

TOP 10 Interest Representation 2025

Organization name	Category	Description	Main action of the Organization	Corporate Position(*)	Description of Position/ Engagement	Main role EDP played at the Organization	Main action developed by EDP throughout 2025	EDP Contribution (€)	Relevant work on Climate positioning (*)	EDP positioning on the same themes	Alignment evaluation
ACP - American Clean Power Association	Sectorial/Industrial Trade associations or tax-exempt groups	National trade association that represents clean energy power project developers, equipment suppliers, services providers, parts manufacturers, utilities, researchers, and others involved in the clean power sector	Advocating for the development of clean energy in North America. Membership services include access to market intelligence, legislative analysis, bill support, and company representation at political events.	Support	ACP led the efforts to retain the IRA fiscal incentives for clean energy (PTC, ITC, etc.), and opposed any weakening of the rules implementing the incentives	EDPR NA has a seat on the board of directors, and actively participates in programming and market intelligence gathering. EDP NA participates in all major ACP committees.	Policy research and analysis, both legislative and regulatory; Industry advocacy before Congress, the White House, regulatory agencies (e.g. FERC, Commerce, Trade Representative, Energy), and the federal court system. Represents all clean energy technology sectors (e.g. solar, wind, storage, hydrogen, transmission)	803 000,00 €	Yes	EDP supports retaining the IRA incentives. Joint letter to the Michigan delegation (Mar/2025); IRS comments on the clean hydrogen tax credit (Feb/2024). Full convergence.	Aligned
AELEC	Sectorial/Industrial Trade associations or tax-exempt groups	AELEC is the Association of Spanish Electricity Utilities, broadly present in the electricity value chain. Its activity is focused on the disclosure, dissemination and promotion of the technical and regulated aspects of electrical activities and works to position itself as a key player that helps to develop an adequate energy transition in Spain	Positioning for an adequate electrification, energy transition and regulatory framework in Spain. Spanish representative in Eurelectric. AELEC focuses its activity on the dissemination, disclosure and promotion of the technical and regulated aspects of electricity activities, particularly in distribution, and works to position itself as a key player to help develop an appropriate energy transition in Spain.	Support	AELEC articulates sector-wide consensus positions that, for the most part, reflect the common interests of its members and incorporate EDP's position; however, if there are internal divergences on certain regulatory issues, these would be handled outside the association's scope.	EDP is a Board member. Leadership position and driver of activities like dissemination, spreading, and promotion of aspects related to energy transition and digital transformation of the electric sector in Spain throughout its value chain.	Plan action involvement/Participation in various discussion groups to defend EDP position in Spain	484 784,00 €	Yes	EDP supports accelerated electrification and a transition aligned with the NECP 2023-2030. No divergences.	Aligned
ABRADEE - Associação Brasileira de Distribuidores de Energia	Sectorial/Industrial Trade associations or tax-exempt groups	The Brazilian Association of Electricity Distributors (Abradee) acts as an important forum for discussing and promoting the development of Brazil's electricity sector, especially regarding energy distribution. In 2005, Abradee created the Abradee Institute with the aim of developing research and studies focused on technological, scientific, and sustainable development of the national electricity sector, with a focus on the energy distribution segment.	The association brings together electric energy distribution companies to encourage best practices, innovation, and regulatory improvements, contributing to the sector's sustainability and progress, always seeking solutions that benefit both companies and consumers.	Support	Abradee has undertaken several actions aimed at mitigating the impacts of climate change on the electricity sector. Among the initiatives, the association has encouraged its members to pursue the following actions: <ul style="list-style-type: none"> Investments in innovation and improvements to grid infrastructure: distributors have systematically invested in innovation, smart metering, and infrastructure upgrades and grid digitalisation to increase network resilience during extreme weather events. Improved quality and efficiency: the distribution segment has advanced in the quality of service delivered to consumers, at increasingly lower costs. International collaboration: Abradee has collaborated with the U.S. Trade and Development Agency (USTDA) to enhance resilience and the ability to anticipate extreme events. Reflection on innovative solutions: the seminar "Extreme weather events: international experience and impacts on electricity grids" fostered a discussion on innovative solutions to the issue. In addition to the actions mentioned, Abradee coordinates R&D projects focused on the energy transition and climate change, as well as sector advocacy on the topic. These actions reflect Abradee's commitment to tackling climate-change challenges and ensuring continuity of electricity supply to consumers. 	EDP holds a seat on the Association's Board of Directors and actively leads several Working Groups on the following topics: Commercial, Tariffs, Purchasing, Modernization, Expansion, Supervision, R&D, Asset Management, as well as the Institutional, Legal, and Regulatory Committees. EDP is also present on the R&D Governance Steering Committee and actively participates in the ABRADEE Award.	For EDP, the association is fundamental in advocating initiatives aligned with the company's objectives, especially regarding concession renewal contracts, market opening, discussion of investment recognition, smart metering, network digitalization, and other relevant topics. In this sense, the association was also responsible for coordinating and facilitating communication between the Executive and Legislative branches, regulatory agencies, the press, and various players in the electricity sector, focusing its actions on defending the Company's interests.	462 659,62 €	Yes	EDP supports grid digitalization and modernization, smart metering, and R&D in the energy transition. No divergences.	Aligned
