Counterparties in derivative financial instruments are credit institutions with high credit risk rating notation and therefore the risk of counterparty default is not considered to be significant. Guarantees and other collaterals are not required on these transactions.

The EDP Group has documented its financial operations in accordance with international standards. Therefore, generally, derivative financial instruments are contracted under ISDA Master Agreements.

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

Regarding the third-party debt generated by the Group's day-to-day business, the credit risk arises essentially from the legal obligation of providing continuous low-tension electricity supplies even when there are payment delays. This risk is considered to be mitigated by the large number of customers and by their diversity in terms of sectors of activity, as well as by the large volume of residential customers.

EDP Group believes that the amount that best represents the Group's exposure to credit risk corresponds to the carrying amount of trade receivables and other debtors, net of the impairment losses recognised. The Group believes that the credit quality of these receivables is adequate and that no significant impaired credits exists that have not been recognised as such and provided for.

Liquidity risk management

The EDP Group undertakes management of liquidity risk through the engagement and maintenance of credit lines and financing facilities with a firm underwriting commitment with national and international financial institutions allowing immediate access to funds. These lines are used to complement and backup national and international commercial paper programmes, allowing the EDP Group's short-term financing sources to be diversified (see note 35).

Energy market risk management

In its operations in the non-regulated Iberian electricity market, EDP Group purchases fuel to generate electric energy and sells the electric energy generated by its plants in the organised market (OMEL and OMIP) as well as to third parties. The Group is exposed to energy market risks namely in its operations in the non-regulated market. Some electricity generating plants despite operating in the market, are subject to the CMEC legislation, and the changes in the operating margins are determined essentially by the difference between the prices in the market and the reference indexes defined in the contracts.

As a result of its energy management operations, EDP Group has a portfolio of operations related to electric energy, carbon emissions (CO2) and fuel (coal, fuel and gas). The portfolio is managed through the engagement of operations with financial and physical settlement on the forward energy markets. The objective of the operations is to reduce volatility of the financial impact resulting from the managed positions and also to benefit from arbitration or positioning within the trading limits approved by the Executive Board of Directors. The financial instruments traded include swaps and forwards of electricity and fuels to fix prices.

The activity of energy management is subject to a series of variables which are identified and classified based on their common uncertainty characteristics (or risk). Such risks include market price evolution risk (electricity and fuel) and hydroelectric production volume risk (price and volume risk), as well as credit risk of the counterparties.

Monitoring the price, volume and credit risks includes their quantification in terms of positions at risk which can be adjusted through market operations. This quantification is made by using specific models that value positions so as to determine the maximum loss that can be incurred, with a given probability and a determined time frame.

Risks are managed in accordance with the strategies defined by the Executive Board of Directors, which are subject to a periodic review based on the evolution of the operations, in order to change the profile of the positions and adjust them to the established management objectives.

Risks are monitored by means of a series of actions involving daily monitoring of the different risk indicators, of the operations grouped in the systems and the prudence limits defined by management area and risk component, as well as regular backtesting and supplementary validation of the models and assumptions used. This monitoring not only ensures the effectiveness of the strategies implemented, but also provides elements to enable initiatives to be taken to correct them, if necessary.

The principal price and volume risk indicator used is the margin at risk (P@R), which estimates the impact of the variation of the different risk factors (price of electricity and hydrological) on the following year's margin, P@R corresponding to the difference between an expected margin and a pessimistic scenario with a probability to occur of 5% (confidence interval of 95%) considering a time frame of 1 year. Both the volumes which are certain and those, which although uncertain, are expected, namely production of the plants and the corresponding consumption of fuel, are considered. In June 2013, P@R has included wholesale gas business. The P@R Distribution by risk factor is as follows:

P@R Distribution by risk factor

| Dec 2013 | Dec 2012 |
|----------|--|
| | |
| 2,000 | <u> </u> |
| 21,000 | 26,000 |
| 15,000 | 2,000 |
| 21,000 | 18,000 |
| 36,000 | 38,000 |
| -51,000 | -43,000 |
| 44,000 | 41,000 |
| | 2,000 21,000 15,000 21,000 36,000 -51,000 |

Regarding credit risk, the quantification of exposure considers the amount and type of transaction (e.g. swap or forward), the rating of the counterparty risk that depends on the probability of default and the expected value of credit to recover, which varies depending on the guarantees received or the existence of "netting" agreements. The EDP Group's exposure to credit risk rating is as follows:

| | Dec 2013 | Dec 2012 |
|--------------------------|----------|----------|
| Credit risk rating (S&P) | | |
| AAA to AA- | 14.51% | 6.63% |
| A+ to A- | 59.60% | 56.54% |
| BBB+ to BBB- | 10.31% | 33.55% |
| BB+ to B- | 0.82% | 0.59% |
| No rating assigned | 14.76% | 2.69% |
| | 100.00% | 100.00% |

Brazil - Interest rate and exchange rate risk management

The main tool used to monitor and control market risk in the Brazilian subsidiaries is Value at Risk (VaR).

VaR is the maximum expected loss on the operations portfolio over a specific period of time, resulting from an adverse movement in the market that has a specific confidence interval. The VaR model used is based on a confidence interval of 95% and assumes a 10 day time frame for settlement of positions, based essentially on historical data. Considering market data for the last 2 years and observation of the relationship between the different prices and markets, the model generates a series of scenarios for changes in market prices.

The VaR methodology used in Brazil considers a series of stress tests with the objective of monitoring the financial impact of the different market scenarios.

The summary of VaR on the operations of the Brazilian subsidiaries is as follows:

| | VaR | | |
|--------------------|----------|----------|--|
| Thousands of Euros | Dec 2013 | Dec 2012 | |
| Exchange rate risk | 1,093 | 1,309 | |
| Interest rate risk | 3,788 | 4,097 | |
| Covariation | -1,340 | -1,993 | |
| | 3,541 | 3,413 | |

5. CONSOLIDATION PERIMETER

During 2013, the following changes occurred in the EDP Group consolidation perimeter as described below:

Companies acquired:

- EDP Renewables, SGPS, S.A. acquired 100% of the share capital of Gravitangle Fotovoltaica Unipessoal, Lda.;
- EDP Energias do Brasil, S.A. acquired 50% of the share capital of Mabe Construção e Administração de Projetos, Lda.;
- South África Wind & Solar Power, S.L. (which was incorporated in March 2013) acquired 42.5% of the share capital of Modderfontein Wind Energy Project, Ltd., 100% of the share capital of Dejann Trading and Investments Proprietary Ltd., 100% of the share capital of EDP Renewables South Africa, Proprietary Ltd. and 100% of the share capital of Jouren Trading and Investments Pty Ltd.;
- EDP Renewables North America L.L.C. acquired 100% of the share capital of Lone Valley Solar Park I L.L.C. (ex-EDPR Agincourt L.L.C.), 100% of the share capital of Lone Valley Solar Park II L.L.C. (ex-EDPR Marathon L.L.C.) and 100% of the share capital of Rising Tree Wind Farm III;
- EDP Renewables Polska, S.P. ZO.O acquired 65,1% of the share capital of Molen Wind II S.P. ZO.O.

Companies sold and liquidated:

- Millenium Energy, S.L. sold by 115,493 thousands of Euros all of its interests in the gas transmission business (Gas Transporte Span, S.L. and Naturgas Energia Transportes, S.A.U.);
- EDP Gestão da Produção de Energia, S.A. sold all of its interests in Soporgen, S.A. by the amount of 5,060 thousands of Euros;
- Arquiled Projectos de Iluminação, S.A. liquidated Futurcompact, Lda.;
- A 49% share interest in EDP Renováveis Portugal, S.A. was sold by 257,954 thousands of Euros, as part of a transaction totalling 368,483 thousands of Euros deducted of loans totalling 110,529 thousands of Euros, with a loss of share interest held by EDP Group in Eólica de Alagoa, S.A., Eólica de Montenegrelo, S.A., Eólica da Serra das Alturas, S.A. and Malhadizes, S.A. This transaction was treated as a disposal of non-controlling interests without a loss of control and therefore the positive difference between the book value and the fair value of the non-controlling interests sold, totalling 112,566 thousands of Euros, was booked against reserves under the corresponding accounting policy;
- A 49% share interest in Wheat Field Holding, L.L.C. (which was incorpored in September 2013) was sold by 34,977 thousands of Euros (corresponding to a sale price of 48,400 thousands of US Dollar deducted of capital contributions, transaction fees and tax effect), with a subsequent 49% shareholding reduction of share interest in Wheat Field Wind Power Project, L.L.C.

 This transaction was treated as a disposal of non-controlling interests without a loss of control and therefore the negative difference between the book value and the fair value of the non-controlling interests sold, totalling a negative amount of 982 thousands of Euros,
- EDP-Gestão da Produção de Energia S.A. liquidated Agência de Desenvolvimento Regional do Vale do Tua, S.A.;
- EDPR Renovables España, S.L. liquidated Parc Eolic Molinars S.L.

was booked against reserves under the corresponding accounting policy;

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

Companies merged:

- Naturgas Energia Participaciones, S.A.U. was merged into Naturgas Energia Grupo, S.A;
- The following companies were merged into Hidroeléctrica del Cantábrico, S.A.:
 - Eléctrica de la Ribera del Ebro, S.A.;
 - Hidrocantábrico Servicios, S.A.;
 - Patrimonial de la Ribera del Ebro, S.L.;
 - Ciclo combinado Soto 5, S.L.

Companies incorporated:

- Empresa de Energia Cachoeira Caldeirão, S.A.;
- South África Wind & Solar Power, S.L.;
- Sustaining Power Solutions, L.L.C.;
- Green Power Offsets, L.L.C. *;
- Arquiled Brasil Projectos de Iluminação Ltda;
- Bourbriac II, S.A.S.;
- EDPR France Holding, S.A.S.;
- Parc Eolien de Montagne Fayel, S.A.S.;
- IME IE Mobil Eléctrica, ACE;
- Arbuckle Mountain;
- Rising Tree Wind Farm II *;
- Wheat Field Holding, L.L.C.;
- Les Eoliennes en Mer de Dieppe Le Tréport, S.A.S.;
- Les Eoliennes en Mer de Vendée, S.A.S.;
- EDP Mediadora S.A.
- * EDP Group holds, through EDP Renováveis and its subsidiary EDPR NA, a set of subsidiaries in the United States legally established without share capital and that as at 31 December 2013 do not have any assets, liabilities, or any operating activity.

Other changes:

- EDP Ventures, SGPS, S.A. increased its shareholding from 40.01% to 46.15% in the share capital of Arquiled Projectos de Iluminação, S.A.;
- Arquiled Projectos de Iluminação, S.A. increased its shareholding to 96% in the share capital of Arquiservice Consultoria Serviços, S.A.;
- EDP Renewables Europe, S.L. increased its shareholding to 100% in the share capital of Greenwind, S.A.;
- EDP Renewables Europe, S.L. increased its shareholding to 100% in the share capital of Relax Wind Park I, S.P. ZO.O through its subsidiary EDP Renewables Polska, S.P. ZO.O.;
- EDP Energias do Brasil, S.A. increased its shareholding to 100% in the share capital of Terra Verde Bioenergia Participações, S.A.;
- Decrease of the financial interest in Principle Power, Inc. from 50.29% to 33.46% through dilution, following a share capital increase not subscribed by EDP Inovação, S.A.

The companies included in the consolidation perimeter of EDP Group as at 31 December 2013 and 2012 are listed in Annex I.

6. TURNOVER

Turnover analysed by sector is as follows:

| | Group | | Company | | |
|--------------------------------|------------|------------|-----------|-----------|--|
| Thousands of Euros | Dec 2013 | Dec 2012 | Dec 2013 | Dec 2012 | |
| Electricity and network access | 14,253,446 | 14,404,399 | 2,057,232 | 1,761,552 | |
| Gas and network access | 1,660,121 | 1,771,137 | 233,116 | 232,827 | |
| Sales of CO2 licences | 26,419 | 17,313 | 52,511 | 51,421 | |
| Other | 163,204 | 147,005 | 134,573 | 144,414 | |
| | 16,103,190 | 16,339,854 | 2,477,432 | 2,190,214 | |

Turnover by geographical market, for the Group, is analysed as follows:

| | Dec 2013 | | | | | |
|--------------------------------|-----------|-----------|-----------|----------|---------|------------|
| Thousands of Euros | Portugal | Spain | Brazil | U.S.A. | Other | Group |
| Electricity and network access | 8,046,860 | 3,146,863 | 2,467,747 | 371,294 | 220,682 | 14,253,446 |
| Gas and network access | 260,379 | 1,399,742 | | <u> </u> | | 1,660,121 |
| Sales of CO2 licences | 26,419 | - | | <u> </u> | | 26,419 |
| Other | 75,626 | 40,944 | 46,197 | 13 | 424 | 163,204 |
| | 8,409,284 | 4,587,549 | 2,513,944 | 371,307 | 221,106 | 16,103,190 |

| | | Dec 2012 | | | | |
|--------------------------------|-----------|-----------|-----------|----------|---------|------------|
| Thousands of Euros | Portugal | Spain | Brazil | U.S.A. | Other | Group |
| Electricity and network access | 8,105,482 | 3,232,648 | 2,516,774 | 364,631 | 184,864 | 14,404,399 |
| Gas and network access | 251,013 | 1,520,124 | | | | 1,771,137 |
| Sales of CO2 licences | 17,313 | | | | | 17,313 |
| Other | 81,569 | 35,859 | 22,634 | <u>-</u> | 6,943 | 147,005 |
| | 8,455,377 | 4,788,631 | 2,539,408 | 364,631 | 191,807 | 16,339,854 |

In 2013, on a consolidated basis, the caption Electricity and network access in Portugal includes a net revenue of 1,905,932 thousands of Euros (income in 30 December 2012: 1,457,820 thousands of Euros) regarding the tariff adjustments of the period (see notes 26 and 39), as described under accounting policy - note 2 x).

Additionally, the caption Electricity and network access includes, on a consolidated basis, 115,576 thousands of Euros (31 December 2012: 474,575 thousands of Euros) related to the Contractual Stability Compensation (CMEC) as a result of the Power Purchase Agreements (PPA) termination.

Following the revision of the Commercial Relations Code (RRC), from 1 January 2012 onwards, EDP Serviço Universal began to sell in the market all the electric power of the special regime production (PRE) acquired under the applicable legislation, also buying in the market all the electricity needed to supply its customers. Following this amendment, from 1 January 2012 onward, the electricity purchases from special regime producers and the respective sales in the market are accounted under cost of electricity and turnover at its gross amounts, respectively, resulting in an increase in these captions in relation to prior periods. As at 31 December 2013, the electricity from special regime producers sold in the market amounts to 907,092 thousands of Euros (31 December 2012: 837,773 thousands of Euros).

The breakdown of Revenue by segment is presented in the segmental reporting (see note 54).

Cost of electricity, Cost of gas and Changes in inventories and cost of raw materials and consumables used are analysed as follows:

| | Gro | Group | | Company | |
|---|------------|------------|-----------|-----------|--|
| Thousands of Euros | Dec 2013 | Dec 2012 | Dec 2013 | Dec 2012 | |
| Cost of electricity | 8,235,491 | 8,392,199 | 1,984,234 | 1,733,128 | |
| Cost of gas | 1,264,745 | 1,375,841 | _ | | |
| Changes in inventories and cost of raw materials and consumables used | | | | | |
| Fuel, steam and ashes | 483,178 | 497,340 | - | - | |
| Gas | 325,663 | 493,792 | 235,909 | 316,730 | |
| Cost of consumables used | 17,152 | 16,552 | - | - | |
| CO2 licences | 135,146 | 48,394 | 52,716 | 51,991 | |
| Own work capitalised | -74,154 | -87,808 | - | _ | |
| Other | 164,939 | 175,377 | 14 | 8 | |
| | 1,051,924 | 1,143,647 | 288,639 | 368,729 | |
| | 10,552,160 | 10,911,687 | 2,272,873 | 2,101,857 | |

On a company basis, Cost of electricity includes costs of 1,038,501 thousands of Euros (31 December 2012: 908,895 thousands of Euros) with the purchase of energy under the agreement for management, purchase and resale of energy signed between EDP, S.A. and EDP Gestão da Produção de Energia, S.A.

The adoption of the European Community Directive 2009/92 of 31 July 2009 to the national legislations, determined that the thermoelectric power plants that operate under a market regime in Portugal and Spain, will not have CO2 licences granted free of charge since 1 January 2013, this resulted in an increase of the CO2 licences cost when compared to 2012.

7. REVENUE FROM ASSETS ASSIGNED TO CONCESSIONS

Under the terms of concession contracts of EDP Group to which IFRIC 12 is applicable, the construction activities are outsourced to external specialised entities. Therefore, EDP Group has no margin in the construction of assets assigned to concessions. The revenue and the expenditure with the acquisition of these assets have equal amounts, being analysed as follows:

| | Group | | |
|---|----------|----------|--|
| Thousands of Euros | Dec 2013 | Dec 2012 | |
| Revenue from assets assigned to concessions | 424,105 | 433,661 | |
| | | | |
| Expenditure with assets assigned to concessions | | | |
| Subcontracts and other materials | -334,446 | -336,283 | |
| Personnel costs capitalised (see note 10) | -81,130 | -85,775 | |
| Capitalised borrowing costs (see note 15) | -8,529 | -11,603 | |
| | -424,105 | -433,661 | |
| | - | _ | |

The Revenue from assets assigned to concessions by geographical market is analysed as follows:

| | | Dec 2013 | | | Dec 2012 | |
|---|----------|----------|----------|----------|----------|----------|
| Thousands of Euros | Portugal | Brazil | Total | Portugal | Brazil | Total |
| Revenue from assets assigned to concessions | 307,415 | 116,690 | 424,105 | 336,135 | 97,526 | 433,661 |
| Expenditure with assets assigned to concessions | -307,415 | -116,690 | -424,105 | -336,135 | -97,526 | -433,661 |
| | - | - | - | | - | - |
| | | | | | 1 | |

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

8. OTHER OPERATING INCOME

Other operating income, for the Group, is analysed as follows:

| | Group | |
|---|----------|----------|
| Thousands of Euros | Dec 2013 | Dec 2012 |
| Gains on fixed assets | 22,416 | 10,940 |
| Customers contributions | 20,297 | 40,071 |
| Income arising from institutional partnerships - EDPR NA | 125,101 | 127,350 |
| Gains on business combinations | 10,767 | 32,393 |
| Gains on sale of electricity transmission assets in Brazil | - | 12,478 |
| Remeasurement of IFRIC 12 indenisation amount in Brazil concessions | - | 40,838 |
| Gains on disposals - assets of gas and electricity business | 58,296 | |
| Other operating income | 123,126 | 125,897 |
| | 360,003 | 389,967 |

Gains on fixed assets include the effect from the sale of a land by Escelsa to Campo Participações Imobiliárias, S.A. generating a gain of 18,132 thousands of Euros (52,000 thousands of Reais).

Customers contributions include the effect of the application of IFRIC 18 in the electricity and gas distribution activities in Spain in the amount of 19,533 thousands of Euros (31 December 2012: 37,335 thousands of Euros), as referred in accounting policy 2h).

Income arising from institutional partnerships - EDPR NA relates to revenue recognition arising from production and investment tax credits (PTC/ITC) and tax depreciations regarding Vento I, II, III, IV, V, VI, VII, VIII, IX and X projects, in wind farms in U.S.A. (see note 38).

In the last quarter of 2013, the Group EDP Energias do Brasil updated the contigent price for the acquisition of the hydro power plant of Jari, considering that the DIFAL tax benefit agreed as a condition for the contigent price payment was not obtained until 31 December 2013. This operation generated a gain on business combinations of 7,285 thousands of Euros. This caption also includes the purchase price allocation of the identificable assets acquired and liabilities assumed of Molen Wind II, S.P. ZO.O. which was carried out by EDPR Polska, and originated an operating income of 3,477 thousands of Euros (see note 19).

Gains on disposals - assets of gas and electricity business is related with the gain on the sale of the assets of the gas transmission business in the amount of 55,829 thousands of Euros and cogeneration activity in the amount of 2,239 thousands of Euros (see note 42).

Other operating income includes the power purchase agreements between EDPR NA and its customers which were valued based on market assumptions, at the acquisition date, using discounted cash flow models. At that date, these agreements were valued at approximately 190,400 thousands of USD and recorded as a non-current liability (see note 39). This liability is depreciated over the period of the agreements against Other operating income. As at 31 December 2013, the amortisation for the period amounts to 8,362 thousands of Euros (31 December 2012: 9,888 thousands of Euros). This caption also includes 13,779 thousands of Euros related with the indemnity received following an amendment of the power purchase agreement between Mesquite Wind, L.L.C. (subsidiary of Vento I, L.L.C) and its client.

During 2012, EDPR Italia acquired 100% of Pietragalla Eólico S.R.L. share capital. Additionally, EDPR Romenia acquired 100% of the share capital of six solar photovoltaic companies. EDPR Group carried out the purchase price allocation to the identifiable assets acquired and liabilities assumed of these companies which originated an operating income of 29,754 thousands of Euros in EDPR Romania and 2,639 thousands of Euros in EDPR Italia (see note 19). These bargain purchases arose from EDPR Group negotiation power, financing capacity and liquidity, as well as from the Romanian Solar market stage of development which enables favourable transactions.

In May 2012, EDP Energias do Brasil, S.A. signed a sale agreement to sell its financial investment in Evrecy Participações, Ltda. (owner of electricity transmission assets) to Companhia de Transmissão de Energia Elétrica Paulista - CTEEP for 25,181 thousands of Euros (63,164 thousands of Brazilian Real). On 21 December 2012, after ANEEL's approval, the disposal process was completed, originating a gain of 12,478 thousands of Euros.

In 2012, Provisional Measure 579/12, meanwhile converted into Law 12.783/13, was issued in Brazil, which establishes the calculation rule for the indemnities payable to distribution companies, related to the assets not fully amortised or depreciated at the end of the concession period, based on the new replacement value methodology. This methodology determined an increase in the indemnity receivable by Bandeirante and Escelsa, accounted for as a financial asset under IFRIC 12 terms, of 40,838 thousands of Euros (102,439 thousands of Brazilian Real), against other operating income. This amount corresponds to the difference between the residual value of the assets according to the new replacement value versus the historical cost (see note 26).

Company

Other operating income, for the Company, is analysed as follows:

| | Company | | |
|------------------------|----------|----------|--|
| Thousands of Euros | Dec 2013 | Dec 2012 | |
| Gains on fixed assets | 204 | 1,264 | |
| Other operating income | 11,628 | 13,024 | |
| | 11,832 | 14,288 | |

9. SUPPLIES AND SERVICES

Supplies and services are analysed as follows:

| | Group | | Com | pany |
|--|----------|----------|----------|----------|
| Thousands of Euros | Dec 2013 | Dec 2012 | Dec 2013 | Dec 2012 |
| Consumables and communications | 51,028 | 52,345 | 8,333 | 9,382 |
| Rents and leases | 115,413 | 112,579 | 44,375 | 45,676 |
| Maintenance and repairs | 333,423 | 326,291 | 17,427 | 17,452 |
| Specialised works: | | | | |
| - Commercial activity | 162,432 | 152,507 | 5,600 | 5,554 |
| - IT services, legal and advisory fees | 87,729 | 98,019 | 20,785 | 30,226 |
| - Other services | 55,151 | 59,106 | 15,570 | 11,459 |
| Provided personnel | - | | 46,671 | 44,309 |
| Other supplies and services | 129,727 | 127,440 | 16,183 | 16,821 |
| | 934,903 | 928,287 | 174,944 | 180,879 |

10. PERSONNEL COSTS AND EMPLOYEE BENEFITS

Personnel costs and employee benefits are analysed as follows:

| | Gro | Group | | Company | |
|---|----------|----------|----------|----------|--|
| Thousands of Euros | Dec 2013 | Dec 2012 | Dec 2013 | Dec 2012 | |
| Personnel costs | | | | | |
| Board of Directors remuneration | 15,884 | 16,742 | 5,886 | 5,437 | |
| Employees' remuneration | 494,129 | 502,028 | 1,835 | 1,527 | |
| Social charges on remuneration | 122,184 | 120,082 | 441 | 406 | |
| Performance, assiduity and seniority bonus | 68,865 | 77,776 | 6,039 | 4,507 | |
| Other costs | 29,749 | 24,817 | 846 | 886 | |
| Own work capitalised: | | | | | |
| - Assigned to concessions (see note 7) | -81,130 | -85,775 | - | - | |
| - Other | -66,450 | -73,473 | -53 | - | |
| | 583,231 | 582,197 | 14,994 | 12,763 | |
| Employee benefits | | | | | |
| Pension plans costs | 25,817 | 29,266 | 212 | 230 | |
| Medical plans costs and other benefits | 11,898 | 8,585 | 156 | 134 | |
| Past service cost (Curtailment / Plan amendments) | -9,243 | 25,133 | - | _ | |
| Other | 26,813 | 26,355 | 63 | 61 | |
| | 55,285 | 89,339 | 431 | 425 | |
| | 638,516 | 671,536 | 15,425 | 13,188 | |

Pension plans costs include 10,265 thousands of Euros (31 December 2012: 12,205 thousands of Euros) related to defined benefit plans (see note 36) and 15,552 thousands of Euros (31 December 2012: 17,061 thousands of Euros) related to defined contribution plans. Medical plans costs and other employee benefits include 11,898 thousands of Euros (31 December 2012: 8,585 thousands of Euros) related to the charge of the period. As at 31 December 2012, the Past service cost (Curtailment / Plan amendments) results essentially from: (i) a restructuring of EDP Brasil with a total cost of 3,690 thousands of Euros. This plan covered 65 employees of Escelsa and 55 of Bandeirante; and (ii) 76 new early retirement agreements of EDP Gestão da Produção de Energia, S.A. following Setúbal power plant decommissioning process, in the amount of 21,391 thousands of Euros.

Other employee benefits include costs with medical services of employees in the amount of 7,825 thousands of Euros (31 December 2012: 8,044 thousands of Euros) and costs with tariff discount of active workers in the amount of 17,348 thousands of Euros (31 December 2012: 11,532 thousands of Euros).

The breakdown by management positions and category of professional staff as at 31 December 2013 and 2012 is as follows:

| | Group | | Company | |
|--|----------|----------|----------|----------|
| Thousands of Euros | Dec 2013 | Dec 2012 | Dec 2013 | Dec 2012 |
| Executive Board members* | 55 | 55 | 7 | 7 |
| Senior management | 712 | 676 | - | |
| Specialists | 4,366 | 4,223 | 3 | - |
| Middle Technicians | 167 | 207 | - | |
| Intermediate Technicians | 67 | 71 | - | |
| Qualified and highly Qualified Professionals | 6,609 | 6,891 | - | - |
| Semi Qualified Professionals | 203 | 152 | - | |
| | 12,179 | 12,275 | 10 | 7 |

^{*} Do not include Non-executive Board members

11. OTHER OPERATING EXPENSES

Other operating expenses, for the Group, are analysed as follows:

| | Group | |
|---|----------|----------|
| Thousands of Euros | Dec 2013 | Dec 2012 |
| Concession rents paid to local authorities and others | 274,399 | 276,374 |
| Direct and indirect taxes | 241,776 | 118,401 |
| Irrecoverable debts | 15,252 | 25,954 |
| Donations | 21,947 | 20,624 |
| Impairment losses: | | |
| - Trade receivables | 34,849 | 58,176 |
| - Debtors | 4,826 | 1,820 |
| Other operating costs | 127,597 | 88,504 |
| | 720,646 | 589,853 |

The caption Concession rents paid to local authorities and others includes essentially the rents paid to the local authorities under the terms of the low tension electricity distribution concession contracts and rents paid to city councils where the power plants are located.

The caption Direct and indirect taxes, as at 31 December 2013, includes the amount of 121.4 millions of Euros related to a new tax of 7% over electricity generation in Spain from 1 January 2013, following the publication of Law 15/2012 on 27 December.

The caption Other operating costs, as at 31 December 2013, includes the amount of 42,668 thousands of Euros related to fines and penalties recognized for the delay in the start of the commercial activity of Porto de Pecém thermoelectric plant and for lower than required availability levels. Additionally, this caption also includes the inventories write-off in the amount of 9,165 thousands of Euros based on the assessment following the ANEEL Resolution 367/09 under which the distributors Bandeirante and Escelsa conducted a physical inventory of all assets assigned to concessions.

The impairment losses on doubtful debts and others are analysed in notes 25 and 26, respectively.

220 Other operating expenses, for the Company, are analysed as follows:

| | Company | | |
|---------------------------|----------|----------|--|
| Thousands of Euros | Dec 2013 | Dec 2012 | |
| Direct and indirect taxes | 1,766 | 1,492 | |
| Donations | 9,212 | 8,443 | |
| Impairment losses: | | | |
| - Trade receivables | - | | |
| - Debtors | 19 | 15 | |
| Other operating costs | 2,112 | 2,396 | |
| | 13,109 | 12,346 | |

12. PROVISIONS

Provisions are analysed as follows:

| | Group | | Company | |
|---------------------------|----------|----------|----------|----------|
| Thousands of Euros | Dec 2013 | Dec 2012 | Dec 2013 | Dec 2012 |
| Charge for the period | 102,082 | 54,411 | 11,232 | 12,171 |
| Write-back for the period | -47,205 | -38,356 | -10,048 | -15,098 |
| | 54,877 | 16,055 | 1,184 | -2,927 |

Provisions for the period, at 31 December 2013, include a net increase in provisions for labor, legal and other contingences in Brazil in the amount of 17 millions of Euros, as well as provisions for contractual, legal and other liabilities and charges in Spain of approximately 35 millions of Euros, which are classified as probable contingencies (see note 37).

13. DEPRECIATION, AMORTISATION EXPENSE AND IMPAIRMENT

Depreciation, amortisation expense and impairment are analysed as follows:

| | Gro | oup | Com | pany |
|--|-----------|-----------|----------|----------|
| Thousands of Euros | Dec 2013 | Dec 2012 | Dec 2013 | Dec 2012 |
| Property, plant and equipment | | | | |
| Buildings and other constructions | 22,947 | 15,836 | 2,837 | 2,899 |
| Plant and machinery | 918,726 | 936,805 | 27 | 26 |
| Other | 67,272 | 77,445 | 12,706 | 11,075 |
| Impairment loss | 56,772 | 54,131 | 4,782 | |
| | 1,065,717 | 1,084,217 | 20,352 | 14,000 |
| Intangible assets | | | | |
| Concession rights and impairment | 84,369 | 78,319 | - | - |
| Intangible assets assigned to concessions - IFRIC 12 | 349,787 | 328,248 | - | _ |
| Other intangibles | 2,616 | 3,105 | 9 | 8 |
| | 436,772 | 409,672 | 9 | 8 |
| Investment property | - | | 670 | _ |
| Compensation of amortisation and depreciation | | | | |
| Partially-funded property, plant and equipment | -26,369 | -24,901 | - | |
| Impairment of Goodwill | 1,127 | _ | _ | - |
| <u> </u> | 1,477,247 | 1,468,988 | 21,031 | 14,008 |
| | | | | |

In 2013, as a result of impairment tests (which assumptions are mentioned in note 19) of wind generation assets and cogeneration in Spain, the EDP Group recognised impairment losses in the caption Property, plant and equipment, in the amount of 16,046 thousands of Euros (EDPR Group) and 31,066 thousands of Euros (HC Energia), due to regulatory changes following the publication of the Royal Decree-Law 9/2013 related with changes in remuneration of wind assets and special regime. Additionally, in EDPR Group there was a write-off of assets under construction in United States of America in the amount of 3,717 thousands of Euros (see note 17).

During 2012, as a result of impairment tests related to wind generation assets in Spain and the United States of America, EDPR Group recognised impairment losses of 45,617 and 7,784 thousands of Euros, respectively.

Under the ANEEL Resolution 367/09, during the third quarter of 2013, the distributors Bandeirante and Escelsa conducted a physical inventory of assets assigned to concessions. Based on the assessment performed, a loss (write-down) in the amount of 20,830 thousands of Euros (59,738 thousands of Reais) was booked, under the caption amortisation of intangible assets assigned to concessions - IFRIC 12 (see note 18).

The partially-funded property, plant and equipment is depreciated on the same basis and at the same rates as the Group's remaining assets, being the corresponding cost compensated through the amortisation of the amounts received (registered under Trade and other payables from commercial activities) on the same basis and at the same rates as the corresponding partially-funded assets.

14. GAINS/ (LOSSES) ON THE SALE OF FINANCIAL ASSETS

Gains / (losses) on the sale of financial assets for the Company are analysed as follows:

| | Dec 2013 | | Dec 2012 | |
|---|------------|-------|------------|--------|
| Thousands of Euros | Disposal % | Value | Disposal % | Value |
| Available-for-sale investments | - | 12 | - | - |
| Investments in subsidiaries and associates: | | | | |
| EDP - Energias do Brasil, S.A. | - | | 11.23% | 87,945 |
| | | 12 | | 87,945 |

In August 2012, the shares that EDP, S.A. held on EDP Energias do Brasil, S.A., corresponding to 53,482,659 ordinary shares, representing 11.23% of the voting rights, totalling 193,909 thousands of Euros were used as a contribution in kind to subscribe a share capital increase in EDP Investments and Services, S.L. of 281,854 thousands of Euros. In accordance with the company's accounting policy, common control transactions are accounted for in company's separate financial statements in accordance with the fair value accounting method, which determined the recognition of a gain of 87,945 thousands of Euros. In October 2012, the financial investment in EDP Investments and Services, S.L. was allocated to EDP Branch in Spain.

15. FINANCIAL INCOME AND EXPENSES

Financial income and expenses, for the Group, are analysed as follows:

| Interest income from loans to associates 19,895 12,263 Interest from derivative financial instruments 135,549 135,149 Derivative financial instruments 394,180 223,691 Other interest income 46,184 57,846 Foreign exchange gains 46,436 59,665 CMEC 51,113 77,322 Other financial income 164,289 111,724 Other financial income 908,567 807,627 Capitalised borrowing costs: - Assigned to concessions (see note 7) -8,529 -11,603 - Other -124,919 -131,400 Interest from derivative financial instruments 116,196 110,444 Derivative financial instruments 404,497 277,315 Other interest expense 36,590 41,239 Foreign exchange losses 51,310 54,801 CMEC 19,035 18,240 Unwinding of liabilities 101,865 114,969 Net interest on the net pensions plan liability (see note 36) 40,097 45,251 Other financial expenses 66,741 61,839 Interest on the medical liabilities and other benefits (see note 36) 40,097 45,251 Other financial expenses 66,741 61,839 Interest on the medical liabilities and other benefits (see note 36) 1,642,350 1,436,924 Interest contact instruments 1,642,350 1,436,924 | | Gro | oup |

The caption Financial income - CMEC totalling 51,113 thousands of Euros includes 16,646 thousands of Euros related to interest on the initial CMEC (31 December 2012: 18,976 thousands of Euros) included in the annuity for 2013, 33,720 thousands of Euros related to the financial effect considered in the calculation of the initial CMEC (31 December 2012: 55,687 thousands of Euros) and 747 thousands of Euros relating to the financial component of the revisable mechanism of CMEC for 2013 (31 December 2012: 2,659 thousands of Euros).

The caption Other financial income includes essentially 89,195 thousands of Euros related with interest income on tariff adjustment and tariff deficit in the national electricity system in Portugal (31 December 2012: 68,808 thousands of Euros), 6,277 thousands of Euros (31 December 2012: 10,851 thousands of Euros) related with interest income on tariff adjustment and tariff deficit in Spain, 50,457 thousands of Euros related to gains, on four securitization operations of part of the 2012 electricity tariff deficit related to the 2012 over cost for the aquisition of electricity from Special Regime Generators and a sale transaction related with 2011 CMEC revisable component (see note 26).

Capitalised borrowing costs includes the interest capitalised in assets under construction according to the accounting policy described in paragraph 2 h). The interest rates considered for the referred capitalisation are in accordance with market rates.

Financial expenses - CMEC, in the amount of 19,035 thousands of Euros (31 December 2012: 18,240 thousands of Euros), relates mainly to the unwinding of the initial CMEC, booked against Deferred Income (see note 39).

The Unwinding of discounted value liabilities refers essentially to, (i) the unwinding of the dismantling and decommissioning provision for wind generation assets of 10,173 thousands of Euros (31 December 2012: 7,862 thousands of Euros), (ii) the implied financial return in institutional partnership in USA wind farms which amounted to 60,840 thousands of Euros (31 December 2012: 68,431 thousands of Euros), and (iii) the financial expenses related to the discount of the debt associated to the concessions of Alqueva/Pedrógão, Investo and Enerpeixe of 10,505 thousands of Euros (31 December 2012: 10,610 thousands of Euros), 3,534 thousands of Euros (31 December 2012: 3,035 thousands of Euros) and 9,097 thousands of Euros (31 December 2012: 10,575 thousands of Euros), respectively. Additionally in 2012, this caption included the unwinding of the put option over EDP Renewables Italia in the amount of 214 thousands of Euros.

As at 31 December 2012, the caption Other financial expenses includes the available-for-sale financial assets impairment loss in the amount of 9,328 thousands of Euros, which refers essentially to the impairment of the investment held in BCP in the amount of 5,495 thousands of Euros, as a result of the listed price decrease of these shares (see note 22).

VEVERENDING ENERGY

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

Financial income and expenses, for the Company, are analysed as follows:

| | Com | npany | | |
|--|-----------|-----------|--|--|
| Thousands of Euros | Dec 2013 | Dec 2012 | | |
| Financial income | | | | |
| Interest income from loans to subsidiaries and related parties | 490,544 | 433,734 | | |
| Derivative financial instruments | 487,722 | 350,285 | | |
| Income from equity investments | 752,630 | 643,458 | | |
| Other financial income | 68,476 | 62,968 | | |

| | 752,630 | 643,458 | |

16. INCOME TAX

In accordance with current legislation, tax returns are subject to review and correction by the tax authorities during subsequent periods. In Portugal the limit is 4 years, or 5 or 6 years if tax losses and tax benefits have been used. In Spain the period is 4 years and in Brazil it is 5 years. In the United States of America, in general, for the IRS (Internal Revenue Service) to issue additional income tax assessments for an entity is 3 years.

