

Lost Lakes Wind

Dickinson County, Iowa

⚡ Installed capacity: **101 MW**

🏠 Commercial operation: **2009**

🏠 Homes powered: **29,000 Iowa homes.**¹

Lost Lakes Wind is located approximately three miles west of the town of Milford in northwest Iowa on agricultural and pasture land in Dickinson County. The land is mainly used to grow corn and soybeans, and the Little Sioux River runs along the east side of the project area. Lost Lakes Wind includes farmland in the Lakeville, Okoboji, Excelsior, and West Port townships.

Energy security

Power generated at this site **will strengthen Iowa's electric grid while contributing to broader U.S. energy security** by diversifying domestic power supply.

Wind energy and land use

Wind turbines have a minimal land footprint, leaving approximately **98% of leased land available** for continued farming, wildlife habitat, ranching, or recreation.²

Wind energy supports American manufacturing

The U.S. wind industry supports a robust domestic supply chain, with **more than 450 factories and over 130,000 American jobs** nationwide.³

Lost Lakes' environmental impact

This project will conserve **over 179.6 million gallons** of water annually and reduce air pollution linked to smog and acid rain.⁴

How wind energy works

EDPR NA uses wind turbines to harness the natural resource of wind to generate mechanical energy. This energy is transformed into electricity via a generator and is sent to the electrical grid after being converted to the proper voltage.

As one of **the most cost-effective energy sources available** today, wind energy already provides at least **25% of electricity generation** in eight U.S. states.^{6,7}

Local experience with EDPR NA

“I think that EDPR fits well in our town. They’re so gracious to come on board with our community, work with us, and help us to keep that small town, big heart alive.”

Lindsey F., Business Owner, Iowa

About us

EDP Renewables North America LLC (EDPR NA), its affiliates, and its subsidiaries develop, construct, own, and operate wind farms and solar parks throughout North America. Headquartered in Houston, Texas, with 61 wind farms, 29 solar parks, four energy storage sites, and eight regional offices across North America, EDPR NA has developed more than 12,900 megawatts (MW) and operates more than 12,300 MW of onshore utility-scale renewable energy projects. With more than 1,000 employees, EDPR NA’s highly qualified team has a proven capacity to execute projects across the continent.
