

## SHY PLACE SOLAR | 250 megawatts

IN DEVELOPMENT | aiming for construction in 2027

⌚ Jasper County northeast of Monticello

**If permitted, Shy Place Solar would add \$35 million+ – \$1 million annually, with no depreciation – into the Jasper County tax base once operational.**

- ✓ FUNDS FOR COUNTY SERVICES
- ✓ MAJOR ECONOMIC BOOST DURING CONSTRUCTION
- ✓ OPPORTUNITIES FOR LOCAL CONTRACTORS & SUPPLIERS
- ✓ STRONGER, MORE RESILIENT LOCAL GRID

**WITH NO:**

- ✗ POPULATION GROWTH
- ✗ RESIDENTIAL SPRAWL
- ✗ ADDITIONAL STRAIN ON SERVICES
- ✗ TRAFFIC, NOISE, SMELLS

The use of the County funds would be determined by the Jasper County Board of Commissioners to allocate as they see fit to meet community needs, such as road repairs, new equipment for law enforcement, more teachers, school renovations, fire department gear, and other emerging needs.