Tax losses generated in each fiscal year, which are also subject to inspection and adjustment, can be deducted to the taxable income assessed in the subsequent years (5 years in Portugal for the tax losses assessed in 2012 and 2013, 18 in Spain, 20 in the USA and Canada, 5 in Poland, 7 in Romania, 9 in the Netherlands and without an expiry date in Brazil, France, Italy, United Kingdom and Belgium). Moreover, in the Netherlands and United Kingdom the tax losses may be carried back to the previous tax year and in the USA and Canada to the 2 and 3 previous years, respectively. However, the deduction of tax losses in Portugal, Spain, Brazil, France, Italy and Poland may be limited to a percentage of the taxable income of the year. The EDP Group companies are taxed, whenever possible, on a consolidated basis as allowed by the tax legislation of the respective countries.

In August 2011, the Royal Decree-Law 9/2011 was approved in Spain, introducing a set of amendments to the Spanish income tax legislation. From 1 January 2012 onwards, the period for off setting prior years' tax losses carry forward was extended from 15 to 18 years.

In Portugal, the Law 64-B/2011 of 30 December (2012 State Budget Law) has extended the period to carry forward tax losses from 4 to 5 years (for tax losses generated after 1 January 2012). However, the deduction of tax losses (even if generated before 2012) cannot exceed 75% of the taxable income earned in each tax period. This limitation does not prevent the deduction of the non-deducted losses, in the same conditions, until the end of the respective tax deductible period.

In Spain, the Royal Decree-Law 12/2012, published on 31 March 2012, established a set of measures aimed to reduce the public deficit, namely a general limitation for the deduction of the net financial expenses to 30% limit of the adjusted operational profit. The amount of financial expenses incurred which exceed the above mentioned 30% limit may be deducted in the 18 following years, provided that this limit is not exceeded in each year. Additionally, the maximum annual rate of goodwill amortisation is established at 1% for the tax years of 2012 and 2013.

The Royal Decree-Law 20/2012, which was approved in July 2012, introduced a new set of temporary measures regarding the Spanish Corporate Income Tax legislation. The main measures are related to the change of the method for the calculation of the payments on account due by large-sized companies in the years 2012 and 2013 and to the amendment of the limits to the deductibility of tax losses carried forward for the years 2012 and 2013:

- Companies whose last year turnover are between 20 and 60 millions of Euros, can only deduct tax losses up to 50% of the taxable income compared to the former limit of 75%; and
- Companies whose last year turnover exceed 60 millions of Euros, can only deduct tax losses up to 25% of the taxable income compared to the former limit of 50%.

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

Law 16/2012 was published on 28 December, introducing a set of tax measures aiming at the reduction of the public deficit and the expansion of the economic activity in Spain. The main measures with impact on the Group subsidiaries located in Spain are the following:

- Limit of 70% of the deductibility for tax purposes of the amortisation and depreciation of intangible and tangible assets and investment properties, on the tax years of 2013 and 2014. Therefore, the amortisation and depreciation which is not deductible for tax purposes in 2013 and 2014, may be deducted on a straight basis over a 10-year period or over the remaining useful life of the corresponding assets from the tax year of 2015 onwards; and

- Possibility of companies revaluate their tangible assets and investment properties, based on pre defined coefficients. According to the law, the effect of the reevaluation was taxed in 2013 at a single rate of 5% over the net increase in the taxable asset value. The amortisation and depreciation expense of the above mentioned net increase (revaluation) was tax deductible for the revaluated assets remaining useful life.

In Portugal, the Law 64-A/2011 of 30 December, determines that the state surcharge will be calculated as follows (i) at a rate of 3% over taxable income in the range of 1.5 to 10 millions of Euros, and (ii) at a rate of 5% over taxable income exceeding 10 millions of Euros. The Law 66-B/2012 of 31 December aggravated the state surcharge as follows: (i) at a rate of 3% over taxable income in the range of 1.5 to 7.5 millions of Euros, and (ii) at a rate of 5% over taxable income exceeding 7.5 millions of Euros. In accordance with n.º 4 of Article 116° of the Law 64-B/2011, such modification applies for a two year period starting in 1 January 2012. Accordingly, during 2012 and 2013, the maximum corporate income tax rate in Portugal applicable to entities with taxable income exceeding 10 and 7.5 millions of Euros, respectively, is 31.5%.

The Law 2/2014, published on 16 January 2014, which approved the Reform of the CIT, introduced a set of new tax measures. The main measures are related to the reduction of CIT rate and the extension of the period to carry forward tax losses:

- The CIT rate is reduced from 25% to 23% in 2014 to which is added the municipal and state tax. Additionally, a new tier of state surcharge was established over taxable income exceeding 35 millions of Euros, at a rate of 7%. Whereas these tax rates are already substantially enacted at the balance sheet date, they have been considered in the calculation of deferred tax assets and liabilities as at 31 December 2013;
- The period to carry forward prior years' tax losses was extended from 5 to 12 years (for tax losses generated on or after 1 January 2014). Additionally, the deduction cap is reduced from 75% to 70% of the taxable income of the year.

In previous years, as a result of the Portuguese Tax Authorities interpretations regarding municipal surcharge and the underlying IT systems used by the tax authorities, EDP Group paid in excess municipal surcharge on the individual taxable income of the subsidiaries forming EDP taxation group in the amount of 43.1 millions of Euros.

On 30 December 2011, the Administrative Court of Lisbon issued a favourable decision to EDP Group regarding the municipal surcharge of 2007, which resulted in the recognition of an income of 10 millions of Euros in 2011. On 24 April 2012, an additional favourable decision was issued by the Administrative Court of Lisbon, regarding the municipal surcharge of 2010 in the amount of 12.7 millions of Euros, which was recorded as an income in the second quarter of 2012. On 31 December 2012, the Administrative Court of Lisbon formally released a decision in favour of EDP regarding the 2008 municipal surcharge and autonomous taxation, which resulted in the recognition of an income of 7.5 millions of Euros in 2012. On 20 May 2013, an additional favourable decision was issued by the Administrative Court of Lisbon, regarding the municipal surcharge of 2009 paid in excess in the amount of 1.6 millions of Euros, which was recorded as an income in the second quarter of 2013.

On 31 December 2013, the total amount of 2011 municipal surcharge paid in excess, for which EDP Group is still awaiting for a formal decision on the legal procedures, amounts to 11 millions of Euros.

Income tax expense is analysed as follows:

| | Gro | oup | Company | |
|--------------------|----------|----------|----------|----------|
| Thousands of Euros | Dec 2013 | Dec 2012 | Dec 2013 | Dec 2012 |
| Current tax | -263,896 | -154,025 | -25,434 | -15,204 |
| Deferred tax | 75,899 | -128,512 | 240 | 106,560 |
| | -187,997 | -282,537 | -25,194 | 91,356 |

The reconciliation between the nominal and the effective income tax rate for the Group, as at 31 December 2013, is analysed as follows:

| | | Dec 2013 | |
|---|--------|-----------|----------|
| Thousands of Euros | Rate % | Tax basis | Tax |
| Nominal rate and income tax | 26.5% | 1,381,520 | 366,103 |
| Tax losses and tax credits | 0.4% | 20,015 | 5,304 |
| Dividends | -1.0% | -53,162 | -14,088 |
| Tax benefits | -4.3% | -222,060 | -58,846 |
| Non deductible provisions and amortisations for tax purposes | 1.8% | 95,800 | 25,387 |
| Accounting revaluations | -11.8% | -617,698 | -163,690 |
| Fair value of financial instruments and financial investments | -3.1% | -161,287 | -42,741 |
| Financial investments in associates and subsidiaries | -0.7% | -36,279 | -9,614 |
| Different tax rates (includes state surcharge) | 7.8% | 405,479 | 107,452 |
| Other adjustments and changes in estimates | -2.0% | -102,906 | -27,270 |
| Effective tax rate and total income tax | 13.6% | 709,422 | 187,997 |
| | | | |

The caption Accounting revaluations includes essentially the fiscal revaluation of EDP's assets held in Spain in accordance with Law 16/2012 of 27 December, which does not have accounting impact but led to an increase of the assets' tax basis of 542 millions of Euros. Therefore, the Group recognised deferred tax assets of 160 millions of Euros, that will be recovered through the tax deduction of assets' increased depreciation charge of the year starting on 1 January 2015 and along its remaining useful life. The effect of the revaluation was taxed in 2013 at a 5% flat rate, whose effect was recognised under current income tax, in the total amount of 27 millions of Euros. Consequently, the net effect of this revaluation in the net income for the period is approximately 133 millions of Euros.

The reconciliation between the nominal and the effective income tax rate for the Group, as at 31 December 2012, is analysed as follows:

| | Dec 2012 | | |
|--|----------|-----------|---------|
| Thousands of Euros | Rate % | Tax basis | Tax |
| Nominal rate and income tax | 26.5% | 1,464,692 | 388,143 |
| Tax losses and tax credits | -2.2% | -122,974 | -32,588 |
| Tax benefits | -2.2% | -119,887 | -31,770 |
| Financial investments in associates and subsidiaries | -5.0% | -276,325 | -73,226 |
| Different tax rates (includes state surcharge) | 4.3% | 236,506 | 62,674 |
| Other adjustments and changes in estimates | -2.1% | -115,834 | -30,696 |
| Effective tax rate and total income tax | 19.3% | 1,066,178 | 282,537 |

The reconciliation between the nominal and the effective income tax rate for the Company, as at 31 December 2013, is analysed as follows:

| | Dec 2013 | | |
|--|----------|-----------|----------|
| Thousands of Euros | Rate % | Tax basis | Tax |
| Nominal rate and income tax | 26.5% | 816,069 | 216,258 |
| Tax losses and tax credits | -0.3% | -10,502 | -2,783 |
| Dividends | -26.3% | -809,551 | -214,531 |
| Different tax rates (includes state surcharge) | 2.7% | 84,064 | 22,277 |
| Other adjustments and changes in estimates | 0.5% | 14,992 | 3,973 |
| Effective tax rate and total income tax | 3.1% | 95,072 | 25,194 |

As a result of the change in the economic, regulatory and tax environment in Spain, the caption Tax losses and tax credits in 31 December 2013 includes the reversal of deferred tax assets in the amount of 27 millions of Euros and the recognition of deferred tax liabilities in the amount of 26 millions of Euros related to contingencies on tax losses carry forward in Spain.

The reconciliation between the nominal and the effective income tax rate for the Company, as at 31 December 2012, is analysed as follows:

| | | Dec 2012 | | | |
|--|--------|-----------|----------|--|--|
| Thousands of Euros | Rate % | Tax basis | Tax | | |
| Nominal rate and income tax | 26.5% | 741,326 | 196,451 | | |
| Non deductible provisions and amortisations for tax purposes | 2.8% | 79,328 | 21,022 | | |
| Tax losses and tax credits | -6.8% | -190,177 | -50,397 | | |
| Dividends | -24.2% | -677,947 | -179,656 | | |
| Difference between tax and accounting gains/losses | -3.6% | -100,457 | -26,621 | | |
| Different tax rates (includes state surcharge) | 2.4% | 66,834 | 17,711 | | |
| Financial investments in associates and subsidiaries | -9.1% | -255,181 | -67,623 | | |
| Other adjustments and changes in estimates | -0.3% | -8,465 | -2,243 | | |
| Effective tax rate and total income tax | -12.3% | -344,739 | -91,356 | | |

Financial investments in associates and subsidiaries include the effect of the reversal of a deferred tax liability which was accounted for following the sale of the shareholding in Oni, by virtue of the extinction of the facts which gave rise to its constitution at the transaction date.

The effective income tax rate for the EDP Group and EDP, S.A. is analysed as follows:

| | Group | | Company | |
|---------------------------|-----------|-----------|----------|----------|
| Thousands of Euros | Dec 2013 | Dec 2012 | Dec 2013 | Dec 2012 |
| Profit before tax | 1,381,520 | 1,464,692 | 816,069 | 741,326 |
| Income tax | -187,997 | -282,537 | -25,194 | 91,356 |
| Effective income tax rate | 13.6% | 19.3% | 3.1% | -12.3% |

Additions include the investment in wind farms by the subgroups EDPR EU and EDPR NA. Additionally, the EDPR EU subgroup carried out investments related with the construction of the solar photovoltaic plants in Romania. The subgroup EDP Brasil carried out investments related with Porto de Pecém coal power plant, with Santo Antônio do Jari hydroelectric plant and Cachoeira Caldeirão hydroelectric plant. In the Portuguese generation activity, the Group is carrying out hydroelectric investments in the construction of several new power plants and power enhancement projects (Baixo Sabor, Foz Tua, Ribeiradio-Ermida, Venda Nova III and Salamonde II).

160,069

619,918

13,461,264

14,241,251

Transfers from assets under construction into operation during 2013, refer mainly to wind farms of EDP Renováveis that became operational and to the second group of the thermoelectric plant of Porto de Pecém I.

The movement in Exchange differences in the year results mainly from the depreciation of American Dollar (USD), of Polish Zloty (PLN) and Brazilian Real (BRL) against the Euro in 2013.

Perimeter Variations / Regularisations include the effect of the acquisition of 100% of the share capital of Lone Valley Solar Park I L.L.C. (ex-EDPR Agincourt L.L.C.), Lone Valley Solar Park II L.L.C. (ex-EDPR Marathon L.L.C.), Gravitangle - Fotovoltaica Unipessoal, Lda., Dejann Trading and Investments Proprietary Ltd., Molen Wind II S.P. ZO.O. and the liquidation of Parc Eolic Molinars S.L. (see note 5).

The movements in Property, plant and equipment, for the Group, for the year ended 31 December 2012 are analysed as follows:

| | | | | | | Perimeter Variations/ | |
|-----------------------------------|------------|-----------|------------|------------|-------------|-----------------------|-------------|
| | Balance at | | Disposals/ | | Exchange | Regulari- | Balance at |
| Thousands of Euros | 1 January | Additions | Write-offs | Transfers | Differences | sations | 31 December |

| | 13,420,322 | 1,084,217 | -142,266 | -58,196 | -60,922 | -1,904 | 14,241,251 |

Charge / Impairment losses includes an impairment of 53,401 thousands of Euros on wind generation assets in the United States of America and Spain (see note 13), and 22,499 thousands of Euros regarding the depreciation of Setúbal thermoelectric power plant, up to its recoverable amount, following the decision to terminate the operation at 31 December 2012.

Disposals / Write-offs includes 88,228 thousands of Euros related with Barreiro thermal power plant due to the completion of dismantling works, during the second quarter of 2012. The accumulated depreciation associated to this thermal power plant amounts to 88,228 thousands of Euros.

Transfers include 61,754 thousands of Euros of cost of acquisition and 58,196 thousands of Euros of accumulated depreciation, related to cogeneration activity assets, which were classified as assets held for sale (see note 42).

Transfers from assets under construction into operation in 2012, refer mainly to wind farms of EDP Renováveis that became operational and to the first group of thermoelectric plant of Porto de Pecém I.

The movement in Exchange differences in the year results mainly from the appreciation of the Zloty (PLN) and the depreciation of the American Dolar (USD) and Brazilian Real (BRL) against the Euro in 2012.

Perimeter Variations / Regularisations includes the effect of the acquisition of Pietragalla Eolico S.R.L., J&Z SP. ZO.O., the acquisition of solar photovoltaic companies in Romenia, the effect of the sale of the companies holders of the mini-hydrics detained in Spain, as well as the decrease of the financial interest in Windplus, S.A. from 42% to 31% due to a share capital increase with dilution of the shareholding held by EDP Inovação, S.A. These transactions occurred during 2012.

As at 31 December 2013, Property, plant and equipment financed through lease contracts for the Group, amount to 14,709 thousands of Euros (14,985 thousands of Euros at 31 December 2012), with accumulated depreciation of 6,598 thousands of Euros (6,277 thousands of Euros at 31 December 2012) and the respective future lease payments amount to 7,564 thousands of Euros (8,606 thousands of Euros at 31 December 2012). Property, plant and equipment financed by leasing contracts is detailed as follows:

| | | Dec 2013 | | | Dec 2012 | |
|----------------------------|-----------|----------|---------------------|-----------|----------|--------------|
| | | | Future lease | | | Future lease |
| Thousands of Euros | Principal | Interest | payments | Principal | Interest | payments |
| Less than one year | 3,116 | 306 | 3,422 | 3,281 | 268 | 3,549 |
| Between one and five years | 3,524 | 252 | 3,776 | 4,070 | 255 | 4,325 |
| More than five years | 352 | 14 | 366 | 712 | 20 | 732 |
| | 6,992 | 572 | 7,564 | 8,063 | 543 | 8,606 |

During 2013, the costs incurred with these assets amounted to 674 thousands of Euros (31 December 2012: 657 thousands of Euros) and are booked in the income statement under Supplies and services.

NG ENERGY

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

The movements in Property, plant and equipment, for the Company, for the year ended 31 December 2013 are analysed as follows:

| | Balance at | | Disposals/ | | Regulari- | Balance at |
|--|------------|------------|------------|-------------|--------------|----------------------|

| Other | 69,884 | 11,101 | -978 | - | 584 | 80,591 |
| | 92,357 | 14,000 | -3,610 | - | 1,147 | 103,894 |

As at 31 December 2013 and for the Company, the Property, plant and equipment financed by leasing contracts amount to 3,792 thousands of Euros (3,883 thousands of Euros at 31 December 2012), with accumulated depreciation of 1,545 thousands of Euros (1,494 thousands of Euros at 31 December 2012) and the respective future lease payments amount to 2,047 thousands of Euros (2,277 thousands of Euros at 31 December 2012). Property, plant and equipment financed by leasing contracts is detailed as follows:

| | Dec 2013 | | | Dec 2012 | | | |
|----------------------------|-----------|----------|--------------|-----------|----------|--------------|--|
| | | | Future lease | | | Future lease | |
| Thousands of Euros | Principal | Interest | payments | Principal | Interest | payments | |
| Less than one year | 850 | 86 | 936 | 823 | 79 | 902 | |
| Between one and five years | 983 | 67 | 1,050 | 1,097 | 71 | 1,168 | |
| More than five years | 59 | 2 | 61 | 201 | 6 | 207 | |
| | 1,892 | 155 | 2,047 | 2,121 | 156 | 2,277 | |

During 2013, the costs incurred related to these assets amount to 164 thousands of Euros (147 thousands of Euros at 31 December 2012) and are booked under Supplies and services in the income statement.

18. INTANGIBLE ASSETS

This caption is analysed as follows:

| | Group | | |
|--|------------|------------|--|
| Thousands of Euros | Dec 2013 | Dec 2012 | |
| Cost | | | |
| Concession rights | 15,017,524 | 15,443,537 | |
| CO2 licences | 235,594 | 320,164 | |
| Other intangibles | 161,526 | 101,616 | |
| Intangible assets in progress | 580,193 | 551,038 | |
| | 15,994,837 | 16,416,355 | |
| Accumulated depreciation and impairment losses | | | |
| Depreciation of concession rights | -434,156 | -406,567 | |
| Depreciation of other intangibles | -2,616 | -3,105 | |
| Accumulated depreciation in previous years | -9,529,758 | -9,464,821 | |
| | -9,966,530 | -9,874,493 | |
| Carrying amount | 6,028,307 | 6,541,862 | |

The concession rights over the electricity distribution networks in Brazil, namely Bandeirante (State of São Paulo) and Escelsa (State of Espírito Santo) are amortised on a straight-line basis over the concession period until 2028 and 2025, respectively. Concession rights in Portugal relate to the natural gas distribution network (Portgás), being amortised on a straight-line basis over the concession period, until 2047, as well as the concession of the public hydric domain for hydroelectric generation (EDP Produção and Hidroeléctrica do Guadiana).

The concession rights over electricity production in Brazil, namely for Lajeado Energia and Investco, are amortised on a straight-line basis over the concession period, until 2032.

The movements in Intangible assets during the year ended 31 December 2013, for the Group, are analysed as follows:

| | | | | | | Perimeter | | - |
|--------------------------------------|------------|-----------|-------------|-----------|-------------|--------------|---------------|---|
| | Balance at | | Disposals / | | Exchange | variations / | Balance at 31 | |

The caption Hydric Portugal includes an increase of 18,522 thousands of Euros (31 December 2012: 28,497 thousands of Euros) related to the power enhancement performed during the first nine months of 2013 in the Alqueva hydroelectric power plant.

Additions of CO2 Licences is related to licences purchased in the market. The Disposals / write-off of CO2 licences include CO2 licences consumed during 2012 and delivered to regulatory authorities in the amount of 144,595 thousands of Euros.

Additions for other intangibles include the power purchase agreements of Rising Tree in the amount of 47,297 thousands of Euros and the recognition of the deferred portion of green certificate rights in Romania in the amount of 12,941 thousands of Euros.

Transfers include 217,154 thousands of Euros of cost of acquisition and 6 thousands of Euros of accumulated depreciation, related with Brazil generation assets, which were classified as assets held for sale (see note 42). Additionally, the net transfers of intangible assets assigned to concessions of 108,061 thousands of Euros relate to increases of financial assets under IFRIC 12, included under Debtors and other assets from commercial activities (see note 26).

The movements in Intangible assets during the year ended 31 December 2012, for the Group, are analysed as follows:

Additions of CO2 Licences as at 31 December 2012 include 109,026 thousands of Euros of CO2 licences granted free of charge to the EDP Group plants operating in Portugal and in Spain and 60,020 thousands of Euros of licences purchased at market. The market for CO2 licences is regulated by "Plano Nacional de Atribuição de Licenças de Emissão" (PNALE) in Portugal, and by "Plano Nacional de Asignación de Derechos de Emisión de Gases de Efecto Invernadero" (PNADE) in Spain, which covers the period 2008-2012. The disposals / write-off of CO2 licences correspond to CO2 licences consumed during 2011 and delivered to regulatory authorities in the amount of 199,909 thousands of Euros and 6,282 thousands of Euros sold in the market.

Transfers in CO2 Licences in the amount of 1,749 thousands of Euros are related with the transfer of cogeneration assets to assets held for sale (see note 42).

The net transfers of intangible assets under construction assigned to concessions in the amount of 123,181 thousands of Euros are related to the transfer to Debtors and other assets from commercial activities of the amount corresponding to the increase of financial assets related with IFRIC 12. This amount includes the effect of the useful lives extension of assets assigned to concessions, determined by the application of the new depreciation rates on the electric sector in Brazil by "Agência de Energia Eléctrica" (ANEEL), in the amount of 12,985 thousands of Euros (32,572 thousands of Reais), during 2012.

19. GOODWILL

Goodwill for the Group, resulting from the difference between the acquisition value and the corresponding share of the fair value of the assets acquired, at the acquisition date, is analysed as follows:

| | Group | | | |
|----------------------|-----------|-----------|--|--|
| Thousands of Euros | Dec 2013 | Dec 2012 | | |
| HC Energia Group | 1,946,935 | 1,919,526 | | |
| EDP Renováveis Group | 1,255,013 | 1,301,218 | | |
| EDP Brasil Group | 52,904 | 55,564 | | |
| Other | 41,022 | 42,149 | | |
| | 3,295,874 | 3,318,457 | | |

The movements in Goodwill during 2013, are analysed as follows:

| | Balance at | | | | Exchange | Regularisa- | Balance at |
|----------------------|------------|-----------|-----------|------------|-------------|-------------|-------------|
| Thousands of Euros | 1 January | Increases | Decreases | Impairment | differences | tions | 31 December |
| HC Energia Group | 1,919,526 | 27,409 | - | - | - | | 1,946,935 |
| EDP Renováveis Group | 1,301,218 | 1,152 | -21,050 | | -26,307 | | 1,255,013 |
| EDP Brasil Group | 55,564 | - | - | - | -2,660 | - | 52,904 |
| Other | 42,149 | | - | -1,127 | - | | 41,022 |
| | 3,318,457 | 28,561 | -21,050 | -1,127 | -28,967 | - | 3,295,874 |

The movements in Goodwill during 2012, are analysed as follows:

| Thousands of Euros | Balance at 1 January | Increases | Decreases | Impairment | Exchange differences | Regularisa- tions | Balance at 31 December |
|----------------------|-------------------------|-----------|-----------|------------|----------------------|----------------------|---------------------------|
| HC Energia Group | 1,916,548 | 2,978 | - | | - | | 1,919,526 |
| EDP Renováveis Group | 1,311,133 | 12,465 | -32 | - | -10,047 | -12,301 | 1,301,218 |
| EDP Brasil Group | 57,427 | | - | | -1,863 | | 55,564 |
| Other | 42,149 | | - | | - | | 42,149 |
| | 3,327,257 | 15,443 | -32 | - | -11,910 | -12,301 | 3,318,457 |

HC Energia Group

During 2013, the goodwill held in HC Group increased by 26,406 thousands of Euros as a result of the revaluation of the liability relating to the anticipated acquisition of non-controlling interests from Liberbank (ex-Cajastur), through the existing written put option held by this entity over 3.13% of the share capital of HC Energia. In December 2013, the put option held by Liberbank over 3.13% of the share capital of HC Energia was partially exercised in 3%. As a result of the revaluation of the liability relating to the anticipated acquisition of non-controlling interests from Liberbank, through the put option held over 0.13% of the share capital of HC Energia, to be exercised until 31 December 2017, the goodwill increased by 1,003 thousands of Euros (31 December 2012: increase by 2,978 thousands of Euros), as described under accounting policy - note 2b).

EDP Renováveis Group

The goodwill held in EDP Renováveis Group, with reference to 31 December 2013 and 2012, is analysed as follows:

| | EDP Renovaveis Gro | | |
|--------------------------------------|--------------------|-----------|--|
| Thousands of Euros | Dec 2013 | Dec 2012 | |
| Goodwill in EDPR Europe Group | 678,544 | 699,522 | |
| Goodwill in EDPR North America Group | 574,867 | 600,302 | |
| Others | 1,602 | 1,394 | |
| | 1,255,013 | 1,301,218 | |

EDPR Europe Group

The goodwill movement in EDPR EU Group in 2013 includes essentially a decrease in the amount of 19,173 thousands of Euros related to the contingent prices revision of some purchase agreements signed before 1 January 2010, date of the adoption of the revised IFRS 3 (as described in accounting policy 2b).

In 2012, the increase net of regularisations in EDP Renováveis Group includes the goodwill after purchase price allocation for the companies acquisition of EDPR Italia Group and EDPR Romania Group.

EDPR North America Group

The goodwill movement in EDPR North America in 2013 relates with the depreciation of the USD against the Euro.

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

Other information for purchase price allocation included in 2013

During 2013 EDP Renewables Polska, Sp. zo. o. acquired 65.07% of the share capital of the company Molen Wind II Sp. zo. o. (see note 5) and has carried out the purchase price allocation which originated the recognition of an operating income of 3,477 thousands of Euros (see note 8).

| | | | Assets and |
|-----------------------------------|------------|--------|---------------------------|

Goodwill impairment test analysis - EDP Group

The recoverable amount of the goodwill in subsidiaries is assessed annually, as at 30 September, independently of the existence of any indicators of impairment. Impairment losses are recognised in the income statement. The recoverable amount is determined based on the value in use of the assets, calculated using valuation methodologies supported by discounted cash flow techniques, considering market conditions, the time value of money and the business risks.

NEVERENDING ENERGY

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

The recoverable amount testing is performed for each cash generating unit, identified in each country where EDP Group develops its activities/operations, namely:

- HC Energia (including NG Energia) Generation, Distribution & Supply of electricity and Distribution & Supply of gas;
- EDPR Europe Wind generation;
- EDPR North America and EDPR Brasil Wind generation;
- EDP Brasil Generation, Distribution, and Supply of electricity.

Therefore, for the purposes of these tests, the EDP Group has defined a set of assumptions to determine the recoverable amount of the main investments of the Group.

Goodwill impairment test analysis - HC Energia Group (including NG Energia)

The discount rates after taxes used by the Group in the impairment test analysis range between 5.70% and 6.77% (2012: between 6.77% and 7.47% respectively).

Regarding to generation business the future cash flow projection corresponds to the remaining useful life of the respective assets (power plants). In the electricity and gas transmission business the cash flow projection period considered was five years added by a growth rate, since long-term contracts exist. For the remaining businesses there are estimated price curves for the reference periods.

The main assumptions on which impairment tests are based are as follows:

- In the generation business, the estimated energy produced by the power plants: consider the best estimate of future market demand and total installed capacity;
- Prices of electricity, gas and coal were defined considering the market expectations regarding future price curves and considering the regulation in force. Contracted prices for future long term purchases were also used;
- Investment costs: the best available estimates of the future investments were used in order to guarantee a regular use of existing assets, as well as the estimates that resulted from legislative changes;
- Operating costs: operating costs were projected consistent with the company's experience and internal models;
- The growth rates used to make projections are the following: (i) for the electricity generation is zero; (ii) for electricity supply is 1.25%; (iii) for electricity distribution is 2.1%; and (iv) for gas activity is 1%. These growth rates are based on the market growth and inflation expectations;
- In the regulated business, namely distribution of electricity and gas, officially approved asset remuneration was used, considering the regulated mechanisms for the annual remuneration updates;
- Discount rate: the discount rates used reflect EDP Group's best estimate regarding the specific risks associated to each CGU.

The Group has performed a series of sensitivity analyses to the results of impairment tests in some key variables, such as (i) cost of fuel and respectively pool price (ii) discount rates; and (iii) trade energy. The sensitivity analysis results show that (i) an increase of 5% in the cost of fuel accompained by the expected impact in the prices and operation hours of the generation assets, or (ii) a decrease of 5% of trade energy, or (iii) an increase of 100 bps on the discount rate do not result in any impairment indicators.

Goodwill impairment test analysis - EDP Renováveis

The future cash flows projection used is the useful life of the assets (25 years) which is consistent with the current depreciation method. This projection also incorporate the long-term energy sale contracts in place and long-term estimates of energy prices, for the asset with market exposure.

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

The main assumptions used for the impairment tests are as follows:

- Power produced: net capacity factors used for each CGU utilize the wind studies carried out, which takes into account the long-term predictability of wind output and that wind generation is supported in nearly all countries by regulatory mechanisms that allow for production and priority dispatching whenever weather conditions permit;
- Electricity remuneration: regulated or contracted remuneration has been applied where available, as for the CGUs that benefit from regulated remuneration or that have signed contracts to sell their output during all or part of their useful life; where this is not available, prices were derived using price curves projected by the company based on its experience, internal models and using external data references;
- New capacity: tests were based on the best information available on the wind farms expected to be built in coming years, adjusted by probability of success and by the growth prospects of the company based on the Business Plan Targets, its historical growth and market size projections. The tests considered the contracted and expected prices to buy turbines from various suppliers;
- Operating costs: established contracts for land leases and maintenance agreements were used; other operating costs were projected consistent with the company's experience and internal models;
- Terminal value: considered at 15% of the initial investment in each wind farm, considering inflation; and
- Discount rate: the discount rates used are post-tax, reflect EDPR Group's best estimate of the risks specific to each CGU and range as follows:

| | 2013 | 2012 |
|--------------------|-------------|-------------|
| Portugal and Spain | 5.3% - 6.5% | 7.0% - 7.1% |
| United States | 6.0% - 7.3% | 5.5% - 6.8% |
| Rest of Europe | 4.8% - 7.6% | 5.9% - 8.2% |

Impairment tests were performed taking into account the regulation changes in each country, as disclosed in note 1.

- A series of sensitivity analysis were performed on the results of impairment tests namely in some of the key variables, such as:
 - EDPR NA, decrease in the Net Capacity Factors;
 - EDPR NA, 5% and 10% reduction of Merchant Prices.

Furthermore, EDPR Group has done an additional sensitivity analysis by increasing 100 basis points the discount rate used in the base case for EDPR NA and EDPR EU CGU's. These sensitivity analysis performed for each assumption independently did not indicate any impairment for the goodwill allocated to each country.

Goodwill impairment test analysis - EDP Brasil

For EDP Brasil, the cash flows were determined based on the production and consumption volume and estimated tariffs and installed capacity and tariff evolution prospects in the different markets / power purchase agreements. The period considered for the cash flows corresponds to the useful life of the plant & machinery and other relevant equipments or until the end of the concession contracts, if lower than the useful life.

The discount rates used reflect the specific risks for each activities: 7.6% in generation, 8.2% in distribution and 9.1% in supply.

The terminal value of the distribution business corresponds to the present value of the assets at the end of the concession period (Regulatory Asset Base). In the generation / supply business, the terminal value corresponds to the present value of the assets net of amortisation at the end of the concession period.

This sensitivity analysis of considering +100bps on the discount rate does not result in any impairment indicators for "goodwill".

20. INVESTMENTS IN SUBSIDIARIES (COMPANY BASIS)

This caption is analysed as follows:

| | Company | | |
|---|------------|------------|--|
| Thousands of Euros | Dec 2013 | Dec 2012 | |
| Acquisition cost | 11,196,465 | 11,012,092 | |
| Effect of equity method (transition to IFRS) | -902,524 | -902,524 | |
| Equity investments in subsidiaries | 10,293,941 | 10,109,568 | |
| Impairment losses on equity investments in subsidiaries | -200,943 | -200,034 | |
| | 10,092,998 | 9,909,534 | |

On the date of transition to IFRS, EDP, S.A. ceased to apply the equity method of accounting to its investments in its unconsolidated financial statements, having considered this method in the determination of the deemed cost at transition date.

NEVERENDING ENERGY

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

Investments in subsidiaries are analysed as follows:

| | | pany |
|---|------------|------------|
| | Dec 2013 | Dec 2012 |
| Thousands of Euros | Net amount | Net amount |
| Investments in subsidiaries: | | |
| EDP Renováveis S.A. | 2,939,889 | 2,939,889 |
| EDP Gestão de Produção de Energia, S.A. | 2,156,054 | 2,156,054 |
| Hidroeléctrica del Cantábrico, S.A. | 2,087,871 | 1,981,798 |
| EDP Distribuição de Energia, S.A. | 1,686,145 | 1,686,145 |
| EDP Servicios Financieros España, S.A. | 482,695 | 482,695 |
| EDP Investments and Services, S.L. | 281,854 | 281,854 |
| EDP Comercial, S.A. | 238,473 | 238,473 |
| Balwerk - Consultadoria Económica e Participações, Soc. Unipessoal, Lda | 71,686 | 1,686 |
| EDP Serviços - Sistemas para a Qualidade e Eficiência Energética, S.A. | 60,600 | 53,100 |
| Other | 87,731 | 87,840 |
| | 10,092,998 | 9,909,534 |

The variation in the caption Investments in subsidiaries on a company basis (183,464 thousands of Euros) results from the partial exercise of the put option held by Liberbank (ex-Cajastur) over the capital of HC Energia, resulting in an increase of EDP share in 3% (in the amount of 106,073 thousands of Euros), with a remaining put option of 0.13% to be exercised until 31 December 2017. Additionally during 2013, supplementary capital contributions were granted to the subsidiaries Balwerk - Consultadoria Económica e Participações, Soc. Unipessoal, Lda (70,000 thousands of Euros) and EDP Serviços - Sistemas para a Qualidade e Eficiência Energética, S.A. (7,500 thousands of Euros).

21. INVESTMENTS IN ASSOCIATES

This caption is analysed as follows:

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

22. AVAILABLE FOR SALE INVESTMENTS

This caption is analysed as follows:

| | Gro | oup | Com | pany |
|---|----------|----------|----------|----------|
| Thousands of Euros | Dec 2013 | Dec 2012 | Dec 2013 | Dec 2012 |
| Banco Comercial Português, S.A. | 65,790 | 29,653 | - | |
| REN - Redes Energéticas Nacionais, SGPS, S.A. | 41,828 | 38,408 | 41,828 | 38,408 |
| Tejo Energia, S.A. | 21,500 | 26,246 | - | - |
| Others | 83,365 | 86,991 | 1,716 | 2,053 |
| | 212,483 | 181,298 | 43,544 | 40,461 |

During 2013, the financial investment held in Banco Comercial Português, S.A., increased by 36,137 thousands of Euros being the increase booked against fair value reserves (see note 32).

During 2013, the financial investment held in REN - Redes Energéticas Nacionais, SGPS, S.A., increased by 3,420 thousands of Euros being the increase booked against fair value reserves (see note 32).

The financial investment held in Tejo Energia, S.A. in 2013, decreased by 4,746 thousands of Euros being the decrease booked against fair value reserves (see note 32).

The caption Other includes units of participation in a fund of stocks and bonds held by Energia RE in the amount of 53,751 thousands of Euros (31 December 2012: 48,229 thousands of Euros), as a result of its reinsurance activity.

According to the assumptions of IFRS 13 (note 47), available for sale investments are classified into three levels of fair value, Level 1 includes financial investment held in Banco Comercial Português, S.A., REN - Redes Energéticas Nacionais, SGPS, S.A. and Rede Energia, S.A. since they are indexed to market price, Level 2 includes the fund of stocks and bonds held by Energia RE and, finally Level 3 covers all other available for sale investments. These include mainly Tejo Energia, S.A., whose fair value in the amount of 21.5 millions of Euros, was calculated according to Dividend Discount Model methodology, based on a discount rate of 7,1%. The sensitivity analysis considering an increase or decrease of 100 basis points in the discount rate determined a fair value of 20.2 millions of Euros and 22.8 millions of Euros, respectively.

In 2013, the movements in Available-for-sale investments are analysed as follows:

| | Balance at | | | | Change in | Other | Balance at |
|---------------------------|------------|--------------|-----------|------------|------------|------------|-------------|
| Thousands of Euros | 1 January | Acquisitions | Disposals | Impairment | fair value | variations | 31 December |
| Banco Comercial Português | 29,653 | - | - | | 36,137 | | 65,790 |
| REN - Redes Energéticas | 38,408 | - | - | - | 3,420 | - | 41,828 |
| Tejo Energia | 26,246 | - | - | - | -4,746 | _ | 21,500 |
| Others | 86,991 | 5,047 | -549 | -4,641 | -5,298 | 1,815 | 83,365 |
| | 181 298 | 5.047 | -549 | -4 641 | 29 513 | 1 815 | 212 483 |

In 2012, the movements in Available-for-sale investments are analysed as follows:

| | Balance at | | | | Change in | Other | Balance at |
|---------------------------|------------|--------------|-----------|------------|------------|------------|-------------|
| Thousands of Euros | 1 January | Acquisitions | Disposals | Impairment | fair value | variations | 31 December |
| Banco Comercial Português | 19,665 | 10,031 | - | -5,495 | 5,452 | | 29,653 |
| REN - Redes Energéticas | 39,361 | <u> </u> | - | | -953 | | 38,408 |
| Tejo Energia | 29,507 | | - | | -3,261 | | 26,246 |
| Others | 82,780 | 12,701 | -1,126 | -3,833 | 1,451 | -4,982 | 86,991 |
| | 171,313 | 22,732 | -1,126 | -9,328 | 2,689 | -4,982 | 181,298 |

As at 30 June 2012, the investment held in Banco Comercial Português, S.A. decreased by 5,495 thousands of Euros, having an impairment loss been recognised in the income statement. During the third quarter of 2012, regarding BCP share capital increase, EDP Group subscribed 250,778,389 shares of BCP at 0.04 Euros per share in a total investment of 10,031 thousands of Euros. After this operation, the Group holds 395,370,529 shares, maintaining its actual share of 2.01%, but reducing the share average cost, which in comparison with the securities market value as at 31 December 2012, generated a positive effect of 5,452 thousands of Euros in fair value reserves.

