

Headwaters Wind

Randolph County, Indiana

- ⚡ Installed capacity: **398 MW**
- 🏠 Commercial operation: **2014**
- 🏠 Homes powered: **107,000 Indiana homes.**¹

Headwaters Wind is comprised of two phases and is located 70 miles east of Indianapolis along the Ohio border. Located entirely in Randolph County, the site complements the area's sprawling corn and soybean fields, providing local farmers with a stable, weather resistant cash crop in the form of landowner lease payments.

Energy security

Power generated at this site **will strengthen Indiana's electric grid while contributing to broader U.S. energy security** by diversifying domestic power supply.

Wind energy and land use

Wind turbines have a minimal land footprint, leaving approximately **98% of leased land available** for continued farming, wildlife habitat, ranching, or recreation.²

Wind energy supports American manufacturing

The U.S. wind industry supports a robust domestic supply chain, with **more than 450 factories and over 130,000 American jobs** nationwide.³

Headwaters' environmental impact

This project will conserve **over 707.7 million gallons** of water annually and reduce air pollution linked to smog and acid rain.⁴

How wind energy works

EDPR NA uses wind turbines to harness the natural resource of wind to generate mechanical energy. This energy is transformed into electricity via a generator and is sent to the electrical grid after being converted to the proper voltage.

As one of the **most cost-effective energy sources available** today, wind energy already provides at least **25% of electricity generation** in eight U.S. states.^{6,7}

Local experience with EDPR NA

“ I think that EDPR fits well in our town. They're so gracious to come on board with our community, work with us, and help us to keep that small town, big heart alive.”

Pam H., Resident, Chalmers, Indiana

About us

EDP Renewables North America LLC (EDPR NA), its affiliates, and its subsidiaries develop, construct, own, and operate wind farms and solar parks throughout North America. Headquartered in Houston, Texas, with 61 wind farms, 29 solar parks, four energy storage sites, and eight regional offices across North America, EDPR NA has developed more than 12,900 megawatts (MW) and operates more than 12,300 MW of onshore utility-scale renewable energy projects. With more than 1,000 employees, EDPR NA's highly qualified team has a proven capacity to execute projects across the continent.
