

INVESTORS PRESENTATION

August, 2025

Disclaimer

This document has been prepared by EDP, S.A. (the "Company") solely for use at the presentation to be made on this date and its purpose is merely of informative nature and, as such, it may be amended and supplemented and it should be read as a summary of the matters addressed or contained herein. By attending the meeting where this presentation is made, or by reading the presentation slides, you acknowledge and agree to be bound by the following limitations and restrictions.

This presentation may not be distributed to the press or to any other person in any jurisdiction, and may not be reproduced in any form, in whole or in part for any other purpose without the express and prior consent in writing of the Company.

This presentation and all materials, documents and information used therein or distributed to investors in the context of this presentation do not constitute or form part of and should not be construed as, an offer (public or private) to sell or issue or the solicitation of an offer (public or private) to buy or acquire securities of the Company or any of its affiliates or subsidiaries in any jurisdiction or an inducement to enter into investment activity in any jurisdiction.

Neither this presentation nor any materials, documents and information used therein or distributed to investors in the context of this presentation or any part thereof, nor the fact of its distribution, shall form the basis of, or be relied on in connection with, any contract or commitment or investment decision whatsoever and may not be used in the future in connection with any offer (public or private) in relation to securities issued by the Company.

Any decision to invest in any securities of the Company or any of its affiliates or subsidiaries in any offering (public or private) should be made solely on the basis of the information to be contained in the relevant prospectus, key investor information or final offering memorandum provided to the investors and to be published in due course in relation to any such offering and/or public information on the Company or any of its affiliates or subsidiaries available in the market.

Matters discussed in this presentation may constitute forward-looking statements. Forward-looking statements are statements other than in respect of historical facts. The words "believe," "expect," "anticipate," "intends," "estimate," "will," "may", "continue," "should" and similar expressions usually identify forward-looking statements.

Forward-looking statements include statements regarding: objectives, goals, strategies, outlook and growth prospects; future plans, events or performance and potential for future growth; liquidity, capital resources and capital expenditures; economic outlook and industry trends; energy demand and supply; developments of the Company's markets; the impact of legal and regulatory initiatives; and the strength of the Company's competitors. The forward-looking statements in this presentation are based upon various assumptions, many of which are based, in turn, upon further assumptions, including without limitation, management's examination of historical operating trends, data contained in the Company's records and other data available from third parties. Although the Company believes that these assumptions were reasonable when made, these assumptions are inherently subject to significant known and unknown risks, uncertainties, contingencies and other important factors which are difficult or impossible to predict and are beyond its control. Important factors that may lead to significant differences between the actual results and the statements of expectations about future events or results include the company's business strategy, financial strategy, national and international economic conditions, technology, legal and regulatory conditions, public service industry developments, hydrological conditions, cost of raw materials, financial market conditions, uncertainty of the results of future operations, plans, objectives, expectations and intentions, among others. Such risks, uncertainties, contingencies and other important factors could cause the actual results, performance or achievements of the Company or industry results to differ materially from those results expressed or implied in this presentation by such forward-looking statements.

The information, opinions and forward-looking statements contained in this presentation speak only as at the date of this presentation, and are subject to change without notice unless required by applicable law. The Company and its respective directors, representatives, employees and/or advisors do not intend to, and expressly disclaim any duty, undertaking or obligation to, make or disseminate any supplement, amendment, update or revision to any of the information, opinions or forward-looking statements contained in this presentation to reflect any change in events, conditions or circumstances.

Net Debt

1) Distributed Generation (DG). 2) S&P. 3) Recurring.

EDP EBITDA and Net Profit with significant growth over the past 5 years

Recurring EBITDA

Recurring Net Profit

Strong performance reflecting the **increase in decarbonized generation** through capacity growth, **resilient Networks** and **strong efficiency efforts** at Opex level

Guidance

Improved 2025 guidance

Recurring
EBITDA ~€4.8–4.9 Bn

Recurring
Net Profit ~€1.2–1.3 Bn

Net Debt ~€16 Bn

- ^ Integrated business in Iberia EBITDA guidance upgraded to €1.2 Bn, based on above average hydro generation and demand for flexgen services.
- > Electricity networks: underlying business growth driven by increasing electricity consumption and inflation update on revenues
- > Wind & Solar €1.9 Bn EBITDA including asset rotation gains expected ~€100m for 2H25
- > Assuming ~€2 Bn AR proceeds, ~€1 Bn tax equity proceeds

