

Jericho Rise Wind

Franklin County, New York

- ⚡ Installed capacity: **78 MW**
- 🏠 Commercial operation: **2016**
- 🏠 Homes powered: **33,600 New York homes.**¹

Jericho Rise Wind is situated between the towns of Chateaugay and Belmont, near the edges of the Chateaugay River. Located entirely within Franklin County about 10 miles south of the Canada border, the site complements the surrounding farmland and woodlands.

Energy security

Power generated at this site **will strengthen New York's electric grid while contributing to broader U.S. energy security** by diversifying domestic power supply.

Wind energy and land use

Wind turbines have a minimal land footprint, leaving approximately **98% of leased land available** for continued farming, wildlife habitat, ranching, or recreation.²

Wind energy supports American manufacturing

The U.S. wind industry supports a robust domestic supply chain, with **more than 450 factories and over 130,000 American jobs** nationwide.³

Jericho Rise's environmental impact

This project will conserve **over 138.7 million gallons** of water annually and reduce air pollution linked to smog and acid rain.⁴

How wind energy works

EDPR NA uses wind turbines to harness the natural resource of wind to generate mechanical energy. This energy is transformed into electricity via a generator and is sent to the electrical grid after being converted to the proper voltage.

As one of **the most cost-effective energy sources available** today, wind energy already provides at least **25% of electricity generation** in eight U.S. states.^{6,7}

Local experience with EDPR NA

“We are always going to have wind, and it’s one way we can utilize the wind to not only help our community and our country, but the world.”

Judy W., Landowner, New York

About us

EDP Renewables North America LLC (EDPR NA), its affiliates, and its subsidiaries develop, construct, own, and operate wind farms and solar parks throughout North America. Headquartered in Houston, Texas, with 61 wind farms, 29 solar parks, four energy storage sites, and eight regional offices across North America, EDPR NA has developed more than 12,900 megawatts (MW) and operates more than 12,300 MW of onshore utility-scale renewable energy projects. With more than 1,000 employees, EDPR NA’s highly qualified team has a proven capacity to execute projects across the continent.