WEF - World Economic Forum	International Organization	World wide organization for public-private partnerships, involving businesses, academy and Nations. Leaders from political, business, cultural and civil society areas, alongside with artists and outstanding international figures, build a common positioning and exchange ideas on crucial debates for the strength of World Economy themes.	Global organization for public-private partnerships, bringing together leaders from business, academia, politics, civil society and other fields, including arts and culture, to shape global, regional and industry agendas. It provides a platform for dialogue and collaboration on key economic and societal challenges, from economic stability to digital trust and climate resilience.	Support	EDP is part of the Alliance of CEO Climate Leaders, a group that works on corporate decarbonization across the entire value chain, consistent with EDP's Net Zero ambition, with working groups focused on emissions reduction, having had a focus on the challenges of scope 3 emissions. The group published an Open Letter addressed to the governments that are parties to the Paris Agreement before the UNFCCC COPs, urging companies and policymakers to take immediate action to strengthen the transition, ensuring stable long-term policies, reducing investment risk, expanding the use of innovative technologies, phasing out fossil fuels, removing licensing barriers, investing in nature, and building climate-resilient economies and food systems.	EDP is a member of the Electricity Industry Community of the Forum, participating in three Centres: Energy and Materials, AI Excellence, and Cybersecurity. The company is also part of high-level alliances, including the Alliance of CEO Climate Leaders, and regularly participates in major events such as the Annual Meeting in Davos.	Participation includes working groups, initiatives and events, supporting advocacy, technical engagement, and knowledge sharing. Key highlights include participation in Davos (January 2026), with representation at board level, involvement in the Alliance of CEO Climate Leaders and Leaders for European Growth and Competitiveness meetings, and support to the COP30 Open Letter.	347 887,31 €	Yes	CEO in the Alliance of CEO Climate Leaders. Full convergence on decarbonization, fossil fuel phase-out, and electrification. No divergences.	Aligned
WIND EUROPE	Sectorial/Industrial Trade associations or tax-exempt groups	European wind energy association. Based in Brussels, with more than 600 active members in over 50 countries, including companies across the energy value chain. Represents investors, developers, researchers, etc.	Annual event and a leading reference organisation in the sector at European level. Advocates ambitious energy and climate policies (renewable energy targets, decarbonisation objectives), frameworks that enable wind deployment (markets, permitting, grids) and EU supply chains.	Support	Wind Europe is actively advocating for the role of renewables and wind in particular on the EU objectives of decarbonization, security and competitiveness. Long-term price signals in energy markets, consistent carbon pricing and climate ambition for the 2040 timeframe are amongst the main policy asks.	Active member at the top "Market Leaders" level, which allows EDP to be a member of the Executive Committee (Duarte Bello) and the Management Team (Raquel Mendes). 19 EDP executives participate in working groups.	Active participation in technical working groups: Communication; Electrification; Floating; Markets & Regulation; Offshore; Supply Chain; Sustainability; System Integration. Active involvement in the Task Forces: Digitalization & Cybersecurity; Flexibility Markets.	261 165,62 €	Sim	EDP supports the EU 2040 GHG target (joint letter Mar/2024), fossil fuel subsidy phase-out (Oct/2023), and faster permitting and grids. Full convergence.	Aligned

Organization name	Category	Description	Main action of the Organization	Corporate Position(*)	Description of Position/ Engagement	Main role EDP played at the Organization	Main action developed by EDP throughout 2025	EDP Contribution (€)	Relevant work on Climate positioning (*)	EDP positioning on the same themes	Alignment evaluation
SEIA - Solar Energy Industry Association	Sectorial/Industrial Trade associations or tax-exempt groups	National trade organization of a sectoral nature for the representation, promotion, management, and defense of the general and common interests of its members in the solar industry.	Advocating representation of solar energy in the U.S. at the federal and state level with studies, fact sheets, state regulatory filings, legislative analysis, public relations and media, industry advocacy, ISO and PUC engagement	Support	SEIA advocated to retain the IRA fiscal incentives for solar power and battery storage, and opposed any weakening of the rules implementing the incentives	EDPR NA has a seat on the board of directors F5, and actively participates in programming, speaking at events, and market intelligence gathering.	Policy research and analysis, both legislative and regulatory; Industry advocacy before Congress, the White House, regulatory agencies (e.g. FERC, Commerce, Trade Representative, Energy). Represents solar and battery storage technology sectors.	209 000,00 €	yes	EDP supports retaining the IRA tax credits for solar and battery storage. Full convergence.	Aligned