Strategic update to be provided at the Capital Markets Day on 6th November 2025

Moderating the pace of short-term investment, focusing on maximizing returns and increasing capital allocation to networks

Reduction on investment levels expected in 2025–26 supportive of credit ratios

Gross investments / year
€Bn

- ✓ Capital allocation following a clear investment framework, keeping our selective and disciplined approach
- ✓ Wind & Solar investments focused on low-risk markets: ~85% allocated to Europe and US
- ✓ ~25% investment plan in electricity networks

2026 targets of €4.9–€5.0 EBITDA and €1.2–€1.3bn net profit, supported by higher integrated margin in Iberia and stable networks

1. EDPR only (excluding Solar DG Europe and Brazil).

2. Hydro, Clients & EM includes: In 2025 €0.2 Bn in Brazil and €1.2 in Iberia.

2026 guidance reiterated reflecting the Integrated Utility low risk profile of EDP

vs. May '24
update

- ~3.5 GW wind & solar capacity added in 2025 & 2026
- ~€4.4Bn/year gross investment:
~75% in Renewables, Clients and EM and
~25% in Electricity Networks
- Wind & Solar investments focused on low-risk markets: ~85% allocated to Europe and US
- Maintain BBB rating
- Working everyday towards Net Zero by 2040
- 0.20€ DPS, anticipating 2026 dividend floor to 2025

Improve shareholder remuneration by increasing dividend floor in 2025 and successful conclusion of share buyback program

Attractive dividend policy : €0.20/share, paid on May 6th

Dividend per share €

Share buyback program up to **€100m** concluded on April 8th

9.9x
2025 P/E

6.9%
Dividend Yield

€2.89/share
Ex-dividend

Fully committed with BBB rating: Immaterial impact on FFO/Net Debt (**<0.1%**) to be more than compensated by CAPEX reduction in 2025-26

EPS accretive from year 1 (**EPS +1%**)

Business Strategy

An aerial photograph showing a series of high-voltage electrical transmission towers and power lines stretching across a vast, mountainous landscape. The mountains are covered in dense, vibrant green forest. The power lines curve through the air, supported by the tall, lattice-structured towers. The scene is captured from a high angle, looking down at the terrain. A semi-transparent grey banner is positioned at the bottom of the image, containing the word "Networks".

Networks

EBITDA from electricity networks with a strong and consistent growth over the past 5 years

Recurring EBITDA

€ Bn

(1) Includes transmission investments in Brazil

(2) Includes acquisition of Viesgo (€2.1 Bn), CELG-T (€0.3 Bn) and EDP Brasil's minority interests (~€1 Bn)

Mix By Country 2024

Good prospects for improved regulatory frameworks in Iberia from 2026 onwards

Iberia  

■ Distribution

	Spain	Portugal
Current Regulatory Period	2020-2025	2022-2025
Regulatory Period Length	6 Years	4 Years
New regulatory period	2026-31	2026-30
Concessions ¹	Perpetual	HV/MV - 2044
RoRAB	5.58% fixed	5.53%, variable indexed to Portuguese 10Y bond yield
Benchmark Cost Inflation Update	No	Yes, annually updated to GDP Deflator

(1) 278 municipal concessions with Low Voltage (LV) renewed automatically

Electricity networks Iberia: supportive regulatory framework/return is necessary to foster much needed investment

Public consultation launched in Spain, proposing a 6.46% return and shift of net RAB to TOTEX model

Electricity networks regulatory return

- Return should converge with EU countries to support the additional investment required for the energy transition
- Shift to TOTEX model starting in 2029: phased transition from 2026 to 2028

Next steps

- 4th/7th Aug'25: Deadline for comments on remuneration rate / remuneration model
- 4Q25: Regulator approval on remuneration framework and new investment limits^{1,2}

Returns should increase in Portugal to support assets' modernization and digitalization

Electricity networks regulatory return

- Proposal for +50% increase in HV-MV investments in 2026-30 with favorable opinion by the regulator, subject to new regulatory framework/return
- Proposed plan with limited impact on end-user electricity prices (+0.7%)⁴ in accumulated terms

Next steps

- 15th October: ERSE's proposal for regulated revenues for '26 and regulatory assumptions for 2026-29
- 4Q25: Investment Plan approval by the government and release on final decision on ERSE's proposal on 15th December