Available-for-sale investments are booked at fair value being the changes since the date of acquisition net of impairment losses recorded against fair value reserves (see note 32). The fair value reserve attributable to the Group as at 31 December 2013 and 2012 is analysed as follows:

| Thousands of Euros | Dec 2013 | Dec 2012 |
|-----------------------------------|----------|----------|
| Banco Comercial Português | 41,589 | 5,452 |
| REN - Redes Energéticas Nacionais | 16,008 | 12,588 |
| Tejo Energia | 15,145 | 19,891 |
| Others | 7,877 | 7,419 |
| | 80,619 | 45,350 |

In addition in 2013, the variation in fair value reserve of available for sale investments includes the negative amount of 1,115 thousands of Euros attributable to non-controlling interests.

23. DEFERRED TAX ASSETS AND LIABILITIES

The EDP Group records the tax effect resulting from temporary differences between the assets and liabilities determined on an accounting basis and on a tax basis, which are analysed as follows:

| | Net De | ferred | Net Deferred | | |
|--|------------|----------|--------------|----------|--|
| | tax a | ssets | tax lial | oilities | |
| Thousands of Euros | Dec 2013 | Dec 2012 | Dec 2013 | Dec 2012 | |

| deferred taxes | -27,683 | -25,298 | -11,442 | 5,430 | |
| | 171,898 | 196,087 | 66,741 | 162,107 | |
| Jnited States of America and Canada | | | | | |
| Tax losses and tax credits | 666,681 | 607,466 | _ | - | |
| Property, plant and equipment | 2,937 | 2,346 | 311,399 | 297,861 | |
| Allocation of fair value to assets and liabilities acquired | - | | 93,090 | 81,288 | |
| Gains from institutional partnerships in USA wind farms | - | | 299,403 | 251,786 | |
| Other temporary differences | 7,768 | 2,123 | 312 | 41 | |
| Assets/liabilities compensation of deferred taxes | -676,277 | -611,074 | -676,277 | -611,074 | |
| | 1,109 | 861 | 27,927 | 19,902 | |
| | 388,813 | 340,816 | 775,269 | 852,054 | |

As referred under accounting policies - note 2 r), the compensation between deferred tax assets and liabilities is performed at each subsidiary, and therefore the consolidated financial statements reflect in its assets the total of the deferred tax of subsidiaries that have deferred tax assets and in its liabilities the total of the deferred tax of subsidiaries that have deferred tax liabilities.

On a company basis, EDP, S.A. records the tax effect resulting from temporary differences between the assets and liabilities determined on an accounting basis and on a tax basis, which are analysed as follows:

| | Net Deferred | | Net De | eferred |
|---|--------------|----------|-----------------|----------|
| | tax a | ssets | tax liabilities | |
| Thousands of Euros | Dec 2013 | Dec 2012 | Dec 2013 | Dec 2012 |
| Tax losses and tax credits | 39,386 | 61,424 | - | |
| Provisions | 4,246 | 3,486 | - | |
| Financial instruments | 6,808 | 16,248 | 7,407 | 12,829 |
| Financial and available-for-sale investments | 9,844 | 4,030 | - | |
| Property, plant and equipment | 13,150 | 11,722 | - | |
| Accounting revaluations | - | - | 14,194 | 13,092 |
| Other temporary differences | 3,169 | 3,065 | 29,905 | 4,255 |
| Assets/liabilities compensation of deferred taxes | -51,506 | -30,176 | -51,506 | -30,176 |
| | 25,097 | 69,799 | - | |

The deferred tax movement, for the Group and for the Company, in 2013 and 2012 is analysed as follows:

| | Deferre | ed taxes | Deferred taxes | |
|---|----------|----------|----------------|----------|
| | Gro | oup | Company | |
| Thousands of Euros | Dec 2013 | Dec 2012 | Dec 2013 | Dec 2012 |
| Balance at 1 January | -511,238 | -442,588 | 69,799 | 18,344 |
| Charges to the profit and loss account | 75,899 | -128,512 | 240 | 106,560 |
| Charges against reserves | 14,266 | 67,752 | -2,086 | 8,229 |
| Exchange differences and other variations | 34,617 | -7,890 | -42,856 | -63,334 |
| Balance at 31 December | -386,456 | -511,238 | 25,097 | 69,799 |

On an individual basis, the caption Other temporary differences includes the tax losses charge-off from the subsidiaries of the EDP Sucursal Group for fiscal consolidation.

Taxes recorded against reserves are analysed as follows:

| | Gre | oup | Company | |
|---|----------|----------|----------|----------|
| Thousands of Euros | Dec 2013 | Dec 2012 | Dec 2013 | Dec 2012 |
| Current tax | | | | |
| Changes in fair value of derivative financial instruments | 80 | 17 | 80 | 17 |
| | 80 | 17 | 80 | 17 |
| Deferred tax | | | | |
| Financial instruments and fair value | -16,202 | 25,729 | -4,761 | 7,323 |
| Actuarial gains and losses | 36,719 | 41,928 | - | - |
| Changes in fair value of financial assets held for sale | -6,251 | 95 | 2,675 | 906 |
| | 14,266 | 67,752 | -2,086 | 8,229 |
| | 14,346 | 67,769 | -2,006 | 8,246 |

The Group tax losses carried forward are analysed as follows:

| | Group | | | |
|---------------------|-----------|-----------|--|--|
| Thousands of Euros | Dec 2013 | Dec 2012 | | |
| Expiry date: | | | | |
| 2013 | - | 552 | | |
| 2014 | 6,169 | 4,694 | | |
| 2015 | 23,644 | 60,057 | | |
| 2016 | 1,523 | 1,505 | | |
| 2017 | 381,153 | 486,853 | | |
| 2018 | 37,208 | 7,645 | | |
| 2019 a 2032 | 2,212,057 | 2,199,483 | | |
| Without expiry date | 430,119 | 818,541 | | |
| | 3,091,873 | 3,579,330 | | |

238 24. INVENTORIES

This caption is analysed as follows:

| | Group | | | |
|---|----------|----------|--|--|
| Thousands of Euros | Dec 2013 | Dec 2012 | | |
| Merchandise | 65,788 | 75,307 | | |
| Finished, intermediate products and sub-products | 8,406 | 28,799 | | |
| Raw and subsidiary materials and consumables (coal and other fuels) | 105,041 | 202,230 | | |
| Nuclear fuel | 18,491 | 16,905 | | |
| Others | 82,283 | 54,377 | | |
| | 280,009 | 377,618 | | |
| | | | | |

The caption Others include CO2 licences held for trading, measured at the lower of acquisition cost and net realisable value, which corresponds to the market quote, as described in accounting policy 2 y), in the amount of 16,745 thousands of Euros (31 December 2012: 103 thousands of Euros) (see note 48).

25. TRADE RECEIVABLES

Trade receivables are analysed as follows:

| | Group | | | |
|--|-----------|-----------|----------|----------|
| Thousands of Euros | Dec 2013 | Dec 2012 | Dec 2013 | Dec 2012 |
| Trade receivables - Non-Current | | | | |
| Corporate sector and individuals: | | | | |
| - Brazil | 9,458 | 11,281 | - | |
| | | | | |
| Public Sector: | | | | |
| - Portugal | 121,227 | 126,501 | - | - |
| - Brazil | 9,948 | 8,571 | - | |

The Amounts receivable from tariff expenses - Electricity - Spain correspond to the accumulated amount receivable from the Spanish Government of the Spanish electricity system tariff deficit as at 31 December 2013, according to the applicable legal framework (see note 3). During 2013, the Spanish Electricity Deficit Amortisation Fund (FADE), launched fifteen bond issuances explicitly guaranteed by the Kingdom of Spain which allowed HC Energia Group to receive approximately 487,280 thousands of Euros related with tariff adjustments from previous years.

The caption Amounts receivable relating to CMEC totalize 1,066,482 thousands of Euros, and includes 898,500 thousands of Euros as non-current and 167,982 thousands of Euros as current. The amount receivable relating to the initial CMEC includes 645,193 thousands of Euros as non-current and 44,114 thousands of Euros as current, and corresponds to the initial CMEC granted to EDP Produção (833,467 thousands of Euros) deducted from the annuities for the years 2007 to 2013. The remaining 235,307 thousands of Euros as non-current and 123,868 thousands of Euros as current correspond to the receivable amounts through the revisibility calculation from 2012 to 2013.

The caption Amounts receivable from concessions - IFRIC 12 in the amount of 768,963 thousands of Euros relates to the financial asset to be received by the EDP Group regarding the electricity and gas concessions in Portugal and Brazil, resulting from the application of the mixed model (see note 2 aa). The variation in the period includes mainly the effect of the depreciation of Brazilian Real against Euro in the amount of 47,136 thousands of Euros and transfers from intangible assets assigned to concessions in the amount of 108,061 thousands of Euros (see note 18).

The movement for the period in Amounts receivable from tariff adjustments - Electricity - Portugal (Current and Non-current) is analysed as follows:

| | | Non- |
|--|-----------|-----------|
| Thousands of Euros | Current | Current |
| Balance as at 1 January 2012 | 374,859 | 424,787 |
| Receipts through the electric energy tariff | -666,216 | - |
| Tariff adjustment of 2011 | 987 | - |
| Tariff adjustment for the year | 619,015 | 980,007 |
| Transfer from tariff adjustments payable | -9,491 | - |
| Interest income | 68,808 | - |
| Securitisation adjustment of 2010 CMEC | -143,566 | - |
| Transfer from Non-Current to Current | 424,569 | -424,569 |

| Securitisation adjustment of 2011 CMEC | -153,213 | - |
| Transfer from Non-Current to Current | 967,248 | -967,248 |
| Balance as at 31 December 2013 | 1,056,572 | 1,237,623 |

VEVERENDING ENERGY

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

During the year 2013, EDP – Serviço Universal, S.A. (EDP SU), sold, in four independent operations, the rights to receive part of the electricity adjustment related to the 2012 overcost with the acquisition of electricity activity from special regime generators, in the amount of 863,230 thousands of Euros. In these assets' sales operations, EDP SU sold without recourse the rights to receive the referred amounts and interests. The total sale price amounted to 918,100 thousands of Euros and generated gains net of transaction costs, as at 31 December 2013, of 49,572 thousands of Euros (see note 15). From the four transactions, three of them were direct sales of assets to BCP and Banco Santander Totta, in the total amount of 468,100 thousands of Euros and the other was a securitization transaction carried out by Tagus - Sociedade de Titularização de Créditos, S.A. through the issuance of senior notes in the amount of 450,000 thousands of Euros.

On 19 December 2013, EDP Distribuição - Energia, S.A., the concessionaire and operator entity of the National Distribution Grid of electric energy, sold without recourse the right to recover the correction portion of the compensation mechanism to maintain the contractual balance (CMEC), referring to 2011 in the amount of 153,213 thousands of Euros, in accordance with the terms of Decree-Law n.º 256/2012 of 29 November. The operation consisted in a direct sale of the asset to BCP in the amount of 154,598 thousands of Euros, generating a gain of 885 thousands of Euros net of transaction expenses.

On 13 December 2012, EDP Distribuição - Energia, S.A., the concessionaire and operator entity of the National Distribution Grid of electric energy, sold without recourse the right to recover the correction portion of the compensation mechanism to maintain the contractual balance (CMEC), referring to 2010, in accordance with the terms of Decree-Law n.º 109/2011 of 18 November. The transaction amounted to 144,320 thousands of Euros, of which 141,081 thousands of Euros were received at the moment of the transaction and 3,239 thousands of Euros were deferred in 12 monthly payments between February 2013 and January 2014, generating a financial profit of 254 thousands of Euros, including transaction costs.

The movements in Impairment losses on debtors - Non-Current are analysed as follows:

| | Group | | |
|--|----------|----------|--|
| Thousands of Euros | Dec 2013 | Dec 2012 | |
| Balance at beginning of year | 3,305 | 2,876 | |
| Charge of the year | 5 | 11 | |
| Perimeter variations / Other regularisations | - | 418 | |
| Balance at year end | 3,310 | 3,305 | |

The movements in Impairment losses on debtors - Current are analysed as follows:

| | Group | | Company | |
|--|----------|----------|----------|----------|
| Thousands of Euros | Dec 2013 | Dec 2012 | Dec 2013 | Dec 2012 |
| Balance at beginning of year | 15,915 | 15,878 | 931 | 938 |
| Charge of the year | 5,022 | 1,809 | 19 | 15 |
| Reversal of impairment losses / Charge-off | -1,998 | -5,126 | - | -22 |
| Perimeter variations / Other regularisations | -287 | 3,354 | - | _ |
| Balance at year end | 18,652 | 15,915 | 950 | 931 |

27. OTHER DEBTORS AND OTHER ASSETS

Other debtors and other assets are analysed as follows:

| | Gro | Group | | Company | |
|--|----------|----------|-----------|-----------|--|
| Thousands of Euros | Dec 2013 | Dec 2012 | Dec 2013 | Dec 2012 | |
| Debtors and other assets - Non-Current | | | | | |
| Loans to subsidiaries | - | - | 6,382,524 | 5,885,502 | |
| Loans to related parties | 336,518 | 265,542 | 90 | 90 | |
| Guarantees and tied deposits | 61,510 | 72,498 | 5 | 5 | |
| Derivative financial instruments (see note 43) | 62,812 | 147,026 | 62,882 | 128,493 | |
| Sundry debtors and other operations | 64,237 | 49,507 | - | - | |
| | 525,077 | 534,573 | 6,445,501 | 6,014,090 | |
| | | | | | |
| Debtors and other assets - Current | | | | | |
| Loans to subsidiaries | - | - | 445,877 | 1,036,546 | |
| Dividends attributed by subsidiaries | - | | 89,880 | 86,204 | |
| Loans to related parties | 45,013 | 38,348 | 17,148 | 17,167 | |
| Receivables from the State and concessors | 44,820 | 48,349 | - | _ | |
| Derivative financial instruments (see note 43) | 154,482 | 129,814 | 116,848 | 127,169 | |
| Subsidiary Companies | - | | 1,302,940 | 1,022,077 | |
| Guarantees and tied deposits | 6,386 | 19,548 | - | - | |
| Sundry debtors and other operations | 57,454 | 60,615 | 2,134 | 5,366 | |
| | 308,155 | 296,674 | 1,974,827 | 2,294,529 | |
| | 833,232 | 831,247 | 8,420,328 | 8,308,619 | |

28. CURRENT TAX ASSETS

Current tax assets are analysed as follows:

| | Group | | Company | |
|-----------------------|----------|----------|----------|----------|
| Thousands of Euros | Dec 2013 | Dec 2012 | Dec 2013 | Dec 2012 |
| Income tax | 201,594 | 168,834 | 120,503 | 81,917 |
| Value added tax (VAT) | 215,389 | 207,245 | 7,942 | 110,415 |
| Turnover tax (Brazil) | 4,409 | 17,026 | - | |
| Other taxes | 17,717 | 42,523 | 3,608 | 3,255 |
| | 439,109 | 435,628 | 132,053 | 195,587 |

On an individual basis, the decrease in Value Added Tax (VAT), relates to the receipt in 2013 of VAT refunds, submitted by EDP S.A. in 2012. In EDP Group, this effect was offset by the increase in recoverable VAT by the Group companies, in particular by EDP Comercial and EDP Distribuição in the amount of 16 and 48 millions of Euros, respectively and in EDP Renewables subgroup (45 millions of Euros).

On EDP Group, the caption Other taxes includes the amount of 8,132 thousands of Euros (31 December 2012: 30,026 thousands of Euros) related with credits from PIS and COFINS in Brazil, resulting from the interpretation provided by the Internal Revenue Service in answer to Inquiry COSIT 27/2008 corresponding to credits calculated based on expenses with materials applied or consumed in the electricity supply activity and on the depreciation of fixed assets to be offset with debits of these contributions.

29. CASH AND CASH EQUIVALENTS

Cash and cash equivalents are analysed as follows:

| | Group | | Company | |
|------------------------------------|-----------|-----------|-----------|-----------|
| Thousands of Euros | Dec 2013 | Dec 2012 | Dec 2013 | Dec 2012 |
| Cash | 88 | 60 | - | - |
| | | | | |
| Bank deposits | | | | |
| Current deposits | 491,626 | 416,038 | 12,286 | 26,345 |
| Term deposits | 1,343,411 | 1,052,822 | 891,119 | 601,914 |
| Other deposits | 306,057 | 29,149 | - | |
| | 2,141,094 | 1,498,009 | 903,405 | 628,259 |
| Operations pending cash settlement | | | | |
| Current deposits | - | 196,976 | 280,000 | 676,976 |
| | | | | |
| Other short term investments | 38,940 | 291 | - | |
| | 2,180,122 | 1,695,336 | 1,183,405 | 1,305,235 |

The caption Other short term investments includes very short term investments promptly convertible into cash.

On a company basis, the caption Operations pending cash settlement relates with commercial paper issued by EDP, S.A., in the amount of 280,000 thousands of Euros, which according to the Group accounting policy is booked as financial debt at the trade date of each emission. This commercial paper was issued on 30 December 2013 and was acquired by EDP Finance B.V., but the settlement date was on 2 January 2014.

30. SHARE CAPITAL AND SHARE PREMIUM

EDP, S.A. is a company that was incorporated as a State-owned company and started its privatisation process in 1997. The second and third phases of the privatisation process were carried out in 1998, the fourth phase in 2000, the fifth phase consisting of a capital increase in 2004 and a sixth phase in 2005. In December 2007 the State issued bonds convertible into shares of EDP, S.A. under the seventh phase of the privatisation process.

On 11 May 2012 regarding EDP's eight reprivatisation phase, the Portuguese State sold to CWEI (Europe), S.A. (former - China Three Gorges International (Europe), S.A.), through a transaction executed outside a regulated market, the ownership of 780,633,782 shares representing 21.35% of the share capital of EDP, S.A.

On 21 February 2013, Parpública – Participações Públicas (SGPS) S.A. (Parpública) notified EDP that on 19 February 2013 sold 151,517,000 shares, which correspond to 4,14% of EDP share capital. The decrease of the shareholding resulted from a private offer via an "accelerated bookbuilding" process, in which Caixa – Banco Investimento, S.A. and Morgan Stanley & Co. International plc acted as Joint Bookrunners and its corresponding settlement was held on the regulated market "Eurolist by NYSE Euronext Lisbon".

As a result of this two last transactions, Parpública no longer has a qualified shareholding position in EDP share capital.

The share capital amounts of 3,656,537,715 Euros and is represented by 3,656,537,715 fully paid up ordinary shares of 1 Euro each.

Share capital and Share premium are analysed as follows:

| | Group and Company | | |
|---------------------------|-------------------|---------|--|
| | Share Share | | |
| Thousands of Euros | capital | premium | |
| Balance as at 1 January | 3,656,538 | 503,923 | |
| Movements during the year | | | |
| Balance as at 31 December | 3,656,538 | 503,923 | |

The earnings per share (EPS) attributable to the equity holders of EDP are as follows:

| | Group | | Com | pany |
|---|---------------|---------------|---------------|---------------|
| | Dec 2013 | Dec 2012 | Dec 2013 | Dec 2012 |
| Net profit attributable to the equity holders of EDP (in Euros) | 1,005,090,734 | 1,012,483,169 | 790,875,101 | 832,681,740 |
| Net profit from continuing operations attributable to the equity holders of | | | | |
| EDP (in Euros) | 1,005,090,734 | 1,012,483,169 | | |
| Weighted average number of ordinary shares outstanding | 3,627,442,609 | 3,624,042,958 | 3,628,955,609 | 3,625,555,958 |
| Weighted average number of diluted ordinary shares outstanding | 3,627,732,136 | 3,624,622,918 | 3,629,245,136 | 3,626,135,918 |
| Basic earnings per share attributable to equity holders of EDP (in Euros) | 0.28 | 0.28 | | |
| Diluted earnings per share attributable to equity holders of EDP (in Euros) | 0.28 | 0.28 | | |
| Basic earnings per share from continuing operations (in Euros) | 0.28 | 0.28 | | |
| Diluted earnings per share from continuing operations (in Euros) | 0.28 | 0.28 | | |

EDP Group calculates basic and diluted earnings per share attributable to equity holders of EDP using the weighted average number of ordinary shares outstanding during the period, net of changes in treasury stock during the year.

The average number of shares was determined as follows:

| | Group | | Company | |
|---|---------------|---------------|---------------|---------------|
| | Dec 2013 | Dec 2012 | Dec 2013 | Dec 2012 |
| Ordinary shares issued at the beginning of the year | 3,656,537,715 | 3,656,537,715 | 3,656,537,715 | 3,656,537,715 |
| Effect of shares issued during the year | - | - | - | - |
| Average number of realised shares | 3,656,537,715 | 3,656,537,715 | 3,656,537,715 | 3,656,537,715 |
| Effect of treasury stock | -29,095, 106 | -32,494, 757 | -27,582, 106 | -30,981, 757 |
| Average number of shares during the year | 3,627,442,609 | 3,624,042,958 | 3,628,955,609 | 3,625,555,958 |
| Effect of stock options | 289,527 | 579,960 | 289,527 | 579,960 |
| Diluted average number of shares during the year | 3,627,732,136 | 3,624,622,918 | 3,629,245,136 | 3,626,135,918 |

31. TREASURY STOCK

This caption is analysed as follows:

| | Group | | Company | |
|---|------------|------------|------------|------------|
| | Dec 2013 | Dec 2012 | Dec 2013 | Dec 2012 |
| Book value of EDP, S.A. treasury stock (thousands of Euros) | 85,573 | 103,706 | 79,478 | 97,611 |
| Number of shares | 27,597,268 | 31,904,523 | 26,084,268 | 30,391,523 |
| Market value per share (in Euros) | 2.670 | 2.290 | 2.670 | 2.290 |
| Market value of EDP, S.A.'s treasury stock (thousands of Euros) | 73,685 | 73,061 | 69,645 | 69,597 |

Operations performed from 1 January to 31 December 2013:

| EDP, S.A Ene | ergia RE |
|---|----------|
| Volume acquired (number of shares) 722,574 | _ |
| Average purchase price (in Euros) 2.513 | |
| Total purchase value (thousands of Euros) 1,816 | |
| Volume sold (number of shares) -5,029,829 | - |
| Selling price average (in Euros) 2.514 | |
| Total sale value (thousands of Euros) 12,646 | |
| Final position (number of shares) 26,084,268 1 | ,513,000 |
| Highest market price (in Euros) 2.811 | |
| Lowest market price (in Euros) 2.210 | - |
| Average market price (in Euros) 2.531 | |

The volume and the selling prices disclosed above include the effect of the treasury stock attributable to employees, as mentioned in note 45 - Share based payments.

The treasury stock held by EDP, S.A., is within the limits established by the Company's articles of association and by the "Código das Sociedades Comerciais" (Companies Commercial Code). The treasury stock is stated at acquisition cost.

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

32. RESERVES AND RETAINED EARNINGS

This caption is analysed as follows:

| | Gro | up | Com | pany |
|---|-----------|-----------|-----------|-----------|
| Thousands of Euros | Dec 2013 | Dec 2012 | Dec 2013 | Dec 2012 |
| Legal reserve | 620,069 | 578,435 | 620,069 | 578,435 |
| Fair value reserve (cash flow hedge) | -74,003 | -121,097 | -1,125 | -16,069 |
| Tax effect of fair value reserve (cash flow hedge) | 20,987 | 34,979 | 257 | 4,938 |
| Fair value reserve (available for sale investments) | 80,619 | 45,350 | 11,648 | 8,238 |
| Tax effect of fair value reserve (available for sale investments) | -7,684 | -1,408 | 4,632 | 1,957 |
| Exchange differences arising on consolidation | -128,291 | 24,268 | - | - |
| Treasury stock reserve (EDP, S.A.) | 79,478 | 97,611 | 79,478 | 97,611 |
| Other reserves and retained earnings | 2,774,602 | 2,464,978 | 1,446,267 | 1,315,569 |
| | 3,365,777 | 3,123,116 | 2,161,226 | 1,990,679 |

Legal reserve

In accordance with Article 295 of "Código das Sociedades Comerciais" (Companies Commercial Code) and EDP, S.A.'s articles of association, the legal reserve must be increased by a minimum of 5% of the annual profit until it reaches 20% of the company's share capital. This reserve can only be used to cover losses or to increase share capital.

Fair value reserve (cash flow hedge)

This reserve includes the effective portion of the cumulative net change in the fair value of the cash flow hedging financial derivative instruments.

Fair value reserve (available-for-sale investments)

This reserve includes the accumulated net change in the fair value of available-for-sale investments as at the balance sheet date, net of impairment losses. The changes in this consolidated caption for the period are as follows:

Group

| | Group | | |
|--|-----------|-----------|--|
| Thousands of Euros | Increases | Decreases | |
| Balance as at 1 January 2012 | 485,789 | -442,777 | |
| Changes in fair value | 8,674 | -13,939 | |
| Transfer of impairment to profit or loss | | 7,603 | |
| Balance as at 31 December 2012 | 494,463 | -449,113 | |
| Changes in fair value | 41,809 | -9,661 | |
| Transfer of impairment to profit or loss | | 3,121 | |
| Balance as at 31 December 2013 | 536,272 | -455,653 | |
| | | | |

Changes in fair value reserve attributable to the EDP Group during 2013 are analysed as follows: $\frac{1}{2} \left(\frac{1}{2} \right) = \frac{1}{2} \left(\frac{1}{2} \right) \left(\frac{1}{2}$

| Thousands of Euros | Increases | Decreases |
|---|-----------|-----------|

NEVERENDING ENERGY

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

Treasury stock reserve (EDP, S.A.)

In accordance with the article 324.° of "Código das Sociedades Comerciais", EDP, S.A., has created an unavailable reserve with an amount equal to the book value amount of treasury stock held.

Dividends

On 6 May 2013, the Shareholders General Meeting of EDP, S.A. approved the dividends distribution to shareholders which ocurred on 23 May 2013 of the net profit for the year 2012 in the amount of 676,459 thousands of Euros, corresponding to a dividend of 0.185 Euros per share (including the treasury stock dividend owned by EDP, S.A. in the amount of 5,527 thousands of Euros).

33. NON-CONTROLLING INTERESTS

This caption is analysed as follows:

| | Group | | |
|--|-----------|-----------|--|
| Thousands of Euros | Dec 2013 | Dec 2012 | |
| Non-controlling interests in income statement | 188,432 | 169,672 | |
| Non-controlling interests in equity and reserves | 2,894,373 | 3,069,642 | |
| | 3,082,805 | 3,239,314 | |

Non-controlling interests, by company, are made up as follows:

| | Group | | |
|----------------------|-----------|-----------|--|
| Thousands of Euros | Dec 2013 | Dec 2012 | |
| EDP Renováveis Group | 1,662,908 | 1,516,865 | |
| EDP Brasil Group | 1,289,891 | 1,604,316 | |
| Other | 130,006 | 118,133 | |
| | 3,082,805 | 3,239,314 | |

During 2013, EDP Group generated profits of 188,432 thousands of Euros attributable to non-controlling interests (31 December 2012: 169,672 thousands of Euros).

The movement in non-controlling interests of EDP Renováveis Group is mainly related to profits attributable to non-controlling interests of 63,864 thousands of Euros, a decrease of 24,754 thousands of Euros related to dividends paid, additional acquisitions of wind farms in Europe, without a change of control, which resulted in a decrease of non-controlling interests of 26,600 thousands of Euros and 8,381 thousands of Euros of negative exchange differences. In June 2013, in accordance with the EDP / CTG strategic partnership, EDP Renováveis Group has completed the sale, without loss of control of a 49% equity shareholding in EDP Renováveis Portugal, S.A., and, as a result, the Group recognised non-controlling interests of 111,231 thousands of Euros and an impact in reserves attributable to EDP Group of 112,566 thousands of Euros. In November 2013, EDP Renováveis Group has completed the sale, without loss of control of a 49% equity shareholding in Wheat Field Holding, L.L.C. to Fiera Axium Infrastructure US L.P., and, as a result, the Group recognised non-controlling interests of 35,959 thousands of Euros and an impact in reserves attributable to EDP Group of 982 thousands of Euros.

The movement booked in non-controlling interests of EDP Brasil Group includes 117,369 thousands of Euros of profits attributable to non-controlling interests, a decrease of 138,938 thousands of Euros related to dividends paid, negative variations resulting from share capital decreases, deliberated on 3 May 2013 by Lajeado Energia General Shareholders Meeting with an effect in non-controlling interests of 69,256 thousands of Euros (198,619 thousands of Reais), the effect of actuarial gains net of taxes recognised in the year which resulted in an increase in non-controlling interests of 10,753 thousands of Euros and 235,342 thousands of Euros resulting from negative exchange differences.

34. HYDROLOGICAL ACCOUNT

This caption is analysed as follows:

| | Group and Company | | | |
|--------------------|-------------------|----------|--|--|
| Thousands of Euros | Dec 2013 | Dec 2012 | | |
| Non-Current | - | 33,644 | | |
| Current | 35,641 | 22,832 | | |
| | 35,641 | 56,476 | | |

The movements in the Hydrological account are analysed as follows:

| | Group and Company | | |
|---|-------------------|----------|--|
| Thousands of Euros | Dec 2013 | Dec 2012 | |
| Balance at the beginning of the year | 56,476 | 69,142 | |
| Amounts received / (paid) during the year | -22,831 | -15,155 | |
| Financial charges | 1,996 | 2,489 | |
| Balance at the end of the year | 35,641 | 56,476 | |

The hydrological account was established by Decree-law 338/91 and consists of a legal mechanism for compensating the variable costs of generating electricity. The hydrological account was set up in 1994 when the actual EDP Group was owned by the State, through a charge against the income statement. In 2000, through a spin-off of EDP, REN was set up, and new regulations were issued (through Decree-law 98/2000) which reinforced and maintained the requirement to keep the hydrological account in EDP's balance sheet.

As explained above, REN was part of the EDP Group until 2000. Thus, the entries in the hydrological correction account were made within the EDP Group. Since the split of REN in June 2000, EDP, S.A. (the Group parent company) has paid to or received cash from REN, which is booked against the hydrological correction account in the balance sheet and the related financial charges are booked in the income statement. REN uses the amounts received or paid to compensate the operators in the liberalised market, in accordance with the objectives of the hydrological correction account as explained above.

In October 2010 it was issued the Decree-Law 110/210, which determines the extinction of the hydrological account mechanism on 31 December 2016. The differential of hydrological adjustment should be reflected in the tariff calculation applicable to all energy consumers, to cover the variation risk of tariff costs and revenues associated to the hydrological variability in Portugal. This decree regulates that the account of hydrological correction should be maintained in the balance sheet of EDP - Energias de Portugal, S.A. and the correspondent annual movements explained in the notes to the financial statements.

In 2014 and according with the Dispatch 8 of the Office of the Energy Secretary of State, of 24 September, the amount to be applied for the benefit of the global system use tariff should correspond to the whole of the existing hydrological account, and therefore the entire balance of this caption is presented as Current liabilities.

35. FINANCIAL DEBT

(*) Collateral Deposits informative note

Following EDP's downgrading in 2012 and in the course of negotiations with BEI, on 31 October 2012, EDP has constituted an escrow deposit which amount at 31 December 2013 is 347,172 thousands of Euros (334,497 thousands of Euros non-current and 12,675 thousands of Euros current), associated with several loans contracted in previous years with this entity. This escrow deposit will be reduced by the repayment of these loans. In addition, the Group has 102,164 thousands of Euros (96,110 thousands of Euros non-current and 6,054 thousands of Euros current) of other deposits constituted as collateral for financial guarantee.

The Group has project finance loans with the usual guarantees for such loans, namely pledged or promissory pledges over shares, bank accounts and assets relating to the projects. As at 31 December 2013 and 2012 these loans amounted to 985,551 thousands of Euros and 1,018,578 thousands of Euros, respectively. These amounts are already included in the Group's consolidated debt (see note 44).

EDP Group has short-term credit facilities of 159,000 thousands of Euros, indexed to Euribor for the agreed period of use with spread conditions agreed in advance, and with a firm underwriting commitment, being totally available; as well as Commercial Paper programs of 100,000 thousands of Euros with guaranteed placement, being fully available as at 31 December 2013. EDP Group has a medium term Revolving Credit Facility (RCF) of 2,000,000 thousands of Euros, with a firm underwriting commitment, being fully available as at 31 December 2013. For liquidity management needs in USD, EDP Group has an RCF of 1,500,000 thousands of USD with a firm underwriting commitment, which as at 31 December 2013 is totally drawn down.

Commercial Paper non-current refers to a Commercial Paper program with a firm underwriting commitment for a period up to one year in the amount of 200,000 thousands of Euros, with interests and fees paid in advance in the amount of 3,007 thousands of Euros.

The nominal value of Bond loans issued with external counterparts and outstanding, as at 31 December 2013, is analysed as follows:

| Issuer | Date | Interest | Type of hedge | Conditions/ | Thousands | |

⁽i) These issues by EDP Finance B.V. are associated with interest rate swaps and/or currency swaps.

⁽ii) Fixed in each year, varies over the useful life of the loan.

⁽iii) Part of this loan is associated to interest rate swaps.

⁽iv) These issues correspond to private placements.

NERGY

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

Loans by maturity, are analysed as follows:

| | Gro | Group | | Company | | |
|--------------------|------------|------------|------------|-----------|--|--|
| Thousands of Euros | Dec 2013 | Dec 2012 | Dec 2013 | Dec 2012 | | |
| Bank loans | | | | | | |
| Up to 1 year | 1,994,741 | 2,558,583 | 48,681 | 64,171 | | |
| From 1 to 5 years | 4,786,170 | 5,142,798 | 686,399 | 659,126 | | |
| More than 5 years | 1,054,398 | 1,407,686 | 363,970 | 438,070 | | |
| | 7,835,309 | 9,109,067 | 1,099,050 | 1,161,367 | | |
| Bond loans | | | | | | |
| Up to 1 year | 2,063,882 | 908,935 | 279,440 | 156,537 | | |
| From 1 to 5 years | 6,795,551 | 6,952,783 | 5,192,763 | 456,324 | | |
| More than 5 years | 3,087,095 | 2,937,950 | 850,000 | 281,941 | | |
| | 11,946,528 | 10,799,668 | 6,322,203 | 894,802 | | |
| Commercial paper | | | | | | |
| Up to 1 year | 113,639 | 324,089 | 2,882,656 | 7,336,912 | | |
| From 1 to 5 years | 196,993 | 196,976 | 196,993 | 196,976 | | |
| | 310,632 | 521,065 | 3,079,649 | 7,533,888 | | |
| Other loans | | | | | | |
| Up to 1 year | 19,906 | 15,896 | - | - | | |
| From 1 to 5 years | 29,123 | 52,837 | - | | | |
| More than 5 years | 19,426 | 24,695 | - | | | |
| | 68,455 | 93,428 | - | | | |
| | 20,160,924 | 20,523,228 | 10,500,902 | 9,590,057 | | |

The fair value of EDP Group's debt is analysed as follows:

| | Dec 2013 | | Dec 2012 | |
|-----------------------------------|------------|------------|------------|------------|
| The county of Funds | Carrying | Market | Carrying | Market |
| Thousands of Euros | amount | value | amount | value |
| Debt and borrowings - Non-Current | 15,968,756 | 16,869,725 | 16,715,725 | 17,164,909 |
| Debt and borrowings - Current | 4,192,168 | 3,902,289 | 3,807,503 | 3,452,211 |
| | 20,160,924 | 20,772,014 | 20,523,228 | 20,617,120 |

In accordance with accounting policies - note 2 d) and f), the financial liabilities risks hedged by derivative financial instruments that comply with hedge accounting requirements of IAS 39, are stated at fair value. The liabilities which the Group has considered as at fair value through profit or loss (fair value option) are also stated at fair value. The remaining financial liabilities are booked at amortised cost.

As at 31 December 2013, scheduled repayments of Group's debt and borrowings including interest accrued are as follows:

| | | | | | | Following | |
|-----------------------------------|-----------|-----------|-----------|-----------|-----------|-----------|------------|
| Thousands of Euros | 2014 | 2015 | 2016 | 2017 | 2018 | years | Total |
| Debt and borrowings - Non-current | - | 3,227,530 | 3,411,432 | 2,802,696 | 2,366,179 | 4,160,919 | 15,968,756 |
| Debt and borrowings - Current | 4,192,168 | - | - | | - | - | 4,192,168 |
| | 4,192,168 | 3,227,530 | 3,411,432 | 2,802,696 | 2,366,179 | 4,160,919 | 20,160,924 |

Future payments of principal and interest and guarantees are detailed in note 44.

Future debt and borrowings payments and interest by type of loan and currency are analysed as follows:

| | | | | | | Following | |
|--------------------|-----------|-----------|-----------|-----------|-----------|-----------|------------|

36. EMPLOYEE BENEFITS

Employee benefits are analysed as follows:

250

| | Group | | |
|---|-----------|-----------|--|
| Thousands of Euros | Dec 2013 | Dec 2012 | |
| Provisions for social liabilities and benefits | 960,356 | 939,399 | |
| Provisions for medical liabilities and other benefits | 974,179 | 994,026 | |
| | 1,934,535 | 1,933,425 | |

This caption is analysed as follows:

| | Group | | |
|--------------------|-----------|-----------|--|
| Thousands of Euros | Dec 2013 | Dec 2012 | |
| Non-Current | 1,751,066 | 1,750,838 | |
| Current | 183,469 | 182,587 | |
| | 1,934,535 | 1,933,425 | |

Provisions for social liabilities and benefits as at 31 December 2013 include 955,199 thousands of Euros relating to retirement pension defined benefit plans (31 December 2012: 932,194 thousands of Euros) and 5,157 thousands of Euros related to the estimated cost of services rendered by third parties under the human resources rationalisation program (31 December 2012: 7,205 thousands of Euros).