ELECPOR - Associação Portuguesa das Empresas do sector Electrico	Sectorial/Industrial trade association and tax-exempt groups	Business association for the electricity industry to represent, promote and defend the general and common interests of its members. Interlocutor in policy and regulatory development between Portugal and international entities.	Portuguese representative in Eurelectric; participation in the drafting and discussion of policies, guidelines and regulation for the electricity sector.	Support	Over the past year, ELECPOR has taken an active and consistent stance in support of electrification as the central pillar of the energy transition, engaging in the main national and European debates on electricity markets, regulation and investment. The association issued positions on market functioning and price formation, regulatory stability and predictability, taxation and charges on the sector, and the need to strengthen and modernize electricity grids to ensure security, resilience and the integration of new technologies. In parallel, it reinforced its role as an institutional interlocutor with national authorities and as a channel amplifying Portugal's voice in Eurelectric's work, contributing to European positions on competitiveness, decarbonisation and the post-2030 framework.	EDP currently chairs the Board. Through Elecpor, EDP contributes to three strategic axes: (1) energy policy and sector regulation with national and international entities; (2) innovation as a catalyst for transition and efficiency, generating value for economy and society; (3) knowledge development for industry and society and promotion of the sector's image. EDP also participates in Eurelectric working groups and committees.	In 2025, EDP actively participated in ELECPOR, contributing to the governance of the Association and to the definition of positions for the Portuguese electricity sector. Its participation included involvement in working groups and regulatory dialogue initiatives, aiming to prepare contributions for national and European decision-making processes. Through ELECPOR, EDP also followed the work of EURELECTRIC, strengthening the sector's coordination at the European level. This participation contributed to the debate on energy transition, electrification of the economy, and the competitiveness of the electricity sector. Key figures: 8 Working Groups; 6 position papers; 58 internal meetings; 14 participations in public consultations; 10 participations in ERSE Advisory Council Opinions and 50 representatives in Eurelectric committees and Working Groups.	187 500,00 €	Yes	EDP chairs the Board. Full support for electrification, grids, regulatory modernization, and coordination with Eurelectric. Full convergence.	Aligned
ACORE - American Council On renewable Energy	sectorial Association and tax-exempt groups	The American Council on Renewable Energy (ACORE) is a 501(c)(3) national nonprofit organization that brings together finance, policy and technology to accelerate the transition to a renewable energy economy.	Research, analysis, and education on clean energy finance, policy and technology, event and conference planning and management	Support	ACORE advocated for retain tax incentives for all clean technologies, and to streamline new transmission upgrades and build-out, in the OBBBA and its regulatory implementation	EDP is part of the Executive Committee (Sandhya Ganapathy) and has an alternate (Tom Starrs). Participation in working groups at Government Affairs level.	Clean energy research, analysis and education across the renewable energy technology sectors, including battery storage and transmission. EDPR NA is a board-level member.	164 175,00 €	yes	EDP supports retaining the tax incentives under the OBBBA framework and expanding transmission. Full convergence.	Aligned
WBCSD	International Organization	Global CEO-led community of more than 200 leading sustainable businesses working collectively to accelerate system transformations for a net-zero, nature-positive and more equitable future. WBCSD reinforces the business case for sustainability through tools, services, models and member experiences, and through collective positioning.	WBCSD supports deepening sustainability by providing tools, services, models and experiences, and by generating positive collective positioning. It engages strategically with multilateral processes such as COPs, G20 and G7 and partners with the Breakthrough Agenda to support governments and businesses between COPs on clean-technology cost and scale objectives.	Support	With a focus on companies' sustainability efforts, the WBCSD develops working tools as well as joint positions among its members in consultations on relevant standards, such as the public consultations for the revision of the Net Zero Standard V2.0, advocating a rigorous and credibility-oriented position for the SBTi and a "mitigation-first" approach to removals and BVCM.	EDP's CEO is part of the Executive Committee (2023–2024) and then Vice-Chair for 2024–2026. Participation in working groups and shared reports relevant to EDP cases within the Climate Imperative and Energy Pathway areas. Showcasing EDP good practices.	Business Barometer under the Breakthrough Agenda initiative (Nov 2025) to track annual corporate progress toward Net Zero, highlight successes and define what is needed to accelerate investments and scale markets.	160 720,00 €	Yes	CEO on the Executive Committee. Convergence on a rigorous SBTi, mitigation-first, and the integrity of the COP process. No divergences.	Aligned
CGA - Clean Grid Alliance	Sectorial / Industrial Trade associations or tax-exempt groups	Advocates for sustainable, renewable energy in the Midwestern United States	EDPR NA has been leveraging this advocacy group for educating key stakeholders on renewables, grid resiliency, and sustainability in Ohio.	Support	A coalition of renewable energy developers operating in a dozen midwestern U.S. states running from the Gulf of Mexico to Canada, CGA has been key to driving a 210 percent increase in installed wind capacity, ensuring Minnesota replaced planned GW in new natural gas with solar plus storage and getting interconnection costs for solar dramatically reduced region wide.	EDPR is represented at the Board through David Mindham, with further participation from Isaac Meyers in State Affairs.	EDPR NA participates in various CGA roundtables and events in the region, including as speakers and other presenters.	136 812,50 €	yes	EDP supports pro-renewable policies in the U.S. Midwest, RPS, and transmission. Full convergence.	Aligned

OTHER REPRESENTATIONS OF INTEREST THAT DEVELOP RELEVANT WORK ON CLIMATE POSITIONING

Organization name	Category	Description	Main action of the Organization	Corporate Position(*)	Description of Position/ Engagement	Main role EDP played at the Organization	Main action developed by EDP throughout 2025	EDP Contribution (€)	Relevant work on Climate positioning (*)	EDP positioning on the same themes	Alignment evaluation
