

Pleasantville Solar

Fulton County, Illinois

⚡ Installed capacity: **150 MW**

🏠 Online since: **2025**

🏠 Homes powered: **38,000 Illinois homes¹**

Pleasantville Solar will be a solar power generation facility that will provide affordable, reliable energy to the power grid through the Midcontinent Independent System Operator (MISO) utility system. The site will be located in Fulton County, Illinois and will complement the area's agricultural land use.

Energy security

Power generated at this site will **strengthen Illinois' electric grid while contributing to broader U.S. energy security** by diversifying domestic power supply.

Solar as a neighbor

Solar projects are designed to **capture light silently and without producing glare**. The vegetation maintained beneath the panels helps mitigate heat.²

Solar panel technology

EDPR NA's solar panels consist of a thin layer of photovoltaic cells sealed on both sides, containing no liquids and **posing no risk to the environment or human health**.

Pleasantville's environmental impact

This project will conserve over **190 million gallons** of water annually and reduce air pollution linked to smog and acid rain.³

How solar energy works

EDPR NA uses photovoltaic (PV) solar cells, which convert sunlight directly into electricity. The resulting direct-current electricity is then collected, converted to alternating current, adjusted to the proper voltage, and delivered to the electrical grid.

Solar has become one of the most **affordable forms of energy**, with costs falling 71% over the past decade.^{5,6}

Local experience with EDPR NA

“EDPR is a very trustworthy company. Over the 10 years our project has been operating, everything they’ve said has been true.”

Tim E., Business Owner and Tenant Farmer, Illinois

¹ Power generation calculated using a 25% capacity factor. Household consumption based on the 2023 EIA Household Data monthly average consumption by state.

² American Clean Power Association, Solar as a neighbor, 2021.

³ Assumes 0.58 gallons of water consumed per kWh of conventional electricity from Lee, Han, & Elgowainy, 2016.

⁴ Based on EDP Renewables North America's operational solar sites through 2025.

⁵ Lazard's Levelized Cost of Energy 2024 (version 17.0)

⁶ Based on American Clean Power Associations Annual Market Report, 2023.

About us

EDP Renewables North America LLC (EDPR NA), its affiliates, and its subsidiaries develop, construct, own, and operate wind farms and solar parks throughout North America. Headquartered in Houston, Texas, with 61 wind farms, 29 solar parks, and eight regional offices across North America, EDPR NA has developed more than 12,900 megawatts (MW) and operates more than 12,300 MW of onshore utility-scale renewable energy projects. With more than 1,000 employees, EDPR NA's highly qualified team has a proven capacity to execute projects across the continent.