The movement in Provisions for social liabilities and benefits is analysed as follows:

| | Group | | |
|---|----------|-----------|--|
| Thousands of Euros | Dec 2013 | Dec 2012 | |
| Balance at the beginning of the year | 939,399 | 1,003,943 | |
| Charge for the period | 41,165 | 60,407 | |
| Past service cost (Curtailment / Plan amendments) | -5,489 | 20,269 | |
| Actuarial (gains)/losses | 137,274 | 8,067 | |
| Charge-off | -145,973 | -149,441 | |
| Transfers, reclassifications and exchange differences | -6,020 | -3,846 | |
| Balance at the end of the year | 960,356 | 939,399 | |

The breakdown of actuarial gains and losses is analysed as follows:

| | Gro | oup |
|---|----------|----------|
| Thousands of Euros | Dec 2013 | Dec 2012 |
| Actuarial (gains)/losses arising from: | | |
| - changes in demographic assumptions | 166,612 | |
| - changes in financial assumptions | -34,113 | 32,147 |
| - experience adjustments | 24,792 | 39,534 |
| Actuarial (gains)/losses arising from return on plan assets | -27,324 | -59,502 |
| Actuarial (gains)/losses of asset ceiling | 7,307 | -4,112 |
| | 137,274 | 8,067 |
| | | |

The movement in Provisions for Medical liabilities and other benefits is analysed as follows:

| | Group | | |
|---|----------|----------|--|

| Balance at the beginning of the year | 994,026 | 819,215 | |
| Charge for the period | 51,995 | 53,836 | |
| Past service cost (Curtailment / Plan amendments) | -3,754 | 1,174 | |
| Actuarial (gains)/losses | -181 | 174,272 | |
| Charge-off Charge-off | -46,959 | -44,308 | |
| Transfers, reclassifications and exchange differences | -20,948 | -10,163 | |
| Balance at the end of the year | 974,179 | 994,026 | |

The breakdown of actuarial gains and losses is analysed as follows:

| | Group | | |
|--|----------|----------|--|
| Thousands of Euros | Dec 2013 | Dec 2012 | |
| Actuarial (gains)/losses arising from: | | | |
| - changes in demographic assumptions | 21,562 | 29,604 | |
| - changes in financial assumptions | -15,609 | 139,433 | |
| - experience adjustments | -6,134 | 5,235 | |
| | -181 | 174,272 | |

The publication of the Decree-Law 167-E/2013 and the Administrative Order 378-G/2013 increased in nearly one year the estimated age of access to the Social Security retirement pension. This change resulted in an increase in the post-employment liability for the active population, which is based on the company' estimatives will adhere to ACT early retirement program and the actual early retirees. This effect in the amount of 164,932 thousands of Euros is recognized in OCI as an assumption change.

As mentioned under Accounting policies - note 2 n), the EDP Group opted, upon transition to IFRS, to charge to reserves, the total amount of the deferred actuarial losses existing at that date, for the several employee benefits plans. The impact on reserves at 31 December 2004 amounted to 1,162,000 thousands of Euros. In the following years, in compliance with the accounting policy adopted, the actuarial gains and losses of these plans were recorded directly in reserves, having recognised in 2013 gains of 137,093 thousands of Euros and in 2012 gains of 182,339 thousands of Euros.

The weighted average duration of the defined benefit liabilities in Portugal is 9 years.

Employee benefit plans

Some EDP Group companies grant post-retirement benefits to employees, under defined benefit and defined contribution plans, namely pension plans that pay retirement complements of age, disability and surviving pensions, as well as early retirement pensions. In some cases healthcare is provided during retirement and early retirement, through mechanisms complementary to those provided by the National Health Service.

The following is a summary of the nature of the plans and the companies covered, as well as financial and economic data of the plans:

I. Defined benefit pension plans

The EDP Group companies in Portugal resulting from the spin-off of EDP in 1994 have a social benefits plan funded by a closed Pension Fund, complemented by a specific provision. The EDP Pension Fund is managed by Pensõesgere with the management of the assets subcontracted to external asset management entities.

This Pension Fund covers the liability for retirement pension complements (age, disability and survivor pension). The responsibilities for early retirement are not covered by the fund's assets, being adequately provisioned through a specific provision.

In Spain, following the collective labour agreement ("Convenio Colectivo") signed in December 2007, HC Energia Group companies implemented an early retirement program that has been in place during the period from 2008 to 2012.

Bandeirante in Brazil has two defined benefit plans managed by the CESP Foundation, until 31 May 2011. From this date, the plans management became the responsibility of EnerPrev, a closed complementary welfare entity, sponsored by companies of EDP Brasil, in order to manage a set of benefit plans for employees and ex-employees of Bandeirante:

- DB Plan in force up to 31 March 1998, a Benefit Plan that grants Balanced Proportional Supplementary Benefits (BSPS) in the form of an annuity payable to participants enrolled until 31 March 1998, of an amount defined in proportion to accumulated past service up to that date, based on compliance with the regulatory granting requirements. The company is fully liable to fund this plan;
- the DB plan in force after 31 March 1998, grants an annuity in proportion to the accumulated past services after 31 March 1998, on the basis of 70% of the average actual monthly wage for the last 36 months in service. In the event of death or disability caused by a labour accident, the benefits incorporate all the past service (including that accumulated up to 31 March 1998), and not only past service accumulated after 31 March 1998. The Company and the participants are equally responsible for funding the Plan.

Escelsa, Bandeirante and Energest have Defined Benefit Plans that grant complementary pensions for retirement due to age, disability, and survivor pensions. Escelsa also has a special complementary retirement pension plan for war veterans.

As at 31 December 2013 and 2012 the number of participants covered by the pension plans was as follows:

| | | 2013 | | | 2012 | |
|-------------------------|----------|-------|--------|----------|-------|--------|
| | Portugal | Spain | Brazil | Portugal | Spain | Brazil |
| Number of participants | | | | | | |
| Retirees and pensioners | 17,742 | 1,425 | 1,747 | 17,959 | 1,517 | 1,743 |
| Active workers | 5,661 | 1,405 | 1,425 | 5,932 | 1,433 | 1,493 |
| | 23,403 | 2,830 | 3,172 | 23,891 | 2,950 | 3,236 |

The following financial and actuarial assumptions were used to calculate the liability of the EDP Group pension plans and similar obligations:

| | Dec 2013 | | | | |

| Mortality table | Born<1950 TV88/90 // Born>=1950 TV99/01 | PERM/F- 2000P | RP-2000 Generational | RP-2000 Generational | RP-2000 Generational | |
| Disability table | 50%EKV 80 | not applicable | Wyatt 85 Class 1 | Wyatt 85 Class 1 | Wyatt 85 Class 1 | |
| Expected % of eligible employees accepting early retirement | (a) | not applicable | not applicable | not applicable | not applicable | |

⁽a) 40% of the eligible population (employees entitled to early retirement, as stated in the Collective Labour Agreement: 36 years of service with at least 60 years of age or 40 years of service at any age).

The assumptions used in the calculation of the liability for employees defined benefit plans, were updated considering the evolutions occurred in the financial markets during 2013.

NEVERENDING ENERGY

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

The liability for retirement pensions and related coverage for the Group, as at 31 December 2013 and 2012 is analysed as follows:

| | Dec 2013 | | | |
|--|-----------|--------|----------|------------|
| Thousands of Euros | Portugal | Spain | Brazil | Group |
| Provision for Pension Plans | | | | |
| Liability at the end of the year | 1,858,039 | 89,902 | 223,775 | 2,171,716 |
| Fair value of plan assets at the end of the year | -993,423 | - | -256,584 | -1,250,007 |
| Asset ceiling | - | - | 33,490 | 33,490 |
| Provision at the end of the year | 864,616 | 89,902 | 681 | 955,199 |

| | Dec 2012 | | | | | |
|--|-----------|---------|----------|------------|--|--|
| Thousands of Euros | Portugal | Spain | Brazil | Group | | |
| Provision for Pension Plans | | | | | | |
| Liability at the end of the year | 1,727,211 | 104,539 | 349,616 | 2,181,366 | | |
| Fair value of plan assets at the end of the year | -960,342 | - | -321,431 | -1,281,773 | | |
| Asset ceiling | | - | 32,601 | 32,601 | | |
| Provision at the end of the year | 766,869 | 104,539 | 60,786 | 932,194 | | |

The caption Asset ceiling refers to the unrecognised assets in the respective accounting years.

The evolution of the present value of the plan liability and fair value of the plan assets of the related funds is analysed as follows:

| Thousands of Euros | 2013 | 2012 | 2011 | 2010 | 2009 |
|--|------------|------------|------------|------------|------------|
| Provision for Pension Plans | | | | | |
| Liability at the end of the year | 2,171,716 | 2,181,366 | 2,206,529 | 2,340,207 | 2,302,307 |
| Fair value of plan assets at the end of the year | -1,250,007 | -1,281,773 | -1,252,622 | -1,290,865 | -1,233,762 |
| Asset ceiling | 33,490 | 32,601 | 40,754 | 43,733 | 27,436 |
| Provision at the end of the year | 955,199 | 932,194 | 994,661 | 1,093,075 | 1,095,981 |

The experience adjustments (effects of the differences between the previous actuarial assumptions and what has really occurred) for the Portugal Pension Funds are analysed as follows:

| Thousands of Euros | 2013 | 2012 | 2011 | 2010 | 2009 |
|---|---------|---------|---------|---------|--------|
| Experience adjustments for the Plan liabilities | -25,100 | -25,009 | -53,764 | 11,939 | -9,112 |
| Experience adjustments for the Plan assets | 64,074 | 32,511 | -70,732 | -33,724 | 13,676 |

The experience adjustments (effects of the differences between the previous actuarial assumptions and what has really occurred) for the Brazil Pension Funds are analysed as follows:

| Thousands of Euros | 2013 | 2012 | 2011 | 2010 | 2009 |
|---|---------|--------|---------|--------|-------|
| Experience adjustments for the Plan liabilities | 308 | 3,469 | -12,478 | -3,238 | 2,701 |
| Experience adjustments for the Plan assets | -36,750 | 21,032 | 35,706 | 4,244 | 5,160 |

The past service liability of the pension plans for the Group, as at 31 December 2013 and 2012 is as follows:

| Thousands of Euros | Portugal | Spain | Brazil | Group |
|---|-----------|---------|---------|-----------|
| Evolution of the liability | | · | | |
| Liability at the beginning of the year | 1,727,211 | 104,539 | 349,616 | 2,181,366 |

The components of consolidated net cost of the pensions plans recognised in the year were as follows:

| | Dec 2013 | | | |
|---|----------|-------|--------|--------|
| Thousands of Euros | Portugal | Spain | Brazil | Group |
| Current service cost | 10,753 | -503 | 15 | 10,265 |
| Past service cost (Curtailment / Plan amendments) | -5,489 | - | - | -5,489 |
| Operational component (see note 10) | 5,264 | -503 | 15 | 4,776 |
| Net interest on the net pensions plan liability | 23,258 | 2,772 | 4,870 | 30,900 |
| Financial component (see note 15) | 23,258 | 2,772 | 4,870 | 30,900 |
| | 28,522 | 2,269 | 4,885 | 35,676 |

| | Dec 2012 | | | | |
|---|----------|-------|--------|--------|--|
| Thousands of Euros | Portugal | Spain | Brazil | Group | |
| Current service cost | 11,796 | 376 | 33 | 12,205 | |
| Past service cost (Curtailment / Plan amendments) | 20,217 | | 52 | 20,269 | |
| Operational component (see note 10) | 32,013 | 376 | 85 | 32,474 | |
| Net interest on the net pensions plan liability | 40,568 | 5,662 | 1,972 | 48,202 | |
| Financial component (see note 15) | 40,568 | 5,662 | 1,972 | 48,202 | |
| | 72,581 | 6,038 | 2,057 | 80,676 | |
| | | | | | |

The evolution of the consolidated assets of the Pension Funds is analysed as follows:

| | | Dec | 2013 | |
|--|----------|-------|---------|-----------|
| Thousands of Euros | Portugal | Spain | Brazil | Group |
| Pension funds | | | | |
| Fair value of plan assets at the beginning of the year | 960,342 | - | 321,431 | 1,281,773 |
| Group contribution | - | | 5,066 | 5,066 |
| Plan participants contributions | - | - | 989 | 989 |
| Benefits paid | -61,155 | | -15,814 | -76,969 |
| Interest on the pensions plan assets | 30,162 | | 24,948 | 55,110 |
| Actuarial gains/(losses) | 64,074 | - | -36,750 | 27,324 |
| Currency fluctuation | - | | -53,280 | -53,280 |
| Other variations | - | | 9,994 | 9,994 |
| Assets value at the end of the year | 993,423 | - | 256,584 | 1,250,007 |
| | | | | |

The actuarial gains/losses in Brazil include the positive amount of 7,307 thousands of Euros (20,956 thousands of Reais) related to actuarial gains and losses of the asset ceiling not recognised in reserves (2012: negative in 4,113 thousands of Euros).

To determine the amount of provisions for pension funds, it has been deducted from the assets funds the value of the asset ceiling of 33,490 thousands of Euros, converted at the closing rate of Brazilian Real (109,097 thousands of Reais). As at 31 December 2012 the value of the asset ceiling was 32,601 thousands of Euros.

| | Dec 2012 | | | | |

31 December 2012

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

Properties included in the fund, that are being used by the Group amount to 118,232 thousands of Euros as at 31 December 2012 (118,232 thousands of Euros at 31 December 2012). Bonds include 13,216 thousands of Euros (16,166 thousands of Euros as at 31 December 2012) relating to bonds issued by EDP Finance B.V.

Shares include securities issued by Group companies that are analysed as follows:

| Thousands of Euros | 2013 | 2012 |
|--------------------|-------|-------|
| Shares: | | |
| EDP Renováveis | 5,714 | 5,911 |
| EDP S.A. | - | |
| | 5,714 | 5,911 |

Pension fund assets in Brazil as at 31 December 2013 and 2012 are analysed as follows:

| | Fund assets by nature | | | | | | |
|--------------------|-----------------------|---------|--------|----------|-------|---------|--|
| Thousands of Euros | Liquidity | Bonds | Shares | Property | Other | Total | |
| 31 December 2013 | - | 229,562 | 22,171 | 900 | 3,951 | 256,584 | |

| 31 December 2013 | _ | 89.47% | 8.64% | 0.35% | 1.54% | 100.00% | | |
| 31 December 2012 | - | 90.02% | 8.13% | 0.35% | 1.50% | 100.00% | | |

Assumptions regarding the discount rate

The discount rates used for the EDP Group pension plan were selected based on an analysis of the rates of return available on the date for the high quality corporate bonds. Bonds with maturities and ratings considered appropriate were selected considering the amount and the periods that the benefits are expected to be paid.

The real return rate on assets of the pension fund in 2013 was positive in 10.31% (2012: positive in 8.73%).

As at 31 December 2013 the amount of future benefits expected to be paid, related to the activity in Portugal, Spain and Brazil, is analysed as follows:

| Expected future benefits to be paid | | | | | | | |
|-------------------------------------|----------|--------|---------|--|--|--|--|
| Portugal | Pensions | Total | | | | | |
| 2014 | 200,916 | 34,664 | 235,580 | | | | |
| 2015 | 193,912 | 35,079 | 228,991 | | | | |
| 2016 | 181,906 | 36,020 | 217,926 | | | | |
| 2017 | 172,629 | 36,779 | 209,408 | | | | |
| 2018 | 162,431 | 37,444 | 199,875 | | | | |
| 2019 | 150,598 | 38,262 | 188,860 | | | | |
| 2020 | 140,467 | 38,842 | 179,309 | | | | |
| 2021 | 128,030 | 38,979 | 167,009 | | | | |
| 2022 | 112,827 | 39,558 | 152,385 | | | | |
| 2023 | 99,080 | 38,830 | 137,910 | | | | |

In 2013 and 2012, no contributions were made to the pension funds.

In 2013, the pensions paid by the funds in Portugal totalled 61,155 thousands of Euros (31 December 2012: 58,960 thousands of Euros).

| Expected future benefits |
|---------------------------------|
| to be paid |

| to be paid | | | | |

II. Defined contribution pension plan

Subsidiaries of EDP Group in Spain, Brazil and Portugal have defined contribution plans for their employees that complement those granted by the Social Welfare Systems, under which they pay annual contributions to these plans, calculated in accordance with the rules established in each case.

III. Liability for Medical Care and Other Benefits Plans - Defined Benefit Type

The Group companies in Portugal resulting from the spin-off of EDP in 1994 have a Medical Care Plan which is fully covered by a provision.

Escelsa, Energest and Investco in Brazil also have Medical and other benefits plans for retired employees which are also fully covered by provisions.

EDP and its subsidiaries boards, based on the information provided by legal advisors and on the analysis of pending law suits, booked provisions to cover the losses estimated as probable, related with litigations in progress.

NEVERENDING ENERGY

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

Provision for legal and labour matters and other contingencies includes provisions for litigation in progress and other labour contingencies, relates essentially to:

- i) Requests for the refund of tariff increases paid by industrial consumers of the Brazilian subsidiaries Bandeirante and Escelsa in the amount of 11,790 thousands of Euros (31 December 2012: 14,722 thousands of Euros). These requests result from the application of Administrative Orders DNAEE 38 of 27 February 1986 and 45 of 4 March 1986 - Plano Cruzado, effective from March to November
- ii) Bandeirante is involved in several legal actions of a labour nature mostly related with overtime payment, life-threatening and reintegration in the amount of 6,609 thousands of Euros;
- iii) The Municipal Council of Póvoa do Varzim has brought up a legal action, which estimated liability as at 31 December 2012 was 2,852 thousands of Euros to be refunded by EDP of amounts of the FEF (Fundo de Equilibrio Financeiro - Financial Stability Fund). The action has been contested by EDP, which was absolved, and the provision was reversed during the second quarter of 2013;
- iv) As at 31 December 2012, the litigation with the Municipal Council of Seixal relating to differences regarding taxes and other fees in connection with the use of public space for the years 2006 to 2008 amounted to 3,852 thousands of Euros. During the second quarter of 2013, EDP Distribuição and Municipal Council of Seixal agreed the termination of the lawsuits and the payment of 1,545 thousands of Euros by EDP Distribuição, therefore the provision has been reversed;
- v) In 2012, following the decision by the arbitration court, which partially accepted Terriminas' claim, and condemned EDP Produção to pay the amount of 1,329 thousands of Euros regarding the price differential for 1985 and 1986, EDP Group has booked a provision to cover this contingency. Therefore, at 31 December 2013, the estimated liability amounts to 5,000 thousands of Euros, corresponding to the initial amount updated to current prices. This process is in a foreclosure stage and an appeal was filled by EDP Produção;
- vi) The remaining legal litigations correspond mainly to indemnities for fires, interruption of electricity supply, electrocution, as well as for other damages caused.

The movement in Provision for customer guarantees under current operations is analysed as follows:

| | Group | | |
|--------------------------------------|----------|----------|--|
| Thousands of Euros | Dec 2013 | Dec 2012 | |
| Balance at the beginning of the year | 10,121 | 37,867 | |
| Charge for the year | 18 | 27 | |
| Reversals | - | -2,924 | |
| Charge-off for the year | -6,800 | -34,119 | |
| Other and exchange differences | 9,340 | 9,270 | |
| Balance at the end of the year | 12,679 | 10,121 | |

Provisions for customer guarantees under current operations of 12,679 thousands of Euros (31 December 2012: 10,121 thousands of Euros) includes essentially provisions for commercial losses.

The movement in Provision for dismantling and decommissioning is analysed as follows:

| | Group | | |
|--------------------------------------|----------|----------|--|
| Thousands of Euros | Dec 2013 | Dec 2012 | |
| Balance at the beginning of the year | 169,402 | 140,212 | |
| Unwinding | 10,173 | 7,862 | |
| Increase of the responsibility | 10,308 | 23,125 | |
| Decrease of the responsibility | -12,921 | | |
| Other and exchange differences | -7,187 | -1,797 | |
| Balance at the end of the year | 169,775 | 169,402 | |

As at 31 December 2013, Provision fo

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

As at 31 December 2013, Provision for dismantling and decommissioning includes the following situations:

- I) The Group holds a provision of 19,188 thousands of Euros (31 December 2012: 29,059 thousands of Euros) to cover the cost of dismantling the Trill Nuclear Plant from the final close down until its transfer to Enresa, the company that will dismantle it. The assumptions used in the calculation of the provision include an inflation rate of 2% and a discount rate of 6.25%. Enresa has the responsibility of decommissioning nuclear power plants, as well as of treating and accommodating radioactive waste, within three years after the conclusion of the operational activity of nuclear power plants;
- ii) Provisions for dismantling of wind farms of 66,468 thousands of Euros (31 December 2012: 63,336 thousands of Euros) to cover the costs of returning the sites to their original state, of which 37,960 thousands of Euros refer to the wind farms of the EDPR NA Group, 27,715 thousands of Euros to the wind farms of the EDPR EU Group and 793 thousands of Euros to the wind farms of the EDPR Brasil Group. The assumptions used when computing these provisions consider: (i) an average per MW cost of decommissioning of 14,000 Euros in Europe and 18,549 Euros in the U.S.A.; (ii) a salvage value of 25,000 Euros in Europe and 17,776 Euros in the U.S.A.; (iii) a discount rate of 6.33% in Europe and 5.38% in the U.S.A.; (iv) an inflation rate of 2% in Europe and 2.5% in the U.S.A., and (v) an original capitalization period of 25 years.
- iii) Under the current and future social/economical trends and the practices followed by the EDP Group in matters of sustainability and environment, the group accounts for provisions to cover the costs with the decommissioning, dismantlement and environmental rehabilitation of electric power plants. As at 31 December 2013, the provision which amounts to 60,080 thousands of Euros (31 December 2012: 56,044 thousands of Euros) and 23,344 thousands of Euros (31 December 2012: 20,194 thousands of Euros) to the electric power plants located in Portugal and Spain, respectively. According to accounting policy referred in note 2 o), these provisions are calculated at the present value of the future liability and are accounted for as part of the cost of the related asset (increase in property, plant and equipment) and are depreciated on a straight line basis over the average useful life of the assets. The calculation of these provisions was based on an inflation rate between 1.5% and 2% and discount rates between 3% and 6.5%.

The movement in Provision for other liabilities and charges for is analysed as follows:

| | Gr | Group | | Company | |
|--------------------------------------|----------|----------|----------|----------|--|
| Thousands of Euros | Dec 2013 | Dec 2012 | Dec 2013 | Dec 2012 | |
| Balance at the beginning of the year | 124,848 | 149,927 | 27,882 | 72,172 | |
| Charge for the year | 69,124 | 28,366 | 11,232 | 12,171 | |
| Reversals | -28,451 | -22,693 | -10,048 | -55,882 | |
| Charge-off for the year | -21,464 | -22,930 | -10,495 | - | |
| Other and exchange differences | -722 | -7,822 | 3,579 | -579 | |
| Balance at the end of the year | 143,335 | 124,848 | 22,150 | 27,882 | |
| | | | | | |

Following the grant of the construction license for the hydroelectric plant - UHE Cachoeira Caldeirão, EDP Brasil took the responsability to implement and perform several social and environmental programs being booked a provision for other liabilities and charges in the amount of 15,328 thousands of Euros, against Property, Plant and Equipment. As at 31 December 2013, this amount was transfered to assets held for sale (see note 42), the net effect is presented under Other.

In the course of its normal activity, EDP Group subsidiaries are involved in several litigations and contingencies (of possible risk) of administrative, civil, tax, labour and other natures. These legal, arbitration or other actions, involve customers, suppliers, employees, administrative, central, municipal, tax, environmental or other authorities. In EDP Group's opinion and its legal advisors the risk of a loss in these actions is not probable and the outcome will not affect on a material way its consolidated financial position.

The losses of these processes were considered as possible, do not require the recognition of provisions and are periodically reassessed. At 31 December 2013, the more relevant situations considered as possible contingencies are described as follows:

- i) Bandeirante is involved in a lawsuit with the client White Martins, S.A. in the amount of 27,769 thousands of Euros, on the alleged existence of reflex effects of the Administrative Order 38/86 and 45/86 of the extinguished DNAEE, in the electricity tariff charged between 1986 and 2000. EDP Group classifies the risk of loss of this lawsuit as possible, considering that customer complaint has no legal basis, in accordance with existing jurisprudence with regard to such complaints;
- ii) Investco is involved in a legal action of a civil nature mostly related with indemnity claims resulting from the filling of the hydroelectric reservoir, in the amount of 27,035 thousands of Euros;
- iii) Escelsa is involved in several legal action of a labour nature mostly related with overtime payment, life-threatening and reintegration in the amount of 14,582 thousands of Euros.
- iv) There is a public civil action filed against Bandeirante and Escelsa by ADIC Associação de Defesa dos Interesses Colectivos, claiming a compensation arising from a tariff readjustment on part A from 43 concessionaires. The estimated value attributable to Bandeirante and Escelsa amounts to 25,644 thousands of Euros.
- On 27 October 2009 and 5 January 2010, the EDP Group received two tax assessments regarding 2005 and 2006 taxable income for the EDP tax Group, which included an adjustment of 591 millions of Euros regarding its subsidiary, EDP Internacional SGPS, related to the tax treatment considered by the EDP Group in relation to a capital loss generated with the liquidation of a subsidiary, whose main assets consisted of investments in operating subsidiaries in Brazil, namely Escelsa and Enersul. As at 31 December 2013, the amount of this tax contingency totals 235.2 millions of Euros (31 December 2012: 224 millions of Euros).

Considering the analysis made, the technical advice received and a favourable binding opinion obtained from the tax authorities in relation to the nature of the transaction occurred in the year of the assessment, the EDP Group considers as remote the risk associated with this matter. Under this analysis, the capital loss is tax deductible for income tax purposes as established in article 75 number 2 of the Corporate Income Tax Code ("Código do IRC") based on the wording of the law in force at that date (actual article 81).

Bearing the above in mind, and given that the EDP Group's tax procedures comply with applicable Portuguese tax legislation at the date of the events, the Group is currently using all available legal means to contest these additional assessments. As a result of the administrative appeal dismissal, EDP presented a judicial claim, on 6 June 2012, which is still being analysed.

Bandeirante, through the Union of Power Industry of the State of São Paulo - SindiEnergia, filed two claims against the Department of Finance of the State of São Paulo, seeking the suspension of the effects of Decrees 55,421/2010 and 55,867/2010. Both claims obtained a favourable decision which was confirmed by the Court of Justice of the State of São Paulo. These decisions are still subject of appeal to higher courts. The estimated value at 31 December 2013 amounts to 51,124 thousands of Euros.

38. INSTITUTIONAL PARTNERSHIPS IN USA WIND FARMS

The caption Institutional partnership in USA wind farms is analysed as follows:

| | Group | |
|---|-----------|-----------|
| Thousands of Euros | Dec 2013 | Dec 2012 |
| Deferred income related to benefits provided | 672,154 | 737,598 |
| Liabilities arising from institutional partnerships in USA wind farms | 836,341 | 942,155 |
| | 1,508,495 | 1,679,753 |

EDPR North America books the receipts of institutional investors associated with wind projects. This liability is reduced by the amount of tax benefits provided and payments made to the institutional investors during the period. The amount of tax benefits provided is booked as a non-current deferred income, recognised over the useful life of 25 years of the related projects (see note 8). Additionally this liability is increased by the estimated interest based on the liability outstanding and the expected return rate of the institutional investors (see note 15).

39. TRADE AND OTHER PAYABLES FROM COMMERCIAL ACTIVITIES

Trade and other payables from commercial activities - Non-Current, are analysed as follows:

| | Group | |
|---|-----------|-----------|
| Thousands of Euros | Dec 2013 | Dec 2012 |
| Government grants for investment in fixed assets | 568,666 | 522,551 |
| Amounts payable for tariff adjustments - Electricity - Portugal | - | 842 |
| Energy sales contracts - EDPR NA | 35,750 | 49,449 |
| Deferred income - CMEC | 351,822 | 392,841 |
| Amounts payable for concessions | 226,569 | 240,051 |
| Other creditors and sundry operations | 69,530 | 57,037 |
| | 1,252,337 | 1,262,771 |

Trade and other payables from commercial activities - Current, are analysed as follows:

| | Group | | Company | |
|---|-----------|-----------|----------|----------|
| Thousands of Euros | Dec 2013 | Dec 2012 | Dec 2013 | Dec 2012 |
| Suppliers | 1,269,457 | 1,169,387 | 323,313 | 236,425 |
| Accrued costs related with supplies | 422,541 | 391,834 | 287,104 | 175,934 |
| Property, plant and equipment suppliers and accruals | 457,165 | 731,769 | 1,589 | 6,708 |
| Holiday pay, bonus and other charges with employees | 145,013 | 142,229 | 11,882 | 7,284 |
| CO2 emission licences | 109,355 | 142,084 | - | |
| Amounts payable for tariff adjustments - Electricity - Portugal | 285,274 | 144,994 | - | |
| Amounts payable for tariff adjustments - Electricity - Spain | - | 8,280 | - | |
| Deferred income - CMEC | 56,461 | | - | |
| Other creditors and sundry operations | 543,736 | 490,022 | 48,983 | 61,735 |
| | 3,289,002 | 3,220,599 | 672,871 | 488,086 |

The movement for the period in Amounts payable from Portuguese tariff adjustments - Electricity (Current and Non-current) is analysed as follows:

| Theorem de of France | Current | Non- Current |
|---|----------|-----------------|
| Thousands of Euros | | |
| Balance as at 1 January 2012 | 67,473 | 12,376 |
| Payment through the electricity tariff | -70,177 | - |
| Tariff adjustment of the year | 141,202 | - |
| Interest expense | 4,453 | - |
| Transfer to tariff adjustments receivable | -10,333 | 842 |
| Transfer from Non-Current to Current | 12,376 | -12,376 |
| Balance as at 31 December 2012 | 144,994 | 842 |
| Payment through the electricity tariff | -138,029 | - |
| Tariff adjustment of 2012 | 2,203 | |
| Tariff adjustment of the year | 280,129 | - |
| Interest expense | 3,481 | |
| Transfer of tariff adjustment to receive | -7,504 | -842 |
| Balance as at 31 December 2013 | 285,274 | - |

The caption CO2 emission licences includes the CO2 consumptions made during 2013 in Portugal and Spain, in the amount of 47,433 thousands of Euros and 61,922 thousands of Euros, respectively. These licences will be returned to the regulatory authorities of each country in 2014.

Government grants for investment in fixed assets non-current correspond to the subsidies for the investment of the Group, being depreciated through the recognition of a revenue in the income statement over the useful life of the related assets (see note 13).

At the moment of the EDPR North America acquisition, the contracts signed between this subsidiary and its customers, determined under the terms of the Purchase Price Allocation, were valued through discounted cash flow models and market assumptions at 190,400 thousands of USD, being booked as a non-current liability under Energy sales contract - EDPR NA, which is depreciated over the useful life of the contracts in Other operating income (see note 8).

Deferred income - CMEC current and non-current in the amount of 408,283 thousands of Euros (31 December 2012: 392,841 thousands of Euros) refers to the initial CMEC amount (833,467 thousands of Euros) net of the amortisation of initial CMEC during the years 2007 to 2013 and including unwinding (see note 15).

Amounts payable for concessions refer to the non-current amounts payable includes the concession rights for the operation of the hydric domain of Alqueva and Pedrógão transferred by EDIA of 150,116 thousands of Euros (31 December 2012: 150,489 thousands of Euros) and to the financial compensation for the use of the public domain related to concession agreements of Investco, S.A. and Enerpeixe, S.A. in Brazil of 77,238 thousands of Euros (31 December 2012: 89,562 thousands of Euros).

The caption Other creditors and sundry operations - Current, includes 14,317 thousands of Euros related to tariff adjustment payable (31 December 2012: 14,317 thousands of Euros).

40. OTHER LIABILITIES AND OTHER PAYABLES

Other liabilities and other payables are analysed as follows:

| | Group | | Com | pany |
|---|----------|----------|-----------|-----------|
| Thousands of Euros | Dec 2013 | Dec 2012 | Dec 2013 | Dec 2012 |
| Other liabilities and other payables - Non-Current | | | | |
| Loans from non-controlling interests | 215,730 | 108,850 | - | - |
| Put options over non-controlling interest liabilities | 8,138 | 90,371 | - | - |
| Derivative financial instruments (see note 43) | 116,631 | 145,614 | - | - |
| Payables - Group companies | - | - | 2,439,880 | 3,006,023 |
| Amounts payable for acquisitions and success fees | 14,720 | 41,735 | - | - |
| Other creditors and sundry operations | 20,627 | 23,167 | 11,062 | 11,062 |
| | 375,846 | 409,737 | 2,450,942 | 3,017,085 |
| | | | | |
| Other liabilities and other payables - Current | | | | |
| Loans from non-controlling interests | 99,253 | 81,008 | - | - |
| Dividends attributed to related companies | 36,145 | 56,394 | - | _ |
| Derivative financial instruments (see note 43) | 74,429 | 62,629 | 80,128 | 61,543 |
| Payables - Group companies | - | - | 131,407 | 679,503 |
| Amounts payable for acquisitions and success fees | 16,863 | 135,932 | - | _ |
| Other creditors and sundry operations | 11,396 | 32,180 | 37,403 | 30,182 |
| | 238,086 | 368,143 | 248,938 | 771,228 |
| | 613,932 | 777,880 | 2,699,880 | 3,788,313 |

The variation in the caption Loans from non-controlling interests Current and Non-Current is mainly related to EDPR Portugal loan formerly due to EDPR-EU in the second quarter of 2013 in the amount of 110,529 thousands of Euros that following the sale process of 49% of its shareholding in EDPR Portugal to CTG, shareholder of EDP Group, were also acquired by CTG. The maturity date of this loan is December 2022, bearing interest at a fixed rate of 5.5% and the interests are paid half-yearly. At 31 December 2013, this loan amounts to 99,414 thousands of Euros.

The caption Payables - Group companies Current on a company basis includes 131,407 thousands of Euros (31 December 2012: 462,142 thousands of Euros) related to debt financing obtained by EDP S.A. Sucursal in Spain through EDP Finance BV and EDP Servicios Financieros España, S.A., respectively (see note 46).

The caption Payables - Group companies Non-Current on a company basis, of 2,439,880 thousands of Euros, corresponds to the financing obtained through EDP Finance BV and granted to EDP - Energias de Portugal - Sociedade Anónima, Sucursal en España, following EDPR NA's acquisition and for the financing of the investment plan of EDP Renováveis Group.

The variation in the caption Put options over non-controlling interest liabilities - Non-Current, includes the exercise by Liberbank (Ex-Cajastur) in 3% of the original written put option held over EDP of 3.13% of HC Energia share capital (see note 19). At 31 December 2013, this caption includes the remaining responsibility of 0.13% in the amount of 4,641 thousands of Euros.

The Amounts payable for acquisitions and success fees Non-Current includes mainly the amounts related to the contingent prices of several European and Brazilian projects. The reduction occurred in this caption is related with the contingent price revision associated with the acquisitions of Polish wind farms in the amount of 17,423 thousands of Euros, Greenwind in the amount of 1,750 thousands of Euros and EDPR France in the amount of 1,705 thousands of Euros. Additionally, it also includes the exercise of the remaining put option of 6.48% over EDPR Italia share capital in the amount of 2,894 thousands of Euros.

Following Ente Vasco de la Energia decision to exercise the NG Energia put option, an agreement was signed on 28 July 2010 between EVE and HC Energia that sets up the following terms: (i) Purchase by HC Energia from EVE of 29.43% of the share capital of NG Energia; (ii) HC Energia will have a call option to acquire from EVE the remaining 5% stake of NG Energia between 1 June 2016 and 1 June 2018, at an exercise price calculated in accordance with a pre-set formula based on expected future dividends to be distributed by NG Energia; and (iii) Change of the HC Energia/EVE shareholder agreement, with the involvement of EVE in NG Energia' strategic management to be adjusted in accordance with its shareholding position. As a consequence of the agreement mentioned above, during the first semester of 2013 the Group HC Energia paid the remaining amount of 96,003 thousands of Euros related to the acquisition of 29.43% of the NG Energia' share capital. Additionally, the variation also includes the payment of the contigent price of the solar photovoltaic companies in Romania (EDPR Solar Romania) in the amount of 9,444 thousands of Euros and the contigent price revision of the acquisition of the hydro power plant of Jari in the amount of 10,983 thousands of Euros.

41. CURRENT TAX LIABILITIES

Current tax liabilities are analysed as follows:

| | Group | | |
|-----------------------|----------|----------|--|
| Thousands of Euros | Dec 2013 | Dec 2012 | |
| Income tax | 158,367 | 103,633 | |
| Withholding tax | 57,565 | 64,763 | |
| Value added tax (VAT) | 163,996 | 94,461 | |
| Turnover tax (Brazil) | 40,008 | 52,956 | |
| Social tax (Brazil) | 18,767 | 41,984 | |
| Other taxes | 146,331 | 109,941 | |
| | 585,034 | 467,738 | |

As at 31 December 2013, for the Group, the caption Other taxes includes essentially the foreign taxes regarding HC Energia Group of 79,773 thousands of Euros, NG Energia Group of 25,626 thousands of Euros (31 December 2012: HC Energia Group of 44,512 thousands of Euros and NG Energia Group of 29,667 thousands of Euros) and EDP Brasil Group of 9,246 thousands of Euros (31 December 2012: 12,710 thousands of Euros).

42. ASSETS AND LIABILITIES HELD FOR SALE

The criteria for classifying assets and liabilities as held for sale and discontinued operations, as well as their presentation in the EDP Group's consolidated financial statements, are presented under accounting policies - note 2 u).