UN Global Compact	International Organization	UN lead organization of companies to align their strategies and operations with Ten Principles on human rights, labour, environment and anti-corruption; and Take strategic actions to advance broader societal goals, such as the UN Sustainable Development Goals, with an emphasis on collaboration and innovation.	Annual Report (CoP - Communication on Progress); UN Global Compact Caring for Climate initiative co-lead with the UN Environment Programme and the Secretariat of the UN Framework Convention on Climate Change to advance the role of business in addressing climate change	Support	The organization focuses more on empowering companies to overcome obstacles in decarbonization and transition, providing practical tools and training.	EDP was among the first 80 signatories of the Business Ambition for 1.5°C (2019), committing to defining strategies to achieve a net-zero emissions target aligned with the goal of limiting the global average temperature to 1.5°C. EDP is regularly invited to events on corporate decarbonization.	Participation in the Caring for Climate COP30 event. Participation in the Climate Action Platform (Europe region) for discussions on advancing transition plans, emissions reductions, etc.	21 870,00 €	Yes	EDP was among the first 80 signatories of Business Ambition for 1.5°C. Full convergence.	Aligned
We Mean Business Coalition	Sectoral/Industrial trade association and tax-exempt groups	Nonprofit coalition of corporate associations that works with an extensive network of organizations to accelerate the transition to a fair, resilient, net-zero economy.	Advocacy on sustainability topics.	Support	WMBC Business issues joint statements calling on governments to champion international cooperation and commit to the highest level of national climate ambition, with clear roadmaps for implementation. WMBC has also taken a position on the review of EU regulations within the framework of the non-financial report ("simplification, not deregulation"), supporting the integrity of the EU climate acquis and regulatory stability.	EDP collaborates in the Policy Advisory Group.	Contributions to policy papers prepared ahead of global meetings, subscription and participation in the "Fossil to Clean" campaign.	0,00 €	Yes	EDP is on the Policy Advisory Group. Endorsement of the Fossil to Clean (Sep/2023), Stand Up for Sustainable Investing (Feb/2023), and Ambitious NDCs (Sep/2024) campaigns. Full convergence.	Aligned
Global Renewables Alliance	Sectoral/Industrial Trade associations or tax-exempt groups		Aims to accelerate the energy transition, defending the global objective of Triple RES capacity in the world	Support	Positioning conveyed to government representatives for the operationalization of the Global Renewable Energy Target declared at COP28, with political requests related to Financing, Networks, Supply Chain and Licensing, and an appeal to governments to incorporate into their Nationally Determined Contributions (NDCs) a modern energy security framework based on accelerating the deployment of renewable energies and energy efficiency gains, removing barriers to the acquisition of clean energy by companies, expanding and modernizing networks, ensuring diversified supply chains, investing in a future-ready workforce, strengthening resilience to cyber and climate risks, realigning incentives away from fossil fuels and ensuring access to clean energy at affordable prices for underserved regions. The GRA political agenda 'Actions to deliver 3x Renewables by 2030' describes the key actions needed to achieve the global renewable energy target. Actions regarding financing, licensing, supply chains, and networks are urgently needed to deploy 11,000 gigawatts of renewable energy by 2030.	Policy and Advocacy, Government engagement. EDP speaker in several events. Sponsorship of global events, Social media campaigns, Policy and Advocacy, Government engagement.	3xRenewables Campaign - an appeal to world leaders and the Parties to the Paris Agreement to commit to tripling renewable energy capacity to a minimum of 11,000 GW by 2030. GRA Business Statement: Redefining Energy Security with Renewables and Energy Efficiency	50 000,00 €	Yes	EDP supports 3xRenewables and Time4Action. Full convergence.	Aligned
GWEC - Global Wind Energy Council	Sectoral/Industrial trade association and tax-exempt groups	GWEC's mission is to ensure wind power is deployed as one of the world's leading energy sources, generating substantial environmental and economic benefits.	Support and advocacy for the promotion, development and implementation of wind energy.	Support	GWEC operates at the highest international political level to create a more favorable policy framework for wind energy. GWEC members are active worldwide, raising awareness among local and national governments as well as international agencies of the benefits of wind energy, in order to advocate for new policies and help wind energy reach its full potential in as many markets as possible.	EDP is a member of the Executive Committee (Rafael Solis).	Time4Action Campaign - Several joint letters released and supported by EDP: - Participation in two board meetings (June and December). - Participation in the GWEC 20th anniversary event in Lisbon (with APM as a speaker, and EDP sponsoring the venue for the event). - GWEC was involved in the organization of COP30 in Belém (Brazil), in which EDP participated. - Leveraging information published in several reports released by GWEC. - EDP frequently shared insights with GWEC to help the organization gauge the state of the sector.	50 000,00 €	Yes	EDP is on the Executive Committee. Full convergence on global wind advocacy.	Aligned

Organization name	Category	Description	Main action of the Organization	Corporate Position(*)	Description of Position/ Engagement	Main role EDP played at the Organization	Main action developed by EDP throughout 2025	EDP Contribution (€)	Relevant work on Climate positioning (*)	EDP positioning on the same themes	Alignment evaluation