(1) 26-28 investment plan submitted to regulators on April 30th (after favorable opinion from Reg. Governments) respecting current investment caps. In parallel, EDP has proposed a plan with a significant increase in 26-28 (beyond current caps), following its response to the Ministry Public Consultation of Jun/24; (2) EDP expected date for approval / further visibility expected in 3Q/4Q'25; (3) Including remuneration rates for electricity distribution in Italy, Northern Ireland, Sweden and Denmark adjusted for the Spanish risk-free rate, tax rate and leverage – source: Nera (4) Source: ERSE; Accumulated nominal 2025-30 increase, according to Regulator opinion (Link: [parecer-à-proposta-de-pdird-e-2024.pdf](#))

Scaling electricity transmission business in Brazil while unlocking value through strategic asset rotation

+12 transmission projects delivered over the last 9 years

EDP's transmission portfolio in Brazil

7 transmission projects of which 3 Under Construction

Under construction
 Operational
 Sold

✓ 6 Lines sold since 2021

✓ \$R 0.7 Bn AR gains

✓ \$R 6.3 Bn proceeds

✓ 3 Lots Under Construction (#2, #7 and #13) awarded in March 2024 auction

✓ R\$ ~2.6 Bn / ~€0.5 Bn investment

✓ 2027-29 COD

✓ Low double digit equity IRRs

Asset base reflecting execution profile

EDP Transmission asset base, \$R Bn

Positive regulatory developments in electricity distribution in Brazil: 30Y concession extension for EDP ES

Concession extension contract signed for EDP Espírito Santo in July-2025

> 30-year concession extension (extended until July 2055)

> No upfront financial burden and contract including quality, efficiency and financial metrics standards: EDP concessions' metrics complying regulator's criteria

> EDP São Paulo concession expected to be extended from 2028 to 2058 under the same terms

Tariff review for EDP Espírito Santo approved on August 5th: new regulatory period 2025-30

New regulatory parameters for EDP ES

> Regulatory period extended from 3 to 5 years

R\$ 3.3 Bn investment in electricity distribution in Brazil in 2025-26

Renewables, Clients and Energy Management

5.8

EBITDA for the integrated segment in Iberia at upper level of guidance for 2025, supported by strong performance in 1H25

EBITDA 2025E integrated business in Iberia

Key drivers

- > Exceptional Q1 with normalization in 2Q–4Q; 3Q seasonally lower hydro volumes
- > Higher sourcing costs in 2H25 following lower weight of hydro in generation mix
- > Costs with ancillary services in supply business
- ✓ Spanish future power baseload forward prices in 2H25 >€70/MWh

EDP has 5.5 GW of hydro installed capacity in Iberia: 1H25 marked by strong hydro resources that contributed to the strengthening of reservoir levels

Hydro resources in Iberia +41% vs. average in 1H25

39

62

Strong rainfall in 1H25 fostered the recovery of hydro reservoir levels

Reservoir levels in Portugal (%)

Hydro reservoirs ~83% in July 2025, +20p.p. vs. early '25 and +20 p.p. vs. historical average

(1) Reservoir levels until 29th July, 2025. Levels as of 30th June: 87%

(2) Net of pumping

Iberia: Continuous increase in flexgen demand and need for increased investment in electricity networks

Increasing weight of ancillary services revenues reflecting the importance of Flexgen

Ancillary services and restrictions component included in final electricity price in Spain, €/MWh¹

- Spain's new capacity mechanism with competitive auctions aligned with EU state aid rules currently under public consultation
- €700m in grants for energy storage projects in Spain, supporting stand-alone, thermal, pumped hydro, and hybrid systems: bids submitted in July '25

In parallel with a reinforced need of continued investments in grids in Iberia

- Increasing electricity demand, fueled by electrification across industry, heating, and mobility and development of data centers and green hydrogen projects
 - +126% E-mobility – related supply points 1H25 vs. 1H23²
 - +3% Electricity distributed 1H25 vs. 1H24²
- Strong renewable energy potential leading to an increased weight of intermittent technologies
 - +18% RES connected to the grid 1H25 vs. 1H23²
- Need for modernization and digitalization of electricity networks infrastructure (e.g. 45% of Portuguese transformers are >40y old)