This caption is analysed as follows:

| | Group | | |
|--|----------|----------|--|
| Thousands of Euros | Dec 2013 | Dec 2012 | |
| Assets held for sale | | | |
| Assets of the business of gas transmission - NG Energia | - | 212,850 | |
| Assets of the business of cogeneration | - | 29,001 | |
| Assets of the business of electricity generation - Jari e Cachoeira | 715,837 | | |
| | 715,837 | 241,851 | |
| Liabilities held for sale | | | |
| Liabilities of the business of gas transmission - NG Energia | - | -23,628 | |
| Liabilities of the business of cogeneration | - | -15,758 | |
| Liabilities of the business of electricity generation - Jari e Cachoeira | -577,964 | | |
| | -577,964 | -39,386 | |
| | 137,873 | 202,465 | |

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

In 2012, as a result of the negotiations for the sale of the gas transmission network of NG Energia, the assets and liabilities associated with this business were presented as assets and liabilities held for sale. This operation was concluded in February 2013, after obtaining the required authorizations by the regulatory and antitrust authorities. NG Energia sold the gas transmission business to Enagás, S.A. (the Spanish gas transmission system operator) for 115,493 thousands of Euros, generating a gain of 55,829 thousands of Euros (see note 8). In this operation, Enagás also paid an intercompany debt of 129,654 thousands of Euros.

On 21 January 2013, following the exercise of a call option by Soporcel as established in the shareholders' agreement, EDP Produção sold the cogeneration assets, through the sale of 82% shareholding in Soporgen, S.A to the other shareholder, Soporcel, S.A., for 5,060 thousands of Euros, generating a gain of 2,239 thousands of Euros (see note 8). Additionally, an amount of 5,349 thousands of Euros was received related to dividends distributed by Soporgen before this operation. Simultaneously with this divestment, EDP Produção received full reimbursement of the shareholders loans granted to Soporgen, including accrued interest, in the amount of 3,281 thousands of Euros. As at 31 December 2012, the assets and liabilities associated with Soporgen were presented under assets and liabilities classified as held for sale.

On 6 December 2013, EDP Energias do Brasil comunicated to the market the establishement of a partnership with CWE Investment Corporation (CWEI) and CWEI Brasil Participações (CWEI Brasil), subsidiaries controlled by China Three Gorges, for joint energy projects in Brazil. In the context of this partnership, was agreed the sale of 50% of the stake held in Jari (CEJA) and Cachoeira Caldeirão hydro power plant projects. The agreement foresees joint participation in energy projects in Brazil with joint control. The transaction amounted to 490 millions of Reais for CEJA and the sale amount of Cachoeira Caldeirão corresponds to 50% of the investment made by EDP Brasil. With reference to 31 December 2013, and to the extent that these transactions, though highly probable, are subject to prior authorization by the competent authorities, the assets and liabilities related to these transactions were presented as non-current assets and liabilities held for sale. The completion of these transactions is expected in the first half of 2014. Under IFRS 11, with the completion of the transaction, CEJA and Cachoeira Caldeirão will be accounted under the equity method. The significant assets and liabilities of these entities that have been reclassified to assets and liabilities held for sale are: tangible assets in progress (355,182 thousands of Euros), concession rights (187,847 thousands of Euros) and net debt (323,294 thousands of Euros). These reclassifications were made only for financial statement presentation purposes, without changing the measurement criteria of these assets and liabilities, being expected that the fair value less costs to sell is higher than the book value of these assets and liabilities in accordance with IFRS 5.

43. DERIVATIVE FINANCIAL INSTRUMENTS

In accordance with IAS 39, the Group classifies derivative financial instruments as fair value hedges of a recognised asset or liability (Fair value hedge), as cash flow hedges of recognised liabilities and highly probable future transactions (Cash flow hedge) and as net investment hedge.

In 2013 the fair value and the maturity of the derivative financial instruments are analysed as follows:

| | Fair v | /alue | Notional | | | |
|------------------------------------|---------|-------------|-----------|------------|--------------|-----------|
| | | | | From 1 | | |
| Thousands of Euros | Assets | Liabilities | Up 1 year | to 5 years | Over 5 Years | Total |
| Net Investment hedge | | | | | | |
| Cross currency interest rate swaps | 12,858 | - | - | 122,412 | - | 122,412 |
| Foreign exchange forwards | 2,360 | | 33,305 | | | 33,305 |
| | 15,218 | | 33,305 | 122,412 | - | 155,717 |
| Fair value hedge | | | | | | |
| Interest rate swaps | 58,315 | - | - | 1,000,000 | 500,000 | 1,500,000 |
| Cross-currency interest rate swaps | 62,393 | -60,056 | 177,911 | 423,922 | 410,314 | 1,012,147 |
| | 120,708 | -60,056 | 177,911 | 1,423,922 | 910,314 | 2,512,147 |
| Cash flow hedge | | | | | | |
| Commodities swaps | 10,756 | -6,729 | 362,884 | 61,578 | - | 424,462 |
| Interest rate swaps | | -50,176 | 47,342 | 214,592 | 365,748 | 627,682 |
| Foreign exchange forwards | 180 | -5,703 | 215,460 | 8,232 | - | 223,692 |
| | 10,936 | -62,608 | 625,686 | 284,402 | 365,748 | 1,275,836 |
| Trading | | | | | | |
| Commodities swaps | 14,335 | -14,982 | 2,101,868 | 46,818 | - | 2,148,686 |
| Interest rate swaps | 35,337 | -29,097 | 518,566 | 85,627 | 708,069 | 1,312,262 |
| Cross-currency interest rate swaps | 7,589 | -15,784 | - | 69,750 | 590,017 | 659,767 |
| Currency forwards | 13,171 | -5,160 | 510,361 | 115,952 | _ | 626,313 |
| Options purchased and sold | - | -3,373 | - | - | - | - |
| | 70,432 | -68,396 | 3,130,795 | 318,147 | 1,298,086 | 4,747,028 |
| | 217,294 | -191,060 | 3,967,697 | 2,148,883 | 2,574,148 | 8,690,728 |

In 2012 the fair value and the maturity of the derivative financial instruments are analysed as follows:

| | Fair | value | Notional | | | |
|------------------------------------|---------|-------------|-----------|------------|--------------|-----------|
| | | | | | | |
| Thousands of Euros | Assets | Liabilities | Up 1 year | to 5 years | Over 5 Years | Total |
| Net Investment hedge | | | | | | |
| Cross currency interest rate swaps | 3,867 | -422 | | 122,412 | | 122,412 |
| | 3,867 | -422 | - | 122,412 | - | 122,412 |
| Fair value hedge | | | | | | |

The fair value of the derivative financial instruments is booked in Other debtors and other assets (see note 27) and other liabilities and other payables (see note 40), according to its nature.

Fair value of derivative financial instruments is based on quotes indicated by external entities, as such, according to IFRS13 requirements, the fair value of the derivative financial instruments is classified as of Level 2 (see note 47). These entities use generally accepted discounted cash flow techniques and data from public markets.

Derivative financial instruments classified as trading are financial hedging instruments contracted for economic hedging at EDP Group level (see note 4), however such instruments are not eligible for hedge accounting under IFRS.

The changes in the fair value, including accrued interest, of hedging instruments and risks being hedged are as follows:

| | | | 2013 | | 201 | 12 |
|--------------------|-----------------------------|----------------------------|------------|------------|------------|------------|
| | | | Changes in | fair value | Changes in | fair value |
| Thousands of Euros | Hedging instrument | Hedged risk | Instrument | Risk | Instrument | Risk |
| | | | | | | |
| Net investment | Cross-curr. int. rate swaps | Subsidiary in PLN and BRL | 9,413 | -8,890 | -4,362 | 4,966 |
| Net investment | Currency forwards | Subsidiary in CAD | 2,360 | -2,360 | | - |
| Fair value | Interest rate swap | Interest rate | -9,924 | 11,173 | 13,937 | -12,459 |
| | | | | | | |
| Fair value | Cross-curr. int. rate swaps | Exchange and interest rate | -91,711 | 89,442 | 51,020 | -46,166 |
| Cash flow | Interest rate swap | Interest rate | 58,713 | - | -37,356 | - |
| Cash flow | Currency forwards | Exchange rate | 3,080 | - | 8,784 | - |
| Cash flow | OMIP futures | Commodity prices | -2,346 | - | 3,046 | _ |
| Cash flow | Commodities swaps | Commodity prices | 12,239 | - | -29,600 | - |
| | | | -18,176 | 89,365 | 5,469 | -53,659 |

During 2013 and 2012 the following market inputs were considered for the fair value calculation:

| Instrument | Market input |
|-----------------------------|---|
| Cross-curr. int. rate swaps | Fair value indexed to the following interest rates: Euribor 3M, Euribor 6M, Daily CDI and Wibor 3M; |
| Cross-curr. Int. rate swaps | and exchange rates: EUR/CHF, EUR/GBP, EUR/BRL, EUR/PLN and EUR/USD. |
| Interest rate swaps | Fair value indexed to the following interest rates: Euribor 3M, Euribor 6M, Wibor 3M and Wibor 6M. |
| Currency forwards | Fair value indexed to the following exchange rates: EUR/USD, EUR/RON, EUR/PLN, EUR/GBP, |
| Currency forwards | CAD/DKK, CAD/USD, USD/JPY and EUR/CAD. |
| Commodities swaps | Fair value indexed to the market quotes of the following commodities: Brent, NBP Natural Gas, |
| Commodities swaps | Electricity, Fuel, Coal, Fuel, Freights, CER and CO2; |
| OMIP futures | Fair value indexed to the quotes from electricity markets. |

The changes in the fair value reserve related to cash flow hedges in 2013 and 2012 were as follows:

| | Group | | |
|--|----------|----------|--|
| Thousands of Euros | Dec 2013 | Dec 2012 | |
| Balance at the beginning of the year | -121,097 | -40,625 | |
| Fair value changes | 40,283 | -78,747 | |
| Transfers to results from hedging of financial liabilities | | | |
| and commodity prices | 7,799 | -590 | |
| Changes resulting from acquisitions/sales without control | | | |
| changes | -988 | -1,135 | |
| Balance at the end of the year | -74,003 | -121,097 | |

The gains and losses on the financial instruments portfolio, excluding accrued interest, booked in the income statement in 2013 and 2012 are as follows:

| | Group | | Company | |
|---|----------|----------|----------|----------|
| Thousands of Euros | Dec 2013 | Dec 2012 | Dec 2013 | Dec 2012 |
| Derivatives held for trading | -11,182 | -59,964 | -15,117 | 10,562 |
| Net investment hedge - ineffectiveness | 523 | 604 | - | |
| Fair value hedges | | | | |
| Derivatives | -101,635 | 64,957 | -86,375 | -39,323 |
| Hedged liabilities | 100,615 | -58,625 | 86,375 | 39,323 |
| Cash flow hedges | | | | |
| Transfer to results from hedging of financial liabilities | 1,349 | -440 | - | |
| Transfer to results from hedging of commodity prices | -9,148 | 1,030 | -1,022 | 698 |
| Ineffectiveness | 13 | -156 | 13 | -156 |
| | -19,465 | -52,594 | -16,126 | 11,104 |

The effective interest rates of the derivative financial instruments relating to financing operations at 31 December 2013 are as follows:

| _ |
|---|
| |
| |

| | | | Group | |

| Other | 9,224 | 9,272 | - | |
| | 2,190,313 | 2,731,245 | 599,502 | 745,324 |
| Total | 3,502,745 | 3,955,766 | 840,698 | 1,057,561 |
| Real guarantees | 21,739 | 29,504 | - | - |
| | | | | |

The financial guarantees contracted include, at 31 December 2013 and 2012, 1,264,945 thousands of Euros and 1,139,074 thousands of Euros, respectively, relating to loans obtained by Group companies and already included in the consolidated debt.

EDP and its subsidiaries are required to provide bank or corporate guarantees for the current generation and distribution activities. The total guarantees outstanding include, at 31 December 2013 and 2012, 299,470 thousands of Euros and 397,266 thousands of Euros, respectively, of guarantees provided to market operators to enable EDP and its subsidiaries to participate in the energy markets.

Operating guarantees contracted include, as at 31 December 2013 and 2012, 303,182 thousands of Euros and 494,327 thousands of Euros, respectively, which refer to corporate guarantees provided by EDP Renewables relating to EDPR Renováveis Group commercial commitments already reflected in the balance sheet.

As at 31 December 2013, guarantees include 294,144 thousands of Euros and 216,013 thousands of Euros, related to Jari and Cachoeira Caldeirão, respectively, which are classified as Assets and Liabilities Held for Sale (note 42).

Real guarantees, as at 31 December 2013, include 1,915 thousands of Euros (31 December 2012: 9,615 thousands of Euros) related with guarantees provided to projects and loans obtained in Brazil.

Regarding the information disclosed above:

- i) The Group also has project finance loans with usual guarantees for these loans, namely pledges or promissory pledges over shares, bank accounts and assets relating to the projects. At 31 December 2013 and 2012 these loans amounted to 985,551 thousands of Euros and 1,018,578 thousands of Euros, respectively, and are included in the Group's consolidated debt (see note 35);
- ii) EDPR NA is providing its tax equity investors with standard corporate guarantees typical of these agreements to indemnify them against costs they may incur as a result of fraud, wilful misconduct or a breach of EDPR NA of any operational obligation under the tax equity agreements. As at 31 December 2013 and 2012, EDPR's obligations under the tax equity agreements, in the amount of 803,006 thousands of Euros and 901,301 thousands of Euros, are reflected in liabilities under the Institutional Partnerships in USA wind farms;
- iii) EDP has constituted an escrow deposit in the amount of 347,172 thousands of Euros (334,497 thousands of Euros non-current and 12,675 thousands of Euros current), as presented in note 35, associated with several loans contracted with the EIB. This escrow deposit may be reduced by the repayment of these loans.

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

The commitments relating to short and medium-long term financial debt, finance lease commitments and other long term commitments (included in the consolidated statement of financial position) and other liabilities relating to purchases and future lease payments under operating leases (not included in the consolidated statement of financial position) are disclosed, as at 31 December 2013 and 2012, by maturity, as follows:

The Group's contractual commitments shown above relate essentially to agreements and commitments required for current business activities. Specifically, the majority of the commitments are established to guarantee adequate supply of fuel and energy to its customers in the Europe, United States of America and Brazil and to comply with medium and long term investment objectives of the Group.

The short and long term debt corresponds to the balance of borrowings and related falling due interest, contracted by the Group with bank entities, non-convertible bonds, commercial paper and other borrowings. Interest was calculated based on interest rates in force at the end of the period.

As at 31 December 2013, short and long term financial debt (including interest) includes 641,076 thousands of Euros related to Jari and Cachoeira Caldeirão financial debt and falling due interest, which are classified as Assets and Liabilities Held for Sale (note 42).

Falling due finance lease commitments relate to Property, plant and equipment acquired by the Group under finance lease contracts. These amounts include capital outstanding and interests.

Purchase obligations include essentially obligations of long term contracts relating to the supply of products and services in the normal course of the Group's operations. Prices defined under forward contracts are used in estimating the amount of contractual commitments.

Other long term commitments relate to Group's liabilities relating to pension and Medical plans and other benefits, classified as beneficts to employees in the consolidated statement of financial position (see note 36).

As at 31 December 2013, the EDP Group has the following liabilities/rights arising from call and put options on investments:

- Put option of Liberbank (Ex-Cajastur) over EDP for 0.13% of the share capital of HC Energia, this option can be exercised until 31 December 2017;
- EDP holds, through its subsidiary EDP Renewables Europe, S.L., a call option over Liberbank for "Quinze Mines" share capital (51% of total share capital). Liberbank has an equivalent put option over EDP. These options can be exercised between 17 July 2014 and 17 July 2016, being the price of exercising the option determined by an investment bank valuation process;
- EDP holds, through its subsidiary EDP Renewables Europe, S.L., a call option over the shares held by Liberbank for the companies "Sauvageons", "Le Mee" and "Petite Piece" (51% of total share capital). Liberbank has an equivalent put option over EDP. These options can be exercised between 1 January 2013 and 31 December 2014, being the price of exercising the option determined by an investment bank valuation process;
- EDP holds, through its subsidiary EDP Renewables Europe, S.L., a call option over the remaining shareholders of Re Plus (WPG, Galilea and Grant Partners) for 10% of its share capital. The price of exercising these options is 7,500 thousands of Euros. The options can be exercised (i) if a change occur in the shareholding structure of the remaining shareholders of Re Plus and (ii) always before the last project starts in operation;
- EDP holds, through its subsidiary EDP Renewables Europe, S.L., a put option of 15% of the share capital of Rowy, over the other shareholders. The exercise price is 80% of equity value with a cap of 5,000 thousands of Euros. The exercise period is the earlier of (i) two years following the beginning of construction date or (ii) 31 December 2019;
- EDP holds, through its subsidiary EDP Gestão da Produção de Energia, S.A., a call option of 2.67% of the share capital of Greenvouga and their supplementary capital on Martifer Renewables, S.A. exercisable at any time. Moreover, Martifer Renewables, S.A., holds a put option of 2.67% of the share capital of Greenvouga and their supplementary capital on EDP Gestão da Produção de Energia, S.A., that can only be exercised within one year from the date of issuance of the license of Ribeiradio-Ermida hydroelectric plants. The option can be exercised until 1 February 2015. The stock price and the price of supplementary capital, in the event of exercise of the options listed, corresponds to their nominal value plus an equity component possible in the amount of 1,750 thousands of Euros;
- EDP holds, through its subsidiary EDP Renewables Europe, S.L., a call option of the remaining 40% of the share capital of J&Z Wind Farms SP. ZO.O., whose exercise price corresponds to 90% of the market value of this participation. This option can be exercised between 3 and 5 years after the start of construction works of the first park;
- EDP holds, through its subsidiary South África Wind & Solar Power, S.L., a call option of an aditional 42,5% of the share capital of Modderfontein Wind Energy Project, Ltd., which exercise price corresponds to the amounts contributed by the other partner in the Modderfontein project development. This option can be exercised from the date of the agreement until 45 calendar days before the deadline for submission of tenders for the next auction of energy;
- EDP holds, through its subsidiary EDP Renewables Europe, S.L., a call option of the remaining 35% of the share capital of Molen Wind II, S.P. ZO.O., whose exercise price corresponds to 90% of the market value of this participation. This option can be exercised up to 2 years after the maturity of the financial debt for the wind farm construction.

45. SHARE BASED PAYMENTS

EDP implemented a stock option programs applicable to senior management and directors, under the terms approved by the General Meeting, in order to promote the creation of value added.

Currently, EDP Group has a stock option plan for the President of the Board of Directors, Chief Executive Officer and Executive Members for the 2003/2005 period in which the options granted can be exercised up to 1/3 in each of the following three years following the grant date. Options not exercised expire eight years after being granted (April 2014). The exercise price of the options is calculated based on the market price of the company's shares at the grant date. The options maximum term is eight years. The options are granted by the EDP Group's Remunerations Committee and can only be exercised after two years of service.

During 2013, were exercised the remaining options of the Plan for Members of the Board of Directors and Management of the Group subsidiaries.

The movements in the stock option plans are analysed as follows:

| | Option activity | Weighted average exercise price (Euros) |
|--------------------------------|-----------------|---|
| Balance as at 31 December 2011 | 605,477 | 2.22 |
| Options exercised | | |
| Options granted | - | |
| Options expired | 38,276 | |
| Balance as at 31 December 2012 | 567,201 | 2.21 |
| Options exercised | 416,511 | |
| Options granted | - | |
| Options expired | | |
| Balance as at 31 December 2013 | 150,690 | 2.21 |

Information regarding stock options as at 31 December 2013, is analysed as follows:

| | Weighted average | Weighted average remaining | | |
|-------------|------------------|----------------------------------|-------------|------------|
| Options | exercise | contractual | Options | Fair value |
| outstanding | price | life | exercisable | options |
| 150,690 | 2.21 | 0.33 | 150,690 | 132,862 |

During 2013 no stock options cost was recognised as the past service cost of granted options was recognised in prior years.

During 2013, EDP Group granted treasury stocks to employees (760,900 shares) totalling 1,886 thousands of Euros.

Remuneration of company

In accordance with the Company's by-laws, the remuneration of company officers is set by a Remunerations Committee appointed by the Shareholders' General Meeting, except for the fixed and variable remuneration of the members of the Executive Board of Directors, which is set by a Remunerations Committee appointed by the General and Supervisory Board.

In 2013, the annual fixed and variable remuneration cost accounted for the members of the Executive Board of Directors (EBD) and the fixed remuneration of the General and Supervisory Board (GSB), was as follows:

| Thousands of Euros | EBD | GSB |
|--------------------|-------|-------|
| President | 989 | 491 |
| Members | 4,589 | 1,249 |
| | 5,578 | 1,740 |

The remuneration costs accounted with the EBD, includes the amount of 1,469 thousands of Euros related to the annual variable remuneration. This amount was calculated considering the maximum potential variable remuneration for the year, in accordance with Remunerations Committee policy of the GSB, deducted from the correction of the accrual from the previous year compared with the amount paid.

Additionally the Remunerations Committee policy of the GSB, foresees in certain circumstances, a variable multi-annual remuneration to the EBD members, corresponding to the current mandate (2012-2014). On this basis, an estimated amount of 7,891 thousands of Euros was accrued.

During 2013 the remuneration costs of the members of the Remunerations Committee of the General Assembly amounted to 35,000 Euros.

In 2013, KPMG fees relating to external audit and statutory audit of all companies financial statements of the EDP Group, except EDP Brasil subgroup, amounted to 5,896,058 Euros. This amount includes 180,000 Euros for the fees of the Statutory auditor of EDP Energias de Portugal, S.A. Additionally, the total fees charged by KPMG for other assurance services, tax advisory and other services than audit amounted to 1,273,865 Euros, 484,600 Euros and 349,455 Euros, respectively.

Business operations between the Company and the members of the Executive Board of Directors and General and Supervisory Board with qualifying holdings and companies in the group or control relationship with EDP

In the course of its activity and regardeless their relevance, EDP concludes business and operations under normal market conditions for similar transactions with different entities, namely financial institutions, including holders of qualified shareholdings in EDP's share capital and those related parties.

On 11 May 2012, after the strategic partnership agreement concluded with China Three Gorges Corporation (CTG) came into effect in December 2011, this company (and three other group companies) became part of EDP's General and Supervisory Board.

Under the strategic partnership with China Three Gorges Corporation, on 28 June 2013 EDP Renováveis, S.A. sold for a total final price of 368 millions of Euros to a CTG Group company (CITIC CWEI Renewables S.C.A.) a 49% shareholding in EDP Renováveis Portugal and 25% of the shareholder loans capital and supplementary capital contributions under the applicable rules for additional contributions granded to this company.

Also under this partnership, on 6 December 2013, EDP Brasil signed a memorandum of understanding with CWE Investment Corporation (CWEI), a wholly owned subsidiary of CTG, setting out the main guidelines for a future partnership in joint investments between EDP Brasil and CWEI and that governs parties' participation in joint projects in Brazil. These investments by CWEI Brasil will be considered for purposes of fulfilment of the strategic partnership agreement in relation to the total investment of 2 billions of Euros to be made by CTG up to 2015 (including co-funding of operating investments) in ready-to-build operational renewable energy generation projects.

Balances and transactions with companies of China Three Gorges Group

In June 2013, in accordance with the EDP / CTG strategic partnership, EDP Renováveis Group has completed the sale, without loss of control of 49% equity shareholding in EDP Renováveis Portugal, S.A., as a result, the Group recognised non-controlling interests of 111,231 thousands of Euros and an impact in reserves attributable to Group of 112,566 thousands of Euros. Following the conclusion of the sale, CTG holds a loan over EDPR Group in the amount of 111 millions of Euros (see note 5). The maturity date of this loan is December 2022, bearing interest at a fixed rate of 5.5% and the interests are paid half-yearly. At 31 December 2013, this loan amounts to 99.414 thousands of Euros from which 8,818 thousands of Euros as current and 90,596 thousands of Euros as non-current (see note 40).

Balances and transactions with subsidiaries and associates

In the normal course of its business, EDP Group companies established commercial transactions and operations with other Group companies, whose terms reflect normal market conditions.

The credits and debits over subsidiaries and associates, at Company level, are analysed as follows:

Credits

| | December 2013 | | | |
|---------------------------------|---------------|------------|---------|-----------|

47. FAIR VALUE OF FINANCIAL ASSETS AND LIABILITIES

Fair value of financial instruments is based, whenever available, on listed market prices. Otherwise, fair value is determined through internal models, which are based on cash flow discounting techniques and option valuation models or through quotations supplied by third parties. These models are developed considering the market variables which affect the financial instruments, namely yield curves, exchange rates and volatility factors.

Market data is obtained from stock exchange and suppliers of financial data (Bloomberg and Reuters).

As at 31 December 2013 and 2012, the following table presents the interest rate curves of the major currencies to which the Group is exposed used for cash flow discount:

| | 31 December 2013 | | 31 December 2012 | | | | |
|----------|------------------|----------|------------------|----------|-------|-------|--|
| | | Currency | | Currency | | | |
| | EUR | USD | BRL | EUR | USD | BRL | |
| 3 months | 0.29% | 0.25% | 10.50% | 0.19% | 0.31% | 7.06% | |
| 6 months | 0.39% | 0.35% | 10.79% | 0.32% | 0.51% | 7.09% | |
| 1 year | 0.56% | 0.58% | 11.06% | 0.54% | 0.84% | 7.14% | |
| 2 years | 0.52% | 0.48% | 11.93% | 0.38% | 0.39% | 7.71% | |
| 3 years | 0.73% | 0.86% | 12.49% | 0.44% | 0.48% | 8.19% | |
| 4 years | 1.00% | 1.31% | 12.75% | 0.60% | 0.64% | 8.44% | |
| 5 years | 1.25% | 1.75% | 12.91% | 0.77% | 0.83% | 8.64% | |
| 6 years | 1.48% | 2.12% | 12.96% | 0.95% | 1.06% | 8.79% | |
| 7 years | 1.68% | 2.43% | 13.07% | 1.12% | 1.27% | 9.00% | |
| 8 years | 1.85% | 2.67% | 13.12% | 1.29% | 1.47% | 9.16% | |
| 9 years | 2.01% | 2.87% | 13.18% | 1.43% | 1.65% | 9.22% | |
| 10 years | 2.15% | 3.03% | 13.20% | 1.57% | 1.81% | 9.33% | |
| | | | | | | | |

Fair value of financial assets and liabilities as at 31 December 2013 and 2012 is analysed as follows:

| | G | Froup Dec 201 | 13 | Group Dec 2012 | | |

Considering that EDP Group's structure of financial assets and liabilities booked at amortised cost has essentially a short term nature (level 2), the effect of changes in the fair value has not been considered. Fair value of EDP Group's loans was determined considering current market interest rates.

The market value of loans is calculated based on the discounted cash flows at market interest rates at the balance sheet date, increased by the best estimate, at the same date, of market conditions applicable to Group's debt, based on its average term.

According to IFRS 13 requirements, EDP Group established the way it obtains the fair value of its financial assets and liabilities. The levels used are defined as follows:

- Level 1 Fair value based on the available listed price (not adjusted) in the identified markets for assets and liabilities;
- . Level 2 Fair value based in market inputs not included in Level 1, but observable in the market for the asset or liability, either directly or indirectly:
- Level 3 Fair value of the assets and liabilities calculated with inputs that are not based on observable market information.

| Financial assets | | | | | | |
| Available for sale investments | 111,003 | 53,751 | 47,729 | 75,387 | 48,229 | 57,682 |
| Derivative financial instruments | - | 217,294 | - | - | 276,840 | - |
| Financial assets at fair value through profit | | | | | | |
| or loss | 4,217 | <u>-</u> _ | - | 390 | | - |
| | 115,220 | 271,045 | 47,729 | 75,777 | 325,069 | 57,682 |
| Financial liabilities | | | | | | |
| Derivative financial instruments | | 191,060 | - | | 208,243 | |
| | - | 191,060 | - | - | 208,243 | - |

As at 31 December 2013 and 2012, the movement in financial assets and liabilities included in Level 3 is analysed as follows:

Available for sale investments

| | 1111031 | 11101110 |
|------------------------------|----------|----------|
| Thousands of Euros | Dec 2013 | Dec 2012 |
| Balance at beginning of year | 57,682 | 63,968 |
| Change in fair value | -8,307 | -4,544 |
| Acquisitions | 1,048 | 3,701 |
| Disposals | -549 | -1,126 |
| Impairment | -1,533 | -306 |
| Transfers and other changes | -612 | -4,011 |
| Balance at year end | 47,729 | 57,682 |

The assumptions used in the determination of Available for sale investments fair value are described in note 22, as stated in IFRS 13.

48, CO2 LICENCES

The movements in the CO2 licences portfolio are analysed as follows:

| | Group | |
|--|------------|------------|
| CO2 (Ton) | Dec 2013 | Dec 2012 |
| CO2 licences as at 1 January | 14,501,227 | 9,899,228 |
| Licences granted free of charge | 3,530,010 | 18,063,481 |
| Licences purchased | 9,128,762 | 5,201,575 |
| Licences transferred (from own consumption to trading) | -3,740,077 | -693,289 |
| | 23,419,922 | 32,470,995 |
| Licences to be returned (consumed) | 16,633,878 | 17,969,768 |
| Excess/(Lack) of licences | 6,786,044 | 14,501,227 |

Licences equivalent to total emissions during the civil year are returned to the regulatory entity of each country by the end of the fourth month of the subsequent year (see notes 18, 24 and 39).

The movements in the portfolio of CO2 licences held for trading and classified as inventories are analysed as follows:

| | Group | |
|---|------------|------------|
| CO2 (Ton) | Dec 2013 | Dec 2012 |
| CO2 licences held for trading on 1 January | 563,297 | 116,920 |
| Licences acquired in the market | 9,708,328 | 5,196,229 |
| Emission licences transferred to the trading portfolio | 3,740,077 | 693,289 |
| Licences sold | -9,072,650 | -5,443,141 |
| CO2 licences held for trading on 31 December | 4,939,052 | 563,297 |
| CO2 licences for trading on 31 December (in thousands of Euros) | 16,745 | 103 |

Purchases and sales of licences are booked based on the listed price on the transaction date. Emission licences transferred to the trading portfolios are classified as Inventories (see note 24), in accordance with Accounting policy - note 2 y).

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

Fair value corresponds to the spot price (closing price) at the end of December in each year.

49. RELEVANT OR SUBSEQUENT EVENTS

Portuguese Government approves energy sector extraordinary contribution for 2014

The Portuguese Government approved on 31 December 2013, the state budget for 2014 approving the creation of an extraordinary contribution applicable to economic operators in the energy sector that develop the following activities: i) generation, transmission or distribution of electricity; ii) transport, distribution, storage or wholesale supply of natural gas; iii) refining, treatment, storage, transportation, distribution and wholesale supply of crude oil and oil products.

The contribution rate on the energy sector will be 0.85% on the fixed tangible and intangible assets, as of 1 January 2014 or as of the first day of the fiscal year. In the case of electricity generation activity, this rate will be applicable only to the power plants in operation on that date.

Among other, the following assets will be exempt from this rate:

- (i) CCGTs with an annual utilization of installed capacity in 2013, up to 2,000 hours (application of a reduced rate of 0.425% for annual utilization above 2,000 hours and below 3,500 hours);
- (ii) The hydroelectric plants with installed capacity below 20 MW;
- (iii) Wind farms; and
- (iv) Power plants with electricity generation licences awarded following tender procedures or competitive consultation.

The Government expects the contribution to generate 150 millions of Euros of proceeds, of which 50 millions of Euros will be allocated to the reduction of the tariff deficit of the electricity sector and to energy efficiency measures.

According to the information available, the impact net of taxes for EDP of this extraordinary contribution will amount to approximately 45 millions of Euros in 2014.

EDP issues U.S.\$ 750,000,000 of notes

On 7 of January, EDP Finance BV launched and priced an offering of a total of 750,000,000 US Dollars of Rule 144A and Regulation S notes, maturing in January 2021 with a coupon of 5.25%.

The Notes were issued under EDP and EDP Finance B.V.'s Programme for the Issuance of Debt Instruments (MTN), and an application for the Notes admitted to official listing on the Irish Stock Exchange.

The proceeds of the offering will be used to fund EDP's general corporate purposes.

Morgan Stanley, RBS, Société Générale Corporate & Investment Banking, UBS Investment Bank and Espírito Santo Investment Bank acted as Joint Lead Managers on the transaction.

Fitch maintains EDP on rating watch negative

On 15 January, Fitch Ratings (Fitch) has maintained EDP and EDP Finance B.V.'s "BBB-" Longterm Issuer Default Ratings (IDR) and senior unsecured ratings and "F3" Short-term IDR on Rating Watch Negative (RWN). Fitch has also maintained Hidroelectrica del Cantabrico, S.A.'s "BBB-" Long term IDR and "F3" Short term IDR on RWN.

Fitch placed EDP on RWN in July 2013, together with other utilities exposed to the Spanish electricity market, following the introduction by the Spanish government of regulatory changes affecting the remuneration of electricity sector activities including electricity distribution and renewable generation assets. The maintenance of RWN reflects that although Fitch currently anticipates that EDP's credit metrics could remain commensurate with the current ratings there remains an element of uncertainty. Fitch further states it will review its expectations once the outstanding details on the remuneration of renewables and company's updated strategy are available.

EDP Renováveis executes project finance for its first project in Canada

On 16 January, EDP Renováveis, S.A. (EDPR) has executed a project finance structure agreement for its first wind farm in Canada. The South Branch project located in Ontario with an installed capacity of 30 MW has secured a 20 year Feed-in Tariff awarded by the Ontario Power Authority.

The long-term contracted debt facility amounts to 49 millions of Canadian dollars and the funding is expected to occur during the first quarter of 2014. EDPR financing strategy is to contract long-term debt in local currency at competitive prices in order to mitigate the refinancing risk and to reduce the foreign exchange risk by having a natural hedge between revenues and costs.

With the successful execution of its first wind project in Canada, EDPR adds to its portfolio a market with a low riskprofile and attractive wind resource and extends its geographical diversification to 11 markets around the world (US, Spain, Portugal, France, Belgium, Poland, Romania, UK, Italy, Brazil and Canada).

NEVERENDING ENERGY

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

Standard & Poor's affirms EDP's 'BB+' rating on stable outlook

On 28 January, Standard & Poor's Ratings Services (S&P) affirmed its 'BB+' long-term and 'B' short-term corporate credit ratings on EDP and EDP Finance B.V. and removed the longterm ratings from CreditWatch with negative implications. The outlook is stable.

The affirmation and removal from CreditWatch follows S&P's similar action on Portugal, on 17 January 2014. S&P stated that "outlook on EDP now reflects S&P's expectation that the utility's business risk and financial risk profiles will remain resilient to persistently difficult and uncertain market, economic, and regulatory conditions in its Portuguese and Spanish core markets." S&P also considers that "EDP's debt will continue gradually decreasing and its credit metrics will continue gradually strengthening in the next two years, thanks to additional asset sales, tariff deficit securitizations, and capex cuts".

A lowering of S&P's long-term rating on Portugal by up to two levels would leave the rating on EDP unchanged, all else remaining equal.

CTG Group enters partnership with EDP Brasil for construction of hydro power plant São Manoel

On 13 December 2013, Terra Nova Consortium, held in 66.6% by EDP – Energias do Brasil (EDP Brasil) and 33.3% by Companhia Furnas Centrais Elétricas S.A. (Furnas), obtained the concession for the São Manoel hydro power plant in the A-5 auction held by ANEEL. This hydro power plant, with an installed capacity of 700 MW will be built on the border of the Mato Grosso and Pará States, in the Teles Pires River

In the context of the Memorandum of Understanding signed by EDP Brasil and CWE Investment Corporation (CWEI), on 6 December 2013, which establishes the key guidelines of a partnership aiming at future co-investments between EDP Brasil and CWEI, EDP Brasil signed, on 7 February 2014, a Purchase and Sale Agreement with CWEI (Brasil) Participações Ltda (CWEI Brasil), a subsidiary of CWEI, to sell 33.3% of the company holding the rights to develop São Manoel hydro power plant to CWEI Brasil.

CWEI Brasil will reimburse the costs incurred by EDP Brasil and assume future equity commitments until the end of the construction, also assuming the risks and benefits of the project in proportion of the acquired stake. The financing of the project considers long-term debt with leverage estimated up to 66% on an investment of 2.7 billions of Reais, not considering inflation and capitalized interest.

Under the terms of the Purchase and Sale Agreement, the conclusion of the transaction is subject to prior approval by the National Electric Energy Agency - ANEEL, Chinese regulatory bodies and the realization of other measures of corporate nature, necessary to the effectiveness of the transfer of control of the company's transactions' object, which is expected to occur by the second half of 2014.

The equity commitments made by CWEI Brasil shall be considered for the purposes of compliance with the Strategic Partnership signed between EDP and CTG, in relation to the total 2 billions of Euros investment by CTG (including co-funding CAPEX) in operating and ready-to-build renewable energy generation projects.

Iberdrola decreases its ownership interest in the share capital of EDP

On 10 February 2014, Iberdrola Energía, S.A. (Iberdrola) notified EDP regarding the sale of EDP's share capital in the NYSE Euronext Lisbon market. Currently, and following sales carried out since 31 December 2013 (including the aforementioned sale), Iberdrola holds 182,674,782 shares, corresponding to 4.996% of EDP's share capital and voting rights.

As a result of this transaction, Iberdrola decreased its position from 6.66% to 4.996% in EDP's share capital.

Additionally, Iberdrola has contracted financial derivatives for the sale of EDP shares representing approximately 2.9% of EDP's share capital. The last due date of these derivatives will take place on 7 May 2014.

Accordingly, at the due date of the last aforementioned derivatives, the participation of Iberdrola in the share capital of EDP will be around 2.1%.

EDP sells 138 millions of Euros of tariff deficit in Portugal

EDP Serviço Universal, S.A. (EDP SU), the last resort supplier of the Portuguese electric system, 100% owned by EDP Group, agreed on 10 February 2014 the sale of a portion of 138 millions of Euros, and the respective interest, of the 2013 tariff deficit related with special regime generation.

This tariff deficit resulted from the 5-year deferral of the recovery of the 2013 overcost with the acquisition of energy from special regime generation (including adjustments for 2011 and 2012) in the total amount of 1.4 billions of Euros, with an outstanding amount at the end of 2013 of 1.3 billions of Euros.

Norges Bank notifies qualified shareholding in EDP

On 13 February 2014, Norges Bank (The Central Bank of Norway) notified EDP that, in accordance with article 20 of the Portuguese Securities Code, it came to hold 81,506,689 ordinary shares of EDP, which corresponds to 2.23% of EDP's share capital and 2.23% of the respective voting rights.