EURELECTRIC	Sectoral/industrial trade association and tax-exempt groups	Represents the common interests of the electricity industry at pan-European level, as well as those of its affiliates and members across several other continents. Active in advocating for market frameworks suitable for investment in clean power generation capacity, and a leader in electrification policies.	Supports positioning of the energy sector with European Institutions across a wide range of topics (generation, distribution, value, public policy, value chains, innovation and retail). Promotes electrification as a source of competitiveness, decarbonization and security, and publishes technical studies and position papers to foster informed dialogue and decisions on EU energy and climate policy.	Support	Eurelectric is the main voice of the Power Sector in Brussels, advocating for increased electrification of energy consumption through clean electricity and power grids. Eurelectric asks for a electrification target in 2030 as well as investments in grids as key enablers of a further electrified economy.	EDP is part of AELEC and ELECPOR, the Spanish and Portuguese representatives in Eurelectric. Participation in several discussion groups to defend the power sector's positions with European bodies, as well as sponsorship of events and specialized studies.	EDP actively participates in the Association's initiatives, both in positioning and in sector advocacy. The main topics under discussion have been electrification, markets, grids, supply-chain and delivery security, with specific studies published through Eurelectric: https://powersummit2025.eurelectric.org/wp-content/uploads/2025/06/Industrial-electrification-competitiveness.pdf	0,00 €	Yes	EDP via AELEC and ELECPOR (chairmanship). Supports a 2030 electrification target, investment in grids, and EU ETS reform. Monitoring the association's positioning on the transitional role of natural gas (weight of RWE/Engie/E.ON in the association).	Aligned
BCSD Portugal - Conselho Empresarial para o Desenvolvimento Sustentável	Sectoral/industrial trade association and tax-exempt groups	Nonprofit association that brings together more than 140 leading companies in Portugal that actively commit to the sustainability transition.	BCSD focuses on working groups fostering collaboration to create innovative solutions, mechanisms and tools for the sustainability transition; open training for professionals; and communication, events and publications to raise awareness and shape the national agenda on sustainability.	Support	The organization focuses more on empowering companies to overcome obstacles in decarbonization and transition, providing practical tools and training.	EDP has been part of the Board since 2021 and participates in several working groups, namely the Carbon Neutrality Working Group.	Participation in board and secretariat meetings, working groups, Principles Charter and 2030 Journey, and events.	10 500,00 €	Yes	EDP has been on the Board since 2021. Full convergence.	Aligned
Solar Power Europe	Sectoral/Industrial Trade associations or tax-exempt groups	Bridging Policy actors and the Solar Value Chain	Ensure that solar energy becomes the main source of energy in Europe by 2030. Advocating for the integration of battery storage systems in electricity markets	Support	Solar Power Europe promotes solar and battery energy storage in EU energy and climate policies. By coupling renewables and storage, SPE advocates for electrification, flexibility and a power sector delivering on utility scale and decentralized solutions.	EDP actively participates in working groups, discussions, studies and analysis.	Advocacy Committee, Buildings and prosumers Workstream, Grids & Flexibility Workstream, Land Use and Permitting Workstream, Manufacturing, Markets & Investments; Grids & Flexibility Workstream; Land Use and Permitting Workstream; Renewable Hydrogen & Electrification; Grids & Flexibility Workstream; Advocacy Committee, Land Use and Permitting Workstream, Markets & Investments; Digitalisation Workstream; SSI Sponsor, Supply Chain Sustainability; Global Markets;	80 000,00 €	Yes	EDP participates in 12 workstreams. Supports battery storage, electrification, and renewable hydrogen. Full convergence.	Aligned
ABEEOLICA - Associação Brasileira de Energia Eólica	Sectoral/Industrial Trade associations or tax-exempt groups	Brazilian Association that congregates and represents the wind energy industry in the country, including companies from the entire production chain. It acts as a channel between government, companies and society. Its goal is to develop the wind energy throughout Brazil, standing for public policy towards growth, and supporting sustainable eolic projects.	Active climate-change awareness, defending the implementation of the wind source in the electric matrix and acting permanently and strategically, with different institutions, to promote the competitiveness and sustainability of the national wind sector. Stating that Wind reduces the dependency on fossil fuel and strengthens the country's independence, Abeeolica defends the Paris Agreement and fights for Brazilian Climate Goals.	Support	ABEEólica has stood out for its climate-related actions, seeking to promote sustainability and social responsibility in the wind sector. The association has collaborated with Banco do Nordeste (BNB) to develop a Guide to Socio-environmental Best Practices, which is essential for sustainability and social responsibility in the wind sector. It also advocates for the creation of a green industrial policy that leverages Brazil's potential to develop a low-carbon production chain, which is essential for sustainable economic growth. ABEEólica is committed to supporting a just energy transition, promoting significant economic and social transformation through renewable energy. It also stands out for its work with certification bodies and the government to foster the issuance of EACs – Energy Attribute Certificates/IRECs, and for advocacy with the Brazilian government on the energy transition agenda, participating in highly relevant forums, with a particular highlight at COP30.	Active Member and Partner Participation in the Executive Board (Pedro Mallmann); engaged through Working Groups (Regulatory, Communication, Environment, Finance, Competitiveness of Production Chain, Patrimonial Safety, Transformation and H2)	In the "Transformation" Working Group, EDP actively participated in the creation of the Wind Sector Best Practices Manual, developed over one year in partnership with 17 companies and a consulting firm. The material is available here: https://abeeolica.org.br/esg/ . In addition, we addressed sectoral demands, such as curtailment, seeking solutions that benefit the sector and the sustainability of projects. In 2025, we remain engaged in a new Abeeólica project to measure the economic and social impact of wind energy in Brazilian municipalities and states.	39 620,38 €	Yes	EDP is on the Board of Directors. Supports the Paris Agreement, Brazilian targets, and a Just Transition. Full convergence.	Aligned

Organization name	Category	Description	Main action of the Organization	Corporate Position(*)	Description of Position/ Engagement	Main role EDP played at the Organization	Main action developed by EDP throughout 2025	EDP Contribution (€)	Relevant work on Climate positioning (*)	EDP positioning on the same themes	Alignment evaluation
APREN - Associação Portuguesa de Energias Renováveis	Sectoral/industrial trade association and tax-exempt groups	Promotion of renewable energies in the electricity sector.	Positioning for an adequate energy transition in Portugal (advocacy for producers' interests, strategy, regulation, etc.). Preparation of studies and publications; annual event "Portugal Renewable Energy Summit"; communication; APREN awards.	Support	Over the past year, APREN has taken an active and technically robust stance in support of accelerating the development of renewable energy in Portugal, focusing on delivering climate targets, security of supply and reducing external energy dependence. The association consistently spoke out on the permitting of renewable projects, the planning and reinforcement of grids, market mechanisms and investment support, as well as the regulatory and fiscal stability needed to attract capital and ensure the competitiveness of clean energy. In parallel, it strengthened its role as an interlocutor with the Government, the regulator and European institutions, contributing to shaping energy and climate policies in the short, medium and post-2030 horizons.	EDP has a seat on the Executive Committee (Hugo Costa). Participates actively in the association's challenges, contributing to public consultations, internal working groups, and providing studies and analyses that benefit the sector and renewables. In 2025 EDP was also represented through its Renewable Generation Assets area.	In 2025, EDP actively participated in APREN, contributing to the definition of positions within the renewable energy sector and monitoring key regulatory and energy policy developments in Portugal. Its involvement included participation in the association's governing bodies and in technical and institutional initiatives. EDP was also a sponsor of APREN's annual conference, the Portugal Renewable Energy Summit 2025, with its Board Member Pedro Vasconcelos acting as a speaker, further strengthening the company's contribution to the strategic debate on energy transition and the electrification of the economy.	63 600,00 €	Yes	EDP is a member of the Executive Committee. Supports fossil fuel phase-out, electrification, and renewables. Full convergence.	Aligned
AEE - Asociación Empresarial Eólica	Sectoral/industrial trade association and tax-exempt groups	AEE is the voice of the wind energy sector in Spain, aiming to promote the growth of this sustainable, strategic and beneficial technology. It represents over 90% of the Spanish wind sector, including developers, turbine and component manufacturers, national and regional associations, consultancies, law firms and financial entities.	Coordinates research in wind energy and provides services to members. Contributes to regulatory framework development, publishes reports and studies, raises public awareness, and organizes high-level events.	Support	AEE articulates sector-wide consensus positions that, for the most part, reflect the common interests of its members and incorporate EDP's position; however, if there are internal divergences on certain regulatory issues, these would be handled outside the association's scope.	EDP chairs the Executive Committee. Active member and partner in initiatives and campaigns such as "Vientos de Futuro".	Sponsorship and participation as speakers at the following events: - Wind journey and Market - Wind Talent - Annual Wind Congress	63 621,00 €	Yes	EDP chairs the Executive Committee. Supports wind development in Spain. Full convergence.	Aligned
MAREC - MidAtlantic Renewable Energy Coalition Action	Sectoral/industrial trade association and tax-exempt groups	Coalition of utility-scale solar, wind and battery storage developers, wind turbine and solar panel manufacturers, and public-interest organizations dedicated to promoting the growth and development of renewables in the Mid-Atlantic region.	Influential advocacy organization whose footprint follows the PJM RTO states, focusing on renewable portfolio standards, long-term contracts, transmission and siting policy.	Support	A coalition of utility-scale solar, wind, and battery storage developers that seeks to impact clean energy policy in nine eastern U.S. states. In 2025 MAREC, among other things, helped achieve Maryland's procurement of 1.6 GW of storage, sought to defend offshore wind projects under attack by the Trump administration, and ensured West Virginia's new energy strategy included a strong role for renewable energy.	EDPR NA is a Board member and has a representative on the Executive Board, serving as treasurer (Isaac Meyer, NA Government Relations). EDP provides input and feedback and votes on Board decisions.	EDP NA focuses efforts on shaping legislation and regulatory proposals with positive impact on the renewable energy industry, safeguarding EDP interests in North America.	38 307,50 €	Yes	EDPR NA is on the ExCom (treasurer). Supports pro-renewable legislation in the Mid-Atlantic, offshore wind, and transmission. Full convergence.	Aligned
(*) EDP conducts an annual assessment of the climate alignment of its main trade associations with the objectives of the Paris Agreement. When misalignment is identified, the procedure provides for: (1) direct engagement with the association's leadership, with a 12-month deadline for correction; (2) publication of a public distancing statement if the misalignment persists; (3) as a last resort, withdrawal from the association. In 2025, no material misalignments were identified among the Top 10 associations.											