The qualified shareholding resulted from the acquisition of 9,250,000 shares on 12 February 2014.

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

Closing of asset rotation transaction in France

On 14 October 2013, EDP Renováveis S.A. has reached an agreement with Axpo Power AG and Centralschweizerische Kraftwerke AG, both subsidiaries of Axpo Group, to sell a 49% equity shareholding and outstanding shareholders loans in a wind farm portfolio of 100 MW located in France, which currently benefit from a feedin tariff regime. Based on the transaction price, the total implied enterprise value for 100% of the assets amounts to 126 millions of Euros. The closing of this transaction occurred in February 2014.

50. RECENT ACCOUNTING STANDARDS AND INTERPRETATIONS ISSUED

The new standards and interpretations that have been issued and are already effective and that the Group has applied on its consolidated financial statements are the following:

IFRS 7 (Amendment) - Financial Instruments: Disclosures - Offsetting Financial Assets and Financial Liabilities

The International Accounting Standards Board (IASB), issued in December 2011, amendments to IFRS 7 – Financial Instruments: Disclosures - Offsetting Financial Assets and Financial Liabilities, with effective date of mandatory application on 1 January 2013, being early adoption allowed.

With this change, the disclosures of financial instruments include information that will evaluate the effect or potential effect of the compensation arrangements, including the countervailing duties recognised as assets and financial liabilities in the statement of financial position.

No significant impact on the financial statement disclosures in the Group, resulted from the adoption of this amendment.

IFRS 13 - Fair Value Measurement

The International Accounting Standards Board (IASB), issued in May 2011, IFRS 13 - Fair Value Measurement, with effective date of mandatory application for periods beginning on or after 1 January 2013, being allowed its early adoption.

This standard presents a revised concept of fair value and determines new disclosure requirements. However, it does not change the requirement of the fair value's measurement or disclosures.

No significant impact in the Group resulted from the adoption of this standard.

IAS 1 (Amended) - Presentation of Financial Statements

The International Accounting Standards Board (IASB), issued in June 2011, IAS 1 (Amended) - Presentation of Financial Statements: Presentation of items of other comprehensive income, with effective date of mandatory application for periods beginning on or after 1 July 2012, being allowed its early adoption.

The principal changes are the following:

- the amendments retain the option to present profit or loss and other comprehensive income in either a single continuous statement or in two separate but consecutive statements;
- items of other comprehensive income, and the respective tax effect, are required to be grouped into those that will and will not subsequently be reclassified to profit or loss.

No significant impact in the Group resulted from the adoption of this amendment.

IAS 19 (Amended) - Employee Benefits

The International Accounting Standards Board (IASB), issued in June 2011, IAS 19 (Amended) - Employee Benefits, with effective date of mandatory application for periods beginning on or after 1 January 2013, being allowed its early adoption.

Under this standard, the Group determines the net interest expense (income) on the defined benefit liability (asset) for the period using the same discount rate as when computing the defined benefit liability at the beginning of the annual period, taking into account every change that occurred in the defined benefit liability (asset) as a result of contributions and benefit payments.

Consequently, the net interest on the net defined benefit liability (asset) comprises:

- interest cost on the defined benefit liability;
- interest income on plan assets; and
- interest on the asset ceiling effect.

No significant impact in the Group resulted from the adoption of this amendment.

NEVERENDING ENERGY

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

Annual Improvement Project (2009-2011)

In May 2012, IASB published the Annual Improvement Project that implied changes to the standards. However, the effective date of the referred changes is 1 January 2013, being early adoption allowed. The changes are the following:

Amendment to IAS 1 - Presentation of Financial Statements. This change clarifies the difference between voluntary additional
comparative information and the minimum required comparative information in cases of retrospective statements, reclassifications and
changes in accounting policies. Generally, the minimum required comparative information is the previous period.

No significant impact in the Group resulted from the adoption of this amendment.

Amendment to IAS 16 - Property, Plant and Equipment. This amendment clarifies that if spare parts and servicing equipment meet the
definition of property, plant and equipment, should not be classified as inventory.

No significant impact in the Group resulted from the adoption of this amendment.

• Amendment to IAS 32 - Financial Instruments: Presentation. The amendment clarifies that income taxes arising from distributions to equity holders are accounted in accordance with IAS 12 - Income taxes.

No significant impact in the Group resulted from the adoption of this amendment.

• Amendment to IAS 34 - Interim Financial Reporting. The amendments align the disclosure requirements for total segment assets with total liabilities in interim financial statements, ensuring that interim disclosures are aligned with annual disclosures in relation to the changes of profit and losses account and other comprehensive income.

No significant impact in the Group resulted from the adoption of this amendment.

Standards, amendments and interpretations issued but not yet effective for the Group

IFRS 10 - Consolidated Financial Statements

The International Accounting Standards Board (IASB), issued in May 2011, IFRS 10 - Consolidated Financial Statements, with effective date of mandatory application for periods beginning on or after 1 January 2014, being allowed its early adoption.

This standard introduces a new approach in determining which investments should be consolidated, replacing IAS 27 - Consolidated and Separate Financial Statements and SIC 12 - Consolidation SPE. This standard establishes a single model to be applied in assessing the existence of control over subsidiaries, where an investor has control over a subsidiary when it is exposed, or has the right, to variable returns arising from its involvement in the subsidiary and has the ability to influence these returns because of the power over it. Additionally, was introduced the concept of "de facto control".

Therefore, the companies included as at 31 December 2013 under the full consolidation method and that will start to be consolidated under the equity method are disclosed in Annex I.

IFRS 11 - Joint Arrangements

The International Accounting Standards Board (IASB), issued in May 2011, IFRS 11 - Joint Arrangements, with effective date of mandatory application for periods beginning on or after 1 January 2014, being allowed its early adoption.

This standard superseded IAS 31 - Interests in Joint Ventures and introduces several changes for accounting jointly controlled investments, the main aspect is the elimination of the option to consolidate joint ventures by the proportional method, being the equity method mandatory.

The structure of a joint agreement ceases to be the main factor in determining the accounting model to adopt. The classification of a joint agreement requires the identification and evaluation of the structure, legal form of the contractual agreement and other facts and circumstances.

Therefore, the companies included as at 31 December 2013 under the the proportional consolidation method and that will start to be consolidated under the equity method are disclosed in Annex I.

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

IFRS 12 - Disclosure of Interests in Other Entities

The International Accounting Standards Board (IASB), issued in May 2011, IFRS 12 - Disclosure of Interests in Other Entities, with effective date of mandatory application for periods beginning on or after 1 January 2014, being allowed its early adoption.

The information disclosed has to help users of the financial statements evaluate the nature and risks associated with its interests in other entities and the effects of those interests on the financial statements. The main issues considered are as follows:

- for the interests in subsidiaries, it should be disclosed: (i) the composition of the group; (ii) non-controlling interests; (iii) significant restrictions on the parent's ability to access or use the assets and settle the liabilities of its subsidiares; (iv) the nature of, and changes in, the risks associated with interests in consolidated structured entities; and (v) changes in its ownership interest that did or did not result in a loss of control during the reporting period;
- for the interests in joint arrangements and associates, it should be disclosed: (i) the nature, extent and financial effects of its interests in joint arrangements and associates, including information about contractual relationships with other parties; and (ii) the nature of, and the changes in, the associated risks with its interests in joint ventures and associates;
- for the interests in unconsolidated structured entities, it should be disclosed: (i) the nature and the extent of its interests in unconsolidated structured entities; and (ii) the evaluation of the nature and changes in the risks associated with the interests in unconsolidated structured entities.

The Group is evaluating the impact of adopting this standard.

IAS 27 (Amended) - Separate Financial Statements

The International Accounting Standards Board (IASB), issued in May 2011, IAS 27 (Amended) - Separate Financial Statements, with effective date of mandatory application for periods beginning on or after 1 January 2014, being allowed its early adoption.

The amendment to IAS 27 in 2011 resulted from the Board's project on consolidation. A new IFRS, IFRS 10 - Consolidated Financial Statements, addresses the principle of control and requirements relating to the preparation of consolidated financial statements. As a result, IAS 27 now contains requirements relating only to separate financial statements. This change is reflected in the standard's amended title, Separate financial statements.

No significant impact in the Group is expected from the adoption of this amendment.

IAS 28 (Amended) - Investments in Associates and Joint Ventures

The International Accounting Standards Board (IASB), issued in May 2011, IAS 28 (Amended) - Investments in Associates and Joint Ventures, with effective date of mandatory application for periods beginning on or after 1 January 2014, being allowed its early adoption.

This amendment to IAS 28 (2003) describes the accounting treatment to be adopted by the investor in associates and joint ventures, defining the accounting requirements for applying the equity method for both associates and joint ventures.

No significant impact in the Group is expected from the adoption of this amendment.

IAS 32 (Amended) - Financial Instruments: Presentation - Offsetting Financial Assets and Financial Liabilities

The International Accounting Standards Board (IASB), issued in December 2011, IAS 32 (Amended) - Financial Statements: Presentation - Offsetting Financial Assets and Financial Liabilities, with effective date of mandatory application for periods beginning on or after 1 January 2014, being allowed its early adoption.

This amendment clarifies the required conditions to be met in order to present the net position of the financial assets and liabilities in the financial position of an entity, as follows: (i) the entity currently has a legally enforceable right to set off the recognized amounts, and (ii) the entity has the intention to settle on a net basis or to realise the asset and settle the liability simultaneously.

No significant impact in the Group is expected from the adoption of this amendment.

NEVERENDING ENERGY

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

IAS 36 (Amended) - Impairment of Assets: Recoverable Amount Disclosures for Non-Financial Assets

The International Accounting Standards Board (IASB), issued in May 2013, IAS 36 (Amended) Impairment of Assets: Recoverable Amount Disclosures for Non-Financial Assets, with effective date of mandatory application for periods beginning on or after 1 January 2014, being allowed its early adoption.

This amendment removes the requirement to disclose recoverable amounts of an asset or a cash-generting unit when there has been no impairment or reversal of impairment. When an impairment is recognised or reversed and the recoverable amount is based on fair value less costs of disposal, the following should be disclosed:

- the level of the IFRS 13 fair value hierarchy within which the fair value measurement of the asset or has been determined;
- for fair value measurements at level 2 or 3 of the fair value hierarchy: (ii) a description of the valuation techniques used and any changes in that valuation technique; and (ii) key assumptions used in the measurement of fair value, including the discount rate(s) used in the current and previous measurement if fair value less costs of disposal is measured using a present value technique.

No significant impact in the Group is expected from the adoption of this amendment.

IAS 39 (Amended) - Financial Instruments: Novation of Derivatives and Continuation of Hedge Accounting

The International Accounting Standards Board (IASB), issued in June 2013, IAS 39 (Amended) - Financial Instruments: Novation of Derivatives and Continuation of Hedge Accounting, with effective date of mandatory application for periods beginning on or after 1 January 2014, being allowed its early adoption.

This amendment clarifies that the novation of a hedging instrument should not be considered an expiration or termination resulting of the discontinuation of hedge accounting when the instrument is novated:

- as a consequence of laws and regulations, or the introduction of laws and regulations, one or more clearing counterparties replace the original counterparty; and
- changes in the terms of the novation process are limited to those necessary to effect the replacement of the counterparty (for example: changes in all collateral requirements, rights to offset receivables and payables balances and charges levied).

Any changes on derivative's fair value arising fom the novation process sould be reflected in its measurement and therefore in the and assessment of the hedge effectiveness.

No significant impact in the Group is expected from the adoption of this amendment.

Investment Entities - Amendments to IFRS 10, IFRS 12 and IAS 27

The International Accounting Standards Board (IASB), issued in October 2012, Investment Entities - Amendments to IFRS 10, IFRS 12 and IAS 27, with effective date of mandatory application for periods beginning on or after 1 January 2014, being allowed its early adoption.

IASB defines the term "investment entity" as an entity whose business purpose is to invest funds solely for returns from capital appreciation, investment income or both, and must evaluate the performance of its investments on a fair value basis.

The amendments provide an exception to the consolidation requirements in IFRS 10 and require investment entities to measure particular subsidiaries ar fair value through profit or loss, rather than consolidate them. These amendments also set out the disclosure requirements for investment entities.

No significant impact in the Group is expected from the adoption of these amendments.

IFRS 9 - Financial Instruments

The International Accounting Standards Board (IASB), issued in November 2009, IFRS 9 - Financial instruments part I: Classification and measurement, with effective date of mandatory application for periods beginning on or after 1 January 2015, being allowed its early adoption. This standard, changed in October 2010, has not yet been adopted by the European Union.

OING ENERGY

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

This standard is included in phase I of the IASB's comprehensive project to replace IAS 39 and relates to issues of classification and measurement of financial assets. The main issues considered are as follows:

- the financial assets can be classified in two categories: at amortised cost or at fair value. This decision will be made upon the initial recognition of the financial assets. Its classification depends on how the entity presents these financial assets and the contractual cash flows associated to each financial asset in the business;
- debt instruments can only be measured at amortised cost when the contractual cash-flows represent only principal and interest payments, which means that it contains only basic loan features, and for which an entity holds the asset to collect the contractual cash flows. All the other debt instruments are recognised at fair value;
- equity instruments issued by third parties are recognised at fair value with subsequent changes recognised in the profit and loss. However an entity could irrevocably select equity instruments at initial recognition for which fair value changes and the realised gain or loss are recognised in fair value reserves. Gains and losses recognised in fair value reserves can not be recycled to profit and loss. This is a discretionary decision, and does not imply that all the equity instruments should be treated on this basis. The dividends received are recognised as income for the year;
- the exemption that allows unquoted equity investments and related derivatives to be measured at cost, under IAS 39, is not allowed under IFRS 9; and
- changes in fair value attributable to own credit risk of financial liabilities classified as fair value through profit or loss, shall be recognised in Other comprehensive income. The remaining fair value changes related to these financial liabilities shall be recognised through profit or loss. The amounts recognised in Other comprehensive income shall not be reclassified/transferred to profit and loss.

The Group is evaluating the impact of adopting this standard.

IAS 19 (Amended) - Employee Benefits: Defined Benefit Plans - Employee Contributions

The International Accounting Standards Board (IASB), issued in November 2013, IAS 19 (Amended) - Employee Benefits: Defined Benefit Plans - Employee Contributions, with effective date of mandatory application for periods beginning on or after 1 July 2014, being allowed its early adoption. This standard has not yet been adopted by the European Union.

This amendment allows for:

- contributions that are independent of the number of years of service to be recognised as a reduction in the service cost in the period in which the service is rendered, instead of allocating the contributions to periods of service; and
- other contributions made by employees or third parties to be attributed to periods of service either using the plan's contribution formula or on a straight-line basis.

The Group is evaluating the impact of adopting these amendments.

IFRIC 21 - Levies

The International Accounting Standards Board (IASB) issued, in May 2013, IFRIC 21 - Levies, with effective date of mandatory application for periods beginning on or after 1 January 2014, being allowed its early adoption. This standard has not yet been adopted by the European Union.

This interpretation clarifies:

- a levy is a payment made to a government for which an entity receives no specific goods or services;
- the obligating event is the activity that binds the entity to pay the levy which is typically specified in legislation enacting the levy;
- a liability to pay a levy to a government should only be recognised when an obligating event has occurred. While levies may be calculated based on past performance (such as generating revenue) that itself is a necessary, but not a sufficient condition to recognise a liability.

No significant impact in the Group is expected from the adoption of this interpretation.

Annual Improvement Project (2010-2012)

In December 2013, the IASB published the Annual Improvement Project that implied changes to the standards. These are effective for annual periods beginning on or after 1 July 2014, being early adoption allowed. This project has not yet been adopted by the European Union

• Amendment to IFRS 2 - Share-based Payments. The definition of vesting and market' conditions was amended. Additionally it defines the terms of performance condition and service condition (which were previously part of the definition of vesting condition).

No significant impact in the Group is expected from the adoption of this amendment.

• Amendment to IFRS 3 - Business Combinations. This amendment clarifies that contingent consideration that is classified as an asset or a liability shall be measured at fair value at each reporting date and changes in fair value shall be recognised in profit or loss.

No impact in the Group is arising from the adoption of this amendment.

NEVERENDING ENERGY

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

• Amendment to IFRS 8 - Operating Segments. The amendment requires an entity to disclose the judgements made by management in applying the aggregation criteria to operating segments and clarifies that an entity shall only provide reconciliations of the total of the reportable segments' assets to the entity's assets if the segment assets are presented to the chief operation decision-maker.

No significant impact in the Group is expected from the adoption of this amendment.

• Amendment to IFRS 13 - Fair Value Measurement. This amendment clarifies that issuing IFRS 13 and amending IFRS 9 and IAS 39 does not remove the ability to measure short-term receivables and payables with no stated interest rate at their invoiced amounts without discounting if the effect of not discounting is immaterial.

No impact in the Group is arising from the adoption of this amendment.

• Amendment to IAS 16 - Property, Plant and Equipment. This amendment clarifies that when an item of property, plant and equipment is revalued the gross carrying amount is adjusted in a manner that is consistent with the revaluation of the carrying amount.

No significant impact in the Group is expected from the adoption of this amendment.

• Amendment to IAS 24 - Related Party: Disclosures. The amendment clarifies that an entity providing key management personnel services to the reporting entity or to the parent of the reporting entity is a related party of the reporting entity.

No significant impact on the financial statement disclosures in the Group, is expected from the adoption of this amendment.

• Amendment to IAS 38 - Intangible Assets. This amendment clarifies that when an intangible asset is revalued the gross carrying amount is adjusted in a manner that is consistent with the revaluation of the carrying amount.

No significant impact in the Group is expected from the adoption of this amendment.

Annual Improvement Project (2011-2013)

In December 2013, IASB published the Annual Improvement Project that implied changes to the standards. These are effective for annual periods beginning on or after 1 July 2014, being early adoption allowed. This project has not yet been adopted by the European Union.

• Amendment to IFRS 1 - First-time Adoption of International Financial Reporting Standards. This amendment clarifies that an entity, in its first IFRS financial statements, has the choice between applying an existing and currently effective IFRS or applying early a new or revised IFRS that is not yet mandatorily effective. An entity is required to apply the same version of the IFRS throughout the periods covered by those first IFRS financial statements.

No impact in the Group from the adoption of this amendment.

• Amendment to IFRS 3 - Business Combinations. This amendment clarifies that IFRS 3 excludes from its scope the accounting for the formation of a joint arrangement in the financial statements of the joint arrangement itself.

No significant impact in the Group is expected from the adoption of this amendment.

• Amendment to IFRS 13 - Fair Value Measurement. This amendment clarifies that the scope of the portfolio exception includes all contracts accounted for within the scope of IAS 39 or IFRS 9, regardless of whether they meet the definition of financial assets or financial liabilities as defined in IAS 32.

No significant impact in the Group is expected from the adoption of this amendment.

• Amendment to IAS 40 - Investment Property. This amendment clarifies that this standard and IFRS 3 are not mutually exclusive and application of both standards may be required. Consequently, an entity acquiring investment property must determine whether: (i) the property meets the definition of investment property in IAS 40; and (ii) the transaction meets the definition of a business combination under IFRS 3.

No significant impact in the Group is expected from the adoption of this amendment.

51. EDP BRANCH IN SPAIN

The aim of "EDP - Energias de Portugal - Sociedade Anónima, Sucursal en España" is to manage and coordinate the energy interests of subsidiaries depending from EDP Group in Spain, organised through managing and monitoring structures, in order to ensure the maximum synergy and value creation in the operations and activities in Spain, also assuming itself as an organizational platform to lead the Iberian integration of shared and support services (back and middle offices). On this basis, the majority interests in EDP Renováveis, S.A., EDP Servicios Financieros (España), S.A. and HC Energia (Hidroeléctrica del Cantábrico S.A.), as well as the indirect majority interest in NG Energia (Naturgás Energia Grupo S.A.), are directly allocated to the assets of EDP Sucursal.

The Spanish branch of EDP has offices in Madrid and Oviedo. From a formal and legal point of view, the representation of the Spanish branch of EDP before third parties is ensured through the permanent representatives, which are members of the Executive Board of Directors of EDP, mandated for that purpose.

The structure of direction, coordination, management and representation of the Spanish branch of EDP is composed of an Executive Committee, a Management Committee and direct representation on Iberian ambit EDP Management Committee.

The Executive Committee is composed essentially of five permanent representatives, a Corporate General Director (Group Controller for the activities in Spain) and by first line directors of the business units in Spain, which constitute the main direction and coordination body of the Branch, being responsible for the coordination of the activities of the permanent representatives and of the Management Committee. The Management Committee is chaired by the Corporate General Director and is composed by the natural extension of the Departments of the Corporate Centre of EDP, namely the Department of M&A ("Direcção de Análise de Negócios"), Department of Legal Affairs ("Direcção de Assessoria Jurídica"), Department of Internal Audit ("Direcção de Auditoria"), Department of Spanish Tax Matters ("Direcção de Fiscalidade Espanhola"), Department of Financial Management ("Direcção de Gestão Financeira"), Department of Commercial Shared Services ("Direcção de Serviços Partilhados Comerciais"), Department of Corporate Shared Services ("Direcção de Serviços Partilhados Corporativos") and IT Department ("Direcção de Sistemas de Informação") and "Share EDP Project" ensuring in a homogeneous way the functions of these departments transversally to the Spanish territory. Lastly, the Spanish branch of EDP has direct representation on Iberian ambit EDP Management Committee particularly the Energy Planning Committees, Price and Volume, Markets, Distribution Networks, Commercial and Production.

The condensed statement of financial position of the Branch as at 31 December 2013 and 2012 is analysed as follows:

| | EDP B | EDP Branch | |
|--|-----------|------------|--|
| Thousands of Euros | Dec 2013 | Dec 2012 | |
| Investments in subsidiaries: | | | |
| - EDP Renováveis, S.A. | 2,939,889 | 2,939,889 | |
| - Hidroeléctrica del Cantábrico, S.A. (HC Energia) | 2,087,871 | 1,981,798 | |
| - EDP Servicios Financieros (España), S.A. | 482,695 | 482,695 | |
| - EDP Investments and Services, S.L. | 281,854 | 281,854 | |
| - Other | - | 60 | |
| Deferred tax assets | 9,481 | 54,636 | |
| Other debtors and others assets | 63,467 | 129,006 | |
| Total Non-Current Assets | 5,865,257 | 5,869,938 | |
| | | | |
| Trade receivables | 9,168 | 10,985 | |
| Debtors and other assets | 197,514 | 325,212 | |
| Tax receivable | 92,169 | 43,943 | |
| Cash and cash equivalents | 1,407 | 361 | |
| Total Current Assets | 300,258 | 380,501 | |
| Total Assets | 6,165,515 | 6,250,439 | |
| | | | |

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

52. ENVIRONMENTAL MATTERS

Expenses of an environmental nature are those identified and incurred to avoid, reduce or repair damage of an environmental nature resulting from the company's normal activity.

Expenses of an environmental nature are recorded as expenses for the year, except if they qualify for capitalization under the terms of IAS 16.

Investments of an environmental nature recorded as Property, plant and equipment assets during the years 2013 and 2012 are analysed

| | Group | |
|--|--|---------------------------------------|
| Thousands of Euros | Dec 2013 | Dec 2012 |
| Air and climate protection | 6,731 | 4,573 |
| Water management | 238 | 285 |
| Waste management | 304 | 466 |
| Soil, subterranean and surface water protection | 3,980 | 1,679 |
| Noise and vibration reduction | 361 | 141 |
| Biodiversity protection | 13,422 | 8,883 |
| Landscape protection | 1,415 | 6,147 |
| Energetic efficiency | 1,949 | 1,228 |
| Research and development in the environmental area | 13 | 21 |
| Other environmental management and protection activities | 15,097 | 8,214 |
| | 43,510 | 31,637 |
| Biodiversity protection Landscape protection Energetic efficiency Research and development in the environmental area | 13,422 1,415 1,949 13 15,097 | 8,883 6,14 1,228 27 8,214 |

Investments recognised in Air and climate protection as Property, plant and equipment in 2013 include costs incurred by EDP Produção of 6,232 thousands of Euros (31 December 2012: 4,172 thousands of Euros). The main assets correspond to gas desulphurisation and denitrification equipments of the Sines thermoelectric plant, which at 31 December 2013, have a net book value of 235 millions of Euros (31 December 2012: 248 millions of Euros).

During the year, the Group recognised expenses that are analysed as follows:

| | Group | |
|--|----------|----------|
| Thousands of Euros | Dec 2013 | Dec 2012 |
| Air and climate protection | 7,483 | 6,958 |
| Water management | 9,354 | 1,946 |
| Waste management | 12,403 | 4,528 |
| Soil, subterranean and surface water protection | 3,747 | 4,861 |
| Noise and vibration reduction | 52 | 133 |
| Biodiversity protection | 4,279 | 5,413 |
| Landscape protection | 47 | 1,930 |
| Energetic efficiency | 7,867 | 4,116 |
| Radiations management | 7 | 7 |
| Research and development in the environmental area | 440 | 481 |
| Other environmental management and protection activities | 12,292 | 18,504 |
| | 57,971 | 48,877 |

Under current and future socioeconomic trends and practices followed by the EDP Group regarding to sustainability and environment, the group accounts for provisions to cover the costs of dismantling, decommissioning, restoring and decontaminating land where electric power plants are located, of 60,080 thousands of Euros and 23,344 thousands of Euros for electric power plants located in Portugal and Spain, respectively. Regarding the liability to dismantle and restore the land where wind farms are located to its original condition, as at 31 December 2013, the provisions amount to 66,468 thousands of Euros. Additionally, the provision to dismantle the Trillo nuclear power plant amounts to 19,188 thousands of Euros (see notes 2 o) and 37).

During the year 2013, the EDP Group incurred in fines and other penalties for breaching environmental regulations and indemnities to third parties related to damages caused in the past with pollution of 236 thousands of Euros (31 December 2012: 2,218 thousands of Euros).

Environmental income recognised in 2013 relates to the sale of by-products of 2,039 thousands of Euros (31 December 2012: 2,797 thousands of Euros) and the sale of environmental waste of 2,224 thousands of Euros (31 December 2012: 1,971 thousands of Euros).

53. TRANSFERS OF FINANCIAL ASSETS - TARIFF ADJUSTMENTS

As mentioned in note 3, in Portugal, Decree - Law 237-B/2006 of 19 December 2006 and Decree - Law 165/2008 of 21 August, refer to the transfer to third parties of the right to receive tariff adjustments (deviations and deficits) of the National Electricity System, through which the EDP Group has made, since 2008, a number of transfer operations of financial assets.

For the following operations, assets were transferred to securitization companies, that financed their purchases trough debt securities registered in the Securities Commission (CMVM):

- In March 2009, EDP Serviço Universal, S.A. sold without recourse to Tagus Sociedade de Titularização de créditos, S.A. (Tagus), the right to receive the non-regular tariff adjustments (tariff deficit) related to 2007 and 2008 of 1,225,376 thousands of Euros. With the sale of those rights, EDP Group received 1,204,422 thousands of Euros, generating a loss of 22,969 thousands of Euros (including financial expenses incurred);
- In December 2009, EDP Serviço Universal, S.A. sold without recourse to Tagus, the right to receive the non-regular tariff adjustments (tariff deficit) related to the estimated special regime overcost related to 2009 of 447,469 thousands of Euros. The transaction totalised 434,720 thousands of Euros, net of expenses, and generated a loss of 12,749 thousands of Euros;
- In May 2013, EDP Serviço Universal, S.A. sold without recourse to Tagus, the right to to receive part of the electricity adjustment related to the 2012 overcost of the acquisition of electricity activity from special regime production, in the amount of 442,692 thousands of Euros. The transaction was performed by the amount of 450,000 thousands of Euros, net of expenses, generating a gain of 22,510 thousands of Euros. This transaction also involved the acquisition by EDP Serviço Universal Service of Class R Notes issued by Tagus at par value in the amount of 400 thousands of Euros and Liquidity Notes issued by Tagus at par value in the amount of 4,695 thousands of Euros, both maturing in 2017. These Notes are instruments that aim to establish a settlement account and a reserve for administrative expenses and are booked under financial assets at fair value through profit or loss, by the net amount of 4,141 thousands of Euros, as at 31 December 2013.

Under IAS 39, the assets (tariff adjustments) transferred in these operations were derecognised from the balance sheet of EDP Group.

54. OPERATING SEGMENTS REPORT

286

In accordance with IFRS 8, an operating segment is a Group component:

- (i) that engages in business activities from which it may earn revenues and incur expenses;
- (ii) whose operating results are reviewed regularly by the Group's chief operating decision maker to make decisions about resources to be allocated to the segment and assess its performance; and
- (iii) for which discrete financial information is available.

The Group develops a set of regulated and liberalised activities in the energy sector, with special emphasis in generation, distribution and supply of electricity and gas.

The Group manages its activities based on several business segments, which includes the activities in Iberia. Moreover, the EDP Group also makes a separate analysis of the electricity generation business through renewable power sources, which is achieved in a specific segment (EDP Renováveis). Finally, taking into consideration the specificity of the Brazilian market, the Group also makes a separate analysis of the electricity generation, distribution and supply businesses in Brazil (EDP Brasil).

The Executive Board of Directors regularly reviews segmental reports, using them to assess and release each business performance, as well as to allocate resources.

The segments defined by the Group are the following:

- Long Term Contracted Generation in Iberia;
- · Liberalised Activities in Iberia;
- · Regulated Networks in Iberia;
- EDP Renováveis;
- EDP Brasil.

The Long Term Contracted Generation in Iberia segment corresponds to the activity of electricity generation of plants with CMEC and SRP plants in Portugal and Spain. This segment includes, namely, the following companies:

- EDP Gestão da Produção de Energia, S.A. (CMEC and SRP generation);
- EDP Produção Bioléctrica, S.A.:
- Fisigen Empresa de Cogeração, S.A.

NEVERENDING ENERGY

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

The Liberalised Activities segment in Iberia corresponds to the activity of unregulated generation and supply of electricity and gas in Portugal and Spain. This segment includes, namely, the following companies:

- EDP Gestão da Produção de Energia, S.A. (liberalised generation);
- Empresa Hidroeléctrica do Guadiana, S.A.;
- Electrica de la Ribera del Ebro, S.A.;
- · Hidroeléctrica Del Cantábrico, S.L.;
- · Central Térmica Ciclo Combinado Grupo 4, S.A.;
- · Patrimonial de La Ribera del Ebro, S.L.:
- EDP Comercial Comercialização de Energia, S.A.;
- · Hidrocantábrico Energia, S.A.U.;
- EDP Soluções Comerciais, S.A.;
- · Naturgás Comercializadora, S.A.

The Regulated Networks segment in Iberia corresponds to the activities of electricity and gas distribution in Portugal and Spain and last resort supplier. This segment includes, namely, the following companies:

- EDP Distribuição de Energia, S.A.;
- EDP Serviço Universal, S.A.;
- Electra de Llobregat Energía, S.L.;
- · Hidrocantábrico Distribucion Eléctrica, S.A.U.;
- Portgás Soc. de Produção e Distribuição de Gás, S.A.;
- EDP Gás Serviço Universal, S.A.;
- Naturgás Energia Distribución, S.A.U.

The EDP Renováveis segment corresponds to the power generation activity through renewable energy resources and includes all the companies of EDPR Europe, EDPR North America and EDPR Brasil subgroups. This segment also includes the holding company EDP Renováveis, S.A., and all the adjustments between the companies composing this segment, including consolidation adjustments.

The EDP Brasil segment includes the activities of electricity generation, distribution and supply in Brazil, and is composed by the Holding EDP Energias do Brasil, S.A. and all its subsidiaries, with the exception of EDP Renováveis Brasil which is included in the EDP Renováveis segment. As in the EDP Renováveis segment, this segment includes all the adjustments for the companies composing this segment, including consolidation adjustments.

Segment Definition

The amounts reported in each operating segment result from the aggregation of the subsidiaries and business units defined in each segment perimeter and the elimination of transactions between companies of the same segment.

The statement of financial position captions of each subsidiary and business unit are determined based on the amounts booked directly in the companies that compose the segment, including the elimination of balances between companies of the same segment, and excluding the allocation in the segments of the adjustments between segments.

The income statement captions for each operating segment are based in the amounts booked directly in the companies financial statements and related business units, adjusted by the elimination of transactions between companies of the same segment.

Nevertheless, since EDP - Gestão da Produção de Energia, S.A.'s assets belong to more than one business segment, namely the CMEC and SRP generation plants - allocated to the Long Term Contracted Generation - and the liberalised generation plants - allocated to the Liberalised Activities -, it was necessary to allocate all its gains, costs, assets and liabilities to those power plants.

Preferentially, it was used analytical accounting reports to allocate gains, costs, assets and liabilities by plant. For the remaining information, since those reports don't comprise all the costs - namely the shared costs in the Supplies and Services and Personnel Costs captions, and since the applicability of the previous criterion it's not possible, the shared costs were allocated in the proportion of costs directly allocated to each plant in the total costs and the remaining assets and liabilities were allocated following the proportion of each plant net assets in the total assets.

During 2013, the Group analysed the nature of each asset, liability and operating investment reported in each business segment, which resulted in the revision of its allocation to each segment. The same criteria was adopted in the presentation of comparative information.

In each business segment, Assets include the Property, Plant and Equipment, Intangible Assets, Goodwill, Trade Receivables and Inventories captions. The captions Debtors and other assets are allocated to each segment according to its nature. The remaining assets are presented in the "Reconciliation of information between Operating Segments and Financial Statements".

In each business segment, Liabilities include the Provisions and Employee benefits captions. The captions Trade and other payables are allocated to each segment according to its nature. The remaining liabilities are presented in the "Reconciliation of information between Operating Segments and Financial Statements".

In each business segment, the Operating Investment caption includes increases in Property, Plant and Equipment and in Intangible Assets, excluding CO2 licences and Green certificates, net of increases in Government grants and customers contributions for investment.

ENDING ENERGY

EDP - Energias de Portugal, S.A. Notes to the Consolidated and Company Financial Statements for the years ended 31 December 2013 and 2012

In 2013, the EDP Group changed the information disclosed by Operating Segment, according to the mentioned above criteria. To be comparable, the information as of 31 December 2012 has been restated to reflect the changes occurred in 2013.

The EDP Group by operating segment report is presented in Annex II.

55. EXPLANATION ADDED FOR TRANSLATION

These financial statements are a free translation of the financial statements originally issued in Portuguese in accordance with International Financial Reporting Standards as adopted by the European Union. In the event of discrepancies, the Portuguese language version prevails.

5.1. FINAL REFERENCES

•

The Executive Board of Directors expresses its gratitude to all those who have supported and followed, directly or indirectly, the activity of EDP Group over the year of 2013.

First of all, we would like to thank the shareholders for the trust and support given to the Executive Board of Directors and to each of its members in the exercise of its activity.

Special thanks are also due to all members of the Corporate Bodies responsible for the auditing and supervision of the Group, for the support given over the year. A special word to the General and Supervisory Board for the guidance provided to the activity of the Executive Board of Directors.

The successful results of the Group and the intrepid defense of all stakeholders' interests clearly demonstrate that the governance model is fully consolidated.

Additionally, as a result of the support granted to the group's activities during last year, the Board thanks the members of the governmental bodies and the public authorities of countries in which EDP is present, for the continued support provided.

Within the energy sector, it is also important to refer the constant and constructive dialogue between EDP and the different energy sector regulators. Particularly with the Regulatory Body for Energy Services (ERSE) and the Directorate-General for Energy and Geology (DGEG) in Portugal, as well as to other regulators in countries where the activity of the EDP group is most visible, such as CNE in Spain, ANEEL in Brazil and FERC and NERC in the USA.

The Executive Board of Directors also extends its gratitude to all the other entities that interacted with the group during 2013, namely, the financial markets regulators, the sectorial associations and the social and environmental non-government organizations.

It is also imperative to thank our customers and reaffirm our full commitment to seek continuous improvement of our offer, as well as excellence in service delivery. Only with full effort we can aim to satisfy our customers' needs.

The Board's gratitude is also extended to suppliers, as well as to the social media that followed the company throughout the year.

Lastly, a special thanks to all EDP employees. Their determination, knowledge and energy were crucial for the company to achieve its results.

THE EXECUTIVE BOARD OF DIRECTORS

Under the terms of the Article 30, number 1, of the Company Constitution, the Executive Board of Directors proposes to the shareholders that the Net Profit, amounted to €790,875,100.65, is appropriated as follows:

| Legal Reserves | € | 39,543,755.03 |
|---------------------------|---|----------------|
| Dividends * | € | 676,459,477.28 |
| Donations to Fundação EDP | € | 7,200,000.00 |
| Retained Earnings | € | 67,671,868.34 |

^{*} The proposed dividend per share is \in 0.185.

312

5.4. REPORTING PRINCIPLES

The EDP Annual Report is published annually. It contains the economic, financial, social and environmental information, since 2008, providing an across-the-board view of the business. The report is divided into four distinct sections:

EDP, which makes a summary presentation of the company, the climate in which it operates and its strategy;

Performance, which reports the main initiatives of the year, in relation to material matters;

Corporate Governance, which describes the organisation and governance of the company, complying with Article 4(1) of CMVM Regulation no. 4/2013, the Portuguese Companies' Code, the Corporate Governance Code and the Regulation on Information Disclosure Duties (no. 5/2008).

Financial Information, which includes a detailed analysis of the financial performance of the Group.

This analysis reflects the period between 1 January and 31 December 2013. In addition to this annual report,

- EDP reports its quarterly results to the market and posts its most important sustainability indicators online:
- makes qualitative and quantitative, operational, environmental and social data available online;
- publishes sector reports, including the Social Report and Biodiversity Report, available at www.edp.pt > sustainability > publications;
- the companies EDP Espanha, EDP Brasil, and EDP Renováveis publish annual and sustainability reports. These reports provide more detailed information on their sustainability performance.

Go to www.edp.pt> sustainability> publications for more detailed information on the content and organisation of the annual reporting of EDP.

AA1000APS 2008

EDP takes a systematic approach within the framework defined by the AA1000 APS (2008) standard to identify critical stakeholders, integrate their expectations into corporate strategy and provide feedback on their contributions.

CHECKS ACCORDING TO AA1000AS 2008

EDP was subject to the verification of compliance in 2013, as in previous years, with the AA1000 AS (2008) standard, type 2, by the auditor KPMG. It audited, in particular, the principle of inclusion, materiality and response.