EDP Climate Positioning through Lobbying Activities in 2025

EDP supports faster licensing as a critical step to triple renewable capacity by 2030, consistent with the Paris Agreement

here are highlight examples of our policy engagement for 2025

Entity approached	Lobbying Type	Lobbying Entity	EDP area	Themes enforced	Value spent (€)(Column A)	Further Information on Climate Positioning	Climate Articulation	Material Policies as external reference
National Regulatory Authority (Public Consultation)	direct Lobbying	EDP identified collaborator	Portugal	Development and Investment Plan for the National Electricity Transmission Network 2025-2034	0	Advocates that Network planning must anticipate future demand and enable the timely connection of new producers and consumers to support the PNEC 2030 targets	Grid expansion as a prerequisite for RES integration. Aligned with EU 2040 GHG and PNEC 2030.	Electricity Market Design / RED III (grid)
National Regulatory Authority (Public Consultation)	direct Lobbying	EDP identified collaborator	Portugal	Reformulation of the Guide for Measuring, Reading and Making Data Available		Emphasizes the need for precise regulation, especially in areas of metrology, data protection, electric mobility, and self-consumption, to support a modern, efficient, and secure electrical system	Smart metering enables demand flexibility and RES integration.	Smart Metering — habilitador de RED III
National Regulatory Authority (Public Consultation)	direct Lobbying	EDP identified collaborator	Portugal	Ten-Year Indicative Plan for Development and Investment in High-Pressure Gas Infrastructure 2026 to 2035		Advocates for investments in the gas grid that are technically and economically justified, avoiding short-term solutions that could become sunk costs	Note: advocates rigorous technical-economic justification, avoiding fossil lock-in.	Phase-out subsídios fósseis (lock-in)
National Regulatory Authority (Public Consultation)	direct Lobbying	EDP identified collaborator	Portugal	Procedures Manual for Bilateral Electricity Registration and Contracting Activities (MPPPA)		Advocates for a simpler and more harmonised registration process, aligned with EU rules, to reduce administrative burdens and improve opportunities for entering into PPAs	Enables long-term PPAs with RES, supporting financing for new projects.	Electricity Market Design (PPAs)
National Regulatory Authority (Public Consultation)	direct Lobbying	EDP identified collaborator	Portugal	Regulation of the legal framework for electric mobility		Advocates for regulatory and technical measures that enable the integration of renewables, smart and bidirectional charging, flexibility services, and consumer empowerment in electric mobility, supporting a sustainable, efficient, and decarbonized energy system	Directly linked to Net Zero Scope 3. Supports AFIR and RED III.	RED III / CO2 standards veiculos
European Commission (Public Consultation)	direct Lobbying	EDP identified collaborator	European Union	Electrification of energy consumption	0	Removal of barriers to electrification through renewable power; target for electrification of consumption	Central pillar of EDP's transition. Directly aligned with the Paris Agreement.	Electricity Market Design / RED III
European Commission (Public Consultation)	direct Lobbying	EDP identified collaborator	European Union	EU Climate law amendment	0	Support EU 90% GHG emissions reduction target by 2040	EU 2040 GHG (90-95%) — EDP position in joint letter Mar/2024.	EU 2040 GHG reduction target
European Parliament (Public Consultation)	direct Lobbying	EDP identified collaborator	European Union	2040 Energy and Climate Framework	0	Call for an ambitious 2040 energy and climate policy framework, including via RES targets and reinforced governance and control of the EU over National Energy and Climate Plans	Paris Agreement — EDP position of 90-95% reduction by 2040.	EU 2040 GHG reduction target
European Council (Public Consultation)	direct Lobbying	EDP identified collaborator	European Union	EU Energy and Climate policy	0	Support for a stable regulatory framework in energy and climate driving investments in renewables and grids	Structural alignment with the Paris Agreement and EU ETS reform.	EU 2040 GHG / EU ETS reform
Government (Public Consultation)	direct Lobbying	EDP identified collaborator	Portugal	Electric mobility	0	New regime of the electric mobility in Portugal	Directly linked to Net Zero Scope 3 and the electrification strategy.	RED III / CO2 standards veiculos
Government (Public Consultation)	direct Lobbying	EDP identified collaborator	Portugal	"Água que Une"	0	Portuguese National Water Management Strategy	Just Transition in the hydropower perimeter — social pillar of the Paris Agreement.	Just Transition (Acordo de Paris)
Government (Public Consultation)	direct Lobbying	EDP identified collaborator	Portugal	Voluntary Carbon Market	0	First carbon methodology focused on new afforestation	Mitigation-first: a complement to, not a substitute for, direct decarbonization. Aligned with SBTi V2.0.	Phase-out subsídios fósseis (relacionado)
ICNF (Institute for Nature Conservation and Forests) (Public Consultation)	direct Lobbying	EDP identified collaborator	Portugal	National Strategy for Nature Conservation and Biodiversity 2030	0	Proposal for the revision of the National Strategy for Nature Conservation and Biodiversity 2030	Alignment with TNFD and nature-climate integration.	TNFD / nature-climate nexus
Government (Public Consultation)	direct Lobbying	EDP identified collaborator	Portugal	RED III - National Electricity System	0	Transposition to the national legislation of RED III with amendments to the Decree-Law 15/2022	Directly aligned with EU 2040 GHG and 3xRenewables 2030.	Renewable Energy Directive (RED III)
Government (Public Consultation)	direct Lobbying	EDP identified collaborator	Portugal	RED III - National renewables targets	0	Transposition to the national legislation of RED III with impact to transport and industry renewables targets	Directly aligned with EU 2040 GHG and the PNEC 2030 target.	Renewable Energy Directive (RED III)
Government (Public Consultation)	direct Lobbying	EDP identified collaborator	Portugal	Alternative Fuels Infrastructure	0	New national action plan for the development of an infrastructure for alternative fuels	Enables transport electrification and renewable hydrogen.	RED III / CO2 standards veiculos
Government (Public Consultation)	direct Lobbying	EDP identified collaborator	Portugal	Electricity market design	0	Transposition for the national legislation of the Electricity Market Design Directive	Enables a model compatible with 100% RES; supports CfDs/PPAs.	Electricity Market Design reform
Climate Agency (Public Consultation)	direct Lobbying	EDP identified collaborator	Portugal	Climate Change 2030	0	National strategy for adaptation to climate change 2030	Structural alignment with the Paris Agreement and the Portuguese NDC.	EU 2040 GHG / PNEC 2030
Government (Public Consultation)	direct Lobbying	EDP identified collaborator	Portugal	Energy efficiency	0	Transposition for the national legislation of the Energy Efficiency Directive	Alignment with the EED revision and demand moderation.	Energy Efficiency Directive (EED)
MITECO	direct Lobbying	EDP identified collaborator	Spain	Revision of Spain's Environmental Impact Assessment (EIA) legal framework	0	Support for strengthening environmental assessment through technical, proportionate and harmonised criteria enabling effective evaluation of real project impacts. Promotion of more agile and predictable procedures that safeguard environmental protection while facilitating the orderly deployment of key energy transition infrastructure.		