PRINCIPLE OF INCLUSION

The principle of inclusion envisages that stakeholders are consulted, their expectations and concerns are known and are incorporated into the decision-making process.

To ensure the improved uptake of this perspective among EDP employees, the cross-cutting training course in Communication of Projects (2013) continued to be run in 2013 (ComPro). The method for engaging stakeholders set out in ComPro is intended to be disseminated and applied to EDP projects according to their characteristics and potential impacts.

Various initiatives aimed at interaction with stakeholders are externally conducted (Chapter on Stakeholder Relations, page 36). There are specific communication channels for each segment of stakeholders (www.edp.pt>sustainability> stakeholders).

PRINCIPLE OF MATERIALITY

The method adopted for measuring material matters is based on the standards of accountability and information and it is gathered at the corporate level and in the business units.

Materiality is obtained by the intersection of the topics identified by society with the importance attributed by the

The themes identified by society are prioritized according to the frequency with which they arise in the different categories analysed.

IMPORTANCE TO SOCIETY

The society vector results from an analysis of the following vectors:

REGULATION

A survey of current and emerging regulations is conducted, by region: Iberia (Spain and Portugal), other European countries, USA and Brazil.

BENCHMARK

An international benchmark of 25 companies operating in the electricity and/or gas markets and headquartered in countries where EDP operates, is conducted. These peers are chosen based on external recognition of their sustainability practices.

INTERNATIONAL STUDIES

All materially relevant issues identified by sustainability strategy studies directed at the electricity or gas sector are consulted.

ESG (ENVIRONMENTAL, SOCIAL AND GOVERNANCE) SURVEYS OF INVESTORS

The topics most frequently requested by ESG investors, based on benchmark surveys, are identified.

SURVEY OF EXPECTATIONS OF THE DIFFERENT STAKEHOLDERS OF EDP

Once the expectations of the different stakeholders are known, by means of: 1) interviews with the managers responsible for different stakeholders segments in the various Group companies; 2) surveys and interviews directly conducted with stakeholders; 3) identification and categorization of the issues addressed in the existing external communication channels; 4) internal workshop to analyse the relevant topics for stakeholders.

IMPORTANCE TO THE BUSINESS

The internal perspective of importance to the business was measured based on the interviews with the Managers and Heads of different areas of the corporate centre and the businesses, which identified the most important topics for the business in 2013.

The materiality matrix is influenced by trends and the climate of society and business. The changes recorded in 2013 compared to the previous year were the following:

- New Topics: energy access, functional energy market; and street lighting;
- Topics that have increased their relevance in both axes: ethics and impacts on communities;
- Topics that have seen their position rise in the society axis: facilities security; sustainability in the supply chain, corporate governance, tariffs and energy prices, regulations, taxes and subsidies, market liberalization; wellbeing, health and safety and innovation;
- Topic that has seen its position rise in the business axis: responsible marketing;
- Topics that have seen their positions fall in the society axis: citizenship, customer service, reputation and trust; responsible employer.
- Topics that have seen their positions fall in the business axis: natural resources management, climate change and new businesses/markets.

To check the renaming of topics on the 2012 materiality matrix, see the glossary (www.edp.pt> sustainability> stakeholders).

PRINCIPLE OF RESPONSE

The materiality matrix guides the reporting structure, in particular this report. The issues of greatest importance are reflected in its content.

EDP answers its stakeholders directly through the adequate channels of communication or indirectly through strategic partnerships.

Communication may result from a request or it may be proactively provided, when in anticipation and meeting the expectations and concerns of its stakeholders, who have been previously consulted.

CORPORATE CONSOLIDATION CRITERIA

In the organisation chart of the Group on page 20 -, the universe of companies included in the annual reporting is summarised.

The consolidation criteria of operational and sustainability information follows the accounts consolidation methods of EDP:

- Full consolidation method: where the parent company holds the majority of voting rights (% control) in the subsidiary, either directly or indirectly. The results of such subsidiaries are reported at 100%;
- Proportional consolidation method: where a company included in the accounting consolidation perimeter runs another company together with one or more companies not included in the perimeter. In this case, only the results corresponding to the percentage stake in the jointly-controlled company are reported.

A list of companies and their consolidation method is available in note 5 to the financial statements of this report (page 215).

The consolidation of operational information of the new Pecém thermoelectric power plant is still limited to the information of a financial and operational nature, and is not being reported for other sustainability indicators (proportional consolidation method: 50%). When available, information concerning Pecém is published in a table footnote.

In 2012, EDP decided to raise the level of external verification of sustainability reporting information to a set of 30 key indicators that are on pages 24 and 25 of this report. The Expenditure on R&D indicator is excluded. EDP is currently reviewing the concept applied and the timing of calculation, and it was not possible to include this indicator as foreseen in the reasonable check in 2013. On the closing date of this report, the reported information still represents an estimate of expenditure on R&D.

This check was conducted by KPMG & Associados - Sociedade de Revisores Oficiais de Contas, S.A.. For further information on the selection process, see page 133.

An online glossary is available to improve the report's transparency. It includes definitions of the methods and quantitative indicators used throughout the document: www.edp.pt/pt/pages/glossário.aspx

GRI INDEX AND GLOBAL COMPACT

This Report has been prepared in accordance with the guidelines of the Global Reporting Initiative, GRI3.1. The following table summarises the indicators according to the protocol of the Electricity Sector, stating deadlines for the implementation of those specific indicators for which full compliance has not yet been possible to achieve. A full table is available at www.edp.pt> sustainability> reports.

Simultaneously, the following table identifies the available information that responds to the 10 principles of the Global Compact, demonstrating EDP's commitment to this initiative.

- (3) Training is Reported, although not as a % of total contractors. EDP is reviewing the indicator under the new GRI guidelines: G4. The report according to G4 is expected in 2015 (page 41).
- (4) Information on Brasil is not available. EDP is reviewing the indicator under the new GRI guidelines: G4. The report according to G4 is expected in 2015 (page 41).

Statement GRI Application Level Check

GRI hereby states that EDP - Energias de Portugal S.A. has presented its report "2013 Annual Report" to GRI's Report Services which have concluded that the report fulfills the requirement of Application Level A+.

GRI Application Levels communicate the extent to which the content of the G3.1 Guidelines has been used in the submitted sustainability reporting. The Check confirms that the required set and number of disclosures for that Application Level have been addressed in the reporting and that the GRI Content Index demonstrates a valid representation of the required disclosures, as described in the GRI G3.1 Guidelines. For methodology, see www.globalreporting.org/SiteCollectionDocuments/ALC-Methodology.pdf

Application Levels do not provide an opinion on the sustainability performance of the reporter nor the quality of the information in the report.

Amsterdam, 27 March 2014

Global Reporting Initiative

The "+" has been added to this Application Level because EDP - Energias de Portugal S.A. has submitted (part of) this report for external assurance. GRI accepts the reporter's own criteria for choosing the relevant assurance provider.

The Global Reporting Initiative (GRI) is a network-based organization that has pioneered the development of the world's most widely used sustainability reporting framework and is committed to its continuous improvement and application worldwide. The GRI Guidelines set out the principles and indicators that organizations can use to measure and report their economic, environmental, and social performance. www.globalreporting.org

Disclaimer: Where the relevant sustainability reporting includes external links, including to audio visual material, this statement only concerns material submitted to GRI at the time of the Check on 18 March 2014. GRI explicitly excludes the statement being applied to any later changes to such material.

AUDITORS' REPORT CONSOLIDATED FINANCIAL STATEMENTS

(ISSUED BY THE STATUTORY AUDITOR, A CMVM REGISTERED AUDITOR)

(This report is a free translation to English from the original Portuguese version In case of doubt or misinterpretation the Portuguese version will prevail)

Introduction

In accordance with the applicable legislation, we present our Auditors' Report on the consolidated financial information included in the Executive Board of Directors report and in the consolidated financial statements as at and for the year ended 31 December 2013 of EDP – Energias de Portugal, S.A., which comprise the consolidated balance sheet as at 31 December 2013 (showing total assets of 42,649,900 thousand Euros and shareholders' equity attributable to the equity holders of EDP of 8,445,756 thousand Euros, including a net profit for the year attributable to equity holders of EDP of 1,005,091 thousand Euros), the consolidated statement of income, the consolidated cash flow statement, the consolidated statement of changes in equity and the consolidated statement of comprehensive income for the year then ended, and the corresponding Notes to the accounts.

Responsibilities

- 2 The Executive Board of Directors is responsible for:
 - a) the preparation of the consolidated financial statements in accordance with International Financial Reporting Standards as adopted by the European Union that present fairly the consolidated financial position of the Group of companies included in the consolidation, the consolidated results of its operations, the consolidated cash flows, the consolidated changes in equity and the consolidated comprehensive income;
 - that the financial information prepared in accordance with International Financial Reporting Standards as adopted by the European Union is complete, true, current, clear, objective and lawful as established by the Portuguese Securities Code ('CVM');
 - c) the adoption of adequate accounting policies and criteria;
 - d) the maintenance of an appropriate internal control system; and
 - the communication of any relevant fact that may have influenced the activity, financial position or results of the Group.
- Our responsibility is to verify the financial information included in the above referred documents, namely as to whether it is complete, true, current, clear, objective and lawful as required by the CVM in order to issue a professional and independent report based on our audit.

Scope

- We conducted our audit in accordance with the Technical Standards and Guidelines issued by the Portuguese Institute of Statutory Auditors ('Ordem dos Revisores Oficiais de Contas'), which require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatements. Accordingly our audit included:
 - verification that the financial statements of the companies included in the consolidation have been properly audited and the verification, on a test basis, of the information underlying the figures and its disclosures contained in the financial statements, and an assessment of the estimates made, based on the judgements and criteria defined by the Executive Board of Directors, used in the preparation of the referred financial statements;
 - verification of the consolidation procedures and of the application of the equity method;
 - evaluation of the appropriateness of the accounting policies used and of their disclosure, taking into account the applicable circumstances;
 - assessment of the applicability of the going concern principle;
 - assessment of the overall adequacy of the consolidated financial statements' presentation;
 and
 - assessment of whether the consolidated financial information is complete, true, current, clear, objective and lawful.
- Our audit also included the verification that the consolidated financial information included in the Executive Board of Directors report is consistent with the financial statements, as well as the verification of the disclosures required by the article 453, of the Portuguese Companies Code ("Código das Sociedades Comerciais").
- 6 We believe that our audit provides a reasonable basis for our opinion.

Opinion

In our opinion, the referred consolidated financial statements present fairly, in all material respects, the consolidated financial position of EDP – Energias de Portugal, S.A., as at 31 December 2013, the consolidated results of its operations, the consolidated cash flows, the consolidated changes in equity and the consolidated comprehensive income for the year then ended, in accordance with International Financial Reporting Standards as adopted by the European Union, and the information contained therein is complete, true, current, clear, objective and lawful.

Report on other legal requirements

8 It is also our opinion that the consolidated financial information included in the Executive Board of Directors report is consistent with the consolidated financial statements and that the Report on Corporate Governance includes the information required by the article 245.°-A of the Portuguese Securities Market Code ('CVM').

REPORT AND OPINION OF THE STATUTORY AUDITOR

Consolidated Accounts Year ended 31 December, 2013

(This report is a free translation to English from the original Portuguese version In case of doubt or misinterpretation the Portuguese version will prevail)

To the Shareholders of

EDP - Energias de Portugal, S.A.

- In accordance with the applicable legislation, we herewith, as statutory auditor of EDP Energias de Portugal, S.A., present the report on our supervisory activity and our opinion on the Executive Board of Directors consolidated report and on the consolidated financial statements, presented by the Executive Board of Directors of EDP Energias de Portugal, S.A., for the year ended 31 December, 2013.
- 2 We have accompanied the evolution of the company, and its most significant subsidiaries and associated companies, activities. We have verified the timeliness and adequacy of the accounting records and supporting documentation. We have enquired about the compliance with the law and the Articles of Association.
- 3 As a consequence of the work carried out, we have issued the attached Auditors' Report on the consolidated financial statements.
- 4 Within the scope of our mandate, we have verified that:
 - the consolidated balance sheet, the consolidated statements of income, of consolidated cash flows, of consolidated changes in equity, of consolidated comprehensive income and the related notes, present adequately the financial position and the results of EDP and its subsidiaries;
 - ii) the accounting policies and valuation criteria used are appropriate; and
 - iii) the Executive Board of Directors consolidated report is sufficiently clear to present the evolution of the business and the consolidated financial position of EDP, highlighting the more significant aspects.
- 5 As result of the work carried out, and taking into account the above referred documents, we are of the opinion that the Annual General Meeting of EDP - Energias de Portugal, S.A., may approve:
 - i) the Executive Board of Directors annual report; and
 - ii) the consolidated financial statements.

AUDITORS' REPORT

(ISSUED BY THE STATUTORY AUDITOR, A CMVM REGISTERED AUDITOR)

(This report is a free translation to English from the original Portuguese version In case of doubt or misinterpretation the Portuguese version will prevail)

Introduction

In accordance with the applicable legislation, we present our Auditors' Report on the financial information included in the Executive Board of Directors report and in the financial statements as at and for the year ended 31 December 2013 of EDP – Energias de Portugal, S.A., which comprise the balance sheet as at 31 December 2013 (showing total assets of 20,988,028 thousand Euros and shareholders' equity of 7,033,084 thousand Euros, including a net profit of 790,875 thousand Euros), the statement of income, the cash flow statement, the statement of changes in equity and the statement of comprehensive income for the year then ended, and the corresponding Notes to the accounts.

Responsibilities

- 2 The Executive Board of Directors is responsible for:
 - a) the preparation of the financial statements in accordance with International Financial Reporting Standards as adopted by the European Union that presents fairly the financial position of the company, the results of its operations, the cash flows, the changes in equity and the comprehensive income;
 - b) that the financial information prepared in accordance with International Financial Reporting Standards as adopted by the European Union, is complete, true, current, clear, objective and lawful as established by the Portuguese Securities Code ('CVM');
 - c) the adoption of adequate accounting policies and criteria;
 - d) the maintenance of an appropriate internal control system; and
 - e) the communication of any relevant fact that may have influenced the activity, financial position or results of the company.
- Our responsibility is to verify the financial information included in the above referred documents, namely as to whether it is complete, true, current, clear, objective and lawful as required by the CVM in order to issue a professional and independent report based on our audit.

Scope

- 4 We conducted our audit in accordance with the Technical Standards and Guidelines issued by the Portuguese Institute of Statutory Auditors ('Ordem dos Revisores Oficiais de Contas'), which require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatements. Accordingly our audit included:
 - verification, on a test basis, of the information underlying the figures and disclosures contained in the financial statements, and an assessment of the estimates made, based on the judgements and criteria defined by the Executive Board of Directors, used in the preparation of the referred financial statements;
 - evaluation of the appropriateness of the accounting policies used and of their disclosure, taking into account the applicable circumstances;
 - · assessment of the applicability of the going concern principle;
 - · assessment of the overall adequacy of the financial statements' presentation; and
 - assessment of whether the financial information is complete, true, current, clear, objective and lawful.
- Our audit also included the verification that the financial information included in the Executive Board of Directors report is consistent with the financial statements, as well as the verification of the disclosures required by the article 453, of the Portuguese Companies Code ("Código das Sociedades Comerciais").
- 6 We believe that our audit provides a reasonable basis for our opinion.

Opinion

In our opinion, the referred financial statements present fairly, in all material respects, the financial position of EDP – Energias de Portugal, S.A., as at 31 December 2013, the results of its operations, the cash flows, the changes in equity and the comprehensive income for the year then ended, in accordance with International Financial Reporting Standards as adopted by the European Union, and the information contained therein is complete, true, current, clear, objective and lawful.

Report on other legal requirements

8 It is also our opinion that the financial information included in the Executive Board of Directors report is consistent with the financial statements and that the Report on Corporate Governance includes the information required by the article 245.°-A of the Portuguese Securities Market Code ('CVM').

REPORT AND OPINION OF THE STATUTORY AUDITOR Year ended 31 December, 2013

(This report is a free translation to English from the original Portuguese version In case of doubt or misinterpretation the Portuguese version will prevail)

To the Shareholders of

EDP - Energias de Portugal, S.A.

- In accordance with the applicable legislation, we herewith, as statutory auditor of EDP Energias de Portugal, S.A., present the report on our supervisory activity and our opinion on the Executive Board of Directors report and on the financial statements, presented by the Executive Board of Directors of EDP Energias de Portugal, S.A., for the year ended 31 December, 2013.
- 2 We have accompanied the evolution of the company, and its most significant subsidiaries and associated companies, activities. We have verified the timeliness and adequacy of the accounting records and supporting documentation. We have enquired about the compliance with the law and the Articles of Association.
- 3 As a consequence of the work carried out, we have issued the attached Auditors' Report on the company's financial statements.
- 4 Within the scope of our mandate, we have verified that:
 - i) the balance sheet, the statements of income, of cash flows, of changes in equity, of comprehensive income and the related notes, present adequately the financial position and the results of EDP;
 - ii) the accounting policies and valuation criteria used are appropriate; and
 - iii) the Executive Board of Directors report is sufficiently clear to present the evolution of the business and the financial position of EDP, highlighting the more significant aspects.
- 5 As result of the work carried out, and taking into account the above referred documents, we are of the opinion that the Annual General Meeting of EDP - Energias de Portugal, S.A., may approve:
 - i) the Executive Board of Directors annual report; and
 - ii) the financial statements.

INDEPENDENT ASSURANCE REPORT

(This Report is a free translation to English from the Portuguese version. In case of doubt or misinterpretation the Portuguese version will prevail.)

To the Executive Board of Directors of EDP - Energias de Portugal, S.A.

Introduction

We have been engaged by the Executive Board of Directors of EDP Energias de Portugal, S.A ("EDP") to provide reasonable assurance in respect of the indicators identified in paragraph 4 of the scope paragraph and limited assurance in respect of the sustainability information included in the chapter "Performance" and appendix "Reporting Principles" of the EDP Annual Report ("the Report") as a whole for the year ended 31 December 2013.

Responsibilities

2 The Executive Board of Directors of EDP is responsible for:

Portugal

- The preparation and presentation of the sustainability information included in the chapter "Performance" and appendix "Reporting Principles" of the EDP Annual Report in accordance with the Sustainability Reporting Guidelines (G3.1) and the Electric Utilities Sector supplement, of the Global Reporting Initiative (GRI) as described in the chapter "Performance" and appendix "Reporting Principles" of the EDP Annual Report, and the information and assertions contained within it;
- Determining EDP's objectives in respect of sustainable development performance and reporting, including the identification of stakeholders and material issues, in accordance with the principles of inclusiveness, materiality and response of AA1000APS (2008); and
- Establishing and maintaining appropriate performance management and internal control systems from which the reported performance information is derived.
- 3 Our responsibility is to express, based on the work performed:
 - A reasonable assurance conclusion on whether GRI indicators: Economic Data (EC1, EC4, EC5, EC6), Sector (EU1, EU2, EU3, EU4, EU5, EU15, EU16, EU21), Environmental (EN3, EN4, EN8, EN11, EN16, EN20, EN22, EN30), Product (PR3), Labour Practices (LA1, LA 2, LA7, LA10, LA13), Fines and Penalties (EN28, SO7, SO8, PR9) Absenteeism rate, Billing of Energy Services, CO2 avoided and Maximum Certified Installed Capacity ISO 14001, are free from material misstatement; and
 - A limited assurance conclusion on whether the information on the sustainability information included in the chapter "Performance" and appendix "Reporting Principles" of the EDP Annual Report, as a whole, as of and for the year ended 31 December 2013, is not free from material misstatement.

We conducted our assurance engagement in accordance with the International Standard on Assurance Engagements (ISAE) 3000, Assurance Engagements other than Audits or Reviews of Historical Financial Information, issued by the International Auditing and Assurance Standards Board of the International Federation of Accountants.

Our work included also a moderate level of assurance in accordance with the AA1000 Accountability Assurance Standard 2008 (AA1000AS) (Type 2) issued by Accountability, that consists in the verification of the nature and extent of the organization's adherence to the AA1000APS (2008), and the evaluation of the reliability of the performance information as reported in the appendix "Reporting Principles".

These Standards require that we comply with applicable ethical requirements, including independence requirements.

Scope

- 4 The scope of our work was as follows:
 - Reasonable Assurance:

A reasonable assurance engagement with respect to the indicators: Economic Data (EC1, EC4, EC5, EC6), Sector (EU1, EU2, EU3, EU4, EU5, EU15, EU16, EU21), Environmental (EN 3, EN 4, EN 8, EN 11, EN 16, EN20, EN 22, EN30), Product (PR3), Labour Practices (LA1, LA 2, LA7, LA10, LA13), Fines and Penalties (EN28, SO7, SO8, PR9) Absenteeism rate, Billing of Energy Services, CO2 avoided and Maximum Certified Installed Capacity ISO 14001, involves performing procedures to obtain sufficient evidence to give reasonable assurance that the indicators disclosed are free from material misstatement whether caused by fraud or error. The procedures performed depend on professional judgment, including the assessment of the risk of material misstatement in the indicators mentioned above, whether due to fraud or error. In making those risk assessments, we considered internal control relevant to EDP in the preparation and presentation of the referred indicators in order to design assurance procedures that are appropriate in the circumstances. Our engagement also included assessing the suitability of the criteria used by the Board of Directors of EDP in the preparation of the indicators, as explained in the chapter "Report Profile" and appendix "Reporting Principles" of the EDP Annual Report, in the evaluation of the appropriateness of the quantification methods, in the reporting of the policies used and the reasonableness of the estimates made by EDP.

Among others, our procedures included:

- Interviews with relevant responsible persons and relevant staff at operating and corporate level concerning the identification of the indicators mentioned above;
- Interviews with relevant responsible persons and relevant staff at operating and corporate level concerning the preparation of the indicators;
- Evaluation of the systems used for collection, calculation and reporting of the indicators;
- Recalculation of the indicators at corporate and operational level; and
- Validation of the design and effectiveness of controls.

We understand that the evidence obtained is sufficient and appropriate for the expression of our conclusion.

Limited assurance:

Our limited assurance engagement on the sustainability information consisted in inquiries, primarily of persons responsible for the preparation of information presented in the chapter "Performance" and appendix "Reporting Principles" of the EDP Annual Report as a whole for the year ended 31 December 2013, and applying analytical and other evidence gathering procedures, as appropriate. These procedures included:

- Interviews with relevant responsible persons and relevant staff at corporate and operational level concerning sustainability strategy and policies for material issues, and the implementation of these across the business;
- Interviews with relevant staff at corporate operational level responsible for the preparation
 of the sustainability information;
- Visits to operating sites in Portugal, Spain and Brazil, selected on the basis of a risk analysis including the consideration of both quantitative and qualitative criteria;
- Comparing the information presented in the chapter "Performance" and appendix "Reporting Principles" of the Report for the year ended 31 December 2013 to corresponding information sources to determine whether all the relevant information contained in such underlying sources has been included in the Report;
- Reading the information presented in the chapter "Performance" and appendix "Reporting Principles" of the Report to determine whether it is in line with our overall knowledge of, and experience with, the sustainability performance of EDP.

The extent of evidence gathering procedures performed in a limited assurance engagement is substantially less in scope than a reasonable assurance engagement or an audit conducted in accordance with International Standards on Auditing and Assurance Engagements, and consequently, does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit or a reasonable assurance engagement. Accordingly, we do not express a reasonable assurance conclusion on the information presented in the chapter "Performance" and appendix "Reporting Principles" of the EDP Annual Report as a whole.

5 Our multidisciplinary team included specialists in AA1000APS, stakeholder dialogue, social, environmental and economic business performance.

Conclusion

- 6 Based on the procedures performed, as described above:
 - We conclude that the indicators: Economic Data (EC1, EC4, EC5, EC6), Sector (EU1, EU2, EU3, EU4, EU5, EU15, EU16, EU21), Environmental (EN3, EN4, EN8, EN11, EN16, EN20, EN 22, EN30), Product (PR3), Labour Practices (LA1, LA2, LA7, LA10, LA13), Fines and Penalties (EN28, SO7, SO8, PR9) Absenteeism rate, Billing of Energy Services, CO2 avoided and Maximum Certified Installed Capacity ISO 14001, are presented in all material respects, in accordance with the Sustainability Reporting Guidelines (G3.1), of the Global Reporting Initiative (GRI) as described in the chapter "Performance" and appendix " Reporting Principles" of EDP's Annual Report.
 - Nothing has come to our attention that causes us to believe that the sustainability information included in the chapter "Performance" and appendix "Reporting Principles" of EDP's Annual Report for the year ended 31 December 2013 is not presented fairly, in all material respects, in accordance with the Sustainability Reporting Guidelines (G3.1) and the Electric Utilities Sector supplement, of the Global Reporting Initiative (GRI) as described in the appendix "Reporting Principles" of EDP's Annual Report. Additionally and also based on the procedures performed, as described above, nothing has come to our attention that causes us to believe that EDP has not applied the principles of inclusivity, materiality and responsiveness as included in the AA1000 Accountability Principles Standard 2008, as described in the appendix "Reporting Principles" of EDP's Annual Report.

Without affecting our conclusions presented above, we present some of the key observations:

In relation to the Inclusiveness principle

EDP managed to leverage the process that started to implement in 2012, making a successful transition to a new stakeholder management model, where inclusion and identification of the concerned parties became dynamic, reviewed on a regular basis and monitored at the highest level of corporate management. This transition must be complemented with the adjustment of the process mentioned above to the other geographies where the group operates.

In relation to the Materiality principle

Materiality identification outputs became more robust and reliable due to the firms capacity increase to gather and analyse a greater array of information from multiple sources, ensuring a clearer understanding of the stakeholder's expectations regarding EDP's activity within the energy sector. To ensure even greater reliability and robustness, the process used for materiality definition should be adjusted on the other geographies where the group operates.

In relation to the Responsiveness principle

EDP should consider the creation and communication of corporate objectives and commitments that incorporate and address the major material issues identified by their stakeholders.

Our assurance report is made solely to EDP in accordance with the terms of our engagement. Our work has been performed only with the objective of reporting to EDP those matters for which we were engaged in this assurance report and for no other purpose. We do not accept or assume responsibility to any third party other than EDP for our work, for this assurance report, or for our conclusions.

Independent Evaluation Report on the Internal Control System Over Financial Reporting of EDP Group

(This report is a free translation to English from the original Portuguese version In case of doubt or misinterpretation the Portuguese version will prevail)

To the Executive Board of Directors EDP – Energias de Portugal, S.A.

Introduction

1 We were engaged by EDP – Energias de Portugal, S.A. ("EDP" or "the Company") to perform a work to assess the internal control system over consolidated financial reporting ("SCIRF") of the Company and its subsidiaries ("Group" or "EDP Group") as at 31 December 2013, based on the criteria established in the internal control framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in relation with global business and control procedures, and with the Control Objectives for Information and Related Technologies ("COBIT") in relation to the general information technologies controls.

Responsibilities

- 2 The Executive Board of Directors is responsible for adopting adequate measures to ensure to a reasonable degree of security the implementation and maintenance of an adequate internal control system over the consolidated financial reporting and the proper development of improvements to the system.
- 3 Our responsibility is to assess and express a conclusion, with reasonable assurance, on the effectiveness of the EDP Group's internal control system over consolidated financial reporting.

Scope

- The internal control system over the consolidated financial reporting is a process designed, to provide reasonable assurance regarding the reliability of financial reporting and preparation of consolidated financial statements for external purposes in accordance with generally accepted accounting principles and includes policies and procedures that:
 - respect to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and disposals of assets of EDP Group;
 - provide reasonable assurance that transactions are recorded as necessary to permit the
 preparation of consolidated financial statements in accordance with generally accepted
 accounting principles, and that receipts and expenditures of EDP Group are being made only
 in accordance with authorizations of the Executive Board of Directors and Directors of
 EDP, S.A. or Directors and Management of EDP subsidiaries; and
 - provide reasonable assurance regarding prevention, or timely detection and correction of unauthorized acquisitions, use or disposals of assets of EDP Group that could have a material effect on the consolidated financial statements.

- Our work was conducted in accordance with the International Standard on Assurance Engagements "ISAE 3000 Assurance Engagements other than Audits or Reviews of Historical Financial Information" issued by the International Auditing and Assurance Standards Board of the International Federation of Accountants. This standard requires that we plan and perform our work to obtain reasonable assurance about whether the Group's internal control system is effective in all material respects.
- 6 Our evaluation included obtaining an understanding of the Group's internal control system over the consolidated financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk and performing such other procedures as we considered necessary in the circumstances.
- 7 We believe that the work performed provides a reasonable basis for our conclusion.
- 8 Due to the limitations inherent in any form of internal control system, there is a possibility that internal control over consolidated financial reporting may not prevent or detect the errors or irregularities that might arise, whether due to collusion, errors in judgment, human error, fraud or malpractice. Also, projections of any evaluation of effectiveness to future periods of the internal control over consolidated financial reporting are subject to the risk that controls may become inadequate due to changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Conclusion

- In our opinion, the Group's internal control system over consolidated financial reporting as at 31 December 2013 is adequate and effective, in all material aspects, according to the criteria established in the internal control framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in relation with global business and control procedures, and with the Control Objectives for Information and related Technologies (COBIT) for general information technologies controls.
- On 27 February 2014 we issued our audit report on the consolidated financial statements of the Group as at 31 December 2013, expressing an unqualified opinion.
- 11 This report has been prepared according to your request in accordance with terms as described in paragraph 1. We do not accept any liability to any third parties other than the intended recipients of this report.

EXTRACT FROM THE GENERAL MEETING

Non-binding translation For information purposes only

------ Extract of Minutes no. 1/2014 of the General Shareholders' Meeting --- On the twelfth of May, of the year two thousand and fourteen, at fifteen hours, the General Shareholders' Meeting of EDP – Energias de Portugal, S.A., a listed company (hereinafter referred to as "EDP" or "Company"), with head office at Praça Marquês de Pombal, 12, in Lisbon, with the share capital of € 3 656 537 715, with the sole number with the tax authorities and with the Commercial Registry Office of Lisbon 500 697 256, met at Auditorio I of FIL Meeting Center, at Rua do Bojador, Parque das Nações, in Lisbon. The meeting took place outside of the Company's head office since it did not allow the meeting to occur in satisfactory conditions, considering, as EDP is a listed company, the high level of shareholders participating. ---------- The Chairman of the General Shareholders' Meeting, Mr. Rui Eduardo Ferreira Rodrigues Pena, started by informing that, before the beginning of the works, an institutional movie of EDP would be presented.-------- After the presentation of the institutional movie, the Chairman of Shareholders' Meeting welcomed all presents - namely the shareholders and its representatives, the members of the General and Supervisory Board, the members of the Executive Board of Directors, the representative of the Statutory Auditor, the Chairman of the Remuneration Committee elected by the General Shareholders, his colleagues of the Board of the General Shareholders and the guests – and explained the participation procedures in the present General Shareholders' Meeting and the respective functioning, which are provided in the General Shareholders' Meeting folder, namely: notice to convene meeting, accounts' reporting documents, opinions and statements of the relevant Corporate Bodies, resolution proposals and EDP By-Laws in force. Afterwards, and assisted by the Vice-Chairman of the General Shareholders' Meeting, Mr. Rui Pedro Costa Melo Medeiros, and by the Company Secretary, Ms. Maria Teresa Isabel Pereira, the Chairman of the General Shareholders' Meeting verified the regularity of the notice to convene the meeting through the mandatory publications made at the Ministry of Justice's, CMVM's and EDP's websites, as well as in the Euronext's Official Listing Bulletin. -------- The Chairman of the General Shareholders' Meeting and the Company Secretary also verified that the attendance list was duly organized and that there were representation letters for the shareholders that were legal persons or that were not physically present. ------Afterwards, the Chairman of the General Shareholders' Meeting and the Company Secretary verified the percentage of the share capital present or represented at the General Shareholder's Meeting which, adding the correspondence votes, represented 71,3610% of the share capital and the voting rights - based upon the shares' registry statements issued by the financial intermediaries responsible for the individual registry of shares for each shareholder. ------

--- The Chairman of the General Shareholders' Meeting proceeded underlining that the exercise of participating and voting rights at the General Shareholders' Meeting would not be prejudiced by the transfer of shares after the registration date (5th of May 2014), nor was dependent from the respective block between registration date and the present date. Nevertheless, the Chairman of the General Shareholders' Meeting referred that shareholders that declared their intention to participate at the General Shareholders' Meeting and, meanwhile, transferred ownership of their shares between registration date and the General Shareholders' Meeting were obliged to communicate it immediately to the Chairman of the General Shareholders' Meeting and to the Portuguese Securities Market Commission. --------- The Chairman of the General Shareholders' Meeting mentioned, afterwards that shareholders who, by professional title, own shares on its own name, but on behalf of clients, may vote on a different way with its shares, as long as, beyond the participating statement and the sending, by the respective financial intermediary, of the shares' registry statements, they had presented to the Chairman of the General Shareholders' Meeting, until 23:59 hours (GMT) of the 2nd of May 2014 – with sufficient and proportional evidence, being understood that the indication of the number of corporate entity issued by the competent authority of the origin country – the following information and documentation: (i) identification of each client and number of shares to vote on its own account and (ii) vote instructions, which shall be specific for each different item of the agenda and shall be given by each client. The Chairman of the General Shareholders' Meeting referred also that in case one shareholder had designated several representatives regarding shares held in different book-entry registries, and these representatives vote in a different way regarding the same proposal, all the expressed votes may be annulled. If any of the representatives would not attend the General Shareholders' Meeting, the votes of the representatives present would be considered, as long as all of the representatives vote in the same way. The presence at the General Shareholders' Meeting of a shareholder that had designated one or more representatives revokes the representation powers conferred. ---------- Following, the Chairman of the General Shareholders' Meeting also stated that, according to article 14, number 3 of EDP's By-Laws, votes would not be cast in the event that they exceeded 25% of the total votes, situation that was not verified at the date of the General Shareholders' Meeting. --------- The Chairman of the General Shareholders' Meeting and the Company Secretary also verified that the remaining General Shareholders' Meeting's prior formalities were observed, namely, that the proposals and other information in relation to the seven items of the agenda were made available to shareholders, at the head office and at the CMVM's and EDP's websites, within the periods provided for by law. ------