MITECO	direct Lobbying	EDP identified collaborator	Spain	Development of the Just Transition Strategy for the 2026–2030 period	0	Reinforcement of a just transition aligned with climate objectives, focusing on sustainable energy and industrial projects that create stable employment and long term economic value in decarbonisation affected territories. Support for public private cooperation frameworks that ensure regulatory certainty and maximise positive social and environmental outcomes.		
MINTUR	direct Lobbying	EDP identified collaborator	Spain	Revision of Spain's regulatory framework for indirect CO ₂ cost compensation during the 2021–2030 period	0	Support for indirect CO ₂ cost compensation mechanisms consistent with the European framework to preserve the competitiveness of low carbon, electricity intensive industry. Emphasis on measures that enable investment, prevent industrial carbon leakage and reinforce climate objectives without regulatory distortions.		
U.S. Congressional offices	indirect Lobbying	SC Partners	North America	Tax credit and federal permitting advocacy	131 340,00 €	Advocated for preservation of federal tax credits; advocated for federal permitting reform	Defense of the IRA — aligned with EDP's public position (Michigan letter Mar/2025).	Inflation Reduction Act (IRA) / OBBBA
Federal Dept of Interior; and State Governors' offices	indirect Lobbying	Flywheel Government Solutions	North America	Federal & State Project Permitting	84 276,50 €	Advocated for reversal of federal executive orders restricting approvals for clean energy projects	Permitting acceleration as a prerequisite for 3xRenewables in the U.S.	Net-Zero Industry Act (NZIA) / IRA implementation

Entity approached	Lobbying Type	Lobbying Entity	EDP area	Themes enforced	Value spent (€)(Column A)	Further Information on Climate Positioning	Climate Articulation	Material Policies as external reference
California governor, agencies and Legislature	indirect Lobbying	Seaside Advocacy [formerly California Advisors]	North America	Expedited clean energy permitting	98 505,00 €	Obtained Governor's Executive Order directing state agencies to expedite renewable project permitting	Permitting acceleration for clean tech. Aligned with Net Zero.	Net-Zero Industry Act (NZIA) / IRA implementation
Kansas Legislature	indirect Lobbying	Bruno and Associates	North America	Consistency and certainty for clean power	48 201,78 €	Established uniform statewide standards for renewable project decommissioning	Regulatory stability for investment in RES — a pillar of the IRA.	Inflation Reduction Act (IRA) / OBBBA
New York Legislature and state agencies	indirect Lobbying	Brown and Weintraub	North America	Consistency and certainty for clean power	52 536,00 €	Standardized taxation methodology to provide consistency and certainty when development clean energy projects	Regulatory stability for investment in RES — a pillar of the IRA.	Inflation Reduction Act (IRA) / OBBBA
Pinal County commission, Coolidge city council	indirect Lobbying	TriAdvocates	North America	Timely permitting	105 072,00 €	Successfully obtained final permits for Flatlands/Brittelbush solar and storage project	Permitting acceleration for RES projects.	Net-Zero Industry Act (NZIA) / IRA implementation
Illinois Legislature	indirect Lobbying	Leinenweber Baroni	North America	Expanding repower opportunities	131 340,00 €	As part of permitting reform, put sound waivers in place to make wind repowering possible	Repowering increases RES capacity without expanding footprint — climate efficiency.	Inflation Reduction Act (IRA)
Oklahoma governor and Legislature	indirect Lobbying	Huddleston Investments [renamed OMNIA Governmental Services in 2026]	North America	Opposing anti-renewable measures	65 670,00 €	Partially ameliorated new restrictions and setback requirements for wind projects	Active defense of a pro-RES regulatory framework against legislative setbacks.	Inflation Reduction Act (IRA) / state RPS
Wisconsin Legislature	indirect Lobbying	Hoven Consulting	North America	Opposing anti-renewable measures	42 147,01 €	Killed bill that would have made it impossible to build projects on farm land	Active defense of a pro-RES regulatory framework against legislative setbacks.	Inflation Reduction Act (IRA) / state RPS
Ohio Legislature	indirect Lobbying	Dickinson Wright	North America	Expanding repower opportunities	33 929,50 €	Partial success in "grandfathering in" repowering standards for wind projects	Repowering increases RES capacity without expanding footprint — climate efficiency.	Inflation Reduction Act (IRA)
Texas Legislature	indirect Lobbying	Cross Oak Group	North America	Opposing anti-renewable measures	106 166,50 €	Defeated legislation that would have required natural gas backup for every renewable project	Active defense of a pro-RES regulatory framework against legislative setbacks.	Inflation Reduction Act (IRA) / state RPS
Indiana Legislature	indirect Lobbying	Dentons Bingham Greenebaum	North America	Consistency and certainty for clean power	65 670,00 €	Ensured legislation would not unduly restrict non-US companies from developing renewable projects	Regulatory stability for investment in RES — a pillar of the IRA.	Inflation Reduction Act (IRA) / OBBBA
Commonwealth Government / Treasurer (Finance Minister)	direct Lobbying	EDP identified collaborator	Australia	Supporting the foreign resident capital gains tax regime update	0	Strengthening the foreign resident capital gains tax (CGT) regime and reflecting the perspective of a foreign shareholder investing into Australian renewable energy infrastructure	Tax stability for foreign investment in RES projects (Australia).	Australian Capacity Investment Scheme