(...)------

| Following all these verifications, the Chairman of the General Shareholders' Meeting declared |
|---|
| having sufficient conditions to initiate the works, as the General Shareholders was validly constituted |
| and ready to deliberate, and proceeded by reading the agenda, according to the notice to convene |
| meeting, with the following content: |

| After the debate and since no other person asked | to speak, the Chairman of the General |
| Shareholders' Meeting submitted to vote the proposal, | having been issued 2.606.350.680 votes, |
| corresponding to 2,606,350,680 shares, which represent 71. | .2518% of the share capital. As abstentions |
| are not considered, the sole management report, the other | accounts' reporting documents regarding |
| 2013 and the Report of the General and Supervisory Board | d were approved by majority of the votes |
| cast (99.9897 % of votes in favour) | |
| The Chairman of the General Shareholders' Meeting pro | oceeded the works, regarding Item Two of |
| the agenda, which content is as follows: - "Resolve on the | allocation of profits in relation to the 2013 |
| financial year". Subsequently the Chairman of the Gene | eral Shareholders' Meeting read out the |
| proposal presented by the Executive Board of Directors, wi | thin the scope of item two of the agenda, |
| according to following terms: | |
| "In accordance with number 1 of article 30 of EDP's Artic | les of Association, the Executive Board of |
| Directors hereby proposes for approval by the Shareholders | s the following allocation of profits, in the |
| total value of € 790,875,100.65: | |
| Legal reserve | € 39,543,755.03 |
| Dividends (The proposed dividend is € 0.185 per share) | € 676,459,47.28 |
| Endowment to EDP Foundation | € 7,200,000.00 |
| Profit forwarded | € 67,671,868.34″ |
| After reading out, Mr. Rui Eduardo Ferreira Rodrigues | Pena granted permission to speak to the |
| Chairman of the Executive Board of Directors, Mr. Antón | nio Luís Guerra Nunes Mexia in order to |
| present the allocation of profits proposal | |
| () | |
| Following that, the Chairman of the General Shareholde | ers' Meeting expressed gratitude for the |
| explanation made by the Chairman of the Executive Boar | d of Directors, and subsequently granted |
| permission to speak to the Chairman of the General and S | Supervisory Board, in order to present the |
| appreciation made by the aforesaid corporate body regarding | ng EDP Foundation activities plan, inherent |
| to the proposed endowment. () | |
| The Chairman of the General Shareholders' Meeting tha | inked the presentation of the Chairman of |
| the General and Supervisory Board and declared opened | the discussion regarding Item Two of the |
| agenda. () | |
| After discussion, and since no other person asked | to speak, the Chairman of the General |
| Shareholders' Meeting submitted to vote the proposal rega | rding Item Two of the agenda, having been |
| | |

| issued 2,605,425,376 votes, corresponding to 2,605,425,376 shares, which represent 71.2539% of the share capital. As abstentions are not considered, the aforementioned proposal was approved by majority of the votes cast (99. 9769% of votes in favour). |
|---|
| Next entering into Item Three of the agenda, the Chairman of the General Shareholders' Meeting read its content, namely, "Resolve on the general appraisal of the management and supervision of the company, under article 455 of the Portuguese Companies Code". |
| Following, the Chairman of the General Shareholders' Meeting informed about the request for clarification made to the Board of the General Shareholders' Meeting by the shareholder Mr. Luís António Dinis Correia, owner of 3,534 shares representative of EDP share capital, and read out loud on the following terms: |
| "GSM 12-May-2014 |
| Request for clarification |
| As I have already done in Item 1 of the Agenda, I hereby question again the "process method" to be adopted in Item 3 of the Agenda |
| The reading of the "Other Information" in the Notice to Convene Meeting is not clear about the "Discussion" |
| In such "Other information" reference is made only to the "voting" being cast "separately" |
| I hereby request a clarification on how the previous "Discussion" of each of the items will be made |
| Lisbon, 12th May 2014 |
| Luís António Dinis Correia |
| Shareholder 313144." |
| In reply, the Chairman of the General Shareholders' Meeting explained that, as it has been a reiterated practice of the General Shareholders' Meeting of past years, it is his understanding that in view of item three the discussion of the matters shall be aggregated, taking into account the interaction of the corporate bodies functioning and the law (article 455.º of Portuguese Companies Code, which refers to the general appreciation of the management and supervise), being the voting cast separately regarding each of the corporate bodies. Therefore, the intervention of the shareholders shall happen in the discussion part, and afterwards the item shall be separated for the voting. |
| Subsequently, the Chairman of the General Shareholders' Meeting reiterated, according to the notice to convene meeting that the voting of this item would me made separately, and so it should be made by sub items as following: |

| 3.1 Vote of confidence and praise to the Executive Board of Directors and each of its members for the performance of their offices during 2013 financial year. |
|---|
| 3.2 Vote of confidence and praise to the General and Supervisory Board and to each of its members for the performance of their offices during 2013 financial year. |
| 3.3. Vote of confidence and praise to the Statutory Auditor for the performance of its office during 2013 financial year. |
| Following, the Chairman of the General Shareholders' Meeting asked the present shareholders about the waiver of reading the proposal regarding the Opinion of the General and Supervisory Board on the vote of confidence to the Executive Board of Directors regarding 2013 (document attached to these minutes), as follows: |
| "As established on the article 22º nº 1 h) of the Articles of Association of EDP, the General and Supervisory Board (GSB) must Issue an opinion, by its own initiative, or when so requested by the Chairman of the Executive Board of Directors (EBD), on the annual vote of confidence which is referred in the article 455º of the Portuguese Code of Commercial Companies |
| The GSB, in the uncompromising pursuit of the interests of the EDP and in the exercise of its powers and without prejudice to the principle of institutional cooperation that steers the relationship with the EBD, believes and has also put into practice a principle of maximum exigency and accountability, which has special significance in terms of the assessment of the work and performance of the EBD. |
| EDP remains one of the few listed companies in Portugal and abroad that has voluntarily established a formal and impartial process to assess the work of the EBD. This distinctive practice adopted by the GSB directly contributes to the Dow Jones Sustainability Index evaluation, and it acknowledges the continued endeavor for excellence in corporate governance practices that the GSB has sought to develop.———————————————————————————————————— |
| At the beginning of 2014, the members of the GSB were invited to complete a questionnaire to assess the EBD, which was divided into two major areas: |
| Assessment of the adequacy of aspects of a formal and organizational nature Material assessment of the work of the EBD |
| The purpose of the questionnaire was to be an impartial support document for the GSB's appraisal with a view to the assessment of the EBD that it has to issue and present to EDP's shareholders to vote on |
| Based on the answers to the questionnaires, the GSB jointly analysed these data at the meeting of 27 February 2014, and drew its conclusions. Hence, pursuant to its rules, which were approved in line with |

| best corporate governance practices, the GSB wishes to record the following conclusions on the |
|--|
| assessment of the work and performance of the EBD in 2013 |
| The GSB assessed all aspects under evaluation as satisfactory. These being: |
| • Organization and powers of the EBD (Internal rules of procedure and composition) |
| • Compliance with the provisions defined by the GSB concerning: |
| - The issue and waiving of prior opinions |
| - Handling conflicts of interest |
| - Additional audit services |
| The GSB considered the overall performance of the EBD in 2013 to be excellent, with particular emphasis on the following areas of activity: |
| • Strategy |
| • Financing |
| • Investment |
| Preparation of financial and accounting information |
| Regardless of the assessment results obtained, the work of the EBD is underpinned by the continual improvement of its performance, both in terms of carrying out its duties and the relationship with the other bodies and corporate bodies of EDP, and also in the best interests of the shareholders |
| Proposal |
| On the basis of this analysis, the GSB decided to classify the overall work of the EBD during the business year 2013 as excellent. |
| Therefore, the GSB unanimously decided to issue its favorable opinion on the activity and performance |
| of the EBD during 2013 and to transmit to the Shareholders its support to the vote of confidence and praise to the EBD, to its Chairman, Mr. António Mexia, and to each of its Members" |
| Following the Chairman of the General Shareholders' Meeting also noted that, about this item of the agenda, a proposal was presented to him, by the shareholders CWEI (Europe), S.A., Oppidum, S.A., José de Mello Energia, S.A. e Banco Comercial Português, S.A. document attached to these minutes, |
| and read it, as follows: |
| "Considering article 455 of the Portuguese Companies Code and the quality of the performance of the |
| members of the management and supervision bodies of EDP - Energias de Portugal, S.A. who exercised |
| their functions during 2013: |
| The Shareholders propose: |

| 1^{ϱ} - A vote of confidence and praise to the Executive Board of Directors and each of its members for the |
|---|
| performance of their offices during 2013 financial year |
| 2º - A vote of confidence and praise to the General and Supervisory Board and to each of its members |
| for the performance of their offices during 2013 financial year |
| 3º - A vote of confidence and praise to the Statutory Auditor for the performance of its office during |
| 2013 financial year" |
| The Chairman of the General Shareholders' Meeting declared then open the discussion on Item Three |
| of the agenda |
| () |
| Concluded the interventions, the Chairman of the General Shareholders' Meeting submitted to vote |
| the proposal regarding "vote of confidence and praise to the Executive Board of Directors and each of |
| its members for the performance of their offices during 2013 financial year", having been issued |
| $2,587,141,006 \ votes,\ corresponding\ to\ 2,587,141,006\ shares,\ which\ represent\ 70.7538\%\ of\ the\ shared$ |
| capital. As abstentions are not considered, the aforementioned proposal was approved by majority of |
| the votes cast (99.9895% of votes in favour) |
| Afterwards, the Chairman of the General Shareholders' Meeting submitted to vote the proposal |
| "vote of confidence and praise to the General and Supervisory Board and to each of its members for |
| the performance of their offices during 2013 financial year", having been issued 2,579,019,874 votes, |
| corresponding to 2,579,019,874 shares, which represent 70.5317% of the share capital. As the |
| abstentions are not considered, the referred proposal was approved by majority of the votes cast |
| (99.9806% of votes in favour) |
| () |
| Following that, the Chairman of the General Shareholders' Meeting submitted to vote the proposal |
| "vote of confidence and praise to the Statutory Auditor for the performance of its office during 2013 |
| financial year", having been issued 2,587,146,002 votes, corresponding to 2,587,146,002 shares, |
| which represent 70.7540% of the share capital. As the abstentions are not considered, the referred |
| proposal was approved by majority of the votes cast (99.9860% of votes in favour) |
| After the conclusion of the voting, the Chairman of the General Shareholders' Meeting received |
| from the shareholder Mr. Luís António Dinis Correia, holder of 3,534 shares representatives of EDP |
| share capital, the voting statements regarding sub items one and two of Item Three of the agenda, |
| which are reproduced herein according to the originals as follows and filed as attachments to these |
| minutes: |

| Lisbon, 12-May-2014 |
| Luís António Dinis Correia |
| Shareholder 313144" |
| "GSM of 12-May-2014 |
| <u>Vote declaration</u> |
| $\underline{\textit{I vote against}} \ \textit{the proposal for a vote of "confidence and praise to the General Supervisory Booard", on }$ |
| the grounds that its Chairman, after more than two years, having answered that the subject of |
| "REMUNERATIONS/WAGES" was not addressed in the extraordinary GSM of 20/Fev/2012 when this |
| same subject is included in a vote declaration presented, read and written by me, which is included in |
| the minutes of such GSM as can be confirmed by its consultation and that I do not transcribe here in |
| order to avoid this "vote declaration" becoming too long |
| The letter received from the advisor of the General Supervisory Board on 9/April/2014 on behalf of its |
| Chairman is not compatible with the contents of my vote declaration, which is clear about the subject |
| "REMUNERATIONS/WAGES" having been "ADDRESSED" |
| Lisbon, 12-May-2014 |
| Luís António Dinis Correia" |
| The Chairman of the General Shareholders' Meeting continued the works by reading the content of |
| Item Four of the agenda – "Resolve on the granting of authorization to the Executive Board of |
| Directors for the acquisition and sale of own shares by EDP and subsidiaries of EDP" – and asked the |
| shareholders that were present to waive the reading of the proposal presented by the Executive Board |
| of Directors, which is reproduced herein as follows and is filed as an attachment to these minutes, |
| since the referred proposal was too extensive and known by all: |
| "Considering: |
| A) The legal regulations applicable to the acquisition and sale of own shares by limited liability |
| companies set forth in the Portuguese Companies Code; |
| B) The permission granted on no. 3 of article 5 of the Articles of Association to acquire, hold and sell |
| own shares, as provided in the law and up to the limits set forth in the law; |
| C) The provisions laid down in Regulation (EC) 2273/2003 of the European Commission dated |
| December 22nd, 2003, that established a special regime contemplating, namely, requirements to |
| exempt from the general regime of market abuse for certain programs of reacquisition of own shares |
| that should be taken into consideration even if the acquisition of own shares is not integrated on the |
| reacquisition programs covered by the referred Regulation; |

D) The obligation to communicate and disclose the execution of own shares' operations by companies listed into trading that are provided for in CMVM's Regulation no. 5/2008, in its current version; ------E) The authorization granted to the Executive Board of Directors to buy and sell own shares by resolution of the General Shareholders' Meeting of May 6th, 2013 by virtue of which EDP carried out stock operations on own shares and currently holds, directly or through its subsidiaries, 25.747.268 own shares; ------F) From the Company's point of view it is deemed convenient for EDP and its subsidiaries to hold an authorization to buy or to sell own shares, namely considering the stock-options programs previously approved or for any actions deemed necessary or appropriate for the development of the Company's interests;-----The Executive Board of Directors proposes that the Annual General Shareholder's Meeting: ------1. Approves to grant authorization to the Executive Board of Directors of EDP and the management bodies of EDP's subsidiaries for acquiring or selling own shares;-----2. Approves the acquisition by EDP, or any of its current or future subsidiaries, of own shares, including acquisition or allocation rights, subject to decision of the Executive Board of Directors of EDP and under the following terms and conditions: ----a) Maximum number of shares to buy: to a total not exceeding 10% of the share capital of EDP, less any sales that might have occurred, regardless of the exceptions included in number 3 of article 317 of the Portuguese Companies Code and the number of shares required for the buying entity to comply with its commitments set forth by law, contract, issue of securities or contractual requirement regarding the provision of stock-options previously approved programs for the Executive Board members to purchase shares, subject to, if required and in compliance with legislation, the subsequent sale of shares exceeding the foregoing threshold; -----b) Period during which shares can be acquired: eighteen months from the date of this resolution; -----c) Forms of acquisition: acquisition of shares or shares purchase or allocation rights, against payment, in any shape or form and pursuant to the terms and limits peremptorily determined in legislation, either in regulated market where EDP shares have been admitted for trading or outside of stock market, respecting the principle of shareholder equal treatment, under the legal terms applicable, namely through (i) transaction performed outside regulated market with entity (ies) selected by the Executive Board of Directors, including financial institution(s) with which EDP or a subsidiary has entered into an equity swap agreement or similar derivative financial instrument agreement, or (ii) any acquisition of any form in order to or for the purpose of complying with any legal or contractual requirements, or the conversion or exchange of convertible or exchangeable securities issued by the company or a subsidiary, under the terms of the respective issuance conditions or agreements executed in relation to such conversion or exchange; ------

d) Minimum and maximum consideration for acquisitions: the maximum and the minimum buying price shall be, respectively, 120% and 80% of the weighted daily average of the closing price of EDP shares in the last 5 sessions of the Euronext Lisbon immediately prior to the date of acquisition or the date on which the right to acquire or allocate shares was attained, or it will correspond to the acquisition price arising from contractual financial instruments, from the issuance conditions established by the company or any subsidiary, from securities convertible into or exchangeable for shares of the company, or any agreement entered into concerning such conversions or exchanges.----e) When to acquire: to be determined by the Executive Board of Directors of EDP, considering the security market situation and the convenience or commitments of the buying entity, of any of its subsidiaries or of the buyer(s). Acquisitions may occur on one or more occasions, broken down in the manner that the referred Board deems appropriate. ------3. Approves the selling of own shares, including the right to acquire and to hold, that have already been acquired by EDP or any of its current or future subsidiary, subject to decision by the Executive Board of Directors of EDP and under the following terms and conditions:-----a) Minimum number of shares to sell: the number of sale transactions and the number of shares to sell shall be determined by the Executive Board of Directors of EDP, whenever deemed necessary or convenient for the development of the corporate interest or for compliance with legal or contractual obligations. Sales transactions include the allocation of stock purchase options under the abovementioned stock-option programs; -----b) Period during which shares can be acquired: eighteen months from the date of this resolution; -----c) Forms of selling: selling of shares or share purchase or allocation rights, against payment, in any shape or form and pursuant to the terms and limits peremptorily determined in legislation, namely by sale or exchange, by negotiating proposal or public offer, respecting the principle of shareholder equal treatment under the applicable legal terms, to perform on regulated market where EDP shares have been admitted for trading or through transaction performed outside regulated market with entity (ies) selected by the Executive Board of Directors, including financial institution(s) with which EDP or a subsidiary has entered into an equity swap agreement or similar derivative financial instrument agreement, or through sale, in any title, in compliance with legal or contractual obligations, or even with the intention or meeting any commitment made in regard to EDP's stock-options programs incorporated under the express approval of the Annual General Shareholder's Meeting; -------d) Minimum Price: the minimum selling price shall be either (i) no less than 80% of the weighted daily average of the closing price of EDP shares in the last 5 sessions of the Euronext Lisbon immediately prior to the date of the sale, except when the purpose of the sale is to permit the full implementation of stock-options programs that have been created under the express approval of the General Meeting of Shareholders, or (ii) it shall be the price that was set or results from the terms and conditions of the

issuance of other securities, namely convertible or exchangeable securities, or from a contract entered into in regard to such issue, conversion or exchange, relative to a sale obliged by the same; -----e) When to sell: the Executive Board of Directors of EDP shall determine the timing of each transaction in view of the securities market conditions and whether the sale is appropriate to or complies with the requirements of the selling entity, the Company or its subsidiary. Sales transactions may occur one or more times, broken down in the manner the referred Executive Board deems appropriate.----4. Approves that the Executive Board of Directors be indicatively notified that, without prejudice to its freedom to decide and to act as per the resolutions taken in respect to paragraphs 1 to 3 precedent, in as much as possible and under the terms and according to the circumstances it deems appropriate – particularly in relation to acquisitions forming part of stock repurchase programs for the purpose of covering bond or other securities' conversion rights, or stock-options programs or similar rights, or other programs that may be governed by the Regulation mentioned in Recital C) – it should not only consider the legislation applicable regarding the disclosure of remuneration policy of the corporate bodies and the Securities Market Commission recommendations in force but also the following recommended practices concerning the buying and selling of own shares in accordance with the authorizations granted under the previous paragraphs: -----a) Disclose to the public, before beginning purchase and sale transactions, the contents of the authorization referred to in the foregoing paragraphs 1 to 3, in particular, the objective, maximum acquisition counter value, maximum number of shares to buy and the authorized timeframe established for the transaction;----b) Record each transaction performed in the ambit of the preceding authorizations; -----c) Perform stock transactions in such a manner, in terms of timing, form and volume, that does not disturb the regular operation of the market, trying to avoid execution during sensitive trading periods, in particular the opening and closure of a session, at times when the market is disturbed, or when relevant facts are announced or financial results are being disclosed; -----d) Restrict acquisitions to 25% of the average daily trading volume, or to 50% of this trading volume provided that the competent authority is previously notified of the intention of exceeding that limit; e) Publicly disclose of any transactions performed, that are relevant according to the applicable regulations, until the end of the third trading day subsequent to the date on which such transaction occurred;----f) Communicate to the competent authority, until the end of the third working day counting from the transaction date, all acquisitions and sales performed; ----a) Refrain from shares selling when stock repurchase transactions are occurring under the auspices of

| For that purpose and in the event of acquisitions under stock repurchasing programs, or other plans |
|---|
| that might be covered by the Regulation referred to on C), the Executive Board of Directors may divide |
| up acquisitions and their conditions according to the respective program. It may provide information of |
| such division in any public disclosure that may be made " |
| Having the shareholders waived the reading of the proposal, the Chairman of the General |
| Shareholders' Meeting granted permission to speak to the Executive Board of Directors in order to |
| present it.() |
| Afterwards, since no one else asked to speak, the Chairman of the General Shareholders' Meeting |
| submitted to vote the proposal related regarding Item Four of the agenda, having been issued |
| 2,577,268,585 votes, corresponding to 2,577,268,585 shares, which represent 70.4839% of the share |
| capital. As the abstentions are not considered, the referred proposal was approved by majority of the |
| votes cast (with 99.5898% of votes in favour) |
| Regarding Item Five of the agenda, the Chairman of the General Shareholders' Meeting proceeded |
| by reading the mentioned item – "Resolve on the granting of authorization to the Executive Board of |
| Directors for the acquisition and sale of own bonds by EDP and subsidiaries of EDP" – and, according to |
| the previous item, asked the shareholders that were present to waive the reading of the proposal, |
| which is reproduced herein as follows and is filed as an attachment to these minutes, since the |
| referred proposal was too extensive and known by all: |
| "Considering that: |
| A) The Articles of Association allow, according to number 1 of article 6, to carry out transactions legally |
| permitted by law involving its own bonds or other securities issued by EDP; |
| B) It is deemed appropriate from the Company's and Group EDP point of view, that EDP holds an |
| authorization to acquire or to sell own bonds; |
| The Executive Board of Directors proposes to the General Shareholders' Meeting the approval of the |
| following resolution: |
| To approve the granting of the authorization to allow EDP's Executive Board of Directors to buy or to |
| sell own bonds or, independently of the applicable jurisdiction, other securities representative of debt |
| of EDP and/or of its current or future subsidiaries, for a period of 18 months and under any business |
| condition or negotiation structure, either out of the Stock Exchange or within national or international |
| regulated markets, applying or not to a financial trustee, through direct transaction or by means of |
| derivative instruments, as well as in accordance with further condition and the following restraints: |
| 1. Acquisition |
| 1.1. Maximum number of bonds to buy: |
| a) When the acquisition is for amortization, partial or total, of the bonds acquired, until the total |
| number of bonds of each issuance; |

| b) When the acquisition has other purpose, until the limit correspondent to 10% of the nominal |
|---|
| aggregate amount of all bonds issued, deducted the sales performed, without prejudice of the |
| exceptions foreseen on no. 3 of article 317 of the Portuguese Companies Code and of the quantity that |
| is required for the compliance of buyer obligations pursuant to law, agreement or securities issuance; |
| 1.2. Minimum and maximum consideration of the acquisition: |
| a) The maximum and minimum buying price will be, respectively, 120% and 80% of the weighted |
| average of the closing price of the issuance published in the last 5 negotiation sessions prior to the date |
| of acquisition or it will be correspondent to the acquisition price resulting from financial instruments |
| entered into or from the respective issuance terms; |
| b) The maximum and minimum buying price concerning issuances not listed in the Euronext Lisbon, |
| irrespective of being listed or not in other markets, its average buying and selling price published by an |
| entity internationally well known in the bond market; |
| c) For issuances not complying with the previous paragraph, the limit price is the value indicated by an |
| independent and qualified consultant or by a financial trustee appointed by the Executive Board of |
| Directors; |
| d) In the case where a transaction results from or has to do with contractual conditions contemplated |
| in another securities issuance, the price will be the value that results from the said contractual |
| conditions; |
| 1.3. Moment of acquisition: the Executive Board of Directors shall determine the timing of each |
| transaction and acquisition may take place one or more times, depending on what the Board deems |
| more appropriate from the Company's point of view |
| 2. Selling |
| 2.1. Maximum number of bonds to sell: the total number of bonds held; |
| 2.2. Minimum consideration of the sale: |
| a) The minimum selling price will be 80% of the weighted average of the closing price of the issuance |
| in the last 5 negotiation sessions prior to the date of selling or it will be correspondent to the selling |
| price resulting from financial instruments entered into or from the respective issuance terms; |
| b) For issuances not listed in the Euronext Lisbon, irrespective of being listed or not in other markets, |
| the limit price is the average buying and selling price published by an entity internationally well known |
| in the bond market; |
| c) For issuances not complying with the previous paragraph, the limit price is the value indicated by an |
| independent and qualified consultant or by a financial trustee appointed by the Executive Board of |
| Directors; |
| d) In the case where a transaction results from or has to do with contractual conditions contemplated |
| in another bond issuance, the price will be the value that results from the said contractual conditions; - |
| |

"1. On the 6th of May of 2013, at the General Shareholders' Meeting of EDP – Energias de Portugal, S.A. (EDP), it was presented and subjected to approval some adjustments to the remuneration policy of the members of EDP Executive Board of Directors (EBD) for the triennium 2012-2014, previously approved at the EDP's General Shareholder's Meeting occurred on the 17th of April, 2012. The proposed modifications concerned the indicators used, especially their respective weights. Additionally, the form of payment of the variable multiannual remuneration component has been changed. During 2013, several meetings to assess the reasonableness of the remuneration policy were held, and the Remuneration Committee of the General and Supervisory Board (REMC) decided to propose its maintenance to this General Shareholder's Meeting, with the exception of the substitution of the "Performance of Free Cash flow" indicator by the "Performance of Operating Cash Flow excluded of regulatory receivables" indicator, as this last was considered to be more appropriate to evaluate the management performance. In summary, and if this amendment is adopted, the remuneration policy of the EBD members of EDP, for 2013-2014, will be based on the following principles and rules: -----a. Fixed remuneration of the EBD Chairman in 600 000 EUR, an amount already practiced on the last two terms of office, since 2006. Likewise, the ratio between the fixed remuneration of the other Executive Directors and its Chairman remains at 80%. Based on the analysis undertaken, although competitive, this value is below the average remuneration of the analyzed universe. As a result of this decision, if approved, at the end of this current term, the fixed remuneration component (and by

| consequence, the maximum limit of the total compensation of the EBD members) will be the same in |
|---|
| nominal terms, for 9 consecutive years; |
| b. Retirement Saving Plans (RSP) assigned to the Executive Board of Directors members during their |
| term of office, amounting in net terms, 10% of their fixed annual remuneration. The characteristics of |
| these standard RSP are covered by the legislation applicable to these financial products; |
| $c.\ Remuneration\ structure\ by\ which\ the\ variable\ component\ can\ duplicate\ the\ fixed\ component\ and\ the$ |
| $multiannual\ variable\ component,\ that\ reflects\ the\ assessment\ for\ the\ whole\ term\ of\ of\!fice,\ will\ have\ a$ |
| weighting of 60% compared with 40% of the weight assigned to the set of indicators that assess the |
| annual performance; |
| d. Minimum and maximum thresholds to define the existence of a performance bonus and the highest |
| value that it may assume. More specifically, if the concrete performance falls below 90% of the fixed |
| targets, and submitted to the GSB, as a reference for performance assessment, there will not be any |
| payment. If, on the other hand, it exceeds 10% or more of its targets, it shall be assigned, always and |
| only, the maximum value. These general criteria apply both to the annual variable component (limited |
| to 80% of the fixed remuneration) as to the multiannual component (which can go up to 120% of the |
| fixed remuneration); |
| e. Criteria that determines the allocation of the multiannual variable remuneration regarding the |
| performance throughout the term of office: although it is calculated annually, it only becomes effective |
| if, at the end of the mandate, at least 90% of the strategic goals have been achieved, according to the |
| $per formance\ of\ the\ company,\ its\ comparison\ with\ strategic\ benchmarks\ and\ the\ individual\ contribution$ |
| of each member of the EDB for the achievement of that purpose; |
| f. Individual performance will weight 20% regarding the annual objectives and 32% for multi-year |
| targets; |
| g. The payment of the multiannual performance bonus will occur with a three year lag regarding the |
| respective year; |
| 2. The indicators used to evaluate the performance of the EBD, particularly regarding the comparison |
| between the stock market performance of EDP and its Iberian and European pears and regarding the |
| economic and financial performance, will be as follows: |
| a. Annual performance indicators |
| a.1. Quantitative component and its weight: |
| Total shareholder return vs Eurostoxx utilities e PSI20(19%) |
| ROIC/WACC(19%) |
| <i>Growth of gross profit</i> (14%) |
| <i>Growth of net profit(14%)</i> |
| EBITDA performance(7%) |

| Operating cash flow excluded of regulatory receivables performance(7%) |
|---|
| The 80% resulting from the weighted sum of these indicators reflect the performance that is common |
| to all EBD members |
| a.2. Qualitative component: |
| The remaining 20% result from an individualized assessment conducted by the REMC, based on the |
| individual performance of each of the EBD members |
| a.3. The resulting value of the quantitative and qualitative component is applicable, as previously |
| mentioned, to 80% of the fixed annual remuneration |
| b. Multiannual performance indicators |
| b.1. Quantitative component and its weight |
| Total shareholder return vs Eurostoxx utilities e PSI20 (17%) |
| ROIC/WACC(17%) |
| EBITDA performance(8,5%) |
| Operating cash flow excluded of regulatory receivables performance(8,5%) |
| Sustainability Performance Indicator (17%) |
| The 68% resulting from the weighted sum of these indicators reflect the performance that is common to all EBD |
| members |
| b.2. Qualitative component: |
| The remaining 32% result from an individualized assessment conducted by the REMC, based on the |
| individual performance of each of the EBD members |
| b.3. The resulting value of the quantitative and qualitative component is also applicable, as previously |
| mentioned, to 120% of the fixed annual remuneration |
| 3. EDP Directors do not enter into agreements, either with the company or with third parties, with the |
| goal of mitigating the risk inherent to the variability of the remuneration that is established by the |
| <i>company.</i> |
| 4. It is further clarified that there are no agreements in EDP that foresee payments in the event of |
| dismissal or termination by agreement of the directors' functions, nor were any payments made in this |
| context during the year of 2013 |
| In accordance to the applicable law and EDP's articles of association, the Remuneration Committee of |
| the General and Supervisory Board submits to the approval of the Shareholders the declaration on the |
| remuneration policy of the members of the Executive Board of Directors in accordance with the above |
| stated terms" |
| As the shareholders waived the reading of the above said statement, Mr. Rui Eduardo Ferreira |
| Rodrigues Pena granted permission to speak to Prof. Alberto João Coraceiro de Castro, Chairman of |
| the Remuneration Committee of the General and Supervisory Board, who, after welcoming all |
| presents, made a brief summary of the referred proposal |

(...) --- After the presentation, the Chairman of the General Shareholders' Meeting thanked Prof. Alberto João Coraceiro de Castro and declared open the debate relating to Item Six of the agenda. (...) ---------- Concluded the debate, the Chairman of the General Shareholders' Meeting submitted to vote the proposal on Item Six of the agenda, having been issued 2,578,372,932 votes, corresponding to 2,578,372,932 shares, which represent 70.5141% of the share capital. As abstentions are not considered, the referred proposal was approved by majority of the votes cast (with 99.9228% of votes --- Afterwards, the Chairman of the General Shareholders' Meeting read the content of Item Seven of the agenda - "Resolve on the remuneration policy of the other members of the corporate bodies presented by the Remunerations Committee elected by the General Shareholders' Meeting" – and, following the same procedure adopted in the previous proposals, asked the shareholders that were present about the waiver of the reading of the statement, with the following content: -------------"In accordance and for the effects of the contents of article 2, no. 1 of Law no. 28/2009, dated 19th June and of article 11, no. 2, d) of EDP - Energias de Portugal, S.A. By-Laws, it competes to the Company's General Annual Shareholders' Meeting to approve the proposal on the Remuneration Policy of the Members of the Corporate Bodies that is submitted by the respective Remunerations Committee. Thus, at the General Shareholders' Meeting held on 17th April 2012, it was not only approved the proposal of the Remunerations Committee that ended its term of office, but also elected the new Committee, composed by: -----• José Manuel Galvão Teles – Chairman reelected------• José de Mello Energia, S.A., represented by Luís Brito de Goes – Member------• Álvaro Pinto Correia – Member------EDP - Energias de Portugal, S.A. By-Laws establish, on article 8, no. 1, that the Company's Corporate Bodies are: -----a) The General Shareholders' Meeting (GSM) -----b) The General and Supervisory Board (GSB) -----c) The Executive Board of Directors (EBD)----d) The Statutory Auditor (SA) ------On the other hand, the By-Laws of the Company also foresee the existence of other Corporate Bodies, with statutory dignity:----a) The Environment and Sustainability Board (ESB)-----b) The Remuneration Committee, elected by the General Shareholders' Meeting and, within the GSB, a Committee for the Monitoring of Financial Matters which according to the By-Laws, also assumes the designation of Audit Committee-----

| c) The Board of the General Shareholders' Meeting |
|---|
| These are the corporate bodies of EDP - Energias de Portugal, S.A |
| The Remuneration Committee, elected by the General Shareholders' Meeting, is therefore, responsible |
| for the determination of the remuneration of the members of the following corporate bodies: Board of |
| the General Shareholders' Meeting; Chairman and members of the GSB; Statutory Auditor and |
| Environment and Sustainability Board. The Financial Matters Committee or Audit Committee shall be |
| dealt together with the other Committees of the GSB |
| In compliance with of the powers conferred by the GSM, the Remunerations Committee set the |
| remunerations of EDP' Corporate Bodies members for the 2012-2014 term of office (with exception of |
| the EBD), although with an express reservation regarding the fact that the Committee would comply |
| with its duty of following, every year, the activity of the respective corporate bodies |
| In that sense, it shall be disclosed, as it has been done in previous years, the Remuneration Policy of |
| Corporate Bodies Members, which has been unchanged in the last years, complying with the main |
| principles approved in General Shareholders' meetings |
| As a result and with the purpose of providing clear and complete information on the referred |
| remuneration policy and with the aim of obtaining from the General Shareholders Meeting the |
| confirmation of that same policy, the adopted guiding principles and the way found suitable to secure |
| the necessary mitigation of the management risks and the alignment of corporate bodies members |
| interests with the Company's interest are detailed as follows |
| I. Framework |
| EDP's remuneration Policy is framed by the guidelines defined by reference shareholders of the |
| Company, which are issued in accordance with the applicable rules and recommendations and with the |
| best practices in the sector |
| The Corporate Bodies Remuneration Policy is annually reviewed and a statement, which resumes its |
| general guidelines is, with the same periodicity, subject to approval by the General Shareholders under |
| proposal of the Remunerations Committee. On the respective definition it were formulated proposals |
| aiming to assure that remunerations are adequate and reflect the risk profile and the long-term |
| objectives of the Company, being also in conformity with the legal rules, principles and pertinent |
| national and international recommendations |
| II. Guiding Principles |
| This Committee has guided its decisions on the matter of remuneration policy, namely of the General |
| and Supervisory Board members, by the following guiding principles: |
| i) Definition of a policy, which is simple, clear, transparent and aligned with EDP's culture, in order |
| that the remuneration practice may be based on uniform, consistent, fair and balance criteria |

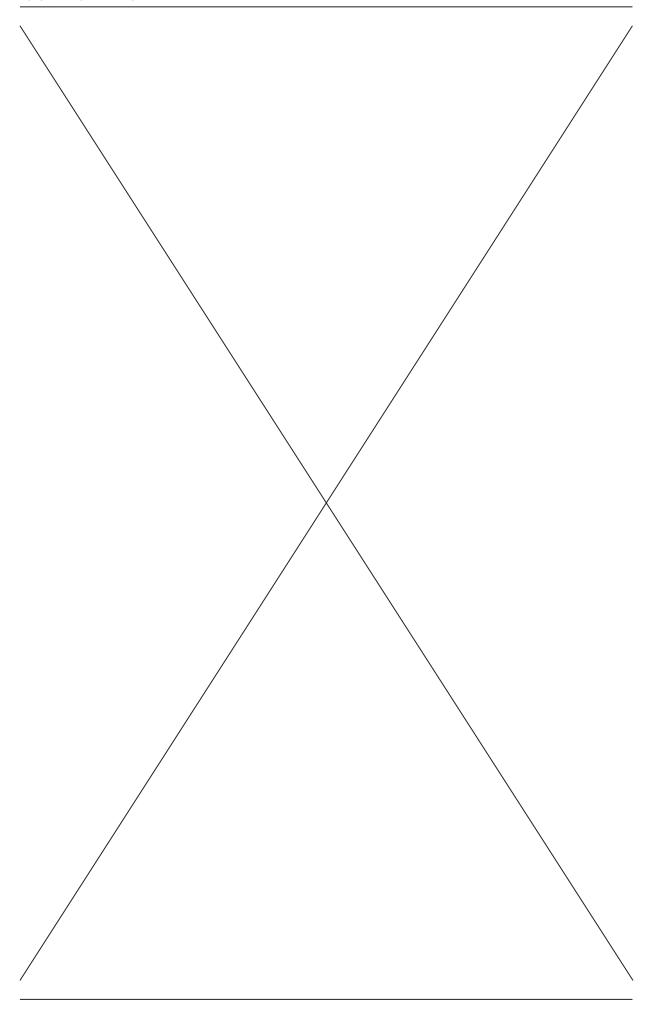

| ii) Definition of a policy, which is consistent with the management and control of risk, efficient to avoid |
|---|
| excessive exposition to risk and to conflicts of interest, seeking coherence with the purposes and long- |
| term values of the Company |
| iii) Assessment and stimulus of a careful performance, in which the merit shall be dully awarded, |
| assuring homogeneity levels compatible with GSB necessary cohesion, considering also the economic |
| and financial situation of the company and of the country |
| iv) Alignment of the remunerations of the several corporate bodies members of the companies with |
| higher stock market capitalization and congeners, namely Iberian |
| v) The more recent recommendations issued by European Union and Portuguese Securities |
| Commission |
| vi) Taking into consideration of the circumstances arising from the serious economic crisis and the |
| current European financial constraint, with the necessary consequences for the Company, with the |
| purpose of complying with the demands of a greater social justice within the scope in general of the |
| country, as well as within the scope of the company's several remuneration regimes |
| The remuneration policy of EDP's corporate bodies shall, in essence, be simple, transparent, |
| moderated, adapted to the conditions of the work performed and to the company's economic |
| situation, but also, competitive and equitable, in order to assure the purpose of value creation for the |
| shareholders and remaining stakeholders |
| III. Structure of remuneration policy |
| Based on these criteria, and considering the challenges that the Company intends to pursue during the |
| current civil year, the Commission defined the following remuneration policy guidance: |
| i) It shall be maintained a differentiation between remunerations attributed to GSB members and the |
| ones assigned to EBD members, and it shall not be attributed to the firsts a variable remuneration |
| component or any other remuneration complement |
| ii) The difficulties that the country is still struggling in consequence of the generalized economic, |
| financial and social crisis installed worldwide and the challenges that the country still has in the exit |
| process of redemption in which Portugal is, imply the maintenance of the remuneration framework in |
| force, but, in any case, it shall always be taken into account the performance merit and the complexity |
| of the functions performed by the members of each body, so that the cohesion, stability and |
| development of the company is not endangered |
| iii) It shall be considered the progressive increase of work and responsibility of the Audit Committee |
| members, assuring a differentiation in relation to other GSB members |
| iv) It is also important to distinguish the performance of other specific functions within GSB, namely |
| the coordination, assigned to the Chairman and Vice-Chairman |
| IV. Remuneration limits |
| |

i) The inexistence of variable components within the remuneration structure of the supervisory body members leads to establishing, as the sole maximum limit on the remuneration policy, the fixed component of remuneration. -----It has been understood, on that subject, according to proportionality and adequacy criteria, that it should be differentiated remuneration limits according to the level of work and responsibility inherent to each supervisory board member. Pursuant to that, it was specially considered the evolvement of some members of the Financial Matters Committee/Audit Committee and other General and Supervisory Board committees. It also has been established additional distinctions, whether the involvement in corporate committees implies, or not, the performance of coordination functions. -----Within this conformity, it was set the following maximum limits of remuneration of the General and Supervisory Board: ------Chairman of the GSB € 490,500.00/ year Vice-Chairman of the GSB € 72,000.00/ year Vice-Chairman of the Financial Matters Committee/Audit Committee € 85,000.00/ year Members of the Financial Matters Committee/Audit Committee € 70,000.00/ year Chairman of other Committees € 57,000.00/ year Members of other Committees € 52,000.00/ year Members of the GSB (without other attributions in this Board) € 47,000.00/ year ii) Regarding the other corporate bodies members, the Committee has considered, also, that the circumstances of the period in which we are living recommended to maintain the level of remuneration adopted in previous years. ------Therefore, in due course, the following values were set to remunerate the members on the corporate positions subsequently described:----a) General Shareholders Meeting Board------Chairman and, simultaneously, Member of the GSB € 57,000.00/year € 2,000.00/year Vice-chairman b) Statutory Auditor-----The Committee accepted and confirmed, regarding the remuneration of the Statutory Auditor, the values contained in the "Agreement for the Rendering of Statutory Audit Services" entered into between EDP and KPMG & Associados, Sociedade de Revisores Oficiais de Contas. -----c) Environment and Sustainability Board------The members of this Board have the right to receive one attendance fee by meeting in the amount of €1,750.00. -----V. Conclusion ------

Current circumstances, in which the companies with national relevance carried out their activity deserve, from our point of view, that it is maintained a particular care in the development of the value chain which, beyond economic aspects, reveal its social sustainability point of view, reason why we ask for the best acceptance, by the General Shareholders Meeting, of the proposal hereby submitted". ------- As the shareholders waived the reading of the above said proposal, the Chairman of the General Shareholders' Meeting granted permission to speak to the Chairman of the mentioned Committee, Mr. José Manuel Archer Galvão Teles, who began by welcoming the shareholders and the members of the corporate bodies that were present, and subsequently made some considerations regarding the policy of remuneration defined by the Committee chaired by him (...)---------- Succeeding, the Chairman of the General Shareholders' Meeting submitted to vote the proposal related Item Seven of the agenda, having been issued 2,588,379,655 votes, corresponding to 2,588,379,655 shares, which represent 70.7877% of the share capital social. As the abstentions are not considered, the referred proposal was approved by majority of the votes cast (99.9874% of votes in favour).-------- Concluded the discussion and resolution on all items of the agenda, Mr. Rui Eduardo Ferreira Rodrigues Pena thanked the fair way all presents cooperate supporting the General Shareholders' Meeting Board in the development works and congratulated the members of the Executive Board of Directors for the activities developed in EDP's benefit in the last exercise, wishing that the same success is achieved in the next year. --------- There being no further business, the meeting was closed at seven hours and thirty minutes, in relation to which the present minutes were drawn up and will be signed by the Chairman of the General Shareholders' Meeting and by the Company Secretary. ------

Lisbon, 16th May 2014

The Company Secretary Maria Teresa Isabel Pereira
